VISION, MISSION, AND VALUES

Vision

Leading the improvement of health by advancing oral health.

Mission

- Prepare oral healthcare providers for scientifically based practice
- Define new standards for education
- Provide patient-centered care
- Discover and disseminate knowledge
- Actualize individual potential
- Develop and promote policies addressing the needs of society

Core Values

These core values characterize the School of Dentistry and define its distinctive identity:

- Humanism: dignity, integrity, and responsibility
- Innovation: willingness to take calculated risks
- Leadership: modeling, inspiring, and mobilizing
- Reflection: using facts and outcomes for continuous improvement
- Stewardship: responsible use and management of resources
- Collaboration: partnering for the common good
- Philanthropy: investing time, talent and assets

Clinic Mission Statement

The mission of the school's clinics is to provide patient-centered, evidence-based, quality oral healthcare in a humanistic educational environment.

The goal of the clinic mission statement is to focus faculty, staff, and students on the delivery of excellent patient care. In all clinical interactions we will strive to provide excellent care to our patients and excellent educational experiences for our students. At those times when we must make a choice between patient care and teaching effectiveness, patient care will take precedence.

There are four parts to the mission statement. *Patient-centered care* means being prompt, efficient, responsible, engaging, focused, and adaptable, among other things. The private practice model is the patient care model to which we aspire. *Evidence-based decision making* involves the use of scientific evidence to help make treatment decisions. It is used in conjunction with individual patient values to determine the best course of action for each patient. *Quality oral healthcare* involves providing treatment to our patients that meets community standards of care in all disciplines. It means providing that care to patients of varying needs and expectations. *Humanistic education* is based on honest communication of clear expectations along with positive support for diligent effort.

Faculty and staff must be models of the profession's highest standards. Students are expected to set equally high standards for their behavior. The educational environment will be intellectually stimulating, progressive in scope, outcomes-focused, and competency-based.

RESERVATION OF POWERS

The School of Dentistry reserves the right to modify or change the curriculum, admission standards, course content, degree requirements, regulations, policies, procedures, tuition, and fees at any time without prior notice and effective immediately. Such changes or modifications will be posted in the online catalog, the source of the most current catalog information. Students who join a subsequent cohort for any reason are governed by the policies, requirements, and curriculum of the catalog in effect at the time of re-entry.

The information in this catalog is not to be regarded as creating an express or implied agreement between the student (or applicant) and the school, nor does its content limit the academic and administrative discretion of the school's administration.

HISTORY AND EDUCATIONAL GOALS

One of the world's most distinctive metropolitan centers, San Francisco has been the home of the School of Dentistry since its incorporation in 1896 as the College of Physicians and Surgeons. The school has been recognized since its inception as a major resource for dental education in the Western states.

- In 1962 the College of Physicians and Surgeons joined the University of the Pacific.
- In 1967 an eight-story building was completed for the teaching of clinical dentistry and for conducting dental research.
- In 1996 the school opened a state-of-the-art preclinical simulation laboratory combining the latest in educational technology with a simulated patient experience.
- In 2002 three new state-of-the-art classrooms were completed.
- In 2003 a new Health Science Center was opened on the Stockton campus combining facilities for dentistry, dental hygiene, physical therapy, and speech pathology.
- In 2004 the university named the dental school in honor of its long-standing dean, Dr. Arthur A. Dugoni.
- In 2011 the school was awarded the prestigious Gies Award for Vision by the American Dental Education Association.
- In 2014 the dental school moved to a completely renovated and updated facility in downtown San Francisco, setting the pace for new and better methods of educating students and providing care to patients.
- In 2015 the dental school became the first school in California and in the United States to have students be licensured through a portfolio exam process.

The Alumni Association provided a twelve operatory dental clinic which has served as the school's major extended campus in southern Alameda County since 1973. The clinic was completely remodeled in 2002 and currently serves as the clinic site for the school's Advanced Education in General Dentistry residency program.

ACCREDITATION

The University of the Pacific is fully accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges (WASC). The dental educational programs are fully accredited by the Commission on Dental Accreditation (CODA). The School of Dentistry is a member of the American Dental Education Association (ADEA).

CODA will review complaints that relate to a program's compliance with the accreditation standards. The Commission is interested in the sustained quality and continued improvement of dental and dental-related education programs but does not intervene on behalf of individuals or act as a court of appeal for treatment received by patients or individuals in matters of admission, appointment, promotion or dismissal of faculty, staff or students.

A copy of accreditation standards and/or the Commission's policy and procedure for submission of complaints may be obtained by contacting the Commission at 211 East Chicago Avenue, Chicago, IL 60611-2678 or by calling 1-800-621-8099, extension 4653.

CURRICULUM

Units of Credit

One unit of credit is awarded for ten hours of lecture or seminar, twenty hours of laboratory or clinic, or thirty hours of independent study per term. In the predoctoral programs (DDS and IDS), students are assigned to comprehensive care clinics for approximately 500 hours during the second year and 1,000 hours during the third, in addition to specialty clinic rotations. Units of credit are assigned in the comprehensive care clinical disciplines in proportion to the amount of time students spend providing specific types of care for assigned patterns.

Full-time enrollment in the predoctoral programs at the School of Dentistry (DDS and IDS) is defined as 16 or more units per term. Full-time enrollment in the graduate residency programs in orthodontics and endodontics is defined as 20 or more units per term. For the graduate certificate programs in Advanced Education in General Dentistry and Oral and Maxillofacial Surgery, full-time enrollment is defined as 16 or more units per term.

Doctor of Dental Surgery (DDS)

Biomedical, preclinical, and clinical science subjects are integrated and combined with applied behavioral sciences in a program to prepare graduates to provide excellent quality dental care to the public and to enter a changing world that will require them to be critical thinkers and lifelong learners. The 36-month curriculum leading to the degree of Doctor of Dental Surgery begins in July and is divided into twelve quarters, each consisting of ten weeks of instruction, one week of examinations, and a vacation period of varying length (between one and four weeks).

Integrated biomedical science instruction in human anatomy, biochemistry, physiology, pharmacology, and microbiology is offered over the first eight quarters, followed by multidisciplinary presentations of basic science foundations for clinical topics such as the importance of saliva, tissue aging, nutrition, and infection control. Throughout the curriculum, students learn to apply basic science knowledge to clinical problems using the scientific method of inquiry. Integrated preclinical instruction in operative dentistry, fixed prosthodontics, and dental anatomy is concentrated in the first four quarters with students learning to work from a seated position in a modern preclinical simulation laboratory and with a chair-side assistant in conjunction with pediatric dental practice. Preclinical instruction in removable prosthodontics, occlusion, and implants is offered in quarters 5-7. Clinical work with patients is initiated in the fourth quarter.

The school is a pioneer in competency-based education, an approach that replaces the traditional system of clinical requirements with experiences that ensure graduates possess the knowledge, skills, and values needed to begin the independent practice of general dentistry. Pacific is also known for its humanistic approach to dental education, stressing the dignity of each individual and his or her value as a person.

The Clinical Practice Strand of the Helix curriculum supports comprehensive patient care which is based on the concept of private dental practice where the student assumes responsibility for assigned patients' overall treatment, consultation, and referral for specialty care. In this strand, second-year students practice clinical dentistry approximately 15 hours per week and third year students practice approximately 33 hours per week. They learn to provide comprehensive dental care under the direction of a team of clinical faculty led by the Group Practice Leader (GPL).

The GPL teams with group practice mentors (GPMs) to supervise the following disciplines in each group practice: oral diagnosis and treatment planning, emergency dental care, uncomplicated periodontics, uncomplicated endodontics, operative dentistry, fixed prosthodontics, removable prosthodontics, uncomplicated extractions, and uncomplicated implant cases. In addition, test cases in most of these disciplines are supervised by at least two members of the faculty team. There are three GPMs in each group practice during a clinic session and students may work with all three mentors during the course of an appointment. The group practice model maintains a student to faculty ratio of approximately 5:1. The GPM/GPL monitors the progress of care and completes periodic case reviews with the patient and the student.

Each student provides care to all patients in his or her patient population. Occasionally, other caregivers, a second- or third-year student, resident, or faculty member, complete certain procedures in any given treatment plan. The GPL coordinates this process which also requires approval of the patient. The student dentist originally assigned to provide care to the patient maintains responsibility for care during all treatment provided by other practitioners.

The second- and third-year class is divided alphabetically into eight group practices. There are about twenty second-year and twenty third-year students in each group practice, which is managed by the GPL, who has overall responsibility for the care of patients by all students and faculty in the group practice. Other clinical disciplines are managed by faculty who do not have specific responsibility for a certain group of students. Specialists in endodontics manage more complex cases in a specified area of the clinic, including test cases. Periodontists manage most periodontal procedures. The Complex Care Clinic allows students to treat more technically difficult restorative cases under the supervision of trained faculty members with a low student-to-faculty ratio.

There are four discipline exceptions to the comprehensive care model: oral and maxillofacial surgery, pediatric dentistry, oral medicine/facial pain, and radiology. Students are assigned to rotations for two to three weeks in each of these disciplines, except for the oral medicine/facial pain rotations which are one day each. In orthodontics, students participate with faculty and orthodontic residents in adjunctive orthodontic care and in oral development clinics. Third-year students also rotate through the Special Care Clinic where they treat perinatal patients, dental-phobic patients, and patients with developmental disabilities. In addition, each student provides care in the hospital operating room on patients with specific health issues, including liver transplant patients.

Advanced clinical dentistry and evaluation of new developments and topics that involve several disciplines are learned in the third year in conjunction with patient care. Second- and third- year students participate in patient care at extramural sites located in numerous treatment facilities around the Bay Area, including acute care hospitals, community clinics, and skilled nursing facilities. At extramural clinic sites, students are taught by

Pacific faculty in conditions that more closely resemble private practice, and typically treat 4-6 patients per day. Rotations occur at a number of different times, including weekdays during the academic year, weekends, and vacation periods. Students typically find these experiences to be highly educational, teaching them how to provide excellent patient care in a condensed time frame. Students may elect to participate in externships to specialty programs during academic break periods, most often the four-week summer break.

Behavioral science aspects of ethics, communication, human resource and practice management, and dental jurisprudence are integrated across the curriculum. Epidemiology and demography of the older population, basic processes of aging, and dental management of hospitalized patients, geriatric patients, and those with the most common disabling conditions are studied during the third year.

Students are counseled individually with regard to establishing a practice and applying for postgraduate education. A weekend conference in the senior year acquaints students with opportunities for postgraduate education and with alumni views of the realities of dental practice.

International Dental Studies Program (IDS)

Biomedical, preclinical, and clinical science subjects are integrated and combined with applied behavioral sciences in a program to prepare graduates to provide excellent quality dental care to the public and to enter a changing world that will require them to be critical thinkers and lifelong learners. The 24-month curriculum leading to the degree of Doctor of Dental Surgery begins in July and is divided into eight quarters, each consisting of ten weeks of instruction, one week of examinations, and a vacation period of varying length (between one and four weeks). Students in the IDS program are held to the same competency standards as their peers in the DDS program.

Integrated preclinical instruction is concentrated in the first three quarters with students learning to work from a seated position in a modern preclinical simulation laboratory and with a chair-side assistant in conjunction with pediatric dental practice. Clinical work with patients is initiated in the third quarter.

The school is a pioneer in competency-based education, an approach that replaces the traditional system of clinical requirements with experiences that ensure graduates possess the skills, understanding, and professional values needed for the independent practice of general dentistry. Pacific is also known for its humanistic approach to dental education, stressing the dignity of each individual and his or her value as a person.

The Clinical Practice Strand of the Helix curriculum supports comprehensive patient care which is based on the concept of private dental practice where the student assumes responsibility for assigned patients' overall treatment, consultation, and referral for specialty care. In this strand, first-year students practice clinical dentistry approximately fifteen hours per week and second-year students practice approximately thirty-three hours per week. Like their DDS peers, IDS students learn to provide comprehensive dental care under the direction of a team of clinical faculty led by the Group Practice Leader (GPL).

The GPL teams with group practice mentors (GPMs) to supervise the following disciplines in each group practice: oral diagnosis and treatment planning, emergency dental care, uncomplicated periodontics, uncomplicated endodontics, operative dentistry, fixed prosthodontics, removable prosthodontics, uncomplicated extractions, and uncomplicated implant cases. In addition, test cases in most of these disciplines are supervised by at least two members of the faculty team. There are three GPMs in each group practice during a clinic session and students may work with all three mentors during the course of an appointment. The group practice model maintains a student to faculty ratio of approximately 5:1. The GPM/GPL monitors the progress of care and completes periodic case reviews with the patient and the student.

Each student provides care to all patients in his or her patient population. Occasionally, other caregivers, a second- or third-year student, resident, or faculty member, complete certain procedures in any given treatment plan. The GPL coordinates this process which also requires approval of the patient. The student dentist originally assigned to provide care to the patient maintains responsibility for care during all treatment provided by other practitioners.

The first- and second-year IDS class is divided alphabetically into eight group practices. There are about 45 students in each group practice, including IDS students. Each group practice is managed by the GPL, who has overall responsibility for the care of patients by all students and faculty in the group practice. Other clinical disciplines are managed by faculty who do not have specific responsibility for a certain group of students. Specialists in endodontics manage more complex cases in a specified area of the clinic, including test cases. Periodontists manage most periodontal procedures. The Complex Care Clinic allows students to treat more technically difficult restorative cases under the supervision of trained faculty members with a low student-to-faculty ratio.

There are four discipline exceptions to the comprehensive care model: oral and maxillofacial surgery, pediatric dentistry, oral medicine/facial pain, and radiology. Students are assigned to rotations for two to three weeks in each of these disciplines, except for the oral medicine/facial pain rotations which are one day each. In orthodontics, students participate with faculty and orthodontic residents in adjunctive orthodontic care and in oral development clinics. Second-year students also rotate through the Special Care Clinic where they treat perinatal patients, dental-phobic patients, and patients with developmental disabilities. In addition, each student provides care in the hospital operating room on patients with specific health issues, including liver transplant patients.

Advanced clinical dentistry and evaluation of new developments and topics that involve several disciplines are learned in the second year in conjunction with patient care. Second-year IDS students participate in patient care at extramural sites in numerous treatment facilities around the Bay Area, including acute care hospitals, community clinics, and skilled nursing facilities. At extramural clinic sites, students are taught by Pacific faculty in conditions that more closely resemble private practice and typically treat 4-6 patients per day. Rotations at these sites occur at a number of different times, including weekdays during the academic year, weekends, and vacation periods. Students typically find these experiences to be highly

educational, teaching them how to provide excellent patient care in a more condensed time frame. IDS students can elect to participate in externships to specialty programs during academic break periods, most often the four-week summer break.

Behavioral science aspects of ethics, communication, human resource and practice management, and dental jurisprudence are integrated throughout the curriculum. Epidemiology and demography of the older population, basic processes of aging, and dental management of hospitalized patients, geriatric patients, and those with the most common disabling conditions are studied during the final year.

Students are counseled individually with regard to establishing a practice and applying for postgraduate education. A weekend conference acquaints IDS students with opportunities for postgraduate education and with alumni views of the realities of dental practice.

Endodontology

Endodontic residents participate in a comprehensive 27-month program designed to provide in-depth clinical training in endodontics, supported by a solid foundation of coursework in the biologic principles that uphold the specialty. In addition to a curriculum that nurtures the clinician-scientist, the program offers clinical experiences with an extensive patient demographic supported by the School of Dentistry and a community dental clinic that is part of an expansive health care network in the East San Francisco Bay Area. Each resident will also engage in an investigative project and complete an acceptable thesis to qualify for the Master of Science in Dentistry degree. The thesis is typically submitted for publication in scientific journals. Classes begin each July. Residents are scheduled for classroom and clinical instruction five full days (and some evenings) per week and full participation is required.

The graduate program in endodontology is fully accredited by the Commission on Dental Accreditation.

More information on the program, including admissions requirements, curriculum and schedule, graduation and certification requirements are available here (<http://dental.pacific.edu/academic-programs/residency-and-graduate-programs/advanced-education-program-in-endodontology>).

Orthodontics

Pacific's orthodontics residency program, instituted in 1971, is fully accredited by the Commission on Dental Accreditation, and is recognized for educational eligibility by the American Board of Orthodontics. The program's courses prepare the resident to provide excellent treatment based on contemporary biologic orthodontic principles.

Faculty members foster the humanistic atmosphere with informal professional relationships and mutual respect with the residents. Clinical instruction and practice are conducted in the orthodontic clinic.

Residents treat an entire range of orthodontic problems during seven half-day clinics per week including instruction in general orthodontics, mixed dentition treatment, surgical orthodontics, mini-implants, and Invisalign. Adult patients constitute about one-fourth of a resident's case load. Each resident starts approximately 50 new patients and is transferred approximately 60-80 existing patients. Fixed appliance treatment employs the edgewise technique although instruction permits a wide latitude of clinical variation based on patient needs and faculty supervision.

Each resident engages in an investigative project and must complete an acceptable thesis to qualify for the Master of Science in Dentistry degree.

Residents are scheduled for didactic and clinical instruction five full days per week and full participation is required. While there is no prohibition of weekend private dental practice, residents' commitments during the program seriously limit this opportunity.

More information on the program, including admissions requirements, curriculum and schedule, graduation and certification requirements is available here (<http://dental.pacific.edu/academic-programs/residency-and-graduate-programs/graduate-orthodontics-program>).

Oral and Maxillofacial Surgery Residency Program

The sponsoring Institutions for the Oral and Maxillofacial Surgery Residency program are the University of the Pacific, Arthur A. Dugoni School of Dentistry and the Alameda Health System/Highland Hospital. Residents receive a thorough foundation in the basic biomedical sciences, including anatomy, pathology, pharmacology, and physiology.

The residency is 48 months in length, and is divided into 34 months of oral and maxillofacial surgery, 2 months of internal medicine, 5 months of anesthesia (2 months of adult anesthesia and 1 month of pediatric anesthesia), 5 months of surgery (2 months of general surgery, 2 months of trauma surgery and 1 month of SICU), and 2 months of plastic surgery/oral pathology. There are several hospitals and clinics utilized for clinical training. The main hospital and training site is Alameda Health System/Highland Hospital, and the University of the Pacific Arthur A. Dugoni School of Dentistry. Affiliated hospitals include University of California San Francisco's Benioff Children's Hospital Oakland and Kaiser Hospital in Oakland.

Training is rigorous and includes experience in:

- Adult and pediatric conscious sedation and general anesthesia
- Dentoalveolar surgery and implant surgery
- Complex maxillofacial trauma of adult and pediatric population
- Maxillofacial reconstructive surgery
- Orthognathic surgery
- Oral and maxillofacial pathology

- Cleft surgeries
- Facial cosmetic surgery
- Temporomandibular joint surgery

Stipend

Residents receive salaries from PGY1 to PGY4.

Admission Requirements and Application

To apply to the program, a candidate requires an undergraduate degree, transcripts showing a DDS or DMD degree, a completed PASS application, National Board of Medical Examiners (NBME) Comprehensive Basic Science Examination (CBSE) score, and three letters of recommendation. University of the Pacific/Highland participates in the National Matching Service. Please see the Alameda Health System webpage (<http://www.highlandahs.org/health-professionals/residencies-and-fellowships/oral-and-maxillofacial-surgery/admission>) for complete admission requirements.

For more information please contact:

Rachelle Surdilla
 OMS Program Coordinator
 Division of Oral and Maxillofacial Surgery

Advanced Education in General Dentistry

The University of the Pacific, Arthur A. Dugoni School of Dentistry houses its Advanced Education in General Dentistry (AEGD) residency program in Union City, approximately 35 miles southeast of San Francisco.

The AEGD program is a one-year accredited postgraduate residency in general dentistry with an optional second year. The core of the program involves advanced clinical treatment of patients requiring comprehensive general dental care to healthy as well as medically compromised patients. Rotations are strategically set for additional training in geriatrics, pediatrics, hospital dentistry, implant restorations and dental emergencies. The AEGD program has an emphasis in minimally invasive and prevention based dentistry such as CAMBRA (CAries Management By Risk Assessment). We feature CAD/CAM restorations, complex implant restoration, Invisalign, and Cone Beam technology. There is an all-encompassing seminar series which covers all dental specialties and participation in rotations at community clinics and in a hospital setting.

The start date for the program is July 1. Residents have time off during the school's winter break and 10 days leave that can be scheduled with the approval of the program director.

Applicants must show record they have graduated from North American dental school. There is no tuition to participate in the program; residents receive an educational stipend. The program uses the American Dental Education Association's PASS application to receive application materials. For further information on the Pacific AEGD program application process, please click here (<http://dental.pacific.edu/academic-programs/residency-and-graduate-programs/advanced-education-in-general-dentistry/application-process>). To learn more about the Union City Dental Care Center, please click here (<http://www.unioncitydentalcare.com>).

International General Dentist Educator Program

In this five-year program, the first two years consist of participation in the AEGD program, and the remaining three years consist of attaining a Master's or doctoral degree in professional education and leadership from the University's Benerd School of Education.

The clinical residency and graduate program for international general dentists is a dual-track program consisting of clinical and didactic education. The clinical track is mainly intended to prepare the candidate for a career in patient care and clinical education. The didactic track and teaching practicum are mainly intended to prepare the candidate for a full-time career in dental academia. However, each track may have overlapping features in terms of purpose.

Clinical education is provided under a two-year residency program leading to a clinical certificate upon completion of both years one and two. Didactic education is provided under the two-year graduate program leading to a Master's in Education. The final year of the program will consist of completing the thesis project if not completed in the previous year, and teaching practicum in didactic, pre-clinical, and clinical education of doctoral students. Please click here (http://www.dental.pacific.edu/Academic_Programs/International_General_Dentist_Educator_Program.html) for more information about this program.

Dental Hygiene Program

The Study of Dental Hygiene

The dental hygiene course of study is an undergraduate, upper division professional program where students learn to provide preventive clinical care for patients with emphasis on recognition, treatment, and prevention of oral diseases. In addition to performing a variety of preventive and therapeutic

functions, the dental hygienist also has a major role in counseling and educating patients, community groups, and other health professionals. The curriculum helps students build the educational, communication, and clinical skills necessary to work in co-therapy with the dental team.

Facilities

Beginning in January 2017, the dental hygiene program will be located at University of the Pacific's San Francisco campus, along with other dental programs offered at the Arthur A. Dugoni School of Dentistry. The program's move will allow for increased connection to the school's San Francisco-based dental clinics and programs; enhanced interprofessional collaboration in the field of oral healthcare; opportunities for dental hygiene students to learn alongside other dental students in the DDS, IDS and residency programs; and a large base of patients who utilize the school's clinics. The San Francisco campus is a state-of-the-art facility located in the South of Market (SoMa) district and is highly accessible by all major forms of public transportation, including BART and Muni.

The Dental Hygiene program will continue to be located at University of the Pacific's Stockton campus through December 2016. The program is currently based in the Chan Family Health Sciences Learning Center, a facility shared with Physical Therapy and Speech-Language Pathology programs.

Admission Requirements

Admission to the Dental Hygiene Program is competitive and based on merit. Students who have completed program prerequisites (at Pacific or another learning institution) will apply via the American Dental Education Association's Centralized Application Service (DHCAS). After review of completed applications, the Office of Admissions will invite qualified candidates to participate in interviews on the San Francisco campus. In addition to a personal interview, applicants are invited to meet informally with current students and tour the campus. Admission will be based on the combination of application information and interview.

Students may apply as freshmen to a pre-dental hygiene pathway presented on the university's main campus in Stockton. Prerequisite coursework may be completed through learning experiences with the general undergraduate student population. Students in the pre-dental hygiene pathway will be guaranteed an interview for the upper division professional dental hygiene program if they maintain at least a 2.7 GPA.

Please click here (<http://www.pacific.edu/Admission/Undergraduate/Applying/Dental-Hygiene.html>) to see detailed admissions information.

Program Description

The Baccalaureate Dental Hygiene program is a professional program presented in an accelerated year-round format, including summer and culminating with the bachelor of science in dental hygiene degree. Transfer program entrants, with prerequisites fulfilled, complete the final four semesters of professional coursework which begins every year in January.

Program applicants must complete prerequisite general education courses either at Pacific or another institution to provide a strong science background and a broad base in the humanities. The prerequisites are designed to strengthen dental hygiene science and clinical practice.

The professional portion of the program is a highly-structured four consecutive semesters of upper division coursework that includes both didactic and clinical experience. This portion of the program is presented by the Arthur A. Dugoni School of Dentistry Dental Hygiene Program on the Stockton campus until January 2017, when it will then be offered on the San Francisco campus.

Dental Hygiene Licensure

Completion of the program enables graduates to take national and regional or state licensure examinations. For California examination information contact:

Dental Hygiene Committee of California
2005 Evergreen Street., Suite 1050
Sacramento, CA 95815
<http://www.dhcc.ca.gov/>

(916) 263-1978 or (916) 263-1978

General Education Curriculum

Dental hygiene prerequisites consist of general education courses providing a strong science background and a broad base in the humanities.

Please click here (<http://catalog.pacific.edu/general/arthuradugonischoolofdentistry/dentalhygiene>) to see more about the general education requirements in this program.

Dental Hygiene Curriculum

Professional training is undertaken in four consecutive semesters following prerequisites. The curriculum provides students with the knowledge of oral health and disease as a basis for assuming responsibility to assess, plan, implement and evaluate dental hygiene services for both the individual patient and community oral health programs.

Please click here (<http://catalog.pacific.edu/general/arthuradugonischoolofdentistry/dentalhygiene>) to see more about the professional training requirements in this program.

HUMANISTIC EDUCATION

It is the goal of the School of Dentistry to educate the highest quality practitioners who can practice independently and successfully in their patients' best interests. It is our belief that a humanistic approach to education best accomplishes this goal. Our view of humanism is based upon honest communication of clear expectations along with positive support for diligent effort. Although kindness is valued, humanism is not interpreted to mean softness, weakness, or superficial niceness. In fact, humanism places great responsibility on each member of the dental school community.

In order for this approach to work, faculty members must be models of the profession's highest standards, and they must teach in a way that encourages and energizes students. Students, in turn, are expected to set very high standards, to work hard, and to take personal responsibility for their own learning process.

Humanistic student-faculty Interaction

Includes

- Good work ethic
- Constructive feedback
- Maintaining confidentiality
- Addressing the issue
- Celebrating achievement
- Excellence
- High ethical standards
- Professional responsibility
- Increasing independence
- Attainment of competency

Excludes

- Minimum effort
- Authoritarian behavior
- Public criticism
- Ignoring the problem
- Dwelling on the negative
- Expedience
- Ethical compromise
- Avoiding responsibility
- Continued dependence
- Tolerance of inability

COMPETENCY STATEMENTS

Competencies are written statements describing the level of knowledge, skill, and values expected of graduates. Students are introduced to competency-based education and the competency statements at matriculation; second- and third-year students are reminded of the competency focus of the educational program during mandatory clinic orientations at the start of each academic year. In addition to these competencies expected of students in the DDS and IDS programs at graduation, there are other components of the curriculum - foundation knowledge and skills - that are also required as part of the educational program. These are normally defined as learning objectives in individual courses.

In regard to oral disease detection, diagnosis, and prevention

1. Establish and maintain patient rapport
2. Perform a complete patient work-up, to include history and physical, laboratory, and radiographic examinations
3. Interpret findings from the complete patient work-up and present them in a standardized format
4. Determine differential, provisional, and definitive diagnoses
5. Determine and consider patient's dental, medical, and personal situations in evaluating the range of dental therapies appropriate for that individual
6. Combine diagnostic and prognostic data with a science base and patient's values to form an individualized, comprehensive, sequenced treatment plan
7. Discuss treatment plans with patients and caregivers, including presentation of findings, alternatives, risks and benefits, and obtain informed consent from them
8. Modify ongoing treatment plans based on changed circumstances
9. Make referrals to dental and medical colleagues and, in conjunction with them, manage patients' care
10. Use preventive strategies to help patients maintain and improve their oral health

In regard to treatment of dental diseases and abnormalities

11. Restore single teeth for therapeutic reasons
12. Treat patients who have missing teeth with simple fixed, removable, and implant-supported prostheses
13. Oversee long-term care for patients with dental prostheses
14. Work with commercial laboratory support associated with restorative treatment
15. Fabricate nightguard appliances to protect the dentition
16. Address simple cosmetic concerns
17. Prevent and treat pulpal inflammations using direct and indirect procedures
18. Perform uncomplicated endodontic therapy on permanent teeth
19. Treat plaque-induced gingivitis, mild chronic periodontitis, and other conditions requiring uncomplicated periodontal therapy
20. Recognize and treat or refer moderate to severe chronic periodontitis, aggressive periodontitis, and other conditions requiring complicated periodontal therapy
21. Assess results of periodontal treatment
22. Recognize and refer dental malocclusions and disturbances in the development of dentition
23. Perform simple and surgical tooth and root extractions
24. Treat simple and recognize and refer complex complications related to intraoral surgical procedures
25. Treat simple and refer complex oral bony abnormalities
26. Treat simple and refer complex oral mucosal abnormalities
27. Administer and prescribe medications commonly used in dentistry, including local anesthesia, and manage their complications
28. Recognize and respond to intraoral emergencies
29. Recognize and respond to medical emergencies occurring in the dental office
30. Perform CPR

In regard to customized treatment of dental diseases and abnormalities

31. Treat patients with special needs who do not require hospital adjunctive care as part of treatment
32. Recognize oral healthcare needs, refer, and ensure follow-up treatment for patients with complex disabilities and medical conditions
33. Involve caregivers, guardians, and other health and social service professionals in managing the oral health of patients
34. Perform treatment for children in a manner that incorporates consideration of their expected growth and development
35. Counsel patients on lifestyle habits that affect oral health

In regard to health care delivery and practice management

36. Function as a patient's primary and comprehensive oral health care provider
37. Prepare and use complete and accurate records
38. Use current infection and hazard control measures in dental practice
39. Practice four-handed dentistry
40. Direct services of dental auxiliaries
41. Develop a philosophy of practice
42. Develop a plan incorporating dental practice management principles
43. Participate in quality assurance systems
44. Practice consistent with sound business principles and legal requirements and regulations

45. Evaluate oral health care delivery and payment systems in terms of their impact on patients, dental practices, and the profession

In regard to personal development and professionalism

- 46. Diagnose and treat only within one's competence
- 47. Recognize moral weakness, uncertainty, and dilemmas in dental practice and practice in accordance with normative ethical principles
- 48. Recognize signs of abuse and neglect and take appropriate action
- 49. Communicate with patients, staff, and others in an empathetic and culturally competent manner
- 50. Participate in activities designed to improve the health of communities
- 51. Participate in organized dentistry
- 52. Assume active responsibility for one's lifelong learning
- 53. Use information technology for dental practice
- 54. Evaluate scientific, lay, and trade information and claims about new products and procedures
- 55. Think critically, solve problems, and base dental decisions on evidence and theory

COURSE DESCRIPTIONS AND FACULTY

Course descriptions are grouped by department. Courses are numbered by year: first-year predoctoral courses in the 100s, second-year predoctoral courses in the 200s, and third-year predoctoral courses in the 300s. Graduate courses are similarly numbered by year: first-year graduate courses in the 400s, second-year graduate courses in the 500s, and third-year graduate courses in the 600s. Quarters during which a course is offered in the DDS and graduate orthodontics and endodontics programs are indicated in parentheses following the course descriptions. (For the sequence of courses in the IDS program, please see Distribution of Instruction). Units of credit are listed separately for clinical courses offered during second and third years, e.g. EN 259 Clinical Endodontics I (2 or 4 units). Otherwise the unit value is listed after the course title. More than a single unit value is reported when there is a difference in contact hours between DDS and IDS courses.

Beginning in the fourth quarter, DDS and IDS students must enroll in selective instruction each year which serves to extend basic knowledge and skills in a discipline. A listing of selective course offerings is distributed during the winter and spring quarters. Advanced topics and experiences in selected basic, clinical, and behavioral science disciplines are offered (10 to 40 hours per year, 0.1-1.0 units per course). If additional work is needed to reach competency in previously completed courses, supplemental instruction offering additional customized and intensive instruction in targeted didactic, laboratory, and clinical competencies will be offered by the faculty.

Units of Credit

One unit of credit is awarded for ten hours of lecture or seminar, twenty hours of laboratory or clinic, or thirty hours of independent study per term. In the predoctoral programs (DDS and IDS), students are assigned to comprehensive care clinics for approximately 500 hours during the second year and 1,000 hours during the third, in addition to specialty clinic rotations. Units of credit are assigned in the comprehensive care clinical disciplines in proportion to the amount of time students spend providing specific types of care for assigned patterns.

Full-time enrollment in the predoctoral programs at the School of Dentistry (DDS and IDS) is defined as 16 or more units per term. Full-time enrollment in the graduate residency programs in orthodontics and endodontics is defined as 20 or more units per term. For the graduate certificate programs in Advanced Education in General Dentistry and Oral and Maxillofacial Surgery, full-time enrollment is defined as 16 or more units per term.

Biomedical Sciences (BMS)

Department Chairperson

David M. Ojcius

Professor of Biomedical Sciences

Faculty

A

Leigh Charles Anderson

Professor of Biomedical Sciences

BS, University of Minnesota, 1971

DDS, University of Minnesota, 1977

PhD, University of Minnesota, Oral Biology, 1979

Homayon Asadi

Associate Professor of Biomedical Sciences

B.A., San Jose State University, Biology, 1984

D.D.S., University of the Pacific, 1988

San Jose City College, 1982

B

Adjunct Instructor of Biomedical Sciences

University of California, Berkeley

A.B., Columbia University, Anthropology, 1994

M.A., University of California, Berkeley, Anthropology, 1997

Course Descriptions

Predoctoral Courses

AN 110. Human Anatomy I: Cells to Systems. 6 Units.

The student will gain an understanding of cell biology, functional histology, and gross anatomy of the human body as appropriate for professional health care providers. Emphasis will be on the integration of anatomical knowledge at all levels and its correlation with basic clinical medicine relevant to dentistry. (45 hours lecture, 40 hours laboratory, including 15 hours clinical correlations/case discussion. Quarters 1-2.).

AN 111. Human Anatomy II: The Orofacial Complex. 7 Units.

The student will gain an understanding of the embryology, histology, neuroanatomy and gross anatomy of the head and neck as appropriate for a dental professional. The objectives are for the student to (1) understand the normal development and structure of tissues of the head and neck in preparation for courses in oral pathology and oral medicine and (2) comprehend the biological basis for rational diagnosis and treatment of clinical problems. Emphasis will be on the integration of anatomical knowledge and its correlation with oral medicine and clinical dentistry (40 hours lecture, 40 hours laboratory, 20 hours seminar/case discussion, Quarter 3).

BC 114. Biochemistry. 6 Units.

Study of major molecular structures and processes of the human organism including structure, function, and biosynthesis of the informational macromolecules, proteins and nucleic acids; generation and storage of metabolic energy; structure, genesis, and transformations of mineralized tissues; and digestion, absorption, and utilization of required nutrients. (60 hours lecture, including 10 hours case-based discussion. Quarters 1-2).

BMS 100. Integrated Medical Sciences. 0 Units.**MC 224. Microbiology. 6 Units.**

The biology of microorganisms that cause disease, including caries, and periodontal and endodontic infections. Microbial structure, metabolism, genetics, and virulence factors; molecular diagnostics and recombinant DNA technology. Pathogenesis, epidemiology, clinical syndromes, laboratory diagnosis, treatment, and prevention of infectious diseases. Innate, humoral and cell-mediated immunity, hypersensitivity and vaccines. Antibacterial, antiviral and antifungal agents. Bacterial infections, including oral manifestations; oral microbiology. Virology, with emphasis on HIV, herpesviruses, and hepatitis viruses; oral manifestations of viral infections. Mycology, with emphasis on oral infections. Parasitology, with emphasis on global public health. Oral microbiology laboratory, including disinfectant and antibiotic susceptibility; the caries risk test and identification of oral bacteria. (57 lecture hours, including independent study hours; 15 laboratory hours. Quarters 4-5).

PG 120. Physiology. 7 Units.

Study of the functioning of the human body, basic methods used to evaluate physiological parameters and introduction to recognition of functional abnormalities in humans. Cell membrane transport; electrical potentials; peripheral nerves; skeletal and smooth muscles; spinal cord and autonomic nervous system; circulatory system and respiratory system; homeostatic function of the kidneys; energy metabolism, temperature regulation, assimilation of food by the gastrointestinal tract; regulatory function of the endocrine system; perception of the external world through the sense organs, and integrative activity of the brain. (70 hours lecture and demonstrations including 10 hours case-based discussion. Quarters 1-3).

PG 220. Pharmacology and Therapeutics. 6 Units.

Rationale of drug use in dental practice, and mechanisms of action of drugs used for the medical management of dental patients; pharmacodynamics and drug kinetics; quantitative pharmacology; drug laws and regulations; prescription writing; emergency drugs, autonomic, respiratory, cardiovascular, psychotropic, hormonal, gastrointestinal, antianxiety, antiparkinson, antidiabetic, antineoplastic drugs; neuromuscular blockers, histamine antagonists, inflammatory mediators, sedative-hypnotics, anticonvulsants, general and local anesthetics, analgesics, antibiotics, antifungal and antiviral agents, substance abuse, toxicology, drug interactions, and therapeutic decision making. (60 hours lecture. Quarters 6-8).

Graduate Courses**AN 410. Advanced Head and Neck Anatomy I. 1 Unit.**

This course presents head and neck anatomy in depth to provide residents essential foundation for dental procedures. The development of normal and pathological craniofacial shapes, as well as anatomical structures relevant for implant placement, are discussed in detail. (Quarter 1).

AN 510. Advanced Head & Neck Anatomy II. 1 Unit.

This course covers head and neck anatomy in depth to provide residents with essential foundation knowledge for dental procedures. The development of normal and pathological craniofacial shapes, as well as anatomical structures relevant for implant placement, are covered in detail. (Quarter 5).

BC 414. Biochemistry and Bioengineering I. 1 Unit.

Residents learn how to assess biocompatibility and longevity of various materials in contact with body fluid and tissues. This course also covers biofilm formation and removal from oral biomaterials. (Quarter 2).

BMS 401. Research Philosophy and Design I. 1 Unit.

In this two-quarter foundational course, students learn about hypothesis-driven research, including hypothesis development and significance testing. (Quarter 1).

BMS 411. Stem Cell Biology I. 1 Unit.

In this two-quarter course, residents discuss in detail current research on cell populations, their properties, and possible application routes—the foundation of modern biology-driven endodontic therapy. Treatment possibilities for immature teeth and other applications in regenerative endodontics are presented. (Quarter 2).

BMS 412. Topics in Oral Biology I. 1 Unit.

This course covers the interaction of pulpal and periapical tissues with medicaments such as bisphosphonates or TNF-alpha blocking antibodies, the effects of systemic diseases such as HIV, diabetes or scleroderma on oral tissues, and other common issues in endodontics. (Quarter 4).

BMS 414. Oral Biology Journal Club I. 3 Units.

This course features discussion of papers on a variety of topics in oral biology. (Quarter 2).

BMS 440. Thesis Protocol. 1 Unit.

In this independent-study research course, residents work with mentor(s) to develop research questions, formulate hypotheses, and write a formal research proposal that includes a full literature review, statement of material and methods, execution of the research, and appropriate analysis and interpretation of data. (Quarters 2-3).

BMS 450. Research Project I. 3 Units.

In this independent-study research course, residents work with research mentors to perform the research project, including data gathering, compilation, and interpretation of the results. The course will culminate in a publishable manuscript. (Quarters 1-4.).

BMS 501. Research Philosophy and Design II. 1 Unit.

In this two-quarter foundational course, residents learn about hypothesis-driven research, including hypothesis development and significance testing. (Quarter 5.).

BMS 512. Topics in Oral Biology II. 1 Unit.

This course covers the interaction of pulpal and periapical tissues with medicaments such as bisphosphonates or TNF-alpha blocking antibodies, the effects of systemic diseases such as HIV, diabetes or sclerodermia on oral tissues, and other common issues in endodontics. (Quarters 5-8.).

BMS 514. Oral Biology Journal Club II. 3 Units.

Residents read and discuss current literature on a range of oral biology topics. (Quarter 6.).

BMS 550. Research Project II. 3 Units.

In this independent-study research course, residents work with research mentors to perform the research project, including data gathering, compilation, and interpretation of the results. The course will culminate in a publishable manuscript. (Quarters 5-8.).

BMS 651. Manuscript Preparation. 3 Units.

Residents prepare the final version of a publishable manuscript. (Quarter 9.).

MC 404. Host Response I. 1 Unit.

This course extends basic immunology to the etiology of pulpal and periapical disease focusing on the host response. The role of inflammatory mediators and the cells that elaborate them is discussed. (Quarter 1.).

MC 424. Oral Microbiology I. 1 Unit.

Residents learn about microbial structure, metabolism, genetics, and virulence factors; molecular diagnostics and recombinant DNA technology; pathogenesis, epidemiology, clinical syndromes, laboratory diagnosis, treatment, and prevention of infectious diseases. (Quarter 2.).

MC 504. Host Response II. 1 Unit.

This course extends from basic immunology to the etiology of pulpal and periapical disease focusing on the host response. The role of inflammatory mediators and the cells that elaborate them will be discussed. (Quarter 5.).

PG 420. Advanced Pharmacology I. 1 Unit.

Local anesthesia and pain management of acute and chronic pain are main components of this lecture series, with specific emphasis on endodontics. Infection control, including biochemistry and side effects, is also presented. (Quarter 1.).

PG 520. Advanced Pharmacology II. 1 Unit.

Local anesthesia and pain management of acute and chronic pain are two main components of this lecture series, with specific emphasis on endodontics. Infection control, including biochemistry and side effects, is also presented. (Quarter 5.).

BS, University of Pittsburgh, Neuroscience, 1993

Cert, San Francisco VA Hospital, GPR Dentistry, 1999

DDS, State University of New York, Buffalo, Dentistry, 1998

Fellowship, San Francisco VA Hospital, Prosthodontics, 2000

Stephen C. Lindblom

Assistant Professor of Dental Practice

BS, University of California, San Diego, Molecular Biology, 1996

DDS, University of the Pacific, 2001

Lucinda J. Lyon

Associate Professor of Dental Practice

ADEA Leadership Institute- American Dental Education Assn., 2009

BS, University of Southern California, Dental Hygiene, 1978

DDS, University of the Pacific, General Dentistry, 1986

Drexel University, Executive Leadership in Academic Medicine, 2015

EdD, University of the Pacific, Education, 2009

USC School of Policy, Planning and Development and Marshall School of Business, 2004

M

Roberto S. Masangkay

Assistant Professor of Dental Practice

BA, Letran College, Manila Philippines, 1961

DDS, University of the Pacific, 1989

Dental Intern, Veterans Memorial Hospital, Manila Philippines, Oral Surgery, 1968

DMD, University of the East, School of Dentistry, 1965

Maritza Mendez

Associate Professor of Dental Practice

BA, Temple University, Philadelphia, PA, Psychology, Cum Laude, 1987
DMD, University of Pennsylvania, School of Dental Medicine, Philadelphia, PA, Dentistry, 1991
UCSF, AEGD, Chief Resident, 1995
UCSF, AEGD, Resident (Certificate), 1994

Stephen A. Mikulic

Assistant Professor of Dental Practice

BA, University of Arizona, Psychology, 1971
DDS, University of Southern California, 1975

Christine E Miller

Associate Professor of Dental Practice

BS, RDH, University of Oregon Health Sciences Center, 1975
MA, University of the Pacific, Education, 1994
MHS, University of San Francisco, 1987

Helen Patricia Mockler

Instructor of Dental Practice

BS, University of California, Santa Barbara, Mathematical Sciences, 2006
DDS, University of the Pacific School of Dentistry, General Dentistry, 2010

Nicolette Moultrie

Assistant Professor of Dental Practice

AS, Chabot College, Biology and Dental Hygiene, 2000
BS, Northern Arizona University, Dental Hygiene, 2008
Cert., University of the Pacific, RDHAP, 2007
MS, UCSF, Dental Hygiene, 2012

N

Nader A. Nadershahi

Professor of Administration

CERT, Palo Alto Veterans Administration Hospital, Hospital Dentistry, 1995
DDS, University of the Pacific, Dentistry, 1994
EdD, University of the Pacific, Education and Leadership, 2011
MBA, University of the Pacific, Business, 1999
University of California, Berkeley, Biology/Art, 1991

Nilou Nadershahi

Assistant Professor of Dental Practice

BS, University of California Berkeley, Architecture, 1988
DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 1991

Daniel Nam

Instructor of Dental Practice

BA, University of California, Los Angeles, Music-Piano, 1996
DDS, University of the Pacific School of Dentistry, General Dentistry, 2002

P

Bruce Peltier

Professor of Dental Practice

BS, USMA, West Point, Engineering, 1970
MBA, University of the Pacific, Business, 1999
Med, Wayne State University, West Berlin, Psychology, 1974
PhD, Wayne State University, Detroit, Counseling, 1979
Post- Doc, University of Southern California, Clinical Psychology, 1980

Beverly Presley-Nelson

Instructor of Dental Practice

Beijing Stomatological Hospital, Chinese Educational Exchange, Foreign Expert, 1983
BS, Northern Arizona University, Vocational and Professional Education, 1978
DDS, University of the Pacific School of Dentistry, Dentistry, 1982
RDH, Phoenix College, 1973
REFDH, Northern University of Arizona, Education/Expanded Function Dental Hygiene, 1978

R

Miriam K. Robins

Assistant Professor of Dental Practice

DDS, Ohio State University, 1969

Ohio State University, PreDent, 1965

University of Texas, 2013

S

Eric S. Salmon

Assistant Professor of Dental Practice

BS, Harvey Mudd College, Biology, 1993

DDS, University of the Pacific, 1999

William C. Sands

Assistant Professor of Dental Practice

BA, University of the Pacific, Stockton, CA, BA Chemistry, 1967

DDS, University of the Pacific, School of Dentistry, San Francisco, CA, Doctor of Dental Surgery, 1971

Monica Sasaki

Instructor of Dental Practice

BS, California State University, Fresno, Physical Therapy, 1994

MA, California State University, Fresno, Physical Therapy, 1996

Raymond Joseph Sheridan

Assistant Professor of Dental Practice

BS, LeMoyne College, Biology, 1966

DDS, New York University College of Dentistry, Doctor of Dental Surgery, 1970

Timothy Sheu

of Dental Practice

BS, University of British Columbia, Biochemistry, 1986

DDS, University of the Pacific, Arthur A. School of Dentistry, General Dentistry, 1990

George Shiao

Instructor of Dental Practice

BA, Washington University St. Louis, Biology and History, 1995

DMD, Temple University School of Dentistry, Dentistry, 1999

Paul Subar

Associate Professor of Dental Practice

BA, UC Santa Cruz, Biochemistry and Molecular Biology, 1989

DDS, University of California, Los Angeles School of Dentistry, 1993

EdD, University of the Pacific Benerd School of Education, Educational Leadership and Administration, 2009

UCLA Center for Health Sciences, General Practice Residency, Department of Hospital, 1994

Veterans Administration Medical Center, Hospital Dental Service, 1995

T

Tiffany Tang

Instructor of Dental Practice

Hong Kong Polytechnic University, Occupational Therapy, 1988

MA, University of the Pacific, Business Administration, 2002

Rocky Mountain University of Health Professions, Occupational Therapy, 2011

Russell Haywood Taylor

Instructor of Dental Practice

BSc, University of Ottawa, Biology, 2004

DMD, McGill University, Dentistry, 2009

MS, University of Ottawa, Biochemistry, 2005

University of the Pacific School of Dentistry, Dentistry-AEGD, 2010

David T. Thornton

Assistant Professor of Dental Practice

BS, University of the California, Berkeley, Nutrition/Dietetics, 1980
DDS, University of the Pacific School of Dentistry, 1986
V. A. Hospital Martinez, CA, 1988

Michael T. Tiller

Assistant Professor of Dental Practice

BS, University of Oregon, 1995
DDS, University of the Pacific, Dentistry, 1999

W

Allen Wong

Professor of Dental Practice

BA, University of the Pacific, Stockton, Bachelor of Arts, Biology, 1983
CERT, Branemark NobleBiocare Restorative Implant Certificate, Implant Certificate, 2000
Certificat, UOP School of Dentistry, Advanced Clinical Dentistry, 1987
Certificat, UOP School of Dentistry, Advanced Education General Dentistry, 2001
DDS, University of the Pacific School of Dentistry, 1986
EdD, UOP Gladys Bernerd School of Education, 2010

Lynne M. Wong

Assistant Professor of Dental Practice

BS, San Francisco State University, Biochemistry Asian American Studies, 1998
DDS, UOP School of Dentistry, 2002
UOP School of Dentistry, AEGD Program, AEGD, 2004

Russell G. Woodson

Assistant Professor of Dental Practice

BS, Arizona State University, Chemistry, 1976
DDS, University of the Pacific, Dentistry, 1979
MA, University of the Pacific, Educational Psychology-Counseling, 1994

Y

Andrew Young

Assistant Professor of Dental Practice

BA, University of California Berkeley, Molecular and Cell Biology, 2001
Cert, Department of Veterans Affairs (Northern California Health Care System), General Practice Dentistry, 2006
Cert, UCSF Pain Management Center (remote), Post Graduate Pain Management, 2008
Cert, University of Medicine and Dentistry, New Jersey, Orofacial Pain Fellowship, 2008
DDS, University of California San Francisco, Dentistry, 2005
Diplomate, American Board of Orofacial Pain, Board Certified, 2011
MSD, University of Medicine and Dentistry, New Jersey, Orofacial Pain Masters, 2009

Douglas A. Young

Professor of Dental Practice

BA, University of California, Berkeley, Bacteriology, 1977
BS, University of California, San Francisco, Dental Science, 1981
CERT, Veteran's Administration Hospital, San Francisco, General Practice Residency, 1982
DDS, University of California, San Francisco, Dentistry, 1981
EdD, University of the Pacific, Education, 2010
MBA, University of the Pacific, Business Administration, 1999
MS, University of California, San Francisco, Oral Biology, 2000
UCSF Hospital, SF General Hospital, VA Longbeach Hospital, Hospital Dentistry, Oral Med, Oral Surg Clerkship, 1981

Z

Meixun Sinky Zheng

Assistant Professor of Dental Practice

BA, East China Normal University, English Education, 2004
MA, East China Normal University, Educational Administration, 2007
PhD, North Carolina State University, Curriculum and Instruction, 2012

Adjunct Faculty

A

Brian Adams

Adjunct Instructor of Dental Practice

Andersen Consulting, Management Consultant, 1998

MA, Cal Poly, San Luis Obispo, Business Administration, Management Systems, 1998

DDS, University of the Pacific, School of Dentistry, Dentistry, 2002

Kimberly Adams

Adjunct Instructor of Dental Practice

Other, Foothill College, Registered Dental Hygienist

BA, University of San Diego, 2007

Hanadi Alenezi

Adjunct Instructor of Dental Practice

BA, Kuwait University, Health Sciences, 2005

BDM, Kuwait University, Dentistry, 2008

Other, University of the Pacific School of Dentistry, AEGD, 2013

Zainab Ali-Rubaie

Adjunct Instructor of Dental Practice

DDS, University of Baghdad, Dentistry, 1991

Nelofer Ansari

Adjunct Assistant Professor of Dental Practice

Elphinston College, Bombay, Pre-dental Science Classes, 1973

BDS, University of Bombay, Government Dental College and Hospital, Dentistry, 1977

Amal Asiri

Adjunct Instructor of Dental Practice

BDS, King Abdulaziz University, Dentistry, 2011

King Abdulaziz University, Internship, 2012

Sahar Aurangzeb

Adjunct Instructor of Dental Practice

BS, De' MontMorency College of Dentistry, University, Bachelor of Dental Surgery, 2000

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 2013

B

Daniel J. Bender

Adjunct Assistant Professor of Dental Practice

BA, Humboldt State University, German, 1982

George-August Universitat, German Language Literature, 1985

MA, University of North Dakota, Foreign Lang Literature, 1986

EdD, University of San Francisco, Learning and Instruction, 2005

Stephen Beveridge

Adjunct Instructor of Dental Practice

BA, Westmont College, Biology and Economics/Business, 1982

DDS, Northwestern University, Dentistry, 1988

Andrea S. Braun

Adjunct Assistant Professor of Dental Practice

BS, Emory University Atlanta Georgia, Biology, 1978

DDS, New York University, College of Dentistry, 1982

Jeff J. Brucia

Adjunct Assistant Professor of Dental Practice

BA, UC Santa Cruz, Biology, 1985

DDS, University of Pacific, Dental, 1988

FDSO, Delta Sigma Delta, Delta Sigma Delta Degree, 1995

MDSD, Delta Sigma Delta, Delta Sigma Delta Degree, 1997

DDSD, Delta Sigma Delta, Delta Sigma Delta Degree, 1998

C

Steven Cavagnolo

Adjunct Instructor of Dental Practice

AA, Oakland City College, General Education, 1965
BA, San Jose State College, Environmental Health, 1967
DDS, UC San Francisco, General Dentist, 1973
St. Luke's Hospital - Malawi, Central Africa, 1974

Kara Chang

Adjunct Instructor of Dental Practice

BA, University of Texas at Austin, Human Ecology, 2006
BSc, University of Texas at Austin, Human Development Family Science, 2006
Baylor College of Dentistry, Pediatric Dentistry - Externship, 2009
Our Children's House at Baylor, Pediatric Dentistry - Externship, 2009
DDS, Baylor College of Dentistry, Dentistry, 2010
University of Texas Dental Branch at Houston, Pediatric Dentistry - Externship, 2010
Michael E. DeBakey VA Medical Center, General Practice Residency, 2011

Janice Chou

Adjunct Instructor of Dental Practice

BS, University of San Diego, Biochemistry/Cell Biology, 2006
DDS, University of the Pacific School of Dentistry, General Dentistry, 2010
University of the Pacific School of Dentistry, Advanced Education in General Dentistry, 2011

Pamela Covin

Adjunct Instructor of Dental Practice

Other, UCLA, Kinesiology, 1985
DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 1988

D

Osleydis Diaz

Adjunct Instructor of Dental Practice

BA, IPVCE/Cuba, Sciences/Literature, 1995
DS, Advanced Institute of Medical Sciences of Santiago de Cuba, Doctor of Stomatology, 2000
Faculty of Medicine, Granma, Cuba, Management and Health Care, 2001
Kaplan Institute and Truman College, English as a Second Language (ESL), 2003
DDS, UCSF School of Dentistry, Dentistry, 2008

Eunice Dizon

Adjunct Instructor of Dental Practice

DDS, New York University College of Dentistry, General Dentistry, 2006
University of the Pacific Arthur A. Dugoni School of Dentistry, General Dentistry - AEGD, 2007

Jennifer Domagalski

Adjunct Instructor of Dental Practice

BA, Dartmouth College, Anthropology, 2006
DDS, Arizona School of Dentistry, Dentistry, 2010
MPH, A.T. Still University School of Health Management, Public Health, 2010

E

Joe Errante

Adjunct Instructor of Dental Practice

BS, University of Arizona, Nutritional Biochemistry, 1977
DDS, Pacific Dugoni School of Dentistry, 1980

F

Julian Marcus Fisher

Adjunct Instructor of Dental Practice

BDS, Birmingham University, United Kingdom, Dentistry, 1985
Other, Stellenbosch University, South Africa, HIV/AIDS, 2002
MIH, Charite University, Germany, International Health, 2006
PhD, Lyon University, France, Non Communicable Diseases, 2011

Harold F. Fisk

Adjunct Instructor of Dental Practice

Pacific University, Clinical Doctorate Program

BS, Marquette University, Physical Therapy, 1978

PT, Marquette University, 1978

G**Vanisha Gandhi**

Adjunct Instructor of Dental Practice

BA, Stanford University, Human Biology, 2010

DDS, Pacific-Dugoni School of Dentistry, Dentistry, 2014

Koroush Langroudi Ghafourpour

Adjunct Instructor of Dental Practice

College of San Mateo, 1991

BS, University of California, Davis, Physiology, 1994

DDS, University of the Pacific, Dentistry, 1997

Sabine Girod

Adjunct of Dental Practice

DDS, University of Bonn Dental School, Dentistry, 1983

Medical School of Hannover, Oral Surgery, 1987

German Academic Exchange Medical Student, 1989

MD, Hannover Medical School, 1989

Harvard Medical School, Head Neck Oncology, 1990

University of Cologne/Germany, ENT, 1991

University of Cologne/Germany, 1995

PhD, University of Koeln, OI and Maxillofacial Surgery, 1996

Lindsey Green

Adjunct Instructor of Dental Practice

BA, Oakland University, Psychology, 2003

JD, DePaul College of Law, Law, 2007

H**Maureen Harrington**

Adjunct Instructor of Dental Practice

BA, St. Mary's College of California, Integral Studies, 1992

MPH, California State University, Long Beach, Community Health Education, 1996

Amruta Hendre

Adjunct Instructor of Dental Practice

BDS, University of Pune India, Dentistry, 1997

DDS, California State, Dentistry, 2008

Kelly Hicklin

Adjunct Instructor of Dental Practice

BS, UCLA, Microbiology, Immunology and Molecular Genetics, 2006

DDS, University of the Pacific School of Dentistry, Dentistry, 2009

UCLA, General Practice Residency, 2011

Andy Hoover

Adjunct Assistant Professor of Dental Practice

Archbishop Mitty High School, High School, 2000

BA, University of Colorado at Boulder, Environmental, Population, and Organic Biology, 2005

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Doctor of Dental Sciences, 2013

Kimberley Hubenette

Adjunct Instructor of Dental Practice

BS, University of Southern California, Los Angeles, CA, Biology, 1989

DDS, University of Southern California, Los Angeles, CA, Doctor of Dental Surgery, 1993

MA, The Pankey Institute, Continuum Level I, II, II-E, III, IV, 2007

Other, Academy of Craniofacial Pain, TMD/Sleep Apnea Mini Residency, 2008

Other, California Academy of General Dentistry, Mastertrack Program, 2008

Other, United States Dental Institute, Orthodontics, 2008

I

Toby Imler

Adjunct Instructor of Dental Practice

BA, Southern Adventist University, Biology, 2006

DDS, University of Nebraska College of Dentistry, General Dentistry, 2010

J

Peter Jacobsen

Adjunct Professor of Dental Practice

BS, Florida State University, Biology, 1967

PhD, University of California, San Francisco, Comparative Pharmacology and Toxicology, 1972

DDS, University of California, San Francisco, Dentistry, 1977

University of California, San Francisco, Oral Medicine Internship, 1978

Maximillian Jensen

Adjunct Instructor of Dental Practice

DDS, University California, San Francisco, Dentistry, 2015

BS, University of New Mexico, Nutrition/ Dietetics, 2016

K

Dennis M Kalebjian

Adjunct Assistant Professor of Dental Practice

California State University, Fresno, 1974

University of California, Los Angeles, 1975

DDS, University of the Pacific, 1978

Valley Medical Center, GPR, 1979

John Kim

Adjunct Instructor of Dental Practice

BS, University of Puget Sound, Natural Biology, 2000

DDS, University of the Pacific, Arthur A. Dugoni School of Dentistry, General Dentsity, 2008

L

Bonnie Lederman

Adjunct Instructor of Dental Practice

BSc, Baltimore College of Dental Surgery Dental School, Dental Hygiene, 1981

DDS, Baltimore College of Denta Surgery Dental School, Dentistry, 1992

University of California, San Francisco, Geriatric Dental Fellow, 2013

Tiffany C. Leung

Adjunct Instructor of Dental Practice

BS, University of California, Davis, Biological Sciences, 1994

DDS, University of the Pacific School of Dentistry, General Dentistry, 1999

Albert S. Lin

Adjunct Assistant Professor of Dental Practice

BS, University of Portland, Life Science, 1976

DDS, University of Pacific, Dentistry, 1994

M

Brian Macall

Adjunct Instructor of Dental Practice

BS, Creighton University, 2001

DDS, Creighton University, Dentistry, 2005

Monica MacVane-Pearson

Adjunct Instructor of Dental Practice

Universite de Moncton, One-month long summer French immersion camp, 1995

Universidad de Zaragoza, Rotary Club International exchange student, 1997

BS, Mount Allison University, Biology, 2001

DMD, McGill University, 2005
University of the Pacific, Arthur A. Dugoni School of Dentistry, AEGD, 2006

Andrew Malan

Adjunct Instructor of Dental Practice
Boise State University, Health Science Studies, 2005
DMD, University of Pittsburgh, Dentistry, 2009

Howard May

Adjunct Instructor of Dental Practice
University of California Berkeley, Social Science, 1971
DDS, University of the Pacific School of Dentistry, Dentistry, 1976

Anthony Mock

Adjunct Instructor of Dental Practice
AB, U.C. Berkeley, Bacteriology, 1975
DDS, Case Western Reserve University Dental School, Dentistry, 1980
Highland General Hospital, GPR, 1981

Audrey Mojica

Adjunct Assistant Professor of Dental Practice
DDS, Loma Linda University of Dentistry, General Dentistry, 2008
BA, California Polytechnic State University, Nutritional Science, 2012

Alicia Montell

Adjunct Instructor of Dental Practice
BS, Stanford University, Biological Sciences, 2000
DDS, University of California, San Francisco, Dentistry, 2005

Jasmin Moschref

Adjunct Instructor of Dental Practice
BA, University of California, Berkeley, Integrative Biology, 2004
DDS, Indiana University School of Dentistry, Dentistry, 2008

Ruby Multani

Adjunct Instructor of Dental Practice
BS, University of California, Davis, Nutrition Science, 1999
DDS, University of the Pacific School of Dentistry, Dentistry, 2003

N

Maysa Namakian

Adjunct Instructor of Dental Practice
BS, California Polytechnic State, Mathematics, 2006
MS, California State University Northridge, Health Education, 2008

David Neal

Adjunct Instructor of Dental Practice
A.T. Still University, Workforce Education and Development, 2006
DMD, A.T. Still University, Dentistry, 2010

Chris Nelson

Adjunct Instructor of Dental Practice
Shasta State High School, 2002
BS, University of California, Davis, Biological Sciences (Neurobiology, Psychology, Behav.), 2006
DDS, University of the Pacific, General Dentistry, 2009

Elizabeth Newell

Adjunct Instructor of Dental Practice
BA, University of Rochester, Rochester, NY, Bachelor of Arts in Philosophy and Classics, 1998
Other, Stanford University, Stanford, CA, Master of Arts in Philosophy, 2000
Other, Foothill College, Los Altos Hills, CA, Associate of Science in Dental Hygiene, 2013

Josephine Ng

Adjunct Instructor of Dental Practice
BS, University of the Pacific, Biological Sciences, 2006

DDS, University of the Pacific School of Dentistry, Dentistry, 2010

Tin Nguyen

Adjunct Instructor of Dental Practice

N/A, Cal State University of Long Beach, Biology, 1991

N/A, El Camino College, Biology, 1995

BA, University of Colorado, Biology, 1997

DDS, Howard University, Dentistry, 2003

David Bruce Nielsen

Adjunct Associate Professor of Dental Practice

AA, Glendale Community College, 1960

BA, Los Angeles State College, 1962

DDS, University of the Pacific, 1967

American Dental Association, 1980

MA, University of the Pacific, 1994

O

Noha H. Oushy

Adjunct Instructor of Dental Practice

DDS, Ain Shams University, Dental Medicine and Surgery, 2005

MS, New Mexico State University, Public Health, 2010

P

Jacob Pai

Adjunct Instructor of Dental Practice

BS, Pacific Union College, Physical Science, 1986

Loma Linda University, Health Education: Community Health, 1990

DDS, UCSF, Dentistry, 1994

UCSF, Dental Public Health, 2003

Aditya Pandya

Adjunct Instructor of Dental Practice

BSc, Arizona State University, Biology, 2009

DMD, A.T. Still University, Dental Public Health, 2014

Allan Pineda

Adjunct Instructor of Dental Practice

DMD, Centro Escolar University, General Dentistry, 1985

DDS, University of Pacific, School of Dentistry, DDS, 2002

Jonathan Po

Adjunct Instructor of Dental Practice

BA, University of California, Davis, Biology, 2008

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 2011

Other, Montefiore Medical Center, General Practice, 2012

Sridevi Ponnala

Adjunct Instructor of Dental Practice

DDS, M.R. Ambedkar Dental College, Dental Surgery, 1997

DDS, University of California San Francisco, Dentistry, 2004

R

Emily Renk

Adjunct Instructor of Dental Practice

BA, University of California, Los Angeles, Classical Civilizations, 2005

DDS, Ostrow School of Dentistry, USC, Dentistry, 2011

University of California, Los Angeles, General Practice Residency, Hospital Dentistry, 2012

Melinda M Reynard

Adjunct Instructor of Dental Practice

BA, University of Texas Austin, Psychology / Pre-Dental, 1979

MS, University of Arizona, Food Science and Nutrition, 1981

DDS, University of the Pacific Arthur A Dugoni School of Dentistry, Dentistry, 1989

Boyd Edwin Robinson

Adjunct Associate Professor of Dental Practice

BA, California State University, Chico, BA in Biology 1971

Graduate Studies 1971-1973, 1973

DDS, University of the Pacific, School of Dentistry, Doctor of Dental Surgery, 1976

MD, Naval Dental School, Bethesda, MD, 1984

Other, Naval Dental School, National Naval Dental Center, Comprehensive Dentistry Residency, 1984

Other, George Washington University, Masters Degree, Higher Ed and Human Development, 1991

Elizabeth Robinson

Adjunct Instructor of Dental Practice

BA,MS, Stanford University, Biological Sciences, 2007

DMD, University of Pennsylvania, Dentistry, 2013

Rowena Romero

Adjunct Instructor of Dental Practice

DDS, University of the Pacific, Dentistry, 2015

Torrey Rothstein

Adjunct Instructor of Dental Practice

BS, University of California, San Diego, Animal Physiology and Neuroscience, 2002

DDS, University of the Pacific, Dental Surgery, 2005

S

Rami Saah

Adjunct Instructor of Dental Practice

BS, University of California, Irvine, Biological Sciences, 1996

DDS, University of the Pacific, Arthur A. Dugoni School of Dentistry, Dentistry, 2000

Faezeh Sadeghi

Adjunct Instructor of Dental Practice

BS, Isfahan University, Iran, Zoology, 1992

College of San Mateo, Biology, 1997

BA, University of California San Francisco, Biology, 1999

DDS, University of California San Francisco, Dentistry, 2005

Mahdi Salek

Adjunct Instructor of Dental Practice

BS, UCLA, Biological Sciences, 2005

DDS, University of Illinois at Chicago, General Dentistry, 2011

Ronald J Sani

Adjunct Associate Professor of Dental Practice

BS, Santa Clara University, Biology, 1972

DDS, University of the Pacific, 1975

Valley Medical Center, 1976

Jack Saroyan

Adjunct Assistant Professor of Dental Practice

BA, University of California Berkeley, General Curriculum, 1958

DDS, University of the Pacific, Dental School, Dentist, 1962

Brian Sheppard

Adjunct Instructor of Dental Practice

BS, San Jose State University, Mechanical Engineering, 2004

DDS, University of the Pacific, Arthur A. Dugoni School of Dentistry, Dentistry, 2010

University of the Pacific, Arthur A. Dugoni School of Dentistry, Advanced Education in General Dentistry, 2011

Elana Shlansky

Adjunct Instructor of Dental Practice

BA, Cornell University, 2007

DDS, Columbia University, Dentistry - Public health, 2014

GPR, San Francisco VA Medical Center, General Practice, 2015

Christiane Silva

Adjunct Instructor of Dental Practice

Dentistry School of Ribeirao Preto, Dentistry, 1998

DDS, Universidad de la Salle, Dentistry, 2014

Ann Marie Silvestri

Adjunct Assistant Professor of Dental Practice

Other, Notre Dame des Victories High School, College Preparatory, 1968

BS, University of San Francisco, Biology/Psychology, 1972

DDS, University of the Pacific, General Dentistry, 1975

Cert, University Hospital School, The University of Iowa, Dental Course for patients with disabilities., 1979

MPA, Notre Dame de Namur University, Belmont, CA, Health Services Administration, 1999

Mark J. Singer

Adjunct Instructor of Dental Practice

BA, University of Michigan, 1966

MD, College of Physicians and Surgeons of Columbia University, Medicine, 1970

Rush-Presbyterian St. Luke's Medical Center, Internship-Surgery, 1971

Northwestern University McGraw Medical Center, Residency: Pathology, 1972

Northwestern University McGraw Medical Center, Residency: Surgery, 1973

Northwestern University McGraw Medical Center, Fellowship: Head and Neck Surgery, 1976

Northwestern University McGraw Medical Center, Residency: Otolaryngology, 1976

Norma Solarz

Adjunct Instructor of Dental Practice

BA, University of California Berkeley, Botany, 1976

DDS, University of California San Francisco, Dentistry, 1980

University of California Berkeley, MPH Epidemiology, 1990

Sara Soleimani

Adjunct Instructor of Dental Practice

BA, University of Washington, Washington DC, Near Eastern Languages Civilizations, 2003

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Doctor of Dental Surgery, 2006

Stanley R. Surabian

Adjunct Associate Professor of Dental Practice

California State University, Fresno, 1965

DDS, University of Southern California, 1969

JD, San Joaquin College of Law, 1992

T**Russell Haywood Taylor**

Adjunct Instructor of Dental Practice

BSc, University of Ottawa, Biology, 2004

MS, University of Ottawa, Biochemistry, 2005

DMD, McGill University, Dentistry, 2009

University of the Pacific School of Dentistry, Dentistry-AEGD, 2010

Ariane Terlet

Adjunct Instructor of Dental Practice

BA, UC Berkeley, 1980

DDS, University of the Pacific, 1986

V**Andy Van Sicklen**

Adjunct Instructor of Dental Practice

California Polytechnic State University, Biology/ Physiology, 2008

DDS, University of the Pacific School of Dentistry, Dentistry, 2011

VA Hospital, General Dentistry, 2012

Willam Albert vanDyk

Adjunct Assistant Professor of Dental Practice

BA, University of California, Davis, Sociology, 1969

DDS, University of the Pacific School of Dentistry, General Dentistry, 1973

Madigan Army Medical Center, Tacoma, Washington, Dental Internship, 1974

Robert Timothy Verceles

Adjunct Instructor of Dental Practice

BS, UC Davis, Genetics, 1989

DDS, UCSF, Dentistry, 1993

W

Colin Wong

Adjunct Professor of Dental Practice

BA, University of California, Berkeley, Microbiology, 1961

University of Connecticut, Certificate in Endodontics - Board Eligible, 2010

Course Descriptions

Predoctoral Courses

DP 100. Ethics and Exploration of Basic Cultural Issues. 3 Units.

Through a combination of classroom discussion and activities, this course introduces students to cultural and ethical issues relevant to dental school clinics and private practice. In a small group environment, students have the opportunity to discuss school culture and intercultural relationships, preparing them for experiences with a diverse school culture and patient pool. Ethics, along with state and federal regulations, are introduced as they apply to dentistry practiced in dental school clinics and private practice. (27 hours. IDS Quarter 1.)

DP 101. Integrated Clinical Sciences I: Orientation to the Clinical Practice of General Dentistry. 5 Units.

This course is the didactic component of a multi-disciplinary, year-long course designed to prepare students to treat patients in Pacific's Main Dental Clinic and engage in community oral health events and programs. Together, DP 101 and DP 106 focus on Diagnostic Sciences, Behavior Sciences, Periodontology, Prevention and Community Health Care Services and Systems. Case-based simulations are supported by clinical exercises and practical exams. (Quarters 1-3.)

DP 106. Integrated Clinical Sciences I: Orientation to the Clinical Practice of General Dentistry Practicum. 7 Units.

This clinically-focused, multi-disciplinary course is designed to prepare students to treat patients in Pacific's Main Dental Clinic and in community-based settings. This lab/clinic course is comprised of supervised case-based simulations, workshops, clinical exercises and community sites. The focus is on the development of a comprehensive medical and dental database risk assessment; disease prevention strategies; diagnostic tests; oral pathology; electronic chart management; ergonomics; infection control; basic periodontal instrumentation; professional deportment; cultural sensitivity and communication with patients in the clinic and in community settings. (Quarters 1-4.)

DP 107. Integrated Clinical Sciences I: Orientation to the Clinical Practice of General Dentistry Practicum. 2 Units.

This one-quarter course is offered in the first year of the International Dental Studies curriculum. This clinically-focused, multi-disciplinary course is designed to prepare students to treat patients in Pacific's Main Dental Clinic. In a variety of settings such as seminars, case-based simulations and clinical exercises, students focus on diagnosis, treatment planning, communication, efficient patient care, clinical systems, basic periodontal instrumentation, electronic patient records and infection control. (IDS Quarter 2.)

DP 160. Dental Radiology. 2 Units.

Study of radiation physics and biology, image quality, intensifying devices, radiation safety, tomography, radiation and the law, radiographic techniques, film processing, anatomic landmarks, and principles of radiographic interpretations. (Quarters 2-3.)

DP 166. Dental Radiographic Technique. 1 or 2 Unit.

Instruction and practice using the extension cone paralleling radiographic technique including patient management, radiation safety, use of equipment, film placement, exposure, identification and mounting, and correction of technical error. (20 hours lab/clinic. Quarter 4.)

DP 199. Enriched Preclinical Experience. 16 Units.

This course provides students with an additional opportunity to enhance or enrich their skills in some or all disciplines. These experiences are directed by the student's Group Practice Leader and/or department chairs, who also recommends certification for promotion. (1-4 quarters).

DP 200. Practice Management I. 1 Unit.

Introduces students to the study of fundamental concepts and terminology of the art and science of practice management as a basis for leadership and decisions in dental practice. Students will learn to track and evaluate key practice indicators, read financial reports, understand the importance of leading a team for efficient delivery of patient care, track and control overhead expenses, and set goals. (10 hours. Quarter 5.)

DP 201. Integrated Clinical Sciences II: Application of Foundational Knowledge. 4 Units.

This two-quarter course provides students with enriched multidisciplinary diagnostic and technical content beyond the fundamentals of first-year studies. Material is presented in a variety of formats including lecture, small group seminars, case-based discussions, and on-line modules. Topics include biomedical sciences, materials, techniques, radiographic interpretation, professionalism, and information specific to each discipline of dental practice. Emphasis is placed on critical thinking and application of evidence to the clinical treatment and management of patients. (Quarters 5-6.)

DP 202. Integrated Clinical Sciences II: Application of Foundational Knowledge. 4 Units.

This one-quarter course builds on foundational clinical and biomedical material presented in first-year studies and in DP 201. Topics include advanced material in endodontics, restorative, implants, orofacial pain, ethics and patient management, community oral health, and appraising scientific literature. Emphasis is placed on the integration of dental concepts, evidence, and critical thinking to deliver accurate diagnoses and prepare customized comprehensive treatment plans. (Quarter 7.)

DP 203. Integrated Clinical Sciences II: Application of Foundational Knowledge. 3 or 5 Units.

This one-quarter course continues the theme of integration of material from multiple dental disciplines in DP 201 and DP 202. Topics include advanced content in oral surgery, endodontics, restorative, implants, orofacial pain, ethics, and managing complex cases. Students are introduced to resume and professional electronic portfolio development as they ready themselves for professional careers. Evidence-based decision making is coordinated with clinical patient management exercises in DP 219. (Quarter 8.)

DP 216. Patient Management and Productivity I. 2 or 4 Units.

Development of competency in patient management skills to maximize patient satisfaction. Students learn to use proper verbal and non-verbal communication and listening skills; to respond appropriately to patient and non-patient concerns; to be organized and prepared for tasks and contingencies related to patient care; to complete tasks and treatment in a timely manner; to provide patients with relevant information about prevention of dental disease and treatment options; and to obtain proper informed consent for procedures. (Quarters 5-8.)

DP 218. Clinical Oral Diagnosis and Treatment Planning. 1-4 Units.

The diagnosis and communication to the patient of the need for dental treatment; recognizing medical, oral, physical, emotional, and economic factors that modify or complicate dental treatment; and development of comprehensive dental treatment plans suitable for patients' needs in accordance with identified modifying and complicating factors. (Quarters 5-8.)

DP 219. Clinical Management and Judgment I. 2 or 4 Units.

Students will learn comprehensive diagnostic care for assigned patients in the disciplines of endodontics, fixed prosthodontics, operative dentistry, oral diagnosis and treatment planning, periodontics, removable prosthodontics and orthodontics. For each assigned patient, the student will examine and evaluate the patient, identify and list dental problems, complete an appropriate treatment plan and schedule, provide all dentistry required in the disciplines, and recognize need for and refer the patient to specialty areas when such treatment is required. (Quarters 5-8.)

DP 266. Clinical Radiology. 2 Units.

Study of preparation, evaluation, and interpretation of diagnostically acceptable intraoral radiographic and panoramic surveys for comprehensive care and emergency clinic patients. (Quarters 5-8.)

DP 299. Enriched Clinical Experience I. 16 Units.

This course provides students with an additional opportunity to enhance or enrich their skills in some or all clinical disciplines. These experiences are directed by the student's Group Practice Leader, who also recommends certification for promotion. (1-4 quarters).

DP 300. Practice Management II. 3 Units.

Challenges students to apply knowledge of practice management concepts through utilization of a computerized business simulation. Includes preparation for career decisions in dentistry with a focus on practice transitions, associateships, dental benefit plan participation, marketing, debt management, retirement planning, patient billing and collections, scheduling for efficiency, basic accounting, tax planning, and development of business plans. (30 hours lecture. Quarter 11.)

DP 301. Jurisprudence. 1 Unit.

Prepares students for an understanding of the foundations of the law, its primary groupings and modes, and its application to the dentist and dental practice environment. Particular attention will be given to California dental law and risk management. (10 hours lecture. Quarter 12.)

DP 302. Clinical Care of Complex Needs Patients. 4 Units.

Study of basic disease processes, epidemiology, demographics, treatment planning, principles of providing dental treatment for individuals with a wide variety of conditions including medical and developmental disabilities, problems associated with aging, psychological problems including dental phobia, hospital organization, joining a hospital staff, providing dental treatment and consultation in a hospital, and principles of general anesthesia. (20 hours lecture, 20 hours self-study and seminar. Quarters 9-11.)

DP 303. Integrated Clinical Sciences III: Multidisciplinary Case Based Seminars. 6 Units.

Multidisciplinary case based presentations of integrated material related to the practice of clinical dentistry. This three-quarter course builds on the foundational and clinical knowledge base of each student to evaluate and plan more complex treatment needs. (60 hours lecture/seminar. Quarters 9-11.).

DP 307. Extramural Patient Care. 4 Units.

Through a combination of didactic and clinical experiences, this course seeks to prepare the student for practice in community clinical settings where diverse patient populations may be encountered. Upon completion of the course, students will have developed the skills to: perform dental procedures in community-based practice settings, work with diverse patient populations, describe the social context of disease processes, develop social awareness and skills for treating underserved groups, describe dental delivery in a community clinic environment, and develop treatment alternative in clinics with limited resources. (90 hours clinical rotations and 4 hours lecture/seminar. Quarters 9-12.).

DP 316. Patient Management and Productivity II. 4 Units.

Development of competency in patient management skills to maximize patient satisfaction. Students learn to use proper verbal and non-verbal communication and listening skills; to respond appropriately to patient and non-patient concerns; to be organized and prepared for tasks and contingencies related to patient care; to complete tasks and treatment in a timely manner; to provide patients with relevant information about prevention of dental disease and treatment options; and to obtain proper informed consent for procedures. (Quarters 9-10.).

DP 317. Patient Management and Productivity III. 4 Units.

Development of competency in patient management skills to maximize patient satisfaction. Students learn to use proper verbal and non-verbal communication and listening skills; to respond appropriately to patient and non-patient concerns; to be organized and prepared for tasks and contingencies related to patient care; to complete tasks and treatment in a timely manner; to provide patients with relevant information about prevention of dental disease and treatment options; and to obtain proper informed consent for procedures. (Quarters 11-12.).

DP 318. Clinical Management and Judgment II. 4 Units.

Students will learn comprehensive diagnostic care for assigned patients in the disciplines of endodontics, fixed prosthodontics, operative dentistry, oral diagnosis and treatment planning, periodontics, removable prosthodontics and orthodontics. For each assigned patient, the student will examine and evaluate the patient, identify and list dental problems, complete an appropriate treatment plan and schedule, provide all dentistry required in the disciplines, and recognize need for and refer the patient to specialty areas when such treatment is required. (Approximately 700 hours in clinical disciplines listed. Quarters 9-10.).

DP 319. Clinical Management and Judgment III. 4 Units.

Students will learn comprehensive diagnostic care for assigned patients in the disciplines of endodontics, fixed prosthodontics, operative dentistry, oral diagnosis and treatment planning, periodontics, removable prosthodontics and orthodontics. For each assigned patient, the student will examine and evaluate the patient, identify and list dental problems, complete an appropriate treatment plan and schedule, provide all dentistry required in the disciplines, and recognize need for and refer the patient to specialty areas when such treatment is required. (Approximately 700 hours in clinical disciplines listed. Quarters 11-12.).

DP 320. Preparation for State Licensure. 0 Units.

This course, available to students on an as-needed basis, includes a review of requirements and protocol as well as practical exercises in preparation for the Western Regional Examining Board and other licensing examinations.

DP 368. Emergency Clinic. 3 Units.

The diagnosis and treatment of patients who require immediate attention. (90 hours clinical rotation. Quarters 9-12.).

DP 399. Enriched Clinical Experience. 16 Units.

This course provides students with an additional opportunity to enhance or enrich their skills in some or all clinical disciplines subsequent to the scheduled graduation date. These experiences are directed by the student's Group Practice Leader, who also recommends certification for graduation. (1-4 quarters).

PA 230. General Pathology. 6 Units.

Basic concepts of disease are studied, especially with regard to mechanisms, gross tissue changes, microscopic changes in selected instances, and implications and applications of these concepts to dental practice. (52 hours lecture/seminar and 34 hours independent study. Quarters 5-6.).

PA 330. Oral Pathology. 5 Units.

Study of the etiology, pathogenesis, clinical and histopathogenic features, and the treatment and prognosis of oral diseases. Recognition of basic tissue reaction and lesions that occur in the mouth, jaws, and neck; formulation of tentative diagnoses; methods used to secure definitive diagnoses and provide appropriate therapy and management or obtaining consultation for the same. (24 hours lecture, programmed instruction equivalent to 30 hours lecture, and six hours clinical rotation. Quarters 7-9.).

PA 331. Differential Diagnosis of Oral and Maxillofacial Lesions. 2 Units.

Clinical evaluation, development of a differential diagnosis, and management protocols for oral and paraoral soft tissue and jaw lesions, based on knowledge of the appearance, behavior, and treatment of oral diseases. (20 hours lecture. Quarter 10.).

Graduate Courses

DP 402. Statistical Methods I. 1 Unit.

Residents learn the importance of data organization and evaluation, and statistical methods used in research. They apply this knowledge to their own research and enhance skills in the interpretation of quality research data. (Quarter 2.).

DP 430. Advanced Oral Pathology I. 1 Unit.

Organized into lectures and clinical-pathologic conferences, this course provides residents a firm foundation in endodontic pathology and clinical entities that may occur in patients but are unrelated to root canal treatment. (Quarter 1.).

DP 460. Advanced Radiology I. 1 Unit.

This course covers key elements of endodontics such as proper radiographic technique and three-dimensional data acquisition and interpretation. Residents obtain and read images from small FOV cone beam scans. (Quarter 1.).

DP 502. Statistical Methods II. 1 Unit.

Residents learn the importance of data organization and evaluation, and statistical methods for meaningful research. They will learn to apply this knowledge both to their own research but also (as is perhaps even more relevant for a practicing clinician) to the interpretation of the quality of published data. (Quarter 6.).

DP 530. Advanced Oral Pathology II. 1 Unit.

Organized into lectures and clinical-pathologic conferences, this course provides residents a firm foundation in endodontic pathology and clinical entities that may occur in patients but are unrelated to root canal treatment. (Quarter 5.).

Course Descriptions

Predoctoral Courses

EN 154. Basic Endodontics. 1 Unit.

Development of the dental pulp, classification and nature of endodontic disease, clinical diagnosis, and fundamentals of root canal therapy and radiographic interpretation. (10 hours lecture. Quarter 3.).

EN 159. Preclinical Endodontics. 2 Units.

Study of pulp morphology, anatomy, cleaning and shaping of root canals; access openings; use of irrigating solutions; obturating the canal and judging the complete treatment with radiographs. (40 hours laboratory. Quarter 4.).

EN 254. Endodontics. 1 Unit.

Review of endodontic retreatment and surgical therapies; dental trauma and sequelae; complex problem solving; endodontic emergencies; endodontic mishaps; and alternate treatments. (10 hours lecture. Quarter 7.).

EN 259. Clinical Endodontics I. 2 or 4 Units.

Study of endodontic diagnosis, treatment planning, and therapy, including management of endodontic emergencies and surgical endodontics in a comprehensive clinical dental practice setting. (Quarters 5-8.).

EN 359. Clinical Endodontics II. 8 Units.

Study of endodontic diagnosis, treatment planning, and therapy, including management of endodontic emergencies and surgical endodontics in a comprehensive clinical dental practice setting. (Quarters 9-12.).

Graduate Courses

EN 401. Endodontic Technology I. 1 Unit.

This course introduces residents to endodontic technology. (Quarter 1.).

EN 402. Endodontic Therapy Seminar I. 2 Units.

Residents discuss contemporary endodontic strategies and the application of current scientific evidence to endodontic treatment. (Quarters 1-2.).

EN 403. Endodontic Biology and Pathology I. 8 Units.

This course presents the biology and etiology of pulpal and periapical disease. (Quarters 1-4.).

EN 405. Advanced Endodontic Technique. 7 Units.

This preclinical course uses simulated root canal treatment on extracted teeth with a variety of instruments and devices to prepare residents for clinical care. (Quarter 1.).

EN 411. Case Seminar I. 12 Units.

Residents review their own cases prepared according to ABE board documentation rules. (Quarters 1-4.).

EN 412. Classic Literature I. 12 Units.

Residents review the body of classic literature pertinent to endodontics, including material relevant for board preparation. (Quarters 1-4.).

EN 413. Current Literature I. 4 Units.

In this course, residents review current endodontic literature using the EndoLit iPad app. (Quarters 1-4.).

EN 422. Clinical Transition: Evidence-based Endodontics. 4 Units.

This course introduces residents to the evidence-based modalities and local rules for treating patients endodontically in the school's clinic. (Quarter 2.).

EN 423. Anesthesia and Pain Management I. 1 Unit.

This course is an introduction to theoretical and practical anesthetic techniques and pain management. (Quarter 2.).

EN 424. Pain/Neuro Seminar I. 1 Unit.

Residents study the physiology and pathophysiology of pain. (Quarter 1.).

EN 430. Clinic Connections I. 1 Unit.

The collaboration between endodontists and other members of the dental team is essential for good clinical outcomes. A series of presentations by clinicians with different training and expertise reinforces an inclusive view of typical and atypical treatment modalities. (Quarter 4.).

EN 440. Special Topics in Endodontology I. 2-4 Units.

Residents attend seminars by invited speakers with expertise and training in contemporary endodontic therapies. (Quarters 1-2.).

EN 457. Endodontic Clinic: Assisting. 2 Units.

In this clinical course, residents assist during endodontic treatment by endodontic faculty in the graduate endodontic clinic. (Quarter 1.).

EN 458. Clinical Endodontics I. 29 Units.

Residents practice non-surgical endodontics appropriate in scope and case difficulty for the first year. (Quarters 2-4.).

EN 459. Clinical Endodontics: Surgery I. 5 Units.

Residents practice surgical endodontics appropriate in scope and case difficulty for the first year. (Quarters 2-4.).

EN 466. Special Care Clinic Rotation. 2 Units.

In this rotation, residents practice non-surgical endodontics under sedation and general anesthesia for patients with special needs. (Quarter 3.).

EN 503. Endodontic Biology and Pathology II. 8 Units.

This course presents the biology and etiology of pulpal and periapical disease. (Quarters 5-8.).

EN 511. Case Seminar II. 12 Units.

Residents review their own cases prepared according to ABE board documentation rules. (Quarters 5-8.).

EN 512. Classic Literature II. 12 Units.

Residents review the body of classic literature pertinent to endodontics, including material relevant for board preparation. (Quarters 5-8.).

EN 513. Current Literature II. 4 Units.

In this course, residents review current endodontic literature using the EndoLit iPad app. (Quarters 5-8.).

EN 530. Clinic Connections II. 1 Unit.

The collaboration between endodontists and other members of the dental team is essential for good clinical outcomes. A series of presentations by clinicians with different training and expertise reinforces an inclusive view of typical and atypical treatment modalities. (Quarter 8.).

EN 558. Clinical Endodontics II. 48 Units.

Residents practice non-surgical endodontics appropriate in scope and case difficulty for the first year. (Quarters 5-8.).

EN 559. Clinical Endodontics: Surgery II. 7 Units.

Residents practice surgical endodontics appropriate in scope and case difficulty for the second year. (Quarters 5-8.).

EN 567. Endodontics at La Clinica II. 28 Units.

Residents practice non-surgical endodontics appropriate in scope and case difficulty for the second year at an affiliated extramural site. (Quarters 5-8.).

EN 571. Predoctoral Instruction. 8 Units.

Residents instruct predoctoral dental students in non-surgical endodontics. (Quarters 6-8.).

EN 611. Case Seminar III. 3 Units.

Residents review their own cases prepared according to ABE board documentation rules. (Quarter 9.).

EN 613. Current Literature III. 1 Unit.

In this course, residents review current endodontic literature using the EndoLit iPad app. (Quarter 9.).

EN 658. Clinical Endodontics III. 10.5 Units.

Residents practice non-surgical endodontics appropriate in scope and case difficulty for the third year. (Quarter 9.).

EN 659. Clinical Endodontics: Surgery III. 2 Units.

Residents practice surgical endodontics appropriate in scope and case difficulty for the third year. (Quarter 9.).

EN 671. Residency Instruction. 4 Units.

Senior residents instruct first-year residents in endodontic technique. (Quarter 9.).

EN 684. ABE Seminar. 3 Units.

Residents participate in mock board exams and assemble their portfolios. (Quarter 9.).

Integrated Reconstructive Dental Sciences (RDS)

Department Chair (interim)

Homayon Asadi

Associate Professor of Biomedical Sciences

Terry Edwin Hoover

Associate Professor of Dental Practice

Vice Chair, Clinical Education

Foroud F. Hakim

Assistant Professor of Integrated Reconstructive Dental Sciences

Vice Chair, Preclinical Education, Technology and Research

Parag R. Kachalia

Associate Professor of Integrated Reconstructive Dental Sciences

Director of Communication and Calibration

Shika Gupta

Assistant Professor of Integrated Reconstructive Dental Sciences

Director of DDS Preclinical Education

Jessie Virginia Stachowiak

Assistant Professor of Integrated Reconstructive Dental Sciences

Director of Implant Dentistry

Steven Judd Sadowsky

Professor of Integrated Reconstructive Dental Sciences

Director of Operative Dentistry

Patrick L. Roetzer

Assistant Professor of Integrated Reconstructive Dental Sciences

Director of Removable Prosthodontics

W. Peter Hansen

Associate Professor of Integrated Reconstructive Dental Sciences

Director of Research

Karen A. Schulze

Associate Professor of Integrated Reconstructive Dental Sciences

Director of Technology

Bina Surti

Assistant Professor of Integrated Reconstructive Dental Sciences

Faculty

A

Basil Al Shaikhly

Instructor of Integrated Reconstructive Dental Sciences

BDS, University of Baghdad School of Dentistry, 2006

DDS, Arthur A. Dugoni School of Dentistry, University of the Pacific, 2015

Bernadette A Alvear Fa

Assistant Professor of Integrated Reconstructive Dental Sciences

BS, University of the Pacific, Biology, 2003

DDS, University of the Pacific, Dentistry, 2006

National Academy of Sports Medicine, Exercise Physiology, Certified Personal Trainer, 2012

Women's Fitness Specialist (WFS), National Academy of Sports Medicine, Exercise Physiology for Women, 2014

Sara Anwar

Instructor of Integrated Reconstructive Dental Sciences

BS, University of Illinois at Chicago, Biological Sciences, 2007

DDS, University of Illinois at Chicago, Dentistry, 2011

Amy Shyuan Au

Assistant Professor of Integrated Reconstructive Dental Sciences

BA, University of the Pacific, Applied Sciences, 2009

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dental, 2012

MA, University of Illinois at Chicago College of Dentistry, Masters of Science, 2015

B

Rene A. Bagus

Instructor of Integrated Reconstructive Dental Sciences

DDS, University of the Pacific, 2001

Brian Baliwas

Instructor of Integrated Reconstructive Dental Sciences

BS, UC Davis, Biochemistry, 2005

DDS, University of the Pacific, School of Dentistry, Dentistry, 2014

William C. Barthold

Assistant Professor of Integrated Reconstructive Dental Sciences

BA, Indiana University, 1971

DDS, University of Michigan, 1975

Chetna Chadha Baveja

Assistant Professor of Integrated Reconstructive Dental Sciences

BDS, DAV Dental College, Dentistry, 1995

DDS, Pacific School of Dentistry, Dentistry, 2001

Bahareh Behdad

Instructor of Integrated Reconstructive Dental Sciences

BS, Azad University of Tehran, B.S. in General Biology, 2002

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 2012

MS, Concordia University, M.Sc. In Biology, 2006

Michelle Brady

Assistant Professor of Integrated Reconstructive Dental Sciences

BDS, Cardiff Dental School, Dentistry, 1994

Other, Dublin Dental School, Clinic Dentistry, 2004

Other, Dublin Dental School, Conscious Sedation, 2011

Philip M. Buchanan

Associate Professor of Integrated Reconstructive Dental Sciences

AA, Santa Monica City College, Pre-dental, 1963

DDS, University of Southern California, Dentistry, 1968

EdD, University of the Pacific, Dental Education, 2016

George E. Bunnell

Associate Professor of Integrated Reconstructive Dental Sciences

BS, University of San Francisco, Biology, 1962

DDS, College of Physician and Surgeons, University of the Pacific, Dentistry, 1967

C

Susan Caliri

Instructor of Integrated Reconstructive Dental Sciences

BS, University of San Francisco, Science, 1977

DDS, University of the Pacific, Arthur A. Dugoni School of Dentistry, Dentistry, 1985

V.A. Medical Center, San Francisco, General Practice Residency, 1986

Daniel M. Castagna

Assistant Professor of Integrated Reconstructive Dental Sciences

BA, University of the Pacific, Stockton, CA, Biology, 1978

DDS, University of the Pacific, Dentistry, 1981

Pedro A. Caturay

Assistant Professor of Integrated Reconstructive Dental Sciences

BS, San Francisco State University, Nursing, 1985
DDS, University of the Pacific School of Dentistry, Dentistry, 1991
University of the Pacific School of Dentistry, AEGD, 1992

Eric H. Chen

Instructor of Integrated Reconstructive Dental Sciences

BS, University of the Pacific, Biochemistry, 2002
DDS, University of the Pacific, Arthur A. Dugoni School of Dentistry, Dental Surgery, 2009
MS, University of the Pacific, Pharmacy and Chemistry, 2007
Other, University of the Pacific, Arthur A. Dugoni School of Dentistry, Certificate: Adv Education in General Dentistry, 2011

Jane Choi

Instructor of Integrated Reconstructive Dental Sciences

BA, University of NC at Chapel Hill, Anthropology, 2005
DDS, University of NC School of Dentistry, Dentistry, 2010
Other, Long Beach VAMC, Certificate of Residency / General Practice, 1011

Russell G. Choy

Assistant Professor of Integrated Reconstructive Dental Sciences

BA, University of California at Berkeley, Biology, 1984
DDS, University of the Pacific, 1987

Robert H. Christoffersen

Professor of Integrated Reconstructive Dental Sciences

BA, San Francisco State University, 1963
DDS, University of the Pacific, 1967
MA, University of the Pacific, 1980

Tom Collins

Assistant Professor of Integrated Reconstructive Dental Sciences

BS, University of Santa Clara, Biology, 1977
DDS, UOP School of Dentistry, 1983
MA, SF State University, Masters Biology, 1980

Megan Constant

Instructor of Integrated Reconstructive Dental Sciences

BS, California Polytechnic State University San Luis Obispo, Biology, 2011
DDS, UOP Dugoni, Dentistry, 2016
University of California Berkeley Extension, 2012

Carlos A Correa

Instructor of Integrated Reconstructive Dental Sciences

City College of San Francisco, 2015
College of Marin, 1983

Ryan Courtin

Instructor of Integrated Reconstructive Dental Sciences

BS, UCLA, BS Biology, 2010
DDS, UOP Dental, DDS, 2016

Steven Reed Curtis

Associate Professor of Integrated Reconstructive Dental Sciences

Bethesda National Naval Dental Center, Prosthodontic Specialty Certificate, 1992
Chanute Air Force Base, Air Force General Practice Residency, 1983
DDS, University of California, Los Angeles, Doctor of Dental Science, 1982
Peterson Area Dental Laboratory, 1996
Santa Rosa Junior College, 1977
University of California, Davis, 1978

D

Helen De Francesco

Instructor of Integrated Reconstructive Dental Sciences

BS, BA, UC Davis, Biological Sciences, Russian Literature, 2007
DDS, UOP, Dentistry, 2015

Andrew Demeyer

Assistant Professor of Integrated Reconstructive Dental Sciences
BS, UCSD, Biology, 1984
DDS, UoP school of Dentistry, Dentistry, 1988

Mina R. Desai

Assistant Professor of Integrated Reconstructive Dental Sciences
BDS, Gov. Dental College, Ahmedabad, India, Dentistry, 1987
DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 1991

Lori Doran-Garcia

Assistant Professor of Integrated Reconstructive Dental Sciences
BS, University of California, Los Angeles, Psychology, 1987
DDS, University of the Pacific School of Dentistry, General Dentistry, 1991

Stafford Justin Duhn

Assistant Professor of Integrated Reconstructive Dental Sciences
BA, University of California, Berkeley, 1981
DDS, University of the Pacific, 1984

E

Charles M. Eliason

Associate Professor of Integrated Reconstructive Dental Sciences
BS, University of California, Berkeley, Nutrition, 1967
DDS, University of California, San Francisco, 1971
MA, University of the Pacific, Education, 1979

Thomas C Ellerhorst

Assistant Professor of Integrated Reconstructive Dental Sciences
BS, University of San Francisco, Biology, 1972
DDS, University of the Pacific, Dentistry, 1977

Richard H. Evans

Assistant Professor of Integrated Reconstructive Dental Sciences
DDS, Washington University, Dentistry, 1964
University of Utah, Pre-dental/Biological Science, 1960

F

Gail E. Frick

Assistant Professor of Integrated Reconstructive Dental Sciences
BS, Scripps College, Biology, 1973
DMD, TUFTS University - School of Dental Medicine, Dentistry, 1977
Georgetown, Graduate Biology, 1974
UCLA, Prosthodontics Certificate, 1981

G

Michael V. Gamboa

Instructor of Integrated Reconstructive Dental Sciences
BA, University of the Pacific, 1985
DDS, University of the Pacific, 1988

Richard John Garcia

Assistant Professor of Integrated Reconstructive Dental Sciences
BS, University of San Francisco, 1971
DDS, University of California, Los Angeles, 1975
Veterans Administration Hospital, San Francisco, 1976

Marc J. Geissberger

Professor of Integrated Reconstructive Dental Sciences
BS, St. Mary's College of California, Bachelors of Science in Biology, 1988
CPT, National Academy of Sports Medicine, Exercise Physiology, 2009
DDS, Doctor of Dental Surgery, University of the Pacific, Dentistry, 1991
MA, University of the Pacific, Master of Arts in Educational Psychology, 1994

Darya Gertrudes Ghafourpour

Instructor of Integrated Reconstructive Dental Sciences
BA, University of California, Santa Cruz, Biology, 1992
DDS, University of the Pacific, 1996

Ernest G. Giachetti

Assistant Professor of Integrated Reconstructive Dental Sciences
BS, University of Santa Clara, 1963
DDS, University of the Pacific, 1967

Eduardo Eduardo Gonzalez

Assistant Professor of Integrated Reconstructive Dental Sciences
DDS, Universidad Evangelica, Dental Surgery, 1995
New York University, Prosthodontics Certificate of Completion, 1998
Pikos Implant Institute, Advanced Bone Grafting Procedures I II, 2009
Private Zahn Klinik Schloss Schellestein with Prof. Fouad Khoury, Olsberg, Germany, Bone augmentation Procedures soft tissue mngmt, 2008

Shika Gupta

Assistant Professor of Integrated Reconstructive Dental Sciences
BDS, GOA Dental College and Hospital, Dentistry, 1997
DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 2007
MDSC, University of Malaya, Faculty of Dentistry, 2001

H

Foroud F. Hakim

Assistant Professor of Integrated Reconstructive Dental Sciences
ADEA Leadership Institute, 2008
BS, San Jose State University, 1987
DDS, University of the Pacific, 1991
Louisiana State University, 1985
MBA, University of the Pacific, 1999

W. Peter Hansen

Associate Professor of Integrated Reconstructive Dental Sciences
BS, UOP Bachelor of Science Biology, 1966
DDS, University of the Pacific School of Dentistry, 1971
Mercy Hospital School of Medicine Technology, 1967
San Diego High School, 1962
UCSF Medical Center, 1973
University of Southern California School of Dentistry Advanced Prosthodontics, 1979

Heidi K. Hausauer

Assistant Professor of Integrated Reconstructive Dental Sciences
BA, University of the Pacific, 1982
DDS, University of the Pacific, 1985
VA Palo Alto, 1986

Vivian Huang

Instructor of Integrated Reconstructive Dental Sciences
BA, Creighton University, Communication Arts, 2000
DMD, Tufts University, Dentistry, 2005
University of California Los Angeles, AEGD Residency, 2006

I

Parvati Iyer

Assistant Professor of Integrated Reconstructive Dental Sciences
BDS, Madras Dental College (India), Dentistry, 1989
DDS, University of Michigan, Dentistry, 1998

K

Parag R. Kachalia

Associate Professor of Integrated Reconstructive Dental Sciences
BS, University of California, Davis, Physiology, 1998
DDS, University of the Pacific, Dentistry, 2001

Minor, University of California at Davis, Managerial Economics, 1998

Constantine J. Karsant

Instructor of Integrated Reconstructive Dental Sciences

BA, San Francisco State University, Health Sciences, 1981

DDS, University of the Pacific, Arthur A. Dugoni School of Dentistry, 1984

Courtney Kilkuts

Assistant Professor of Integrated Reconstructive Dental Sciences

BA, Princeton University, Psychology, 2010

DMD, University of Pennsylvania, Dentistry, 2014

Other, Abington Memorial Hospital, General Practice Dentistry, 2015

Junsik Kim

Assistant Professor of Integrated Reconstructive Dental Sciences

BS, Ohio State University, Molecular Genetics: Mathematics, 2006

DDS, Tufts University School of Dental Medicine, D.M.D., 2010

Other, University of California, San Francisco, Prosthodontics, 2013

Carol Kim

Assistant Professor of Integrated Reconstructive Dental Sciences

BA, University of Colorado, Boulder, Psychology, 2002

DDS, University of California, LA, Dentistry, 2008

MS, Columbia University, Prosthodontics, 2012

Other, Veterans Administration, Resident, 2009

Nicholas K. Kitajima

Instructor of Integrated Reconstructive Dental Sciences

BS, University of California, Davis, Physiology, 2001

DDS, University of the Pacific, School of Dentistry, General Dentistry, 2004

University of the Pacific, School of Dentistry, AEGD Dentistry, 2005

Alexander Kogan

Instructor of Integrated Reconstructive Dental Sciences

BA, University of San Francisco, Biology, 1996

DDS, University of the Pacific School of Dentistry, 1999

Linda Kuo

Instructor of Integrated Reconstructive Dental Sciences

BS, UC Berkeley, Molecular Cell Biology, 2007

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 2013

L

Eugene Edward LaBarre

Associate Professor of Integrated Reconstructive Dental Sciences

BA, Harvard University, 1973

DMD, Tufts University, 1977

MS, University of North Carolina, 1981

Mimi (Quynh-Mi) Le

Instructor of Integrated Reconstructive Dental Sciences

BA, University of California, Integrative Biology, 2006

DDS, University of the Pacific, Dentistry, 2014

PhD, LMC- Asian Health Services, AEGD, 2015

Jamie Grinnell Leach

Instructor of Integrated Reconstructive Dental Sciences

BS, University of Washington, Psychology, 2004

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 2013

MA, Stanford University, Psychology, 2006

Scripps College, 2001

Nancy Lee

Instructor of Integrated Reconstructive Dental Sciences

BS, University of California - Davis, Biological Sciences, 2006

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, General Dentistry, 2011

Josh Liu

Instructor of Integrated Reconstructive Dental Sciences

BS, University of California, Santa Barbara, Aquatic Biology, 2007

DDS, University of Pacific, Arthur A. Dugoni School of Dentistry, Dentistry, 2012

Kenneth Gregory Louie

Associate Professor of Integrated Reconstructive Dental Sciences

BA, University of California, Berkeley, Microbiology, 1985

DDS, University of the Pacific, Dentistry, 1988

MA, University of the Pacific, Education, 1994

Elliot Low

Instructor of Integrated Reconstructive Dental Sciences

DDS, University of the Pacific School of Dentistry, Dentistry, 1977

UCSF Postgraduate Temporomandibular Joint Disorder Program, 1989

UCSF, Implantology Study Group - (One Year Program), 1984

University of California, Berkeley, 1974

Jennifer Marie Low

Instructor of Integrated Reconstructive Dental Sciences

BS, Santa Clara University, Biology, 2008

DDS, University of the Pacific Arthur A Dugoni School of Dentistry, 2012

M

Joy Magtanong-Madrid

Instructor of Integrated Reconstructive Dental Sciences

BS, University of California, Irvine, CA, Classical Civilization, 2004

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Doctor of Dental Surgery, 2011

University of California, San Francisco, Post-Baccalaureate Certificate, 2007

Jason Matsushino

Instructor of Integrated Reconstructive Dental Sciences

BA, UC Santa Barbara, Japanese, 2003

DDS, UOP Dugoni Dental School, General Dentistry, 2008

Other, Weill Cornell, PGY-1 6PR, 2009

Olga Matveyeva

Instructor of Integrated Reconstructive Dental Sciences

Cert., Health Department of Odessa Regional State Boars of Certification, Dental Technician, 2013

Cert., Odessa Training School for Health Workers, Certificate of Completion, 1986

Other, Odessa Medical College #1, Dental Technician, 1977

Charles W. McGary

Instructor of Integrated Reconstructive Dental Sciences

University of Michigan, 1953

University of Michigan, DDS, 1957

James Edward Milani

Associate Professor of Integrated Reconstructive Dental Sciences

BA, University of the Pacific, Biology, 1979

DDS, University of the Pacific, 1982

Jeffrey P. Miles

Associate Professor of Integrated Reconstructive Dental Sciences

BA, University of California, Santa Barbara, CA, Biochemistry, 1976

BDS, University of California, San Francisco, Dental Services, 1980

DDS, University of California, San Francisco, CA, 1980

University of North Carolina, Institute for Teaching and Learning, 2007

University of Washington, Summer Institute in Clinical Dental Research Metho, 2006

Adam M Miller

Instructor of Integrated Reconstructive Dental Sciences

BS, University of California Davis, Man. Economics/ Psychology, 2006

DDS, UOP Dugoni, DDS(expected June 2016), 2016

San Francisco State University, Post Baccalaureate Pre-Health Professions, 2012

Arthur Muncheryan

Instructor of Integrated Reconstructive Dental Sciences

BSc, U.C. Irvine, Electrical Engineering, 1972

DDS, UCSF School of Dentistry, Dentistry, 1977

N

Farbod Bob Nadjibi

Instructor of Integrated Reconstructive Dental Sciences

AEGD, University of the Pacific, School of Dentistry, 2000

BS, University of California, Davis, Genetics, 1996

DDS, University of the Pacific, 1999

David Nisenboym

Instructor of Integrated Reconstructive Dental Sciences

BS, UC Davis, Biology, 2009

DDS, University of the Pacific, Arthur A. Dugoni School of Dentistry, Dentistry, 2013

Pascua Yaqui Dental Clinic, Tucson, AZ, 2014

Warden H. Noble

Professor of Integrated Reconstructive Dental Sciences

DDS, University of California, San Francisco, Dentistry, 1965

MS, University of Michigan, Ann Arbor, Restorative Dentistry, 1970

MS, University of Southern California, Education, 1968

University of California, Berkeley, Biology, 1961

P

Erika Peterson

Assistant Professor of Integrated Reconstructive Dental Sciences

BS, San Jose State University, Molecular Biology, 1976

DDS, University of the Pacific School of Dentistry, Dentistry, 1979

Other, USC School of Dental Hygiene, 1967

Donnie Poe

Instructor of Integrated Reconstructive Dental Sciences

Career Academy Vocational School, Dental Technology, 1968

Priya Prasannakumar

Assistant Professor of Integrated Reconstructive Dental Sciences

BDS, Pamashree Dr. D. Y. Patil Dental School, Dentistry, 2002

DDS, University of the Pacific, Dentistry, 2011

R

Gitta Radjaeipour

Associate Professor of Integrated Reconstructive Dental Sciences

DDS, University of the Pacific, School of Dentistry, Doctoral of Dental Surgery, 1992

EdD, University of the Pacific, Gladys L Benerd School of Education, Education administration and leadership EDD, 2009

San Jose State University, Pre-Dental, 1989

Lauren Yasuda Rainey

Instructor of Integrated Reconstructive Dental Sciences

BA, Wellesley College, East Asian Studies: Japanese language, 2006

DDS, University of Pacific Dugoni Dental School, Dentistry, 2011

Other, Tufts University School of Dental Medicine, General Practice Residency, 2012

Aneet Randhawa

Assistant Professor of Integrated Reconstructive Dental Sciences

BDS, Punjab Government Dental College and Hospital, 1988

MDS, Punjab Government Dental College and Hospital, 1992

Laura K. Reid

Assistant Professor of Integrated Reconstructive Dental Sciences

BS, University of California, Davis, Psychology, 1991

DDS, University of the Pacific, Doctorate of Dental Surgery, 2000
Flinders University, Australia, Education Abroad Program, 1989
Vanderbilt University, Doctor of Medicine, 1996

Patrick L. Roetzer

Assistant Professor of Integrated Reconstructive Dental Sciences
BS, University of Wisconsin, Experimental Psychology and Biology, 1970
DDS, Marquette University, Dentistry, 1974
Veterans Administration Medical Center, General Practice Resident, 1975

S

Steven Judd Sadowsky

Professor of Integrated Reconstructive Dental Sciences
BA, University of California, Los Angeles, Psychology, 1967
DDS, University of California, Los Angeles, DDS, 1971
University of Southern California School of Dentistry, Los Angeles, Certificate, Advanced Prosthodontic Education, 1983

Ladan Sahabi

Instructor of Integrated Reconstructive Dental Sciences
AS, Pierce College, Chemistry, 2006
BS, University of California Los Angeles, Biochemistry, 2009
DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Doctor of Dental Surgery, 2012

Leyla Sahabi

Instructor of Integrated Reconstructive Dental Sciences
BS, UCLA, Biology, 2008

Suzanne Saidi

Instructor of Integrated Reconstructive Dental Sciences
BA, Cal State University East Bay, Biochemistry, 1988
DDS, Pacific Dugoni School of Dentistry, Dentistry, 1991

Shiva Salehi

Instructor of Integrated Reconstructive Dental Sciences
BS, King's College London, Computer Science, 2004
DDS, UoP, Dentistry, 2014

Shirin Salehinia

Instructor of Integrated Reconstructive Dental Sciences
B.A., California State University, Northridge, 1990
D.D.S., University of California at San Francisco, 1995
Tufts University, Dental Sleep Medicine, 2013

Sima Salimi

Assistant Professor of Integrated Reconstructive Dental Sciences
BS, Fairleigh Dickinson University, Bachelors of Science in Biology, 1991
DDS, University of the Pacific, 1994., Doctor of Dental Surgery, 1994

Amin P Samadian

Instructor of Integrated Reconstructive Dental Sciences
DDS, Tehran Azad University School of Dentistry, Tehran, Iran, Dentistry, 2011

Eugene T. Santucci

Associate Professor of Integrated Reconstructive Dental Sciences
BS, Kings College, 1964
DDS, Temple University School of Dentistry, 1968
Foundation for Advanced Continuing Education, Certificate of Completion, 1977
MA, University of the Pacific, 1994
U.S. Navy Dental Internship, Certificate of Completion, 1969

Noelle M Santucci

Assistant Professor of Integrated Reconstructive Dental Sciences
BS, Marquette University, Dental Hygiene/Biology, 1985
DDS, University of the Pacific, 1991
MA, University of the Pacific, 1994

University of the Pacific, Advanced Education in General Dentistry Cert., 1992

Troy Schmedding

Assistant Professor of Integrated Reconstructive Dental Sciences

BA, University of Puget Sound, Bachelor of Science, 1990

DDS, University of the Pacific, 1993

Karen A. Schulze

Associate Professor of Integrated Reconstructive Dental Sciences

DDS, University of Leipzig, Germany, Dentistry, 1992

PhD, University of Leipzig, Germany, Oral Surgery, 1998

Post-doc, UC San Francisco, Post-Doc in Dental Materials, 2002

Roxanna R. Shafiee

Assistant Professor of Integrated Reconstructive Dental Sciences

BS, University of San Francisco, Biology, 1993

DDS, University of the Pacific, 1997

MSD, University of the Pacific, Orthodontics, 2009

Vishnu Shankar

Instructor of Integrated Reconstructive Dental Sciences

DDS, Fiji School of Medicine, Dentistry, 2013

DDS, University of the Pacific School of Dentistry, Dentistry, 1991

Nobel Biocare Dental Implant Mini-Residency, 2013

University of South Pacific, Preliminary Medical Science, 1981

Edward L. Shaw

Assistant Professor of Integrated Reconstructive Dental Sciences

BS, University of British Columbia, 1977

Cert, University of California, San Francisco, GPR, 1983

Cert, University of California, San Francisco, Prosthodontics, 1986

DDS, University of the Pacific, 1982

Dennis Daizo Shinbori

Associate Professor of Integrated Reconstructive Dental Sciences

AA, City College of San Francisco, 1970

BA, University of the Pacific, 1972

DDS, University of the Pacific, Dentistry, 1975

Brian Kent Sibbald

Instructor of Integrated Reconstructive Dental Sciences

AB, University of California, Berkeley, 1969

DDS, University of California, Los Angeles, 1973

Jessie Virginia Stachowiak

Assistant Professor of Integrated Reconstructive Dental Sciences

BS, University of the Pacific, Biological Sciences, 2001

Bureau of Medicine and Surgery, US Navy, AEGD certification, 2005

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 2004

Other, Academy of Academic Leadership, Center for Advancing Learning and Teaching, 2008

Other, Disney Leadership Institute, Leadership Excellence, 2012

Other, National Institutes of Health, Protecting Human Research Participants, 2008

Other, University of the Pacific Arthur A Dugoni School of Dentistry, Course Director Orientation, 2012

Cathrine Steinborn

Instructor of Integrated Reconstructive Dental Sciences

BA, UC Santa Barbara, Botany, 1978

DDS, UoP School of Dentistry, Dentistry, 1985

Other, Veterans Administration SF, General Practice Residency, 1986

Bina Surti

Assistant Professor of Integrated Reconstructive Dental Sciences

AEGD, Case Western Reserve University, AEGD, 1996

BS, Wayne State University, Biology, 1991

Case Western Reserve University, Fellowship, 1997

DDS, University of Detroit Mercy, Dentistry, 1995

T

Ulf Temnitzer

Assistant Professor of Integrated Reconstructive Dental Sciences

DDS, University of the Pacific, Dentistry, 2010

Other, University of Alabama at Birmingham, Graduate Prosthodontics, 2013

Sonoma State University, 2007

Konni Kawata Tittle

Instructor of Integrated Reconstructive Dental Sciences

CSUF, Biology, 1984

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 1989

Indiana University, Biology - Undergraduate, 1985

Indiana University, School of Dentistry, 1987

Alan K. Tong

Assistant Professor of Integrated Reconstructive Dental Sciences

BA, City University of New York City College, 1976

DDS, University of the Pacific, 1989

MBA, St. John's University, New York, NY, 1984

Chi Dinh Tran

Assistant Professor of Integrated Reconstructive Dental Sciences

DDS, Medical College of Virginia, 1979

University of California, San Francisco, Certificate in Prosthodontics, 1984

University of Richmond, 1973

V

Ian Peter van Zyl

Assistant Professor of Integrated Reconstructive Dental Sciences

BDS, King's College, School of Medicine and Dentistry, 1985

DDS, University of Detroit Mercy, 1997

MS, University of Michigan, Prosthodontics, 1992

Michael Viale

Assistant Professor of Integrated Reconstructive Dental Sciences

BS, UC Berkeley, Genetics, 1975

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 1979

Terry L. Vincent

Assistant Professor of Integrated Reconstructive Dental Sciences

BS, Arizona State University, Zoology, 1967

DDS, UCLA, Dentistry, 1971

W

Kevin S. Walker

Instructor of Integrated Reconstructive Dental Sciences

BS, Wheaton College, Bachelor of Science, degree in Biology, 2009

DDS, Native American Health Center, Advanced Education in Gen Dentistry Certificate, 2013

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Doctor of Dental Surgery, 2012

Sandra Arita Ward

Assistant Professor of Integrated Reconstructive Dental Sciences

BA, University of the Pacific, Sports Medicine, 1987

DDS, Pacific-Dugoni School of Dentistry, Dentistry, 1991

Alexandra A Wenzel

Instructor of Integrated Reconstructive Dental Sciences

BS, University of Wisconsin-Madison, Biology, 2012

DDS, UOP, DDS, 2015

Other, University of Wisconsin College, AAS, 2010

Erich Werner

Assistant Professor of Integrated Reconstructive Dental Sciences
BS, San Jose State University, Biology, 1984
DDS, U.O.P School of Dentistry, DDS, 1988

Richard H. White

Associate Professor of Integrated Reconstructive Dental Sciences
BA, Albion College, Biology, 1971
CalTeach I and CalTeach II, 2013
DDS, University of Michigan School of Dentistry, Dentistry, 1975
University of Washington, Summer Institute in Clinical Dental Research Metho, 2010
US Public Health Service, General Practice Dental Residency, 1976

George J. Wolff

Instructor of Integrated Reconstructive Dental Sciences
DDS, University of Washington, 1966
University of California(Berkeley), 1961

Debra A. Woo

Assistant Professor of Integrated Reconstructive Dental Sciences
AA, De Anza Community College, A.A., 1977
BS, University of California, Davis, Human Biology, 1979
DDS, University of the Pacific, Arthur A. Dugoni School of Dentistry, Dentistry, 1986
MA, San Jose State University, Health Sciences, 1983

Y

Nathan Yang

Assistant Professor of Integrated Reconstructive Dental Sciences
BS, University of California at Davis, Psychology and Biochemistry, 1998
DDS, University of the Pacific, Arthur A. Dugoni School of Dentistry, Dentistry, 2006

Adjunct Faculty

B

Curtis Barmby

Adjunct Instructor of Integrated Reconstructive Dental Sciences
American River College, AA Pre-Dental, 1967
DDS, UCSF School of Dentistry, Dentistry, 1971
Wadsworth VA Medical Center, Certificate in Fixed Prosthodontics, 1981
American Board of Prosthodontics, Diplomate, 1987

F

Michael Falkel

Adjunct Instructor of Integrated Reconstructive Dental Sciences
BS, State University of New York Albany, Chemistry/Biology, 1984
DDS, University of the Pacific, Dentistry, 1987

Richard A. Fitzloff

Adjunct Assistant Professor of Integrated Reconstructive Dental Sciences
San Jose State University, 1967
DDS, Marquette University School of Dentistry, Dentistry, 1972
Other, Veteran's Administration Hospital, Albany, New York, Certificate, General Dental Internship, 1973
Other, Veteran's Administration Hospital, San Francisco, CA, Certificate, Prosthodontic Residency, 1975

H

Farida Hakimi

Adjunct Assistant Professor of Integrated Reconstructive Dental Sciences
BS, Golden Gate University San Francisco, Health Services Management, 1990
San Francisco State University, Biology and Health Sciences, 1993
DMD, Tufts University Boston, DMD, 1997

J

Andrea Jordan

Adjunct Instructor of Integrated Reconstructive Dental Sciences
BS, UC Irvine, BS Biology/Microbiology, Biochemistry, 2004
DDS, NYU, Dentistry, 2009
Other, NYU, Certificate-Prosthodontics, 2012
Other, UCLA, Certificate-Maxillofacial Prosthodontics, 2013

K

Ron Noah Kaminer

Adjunct Assistant Professor of Integrated Reconstructive Dental Sciences
BA, SUNY Stonybrook, BA Psychology, 1985
DDS, SUNY Buffalo School of Dental Med., Dentistry, 1990
Other, Northshore Univ. Hospital, Residency, 1991
Other, Northshore Univ Hospital, Chief Resident, 1992

M

Steven Mansfield

Adjunct Associate Professor of Integrated Reconstructive Dental Sciences
BA, Colby College, Biology, 2012
DMD, Tufts School of Dental Medicine, Doctor of Dental Medicine, 2012
University of California, San Francisco, Postdoctoral Certificate in Prosthodontics, 2012

Donald Missirlian

Adjunct Assistant Professor of Integrated Reconstructive Dental Sciences
UCLA, 1961
DDS, Northwestern University Dental School, Dentistry, 1965
SF State, 1978
University of Iowa, School of Dentistry (Iowa City), Certificate of Specialty in Fixed Prosthodontics, 1981

Kathy Mueller

Adjunct Assistant Professor of Integrated Reconstructive Dental Sciences
BS, University of KY, 1974
MS, Pursue University, 1976
DMD, University of KY, 1980
VA UCSF, Prosthodontic Certificate, 1983

N

Molly P. Newlon

Adjunct Associate Professor of Integrated Reconstructive Dental Sciences
UCSB, General Education, 1973
BA, UCLA, Fine Arts/Dance, 1975
MA, UCLA, Dance Therapy, 1977
DDS, University of the Pacific, Dentistry, 1982
GPR Cert., Veterans Administration Hospital, general practice residency, 1983

P

Tim J. Patel

Adjunct Professor of Integrated Reconstructive Dental Sciences
BA, UC Berkeley, Psychology, 1991
DMD, Boston University Dental School, Dentistry, 1996

Fiorella L Potesta-Knoll

Adjunct Assistant Professor of Integrated Reconstructive Dental Sciences
DDS, U. San Marin De Porres Lima, Dentistry, 1998
MS, University of Alabama at Birmingham, Dental Science, 2005
University of Alabama at Birmingham, Graduate prosthodontist Program, 2005
University of Alabama Birmingham, Maxillofacial Prosthetics, 2006

S

Paresh Shah

Adjunct Assistant Professor of Integrated Reconstructive Dental Sciences
BSc, University of Manitoba, Microbiology, 1983
MSc, University of Manitoba, Physiology, 1987

DMD, University of Manitoba, Doctor of Dental Medicine, 1991
University of Manitoba Health Sciences Centre, Winnipeg, Hospital Internship Program, 1992
University of Minnesota, Post Graduate Program in Esthetic Dentistry, 2002
University of Buffalo (SUNY), Proficiency Certificate in Esthetic Dentistry, 2007

Course Descriptions

Predoctoral Courses

RDS 100. IPT I Technique. 1-10 Units.

RDS 125. Integrated Preclinical Professional Development I. 2 Units.

As a component of the Integrated Preclinical Reconstructive Dentistry curriculum, this course includes the continual formative evaluation of students' professionalism as well as assessments aimed to measure their critical evaluation and thought processes. Students are evaluated on a multitude of professional traits for the duration of the course including professional behavior, preparedness and organization, communication, self-assessment, critical thinking, time-management, teamwork and rapport, response to feedback, and engagement in learning. Students' strengths and weaknesses are evaluated frequently and reported to them in the form of a rubric by faculty who work closely with them in the laboratory environment. Students are expected to grow and show improvement in areas in which they are weak. Their critical thinking ability and growth is measured using assessments in both the laboratory and didactic sessions that allow students to showcase these integrated skills and thought processes such as OSCE's, oral examinations, portfolios and multidisciplinary capstone experiences. (Quarters 1-2.).

RDS 126. Integrated Preclinical Professional Development II. 4 Units.

As a component of the Integrated Preclinical Reconstructive Dentistry curriculum, this course includes the continual formative evaluation of students' professionalism as well as assessments aimed to measure their critical evaluation and thought processes. Students are evaluated on a multitude of professional traits for the duration of the course including professional behavior, preparedness and organization, communication, self-assessment, critical thinking, time-management, teamwork and rapport, response to feedback, and engagement in learning. Students' strengths and weaknesses are evaluated frequently and reported to them in the form of a rubric by faculty who work closely with them in the laboratory environment. Students are expected to grow and show improvement in areas in which they are weak. Their critical thinking ability and growth is measured using assessments in both the laboratory and didactic sessions that allow students to showcase these integrated skills and thought processes such as OSCE's, oral examinations, portfolios and multidisciplinary capstone experiences. (Quarters 3-4.).

RDS 130. Integrated Preclinical Concepts I. 4 Units.

As a component of the Integrated Preclinical Reconstructive Dentistry curriculum, this course will provide students with the factual knowledge needed to build a strong foundation for critical assessment, evidence-based practice and lifelong learning in the dental profession. Formative and summative assessment will be used to frequently appraise students' grasp of dental anatomy, dental materials science, occlusion, cariology, operative dentistry, fixed and removable prosthodontics, radiology, local anesthesia, implant dentistry, diagnosis and treatment planning. The assessments used will measure the students' ability not only to master concepts within a discipline, but to integrate concepts across disciplines. This didactic component enables the students to treat a family of patients with a strong foundation of dental fundamentals. (Quarter 1.).

RDS 131. Integrated Preclinical Concepts II. 4 Units.

As a component of the Integrated Preclinical Reconstructive Dentistry curriculum, this course will provide students with the factual knowledge needed to build a strong foundation for critical assessment, evidence-based practice and lifelong learning in the dental profession. Formative and summative assessment will be used to frequently appraise students' grasp of dental anatomy, dental materials science, occlusion, cariology, operative dentistry, fixed and removable prosthodontics, radiology, local anesthesia, implant dentistry, diagnosis and treatment planning. The assessments used will measure the students' ability not only to master concepts within a discipline, but to integrate concepts across disciplines. This didactic component enables the students to treat a family of patients with a strong foundation of dental fundamentals. (Quarter 2.).

RDS 132. Integrated Preclinical Concepts III. 4 Units.

As a component of the Integrated Preclinical Reconstructive Dentistry curriculum, this course will provide students with the factual knowledge needed to build a strong foundation for critical assessment, evidence-based practice and lifelong learning in the dental profession. Formative and summative assessment will be used to frequently appraise students' grasp of dental anatomy, dental materials science, occlusion, cariology, operative dentistry, fixed and removable prosthodontics, radiology, local anesthesia, implant dentistry, diagnosis and treatment planning. The assessments used will measure the students' ability not only to master concepts within a discipline, but to integrate concepts across disciplines. This didactic component enables the students to treat a family of patients with a strong foundation of dental fundamentals. (Quarter 3.).

RDS 133. Integrated Preclinical Concepts IV. 1 Unit.

As a component of the Integrated Preclinical Reconstructive Dentistry curriculum, this course will provide students with the factual knowledge needed to build a strong foundation for critical assessment, evidence-based practice and lifelong learning in the dental profession. Formative and summative assessment will be used to frequently appraise students' grasp of dental anatomy, dental materials science, occlusion, cariology, operative dentistry, fixed and removable prosthodontics, radiology, local anesthesia, implant dentistry, diagnosis and treatment planning. The assessments used will measure the students' ability not only to master concepts within a discipline, but to integrate concepts across disciplines. This didactic component enables the students to treat a family of patients with a strong foundation of dental fundamentals. (Quarter 4.).

RDS 137. Local Anesthesia. 2 Units.

This hands-on course will teach the pharmacological basis and basic injection techniques of dental local anesthesia. Topics include an overview of local and systemic complications, the pharmacology of local anesthetics, and presentation of an algorithm of how to overcome difficulties in mandibular blocks. This rotation should help students develop confidence and ease the anxiety of providing injections on patients. (Quarter 4.).

RDS 138. Advanced Restorative Technique. 2 Units.

This hands-on course, referred to as "A.R.T" block, utilizes extracted human teeth to simulate a multitude of clinical procedures. Students will perform advanced techniques focused on adhesive dentistry and digital dentistry. (Quarter 4.).

RDS 139. Clinical Transitions. 1 Unit.

A hands-on course focused on caries detection evaluation and removal techniques in extracted human teeth. Students will also participate in seminars that highlight Dugoni's clinical process and procedures relating to reconstructive dentistry. (Quarter 4.).

RDS 145. Integrated Preclinical Technique I: : Dental Anatomy. 2 Units.

As a component of the Integrated Preclinical Reconstructive Dentistry curriculum, students will be evaluated on their mastery of laboratory skills and simulation of reconstructive dentistry procedures as they relate to a "family" of patient cases presented in the course. Projects in this course include waxing teeth to partial and full contour using additive and subtractive techniques, and composite placement and amalgam carving. Occlusal principles are heavily emphasized as a key factor in successful mastery of dental anatomy. (Quarters 1-2).

RDS 146. Integrated Preclinical Technique I: Direct Restorative. 5 Units.

As a component of the Integrated Preclinical Reconstructive Dentistry curriculum, students will be evaluated on their mastery of laboratory skills and simulation of reconstructive dentistry procedures as they relate to a "family" of patient cases presented in the course. In this course, students use a caries-driven, minimally invasive approach to treating dental decay in the "family" of patients. Students are taught modern and classic preparations starting with sealants on a child "patient," and progress through minimally invasive resin-based preparations, larger resin-based preparations and ultimately learning GV black amalgam preparations. Students gain exposure to all types of anterior and posterior direct preparations and restorations including Classes I, II, III, IV, V. Occlusion and establishing the proper occlusal relationship is paramount. (Quarters 1-2).

RDS 147. Integrated Preclinical Technique I: Indirect Restorative. 4 Units.

As a component of the Integrated Preclinical Reconstructive Dentistry curriculum, students will be evaluated on their mastery of laboratory skills and simulation of reconstructive dentistry procedures as they relate to a "family" of patient cases presented in the course. Starting with all-ceramic preparations and progressing through PFM, gold and partial coverage restorations, an emphasis on conservation of tooth structure and maintaining or enhancing esthetics is woven through all projects. Students learn single tooth and multiple tooth rehabilitation. Projects increase in complexity throughout the year and treatment planning accompanies all projects. Ample time is spent on the adhesive protocols for cementation. Related topics included in this component are post and core placement, laboratory skills, and general dental procedures such as impression taking and model work. (Quarters 1-2).

RDS 155. Integrated Preclinical Technique II: Dental Anatomy. 3 Units.

As a component of the Integrated Preclinical Reconstructive Dentistry curriculum, students will be evaluated on their mastery of laboratory skills and simulation of reconstructive dentistry procedures as they relate to a "family" of patient cases presented in the course. Projects in this course include waxing teeth to partial and full contour using additive and subtractive techniques, and composite placement and amalgam carving. Occlusal principles are heavily emphasized as a key factor in successful mastery of dental anatomy. (Quarters 3-4).

RDS 156. Integrated Preclinical Technique II: Direct Restorative. 3 Units.

As a component of the Integrated Preclinical Reconstructive Dentistry curriculum, students will be evaluated on their mastery of laboratory skills and simulation of reconstructive dentistry procedures as they relate to a "family" of patient cases presented in the course. In this course, students use a caries-driven, minimally invasive approach to treating dental decay in the "family" of patients. Students are taught modern and classic preparations starting with sealants on a child "patient," and progress through minimally invasive resin-based preparations, larger resin-based preparations and ultimately learning GV black amalgam preparations. Students gain exposure to all types of anterior and posterior direct preparations and restorations including Classes I, II, III, IV, V. Occlusion and establishing the proper occlusal relationship is paramount. (Quarters 3-4).

RDS 157. Integrated Preclinical Technique II: Indirect Restorative. 5 Units.

As a component of the Integrated Preclinical Reconstructive Dentistry curriculum, students will be evaluated on their mastery of laboratory skills and simulation of reconstructive dentistry procedures as they relate to a "family" of patient cases presented in the course. Starting with all-ceramic preparations and progressing through PFM, gold and partial coverage restorations, an emphasis on conservation of tooth structure and maintaining or enhancing esthetics is woven through all projects. Students learn single tooth and multiple tooth rehabilitation. Projects increase in complexity throughout the year and treatment planning accompanies all projects. Ample time is spent on the adhesive protocols for cementation. Related topics included in this component are post and core placement, laboratory skills, and general dental procedures such as impression taking and model work. (Quarters 3-4).

RDS 173. Principles of Restorative Dentistry Lecture. 4 Units.

This course introduces students to operative dentistry and dental anatomy in a comprehensive, integrated format with an emphasis on clinical applications. Foundational knowledge of direct restorative materials is presented. Students learn about indications and principles of preparations for restoring teeth with amalgam and composite resins, including techniques for placement of the direct restorations. Additionally, correct ergonomics for a dental practitioner, hand piece techniques, rubber dam application and tooth morphology are covered. Emphasis is placed on the development of hand skills and self-evaluation of the student's own work. Development of critical thinking skills by students is achieved through two literature review projects. (Quarter 1.).

RDS 174. Complex Issues in Restorative Dentistry Lecture. 3 Units.

This second course in the series introduces the disciplines of fixed prosthodontics, dental anatomy, and occlusion. Various indirect restorative materials are presented. Sequencing treatment is incorporated through the use of simulated clinical patient cases. Students learn the rationale and criteria for full cast gold crowns and ceramic restorations, including the preparation designs for individual teeth and fixed partial dentures. Traditional impression techniques and provisional fabrications are also taught. Emphasis is placed on developing the student's hand skills needed to complete successful fixed prosthodontic preparations. (Quarter 2.).

RDS 175. Principles of Restorative Dentistry Lab. 5 Units.

This course introduces students to operative dentistry and dental anatomy in a comprehensive, integrated format with an emphasis on clinical applications. Foundational knowledge of direct restorative materials is presented. Students learn about indications and principles of preparations for restoring teeth with amalgam and composite resins, including techniques for placement of the direct restorations. Additionally, correct ergonomics for a dental practitioner, hand piece techniques, rubber dam application and tooth morphology are covered. Emphasis is placed on the development of hand skills and self-evaluation of the student's own work. Development of critical thinking skills by students is achieved through two literature review projects. (Quarter 1.).

RDS 179. Complex Issues in Restorative Dentistry Lab. 5 Units.

This second course in the series introduces the disciplines of fixed prosthodontics, dental anatomy, and occlusion. Various indirect restorative materials are presented. Sequencing treatment is incorporated through the use of simulated clinical patient cases. Students learn the rationale and criteria for full cast gold crowns and ceramic restorations, including the preparation designs for individual teeth and fixed partial dentures. Traditional impression techniques and provisional fabrications are also taught. Emphasis is placed on developing the student's hand skills needed to complete successful fixed prosthodontic preparations. (Quarter 2.).

RDS 183. Advanced Techniques in Restorative Dentistry Lecture. 3 Units.

The third course of the series continues with the disciplines of fixed prosthodontics, removable prosthodontics, and implant dentistry. Advanced restorative procedures, direct and indirect esthetic posterior restorations, and anterior esthetic reconstruction by creating a smile design and fabricating indirect porcelain veneers are covered. Treatment-planning fundamentals are introduced and concepts are integrated through the use of multiple simulated clinical patient cases. Emphasis is placed on the student's ability to apply principles taught in the first two quarters to simulated clinical situations. Clinical photography and digital impressions with hands-on training sessions are also taught. Additionally, students are given an introduction to implant dentistry that includes a hands-on session on implant impression techniques. A group research project is completed to further develop critical thinking on the part of the student. (Quarter 3.).

RDS 185. Advanced Techniques in Restorative Dentistry Lab. 5 Units.

The third course of the series continues with the disciplines of fixed prosthodontics, removable prosthodontics, and implant dentistry. Advanced restorative procedures, direct and indirect esthetic posterior restorations, and anterior esthetic reconstruction by creating a smile design and fabricating indirect porcelain veneers are covered. Treatment-planning fundamentals are introduced and concepts are integrated through the use of multiple simulated clinical patient cases. Emphasis is placed on the student's ability to apply principles taught in the first two quarters to simulated clinical situations. Clinical photography and digital impressions with hands-on training sessions are also taught. Additionally, students are given an introduction to implant dentistry that includes a hands-on session on implant impression techniques. A group research project is completed to further develop critical thinking on the part of the student. (Quarter 3.).

RDS 225. Integrated Preclinical Professional Development III. 5 Units.

In this course, students develop many skills that are important for success as a dental professional. These skills include professional behavior, preparedness and organization, communication, self-assessment, critical thinking, time-management, teamwork and rapport, response to feedback, and engagement in learning. Students' strengths and weaknesses are evaluated and reported to them in the form of a rubric by faculty who work closely with them in the laboratory and clinical environment. Students are expected to grow and show improvement in areas in which they are weak. Critical-thinking abilities and growth are measured using assessments in both the laboratory and didactic sessions that allow students to showcase these integrated skills and thought processes such as OSCE's, oral examinations, portfolios, seminars and case presentations. Clinical activities required during the course include Denture Block and Crown Block. (Quarters 5-7.).

RDS 230. Integrated Preclinical Concepts V. 2 Units.

This didactic course provides students with the foundational knowledge in removable prosthodontics needed to build a strong foundation for critical assessment, evidence-based practice, and lifelong learning in the dental profession. Formative and summative assessment will be used frequently to appraise students' grasp of principles related to the partially edentulous and fully edentulous patient. Course material includes the full scope of removable prosthodontic treatment for partially and completely edentulous patients, including patho-physiology of tooth loss; diagnosis and treatment planning for transitional and definitive removable dentures; fabrication of partial and complete dentures; follow-up, recall, and problem-solving for patients with removable dentures. (Quarter 5.).

RDS 231. Integrated Preclinical Concepts VI. 2 Units.

This didactic course provides students with the foundational knowledge in occlusion and implant dentistry needed to build a strong foundation for critical assessment, evidence-based practice, and lifelong learning in the dental profession. Formative and summative assessment will be used frequently to appraise students' grasp of occlusal principles related to the dentate, partially edentulous and fully edentulous patient. The concept of "idealized occlusion" is taught as a model to utilize when designing new restorations and larger restorative cases. Lectures on temporomandibular joint (TMJ) and muscle anatomy, occlusal exam, inter-occlusal records, marking media, bruxism, sleep disorders, and temporomandibular dysfunction (TMD) are provided. Course material also includes the full scope of implant treatment for partially and completely edentulous patients, including history and biophysiology of dental implants; diagnosis and treatment planning for implants; implant components and techniques; follow-up, recall, and problem-solving for patients with implant restorations. (Quarter 6.).

RDS 232. Integrated Preclinical Concepts VII. 3 Units.

This didactic course provides students with the foundational knowledge in dentistry needed to build a strong foundation for critical assessment, evidence-based practice, and lifelong learning in the dental profession. Formative and summative assessment will be used frequently to appraise students' grasp of occlusal principles related to evidence-based dentistry. Course material includes the temporomandibular joint (TMJ) and muscle anatomy, occlusal exam, inter-occlusal records, marking media, bruxism, sleep disorders, temporomandibular dysfunction (TMD), erosion, and para-functional habits and their effects on total dental wear as it relates to complex conformative and reorganized dentistry. (Quarter 7.).

RDS 235. Integrated Preclinical Technique III: Removable Prosthodontics. 3 Units.

In this course, students develop laboratory and clinical skills as related to removable prosthodontics. In the partially edentulous patient, students will gain technical experience with tooth replacement with a removable prosthesis. Students will apply biomechanical principles and fundamentals of survey and prosthesis design, including base, clasp, rest, minor connector, and major connector designs. For edentulous patients and those patients with hopeless dentition, students will learn the basic clinical and laboratory phases of complete denture fabrication including diagnosis, pre-prosthetic surgery, tissue conditioning, impression, cast fabrication, record base/rim, occlusal records, chair-side esthetic arrangement, articulator mounting, anterior artificial tooth arrangement, trial denture try-in, denture processing and finishing, denture insertion, prosthetic home care patient education, and prosthetic follow-up and recall, including relining/repair and laboratory communication. Students will prescribe optimal clinical materials to be used in prosthesis fabrication and diagnose biomechanical problems from simulated case scenarios. (Quarter 5).

RDS 236. Integrated Preclinical Technique IV: Occlusion and Implant Dentistry. 3 Units.

In this course, students develop laboratory and clinical skills in occlusion and implant dentistry. Students will gain technical experience in equilibrating occlusal prematurities, creating Smile Design wax-up, polymerized smile design and custom incisal guide table to understand the balance between occlusal factors and esthetics. This course provides students with the foundational knowledge needed for critical assessment during the occlusal exam, treatment planning, evidence-based practice, and encouragement of lifelong learning. Formative and summative assessment will be used frequently to appraise students' grasp of occlusion and implant principles and the use of that knowledge to perform laboratory and clinical procedures. The concept of "idealized occlusion" is taught as a model to utilize when designing new restorations and larger restorative cases. (Quarter 6.).

RDS 237. Integrated Preclinical Technique V: Advanced Reconstructive Techniques. 3 Units.

In this course, students develop laboratory and clinical skills as related to modern dentistry. Students will gain technical experience in veneer preparation and cementation procedures, various soft tissue management techniques, and the delivery and maintenance of an occlusal splint. Students are challenged to treatment plan and determine restorability of teeth in various dental situations utilizing periodontal, endodontic, and orthodontic parameters addressing the chief concerns from selected clinical case scenarios. (Quarter 7.).

RDS 277. Local Anesthesia. 1 Unit.

Students review basic anesthesia delivery techniques and apply them to a clinical situation. Students will learn new injection technique and how to overcome difficulties in mandibular anesthesia. In the self-study component, students will conduct independent research and summarize their findings in writing. (2 hours lecture, 6 hours clinical rotation, 10 hours self-study. Quarters 5-7.).

RDS 279. Clinical Restorative Dentistry I. 3 or 6 Units.

Study of diagnosis, treatment planning, and intracoronal dental therapy, including preparation for and restoration of teeth with cast gold and porcelain inlays and onlays, composite resins, laminates, and amalgam in comprehensive clinical dental practice. Requirements include practice of operative dentistry procedures under simulated state board examination conditions. These courses also cover the diagnosis, treatment planning, and delivery of fixed prosthodontic treatment that addresses the patient's esthetic dental needs; stabilizes, improves, and protects the patients' gnathostomatic system in a comprehensive clinical dental practice. Students participate in quality assessment at clinical impression stage and at prosthesis delivery. Lab Services coordinates student dental laboratory prescriptions with private outsource laboratories. Test cases determine student competency by evaluating their ability to independently prepare a single tooth crown preparation in a specified time period. (Quarters 5-8.).

RDS 281. Dental Implants. 1 Unit.

The study of modern implant dentistry with emphasis on history, the physiology of osseous integration, treatment planning, implant surgery, fabrication of single and multiple tooth fixed implant restorations and implant-supported removable overdentures, laboratory steps, maintenance and implant problems. Hard and soft tissue augmentation procedures will be studied along with esthetic concerns. (10 hours lecture and laboratory. Quarter 8.).

RDS 378. Clinical Restorative Dentistry II. 11 Units.

Study of diagnosis, treatment planning, and intracoronal dental therapy, including preparation for and restoration of teeth with cast gold and porcelain inlays and onlays, composite resins, laminates, and amalgam in comprehensive clinical dental practice. Requirements include practice of operative dentistry procedures under simulated state board examination conditions. These courses also cover the diagnosis, treatment planning, and delivery of fixed prosthodontic treatment that addresses the patient's esthetic dental needs; stabilizes, improves, and protects the patients' gnathostomatic system in a comprehensive clinical dental practice. Students participate in quality assessment at clinical impression stage and at prosthesis delivery. Lab Services coordinates student dental laboratory prescriptions with private outsource laboratories. Test cases determine student competency by evaluating their ability to independently prepare a single tooth crown preparation in a specified time period. (Quarters 9-10.).

RDS 379. Clinical Restorative Dentistry III. 12 Units.

Study of diagnosis, treatment planning, and intracoronal dental therapy, including preparation for and restoration of teeth with cast gold and porcelain inlays and onlays, composite resins, laminates, and amalgam in comprehensive clinical dental practice. Requirements include practice of operative dentistry procedures under simulated state board examination conditions. These courses also cover the diagnosis, treatment planning, and delivery of fixed prosthodontic treatment that addresses the patient's esthetic dental needs; stabilizes, improves, and protects the patients' gnathostomatic system in a comprehensive clinical dental practice. Students participate in quality assessment at clinical impression stage and at prosthesis delivery. Lab Services coordinates student dental laboratory prescriptions with private outsource laboratories. Test cases determine student competency by evaluating their ability to independently prepare a single tooth crown preparation in a specified time period. (Quarters 11-12.).

RDS 396. Clinical Removable Prosthodontics. 12 Units.

The study of diagnosis, treatment planning, and removable prosthodontic treatment that restores masticatory function and phonetics, preserves underlying structures, results in patient comfort, and is esthetically pleasing. Course includes practice for state board removable prosthodontic procedures and simulated examination conditions. (Quarters 9-12.).

Graduate Courses

RDS 484. Biomaterials I. 1 Unit.

This class focuses on restorative materials such as bonding systems, buildup composites and materials for crown and bridge fabrication. It also introduces new developments in biomaterial sciences. Basic material testing principles are discussed and the material properties for NiTi alloy used in endodontics are included. (Quarter 2.)

RDS 584. Biomaterials II. 1 Unit.

This class focuses on restorative materials such as bonding systems, buildup composites and materials for crown and bridge fabrication. It also introduces new developments in biomaterial sciences. Basic material testing principles are discussed and the material properties for NiTi alloy used in endodontics are included. (Quarter 6.)

Oral and Maxillofacial Surgery (OS)

Department Chairperson

A. Thomas Indresano

Professor of Oral and Maxillofacial Surgery

Faculty

A

Michael Ajayi

Associate Professor of Oral and Maxillofacial Surgery

BDS, University of Lagos College of Medicine and Dentistry, 1975

BSc, University of Toronto, Toronto, Canada, 1981

Henry Ford Hospital, Oral Maxillofacial Surgery, Detroit, Michigan, Chief Resident, 1983

University of Toronto, Oral and Maxillofacial Surgery, Resident, 1981

B

John A. Boghossian

Associate Professor of Oral and Maxillofacial Surgery

AA, City College of San Francisco, Biology, 1983

BA, San Francisco State University, Biology, 1984

DDS, University of California San Francisco, Dentistry, 1988

Harbor-UCLA Medical Center, Torrance, CA, Oral Surgery, 1995

Other, Memorial Sloan-Kettering Cancer Center, New York, NY, Dental Oncology Fellowship Certificate, 1990

Justin Bonner

Instructor of Oral and Maxillofacial Surgery

Amarillo College, Pre-dental Studies, 2005

BS, West Texas AM University, Biology, Summa Cum Laude, 2007

DDS, University of Texas Health Science Center at San Antonio, TX, Dentistry, Honors, 2012

Florida College, Pre-Dental Studies, 2006

D

Alfredo A. Dela Rosa

Assistant Professor of Oral and Maxillofacial Surgery

BS, University of California, San Francisco, Dental Sciences, 2004

DDS, University of California, San Francisco, Doctor of Dental Surgery, 2006

Massachusetts General Hospital, General Surgery, 2010

Massachusetts General Hospital, Oral Maxillofacial Surgery, 2012

MD, Harvard Medical School, Boston MA, Doctor of Medicine, 2009

Saint Ignatius College Preparatory, San Francisco, 1999

University of California, Davis: College of Biological Sciences, Biological Sciences, 2002

F

Jesse M. Fa

Instructor of Oral and Maxillofacial Surgery

BS, University of the Notre Dame, IN, Science, 2003

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 2006

PGY1 General Practice Residency VA/UCI Medical Center, Long Beach, Certificate, 2007

PGY2 General Practice Residency VA/UCLA Medical Center, LA, Certificate, 2008

University of Illinois at Chicago, Oral Surgery Internship, Certificate, 2010

Vincent Wayne Farhood

Associate Professor of Oral and Maxillofacial Surgery

Certificat, Wilford Hall USAF Medical Center, Oral Maxillofacial Surgery, 1978

DDS, University of Southern California, Dentistry, 1970

I

A. Thomas Indresano

Professor of Oral and Maxillofacial Surgery

AB, Boston University, Biology, 1967

DMD, Harvard University School of Dental Medicine, Dentistry, 1971
Vanderbilt University, Oral and Maxillofacial Surgery, 1974

J

Bahram Javid

Associate Professor of Oral and Maxillofacial Surgery

Diplomate, American Board of Oral and Maxillofacial Surgery, 1972

DMD, School of Dental Medicine, Tufts University, 1960

Eastman Dental Center, University of Rochester, Rochester, New York, USA, Clinical Fellow, 1958

Hilsea College (Basingstoke) U.K., School Certificate, Oxford University, U.K., 1951

Hospital of the University of Pennsylvania, Graduate School of Medicine, Pennsylvania, PA USA, Oral Surgery Residency Program, 1966

King's College Dental School (Durham University). Newcastle-upon-Tyne, U.K., Junior House Officer, 1957

King's College Dental School, 1957

L.D.S., King College (Durham University) Sutherland Dental School, Newcastle-upon-Tyne, U.K., Oral Surgery, 1956

Newcastle-on-Tyne Infirmary, England, Junior House Instructor, 1957

K

Sam F Khoury

Instructor of Oral and Maxillofacial Surgery

BS, Santa Clara University, Biology, 1999

DMD, University of Pittsburgh, Dental Medicine, 2005

L

Wendy Peiwen Liao

Instructor of Oral and Maxillofacial Surgery

BA, University of California, Berkeley, Molecular Cell Biology Emphasis in Neurobiology, 1999

BA, University of California, Berkeley, Music, 1999

DDS, University of California, Los Angeles, Degree Expected, 2004

Luis Ramon G. Limchayseng

Assistant Professor of Oral and Maxillofacial Surgery

BS, University of the East (Philippines), 1979

DMD, University of the Philippines College of Dentistry, 1983

M

Joseph Clarence McMurray

Assistant Professor of Oral and Maxillofacial Surgery

BS, Pt. Loma College, Biology, 1985

DMD, Washington University St. Louis, 1990

Len Tolstunov

Assistant Professor of Oral and Maxillofacial Surgery

DDS, Moscow Dental Institute, 1985

DDS, University of the Pacific, Graduated with honors (TAU KAPPA OMEGA), 1992

Moscow Trauma Hospital, Resident in the department of oral and maxillofaci, 1989

University of California, San Francisco, Oral and Maxillofacial Surgery residency, 1997

Adjunct Faculty

B

Michael Lawrence Beckley

Adjunct Assistant Professor of Oral and Maxillofacial Surgery

BS, Texas Christian University, Biology, 1992

DDS, Baylor College of Dentistry Texas A and M University, 1997

University of the Pacific School of Dentistry, Oral and Maxillofacial Surgery, 2002

Craig Yale Bloom

Adjunct Associate Professor of Oral and Maxillofacial Surgery

BA, Boston University, Biology, 1967

DMD, University of Pennsylvania Dental School, Dentistry, 1971

University of Pennsylvania, Anesthesiology, 1973

University of Pennsylvania, OMF Surgery, 1976

C

Michael E. Cadra

Adjunct Assistant Professor of Oral and Maxillofacial Surgery

BS, University of California, Irvine, Biological Sciences, 1975

Other, California State University, Fullerton, Graduate Research in Biochemistry, 1978

DMD, Washington University School of Dental Medicine, Dentistry, 1982

Los Angeles County/USC Medical Center, Oral and Maxillofacial Surgery, 1986

MD, University of Alabama School of Medicine, Medicine, 1993

Cottage Hospital, Santa Barbara, General Surgery, 1994

D

Donald Hayes Devlin

Adjunct Professor of Oral and Maxillofacial Surgery

University of California Berkeley, 1945

DDS, University of California San Francisco, 1949

Michael Dumas

Adjunct Associate Professor of Oral and Maxillofacial Surgery

DMD, Tufts University, 1956

PhD, University of California, 1964

E

Austin Eckard

Adjunct Instructor of Oral and Maxillofacial Surgery

BA, University of California, Berkeley, Molecular and Cell Biology, 2009

F

Alicia Follmar

Adjunct Instructor of Oral and Maxillofacial Surgery

BA, Stanford University, Human Biology, Molecular Physiology Disease Mech, 2009

Other, University of Southern California, Los Angeles County, Oral Maxillofacial Surgery (one week externship, 2012
Other, University of the Pacific, Highland Hospital, Department of Oral and Maxillofacial Surgery, 2012
DMD, Harvard School of Dental Medicine, Dentistry, Oral Maxillofacial Surgery, 2013

G

Paul C. George

Adjunct Assistant Professor of Oral and Maxillofacial Surgery
University of California, Santa Cruz, General - Biology, 1983
BA, University of California, Berkeley, Cell Biology, 1985
BSc, University of California, San Francisco, Dental Science, 1989
DDS, University of California, San Francisco, Dentistry, 1989
University of California, San Francisco, Certificate in Oral Maxillofacial Surgery, 1993

K

Touraj Khalilzadeh

Adjunct Instructor of Oral and Maxillofacial Surgery
BS, University of California, Irvine, Biological Sciences, 2002
DMD, University of Pennsylvania, Doctor of Dental Medicine, 2006
MD, University of Maryland School of Medicine, Doctor of Medicine, 2009
Other, University of Maryland Medical Center, R. Adams Cowley Shock Trauma Center, Oral Maxillofacial Surgery, 2012

Joseph S Kim

Adjunct Assistant Professor of Oral and Maxillofacial Surgery
BA, Oxford College at Emory University, Chemistry, 1985
DMD, Tufts University School of Dental Medicine, 1991
Montefiore Medical Center, Specialty Certificate, 1997

Michael Rudolph Knoll

Adjunct Instructor of Oral and Maxillofacial Surgery
BS, University of California Riverside, Biology, 1993
MS, Loma Linda University School of Dentistry, Doctorate Dental Surgery, 2001
University of Alabama Birmingham, OMS Certificate Internship, 2002
University of Alabama Birmingham, Medical Doctorate, 2004
Certificate, University of Alabama Birmingham, Internship General Surgery, 2005
Certificate, University of Alabama Birmingham, Oral Maxillofacial Surgery, 2007

L

Gregory Scott Lee

Adjunct Assistant Professor of Oral and Maxillofacial Surgery
BA, UOP Stockton, Stockton California, 1984
DDS, UOP School of Dentistry, 1987
Certificate, UOP Highland General Hospital, 1997

Wendy Peiwen Liao

Adjunct Instructor of Oral and Maxillofacial Surgery
BA, University of California, Berkeley, Molecular Cell Biology Emphasis in Neurobiology, 1999
BA, University of California, Berkeley, Music, 1999
DDS, University of California, Los Angeles, Degree Expected, 2004

M

Nima Massoomi

Adjunct Instructor of Oral and Maxillofacial Surgery
BS, St. Lawrence University, Cum Laude, Canton, New York, Bio/Chemistry, 1994
DMD, University of Pennsylvania School of Dental Medicine, Dental Medicine, 2001
Med, University of Pennsylvania Graduate School of Education, Masters of Education, 2001
Internship, Vanderbilt University Medical Center, Nashville, TN, General Surgery, 2005
MD, Vanderbilt University School of Medicine, Nashville, TN, Medicine, 2007
Residency, Vanderbilt University, Nashville, TN, Oral Maxillofacial Surgery, 2007
Fellowship, T. Williams Evans Fellowship Columbus, Ohio, Facial Cosmetics Surgery, 2008

David L McAninch

Adjunct Instructor of Oral and Maxillofacial Surgery
BS, California Polytechnic State University: San Luis Obispo, CA, Business Administration Management, 2008

DDS, University of Southern California, Dentistry, 2012

Craig D McDow

Adjunct Assistant Professor of Oral and Maxillofacial Surgery

BS, Oregon State University, Zoology, 1977

Portland State University, Adaptive Physiology, 1978

DMD, Oregon Health Sciences University, Dentistry, 1982

GPR, USAF Keesler AFB, General Dentistry, 1983

MS, University of Michigan Hospitals, Oral Maxillofacial Surgery, 1989

N

Yuko Christine Nakamura

Adjunct Assistant Professor of Oral and Maxillofacial Surgery

BS, Duke University Trinity College, Durham, NC, Major: Cell Molecular Biology, Minor: Chemistry, 1999

DMD, Case Western Reserve University School of Dental Medicine, Cleveland, OH, Doctor of Medical Dentistry, 2004

MD, Columbia University College of Physicians Surgeons, NY, Doctor of Medicine, 2007

Columbia University Medical Center, New York, NY, General Surgery Internship, 2008

Columbia University Medical Center, New York, NY, Oral Maxillofacial Surgery Certificate, 2010

Ned Leonard Nix

Adjunct Associate Professor of Oral and Maxillofacial Surgery

BS, University of California, Davis, Agricultural and Managerial Economics, 1986

DDS, University of the Pacific, Arthur A. Dugoni School of Dentistry, Dentistry, 1995

Certificate, General Practice Residency, St. Luke's Roosevelt Hospital Center, 1996

Certificate, Oral and Maxillofacial Surgery, St. Luke's Roosevelt Hospital Center, 2000

MA, University of the Pacific, Gladys Benerd School of Education, Dental Education, 2015

P

David B. Poor

Adjunct Associate Professor of Oral and Maxillofacial Surgery

BA, Windham College, English/Economics, 1974

University of Massachusetts, Graduate Non-Degree Program, Zoology, 1979

DMD, Tufts University, 1982

United States Air Force, Keesler AFB, Mississippi, 1983

R

Terry Rust

Adjunct Instructor of Oral and Maxillofacial Surgery

BS, University of Oregon, 1962

DDS, St. Louis University Dental School, Dentistry, 1967

County Hospital NY Intern, 1968

North Wellling Hospital, 1969

NYU Post Grad Oral Surgery, Oral Surgery, 1970

S

Roger W. Sachs

Adjunct Assistant Professor of Oral and Maxillofacial Surgery

BS, Parsons College, Biology, 1964

MS, Northeastern University, Physiology, 1966

DMD, Temple University, Dentistry, 1970

Beth Israel Hospital, OMFS, 1971

Lincoln Hospital, Albert Einstein College of Medicine, Oral Maxillofacial Surgery, 1974

Benjamin R. Shimel

Adjunct Instructor of Oral and Maxillofacial Surgery

BA, Saint Mary's College of California, Integral Program of Liberal Arts, 2002

Other, California San Francisco State University, Biology, 2009

Other, Cal Berkeley Extension, Biology, 2010

University of California, San Francisco, Externship, 2012

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 2013

Alireza Michael Sodeifi

Adjunct Assistant Professor of Oral and Maxillofacial Surgery

DMD, Harvard School of Dental Medicine, Dentistry, 1997
Vanderbilt University Medical Center, Intern, Oral Surgery, 1998
Vanderbilt University Medical Center, Resident, General Surgery, 2001
Vanderbilt University Medical Center, Resident, Oral Surgery, 2002
Vanderbilt University Medical Center, Chief Resident, Oral Surgery, 2003
MD, Vanderbilt University School of Medicine, Dentistry, 2007

W

Stephen Takashi Gong Wat

Adjunct Instructor of Oral and Maxillofacial Surgery

BS, University of California, Los Angeles, California, Microbiology, Immunology, and Molecular Genetics, 2003

Highland General Hospital, Oakland, California, Attended grand rounds, 2004

University of Washington, Harborview Hospital - observer, Observer, 2004

LSU Health Sciences Center, Charity Hospital, 2005

University Medical Center, Fresno, California, 2005

DDS, University of Pacific, Arthur A. Dugoni School of Dentistry, San Francisco, California, 2006

Course Descriptions

Predoctoral Courses

OS 139. Preclinical Multidisciplinary Surgery. 1 Unit.

Study of the principles of mucoperiosteal flap design, biopsy techniques, suturing, use of flaps, bone removal, and tooth sectioning for exodontia; apicoectomy in endodontic surgery and osseous surgery. Soft tissue grafting in periodontics will also be demonstrated. (7.5 hours lecture, 4 hours laboratory. Quarter 4.)

OS 239. Clinical Oral and Maxillofacial Surgery I. 1 Unit.

Oral and maxillofacial surgical treatment planning and treatment including routine exodontia, incision and drainage, biopsy, mucoperiosteal flap design, sectioning of teeth, and bone removal; utilizing accepted procedures for asepsis; and patient preparation, positioning, and management including obtaining patients' informed consent and proper consideration for medically compromised patients. The student learns to assume responsibility for recognizing limitations of their competence and to refer patients who need more complex surgical treatment to a specialist. (Quarters 5-8.)

OS 339. Clinical Oral and Maxillofacial Surgery II. 2 Units.

Oral and maxillofacial surgical treatment planning and treatment including routine exodontia, incision and drainage, biopsy, mucoperiosteal flap design, sectioning of teeth, and bone removal; utilizing accepted procedures for asepsis; and patient preparation, positioning, and management including obtaining patients' informed consent and proper consideration for medically compromised patients. The student learns to assume responsibility for recognizing limitations of their competence and to refer patients who need more complex surgical treatment to a specialist. (Quarters 9-12.)

Graduate Courses

OS 434. Implant Seminar I. 4 Units.

In this implant treatment-planning seminar, endodontics residents discuss case presentations and treatment planning options. The focus will be on evidence-based treatment options. (Quarters 1-4.)

OS 439. Advanced Oral Surgery and Implantology I. 3 Units.

This hands-on course provides endodontics residents the foundational and practical knowledge of treatment planning and placement. (Quarters 3-4.)

OS 534. Implant Seminar II. 4 Units.

In this implant treatment-planning seminar, endodontics residents discuss case presentations and treatment planning options. The focus will be on evidence-based treatment options. (Quarters 5-8.)

OS 634. Implant Seminar III. 1 Unit.

In this Implant treatment-planning seminar, endodontics residents discuss case presentations and treatment planning options. The focus will be on evidence-based treatment options. (Quarter 9.)

Orthodontics (OR)

Department Chairperson

Robert L. Boyd

Professor of Orthodontics

Program Director

HeeSoo Oh

Associate Professor of Orthodontics

Clinical Director

M. Gabrielle Thodas

Assistant Professor of Orthodontics

Director of the Pre-doctoral Program

Mohamed S. Fallah

Associate Professor of Orthodontics

Director of the Craniofacial Research Instrumentation Laboratory (CRIL)

Sheldon Baumrind

Professor of Orthodontics

Associate Director of the Craniofacial Research Instrumentation Laboratory (CRIL)

HeeSoo Oh

Associate Professor of Orthodontics

Director of the Cleft Lip and Palate Prevention Program

Marie Milena Tolarova

Professor of Orthodontics

Faculty

A

Maryse M. Aubert

Associate Professor of Orthodontics

DDS, University Paris V, Dentistry, 1976

MA, University of the Pacific, Education, 1994

MA, University of the Pacific, Psychology and Counseling, 1994

University of California, San Francisco, Certificate of Participation - Temporomandibular, 1996

University of the Pacific, Orthodontics, 1980

University Paris VII, Embriology, 1976

B

Sheldon Baumrind

Professor of Orthodontics

BS, New York University, Chemistry, 1943

DDS, New York University, College of Dentistry, Dentistry, 1947

MS, Oregon Health Sciences University, Cell Biology, 1968

U. Oregon Dental School, Certificate in Orthodontics, 1966

Roger P. Boero

Associate Professor of Orthodontics

DDS, College of Physicians Surgery (UOP), Dentistry, 1964

MSD, University of the Pacific, Orthodontics, 1995

Pomona College, 1960

University of the Pacific, Orthodontics, 1975

Robert L. Boyd

Professor of Orthodontics

CERT, University of Pennsylvania, Orthodontics, 1974

CERT, University of Pennsylvania, Periodontics, 1972

DDS, Temple University, Dentistry, 1970

Indiana University, Biology, 1966
Med, University of Florida, Dental Education, 1981

F

Mohamed S. Fallah

Associate Professor of Orthodontics

BSD, University of London, UK, Dental Surgery, 1969
MSD, University of Pittsburgh, Dental Science, 1976
University of Pittsburgh, Certificate - Clinical Internship, 1974
University of Pittsburgh, Certificate - Orthodontics, 1976

K

Katherine Kieu

Instructor of Orthodontics

BS, University of California, Los Angeles, Biology, 2005
DDS, University of California, San Francisco, Dentistry, 2009
MSD, University of the Pacific, Orthodontics, 2012

M

Kimberly A Mahood

Assistant Professor of Orthodontics

BS, University of Louisville, Biology, 2000
DMD, University of Kentucky College of Dentistry, Dentistry, 2004
MSD, University of the Pacific Arthur A. Dugoni School of Dentistry, Orthodontics, 2010
University of Kentucky College of Dentistry, Oral and Maxillofacial Surgery, 2005
University of the Pacific Arthur A. Dugoni School of Dentistry, Advanced General Dentistry, 2007

O

HeeSoo Oh

Associate Professor of Orthodontics

Chonnam National University Hospital, Korea, Pediatric Dentistry, 1992
DDS, Chonnam National University School of Dentistry, Korea, Dentistry, 1989
MS, Chonnam National University, School of Dentistry, Korea, Pediatric Dentistry, 1992
MSD, University of the Pacific, Arthur A. Dugoni, School of Dentistry, Orthodontics, 2005
PhD, Chonnam National University, School of Dentistry, Korea, Oral Biology, 1999
University of the Pacific, School of Dentistry, Graduate Residency Program - AEGD, 2001

P

Joorok Park

Assistant Professor of Orthodontics

BA, University of California, Berkeley, Molecular and Cell Biology, 2001
DMD, University of Pennsylvania, School of Dental Medicine, Dental Medicine, 2006
MSD, University of the Pacific, Arthur A. Dugoni School of Dentistry, Certificate, Orthodontics, 2008

T

M. Gabrielle Thodas

Assistant Professor of Orthodontics

BS, Oregon State University, Biology, 1972
DDS, University of the Pacific, General Dentistry, 1977
MSD, University of the Pacific, Orthodontics, 1995

Miroslav Tolar

Associate Professor of Orthodontics

MD, Charles University School of Medicine, 1965
PhD, Czechoslovak Academy of Sciences Charles University School of Medicine, Postgraduate Program in Physiology, 1970
University of California in San Francisco, Postgraduate course in biostatistics biomodeling, 1993

Marie Milena Tolarova

Professor of Orthodontics

Board Cert, Postgraduate Medical Institute, Prague, Czechoslovakia, Medical Genetics, Board Certificate, 1985
Board Cert, Postgraduate Medical Institute, Prague, Czechoslovakia, Pediatrics, Board Certificate, 1985

DSc, Czechoslovak Academy of Sciences, Prague, Czechoslovakia, Medical Genetics, 1986
Gymnasium, Tabor, Czechoslovakia, College education, 1959
MD, Charles University School of Medicine, Medicine, 1965
PhD, Czechoslovak Academy of Sciences Charles University School of Medicine, Prague, Czechoslovakia, Human Genetics, 1979

Walied Touni

Instructor of Orthodontics

BDS, CAIRO University, Cairo, Egypt, dentistry, 1994
Cairo University, Egypt, prosthodontics, 1998
Cairo University, Egypt, General Practice Residency, 1995
Faculty of Sciences, Cairo, Egypt, Preliminary Natural Sciences (certificate), 1990
MSD, University of the Pacific, Arthur A. Dugoni School of Dentistry, orthodontics, 2012

Y

Jennifer Yau

Instructor of Orthodontics

BS, University of the Pacific, Biology, 2009
DDS, University of California, Los Angeles, Doctor of Dental Surgery,, 2013
MSD, University of the Pacific, Arthur A. Dugoni School of Dentistry, icate in Orthodontics,, 2015

Adjunct Faculty

A

Arash Abolfazlian

Adjunct Assistant Professor of Orthodontics

BS, California Polytechnic State University, San Luis Obispo, Industrial Technology and Biology, 2007
DDS, University of the Pacific, Dentistry, 2011
MSD, University of the Pacific, Orthodontics, 2013

Hesham Amer

Adjunct Assistant Professor of Orthodontics

BDS, Cairo University (Cairo, Egypt), General Dentistry, 1995
MS, University of the Pacific School of Dentistry, Orthodontics, 2001

Christopher Anderson

Adjunct Assistant Professor of Orthodontics

BS, Santa Clara University, Biology, 2001
DDS, University of the Pacific, Dentistry, 2004
MSD, University of the Pacific, Orthodontics, 2006

Maryse M. Aubert

Adjunct Assistant Professor of Orthodontics

DDS, University Paris V, Dentistry, 1976
University Paris VII, Embriology, 1976
University of the Pacific, Orthodontics, 1980
MA, University of the Pacific, Education, 1994
MA, University of the Pacific, Psychology and Counseling, 1994
University of California, San Francisco, Certificate of Participation - Temporomandibular, 1996

B

Kathleen M. Bales

Adjunct Assistant Professor of Orthodontics

BA, University of the Pacific, Applied Science, 2000
DDS, University of the Pacific, Dentistry, 2003
MS, UCLA School of Orthodontics, M.S. in Oral Biology, 2006

Thomas Reed Bales

Adjunct Assistant Professor of Orthodontics

University of California Davis, 1971
DDS, University of the Pacific, School of Dentistry, Dental, 1974
certificat, UCLA, Orthodontics, 1976

Carol T. Bongiovanni

Adjunct Assistant Professor of Orthodontics

BS, Rensselaer Polytechnic Institute, Biology, 1989
DMD, Tufts University School of Dental Medicine, Magna Cum Laude, 1993
Cert, Tufts University School of Dental Medicine, Orthodontics, 1995

Matthew K Bruner

Adjunct Assistant Professor of Orthodontics
Interlake High School, 1990
BS, Pacific Lutheran University, Biology, 1994
DDS, Loma Linda University School of Dentistry, Dentistry, 1998
Army, Flight Surgeon Primary Course, 2000
MS, University of Louisville, Orthodontics, 2004

C

Sean K. Carlson

Adjunct Assistant Professor of Orthodontics
BA, University of California, Santa Barbara, Biology, 1989
DMD, Harvard School of Dental Medicine, Dentistry, 1994
MS, University of California, San Francisco, Oral Biology, 1998
University of California, San Francisco, Orthodontics Certificate, 1998

Kevin W. Carrington

Adjunct Assistant Professor of Orthodontics
BS, St. Mary's College, Moraga, CA, 1980
DDS, University of California, Los Angeles, CA, Dentistry, 1984
MA, Howard University, Washington DC, Orthodontics, 1987

Thad Champlin

Adjunct Associate Professor of Orthodontics
AA, Santa Monica College, Pre-Dent, 1963
BS, Cal State University Long Beach, Zoology (Pre-Dent), 1965
DDS, USC, Dentistry, 1969
MSD, University of the Pacific, Orthodontics, 1984

Vanessa Chong

Adjunct Instructor of Orthodontics
Other, Appleby College, 2006
Other, University of Western Ontario, Honours Pathology and Toxicology Program, 2009
DDS, University of Toronto, Doctor of Dental Surgery (awarded with honours), 2013

Lani Chun

Adjunct Assistant Professor of Orthodontics
BS, University of Utah, Major: Sociology Minor: Chemistry, 1994
DDS, New York University College of Dentistry, Doctor of Dental Surgery, 1999
Bronx Lebanon Hospital Center, Hospital Based General Practice, 2000
MSD, University of the Pacific, Orthodontics, 2008

Sarah Chung

Adjunct Assistant Professor of Orthodontics
BS, University of the Pacific, Biological Sciences, 2003
DDS, University of California San Francisco, dental, 2007
MSD, University of the Pacific, orthodontics, 2012

William A Cole

Adjunct Associate Professor of Orthodontics
BA, Washington and Jefferson College, Biology, 1981
DMD, New Jersey Dental School, Dental, 1983
Cert, University of California, San Francisco, Orthodontics, 1986

D

Sam W. Daher

Adjunct Assistant Professor of Orthodontics
DCS, Vanier College, Health Sciences, 1988
McGill University, Pre-Dentistry, 1990
DDS, McGill University, Dentistry, 1994

MS, Universite de Montreal, Orthodontics, 2006

Bill Dischinger

Adjunct Assistant Professor of Orthodontics

Lake Oswego High School, 1990

BS, Oregon State University, Pre Dental, 1994

DMD, Oregon Health Sciences University, Dentistry, 1997

Tufts University, Certificate in Orthodontics, 1999

Terry Dischinger

Adjunct Associate Professor of Orthodontics

DDS, Univ. Of Tennessee, 1973

Univ. Of Oregon, Orthodontics, 1977

Steven A. Dugoni

Adjunct Professor of Orthodontics

DMD, Tufts University, 1979

MSD, University of the Pacific, 1981

F

Daniel Frey

Adjunct Instructor of Orthodontics

Gettysburg College, Focus in Biology, 2006

University of Pittsburgh, Focus in Biology, Pre-Dental Concentration, 2009

DMD, Temple University - Kornberg School of Dentistry, Dentistry, 2013

Stuart Lund Frost

Adjunct Assistant Professor of Orthodontics

Eastman School of Dentistry, Certificate in TMJD, 1988

Arizona State University, 1989

Mesa Community College, 1989

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dentistry, 1992

University of Rochester, Eastman Dental Center, Certificate in Orthodontics, 2000

Robert W Fry

Adjunct Associate Professor of Orthodontics

DDS, U of Missouri Kansas City, 1973

MS, Univ of North Carolina, Orthodontics, 1977

G

Elyse Garibaldi

Adjunct Instructor of Orthodontics

Archbishop Mitty High School, 2004

BS, University of California Los Angeles, biology, 2008

DDS, University of Southern California, School of Dentistry, dentistry, 2012

MSD, University of the Pacific, Arthur A. Dugoni School of Dentistry, orthodontics, 2014

Garry G Gast

Adjunct Assistant Professor of Orthodontics

BS, Oregon State Univ., 1967

San Francisco State, 1968

DDS, University Of Detroit, 1972

Cert., Univ. of Calif. San Francisco, Orthodontics, 1977

John P. Gibbs

Adjunct Associate Professor of Orthodontics

BS, University of Nebraska, Nebraska, 1954

DDS, University of Nebraska Medical Center, Nebraska, Doctor of Dental Surgery, 1956

Other, University of Nebraska, Nebraska, Orthodontics, 1960

Jonathan Gluck

Adjunct Instructor of Orthodontics

BS, University of Michigan, BioPsychology, 2008

DDS, University of the Pacific, Arthur A. Dugoni School of Dentsitry, dentistry, 2012

MSD, University of the Pacific, Arthur A. Dugoni School of Dentistry, orthodontics, 2014

Robert E Griffin

Adjunct Assistant Professor of Orthodontics
Univ. of Colorado, 1959
DDS, Northwestern Univ, 1963
Columbia University, Orthodontics, 1968

Cheryl Guerrero

Adjunct Instructor of Orthodontics
BS, Cal Poly, San Luis Obispo, Business Administration, 2003
DDS, UC San Francisco, Dentistry, 2013

Nadim Guirguis

Adjunct Instructor of Orthodontics
University of Nevada Las Vegas, Biology, 2007
DMD, University of Nevada Las Vegas School of Dental Medicine, dentistry, 2011

H

Robert S. Haeger

Adjunct Instructor of Orthodontics
University of Michigan, 1983
MS, University of Illinois At Chicago, Orthodontics, 1989
DDS, University of Michigan, Dental, 2011

Stephen J. Hannon

Adjunct Assistant Professor of Orthodontics
BS, Washington Lee University, Chemistry, 1971
DDS, Georgetown University, Dentistry, 1975
MS, West Virginia University, Orthodontics, 1978

Harry H. Hatasaka

Adjunct Associate Professor of Orthodontics
University of Colorado, 1947
DDS, Northwestern University, 1954
U.S. Public Health Service Hospital, 1955
MSD, University of Washington, 1960

David C. Hatcher

Adjunct Associate Professor of Orthodontics
BA, Central Washington State College (1969), Biology
Columbia Basin Comm. College, Pasco, Washington (1967), Biology
DDS, University of Washington, Seattle (1973), Dentistry
M.R.C.D., University of Toronto, Ontario Canada (1983), Oral Radiology
M.Sc., University of Toronto, Ontario Canada (1983), Oral Radiology
University of Vermont Medical Center (1976), General Practice Residency
University of Washington, Seattle (1965), Biology
University of Washington, Seattle (1968), Biology
Wesern Washington State College (1969), Biology

I

Timothy D Irish

Adjunct Assistant Professor of Orthodontics
BA, Univ. Of CA San Diego, 06/1987, 1987
DDS, Univ. of the Pacific, 06/1990, 1990
Univ. of the Pacific, Orthodontics, 1992

K

Paul M Kasrovi

Adjunct Professor of Orthodontics
BS, University of Southern Cal (USC), Biomedical Engineering, 1984
MS, University of Pennsylvania, Electrical Engineering, 1986
DDS, UCSF, Dental Sciences, 1992

MS, UCSF, orthodontics, oral biology, 1995

Rebecca B Keller

Adjunct Assistant Professor of Orthodontics

Livermore High School, High School Diploma, 1993

University of Southern California, 1995

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, dentistry, 1998

certificat, Harvard - Wide General Practice Residency, Hospital Based General Practice Residency, 1999

BA, University of the Pacific, Applied Sciences (awarded in 2000), 2000

certificat, University of the Pacific Arthur A. Dugoni School of Dentistry, orthodontics, 2003

MSD, University of the Pacific Arthur A. Dugoni School of Dentistry, orthodontics, 2003

L

Jordan Lamberton

Adjunct Assistant Professor of Orthodontics

BS, University of California Irvine, sociology, 2005

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, dentistry, 2009

MSD, University of Colorado: Denver School of Dental Medicine, orthodontics, 2012

Jetson Scott Lee

Adjunct Assistant Professor of Orthodontics

AB, University of California, Berkeley, CA, Biological Sciences

DDS, University of the Pacific, School of Dentistry, Dentistry

MSD, University of the Pacific, School of Dentistry, Orthodontics

Victor S. Lee

Adjunct Instructor of Orthodontics

Beijing University, completed two courses of Chinese (Mandarin) Language, 2002

BS, University of California, Davis, Neurology, Physiology and Behavior: Exercise Biol, 2007

Kyoto Seika University, completed three courses of Japanese Language, 2007

DDS, University of California, Los Angeles School of Dentistry, Dentistry, 2011

MSD, University of the Pacific, Orthodontics, 2013

Donald W. Linck II

Adjunct Assistant Professor of Orthodontics

DDS, University of California School, San Francisco, 1963

Columbia University, Orthodontics, 1965

Kenny Liu

Adjunct Instructor of Orthodontics

BS, University of California Irvine, biology, 2002

DDS, University of the Pacific, dentistry, 2005

University of the Pacific, Craniofacial Genetic Research Fellow, 2011

M

Justin Maccaro

Adjunct Instructor of Orthodontics

BS, Boston College, Biology, Chemistry, 2009

DMD, Harvard School of Dental Medicine, DMD, 2013

Laura Mancini

Adjunct Instructor of Orthodontics

Other, McGill University, Pre Dental in Health Science, 2009

DMD, McGill University, Dentistry, 2013

MSD, University of the Pacific, Arthur A. Dugoni School of Dentistry, Orthodontics, 2015

Cameron K. Mashouf

Adjunct Associate Professor of Orthodontics

DDS, University of Tehran, Dentistry, 1967

University of California, Berkeley, Physiology, 1970

Loyola University, Chicago, Certificate in Orthodontics, 1972

Laurie McCullough

Adjunct Instructor of Orthodontics

Diablo Valley College, 2005

University of Queensland, Australia, year-long undergraduate study abroad program, 2006
BS, University of California, Davis, biological sciences, 2007
DDS, University of the Pacific, Arthur A. Dugoni School of Dentistry, dentistry, 2011
University of Florida, orthodontic internship, 2012
MSD, University of the Pacific, Arthur A. Dugoni School of Dentistry, orthodontics, 2014

Setareh Mozafari

Adjunct Assistant Professor of Orthodontics
DDS, Azad University, School of Dentistry, Dental, 2001
DDS, University of Southern California, School of Dentistry, Dental, 2005
University of Rochester, Eastman Dental Center, Orthodontics and Dentofacial Orthopedics, 2007

P

Cheol-Ho Paik

Adjunct Associate Professor of Orthodontics
DDS, Seoul National University, Dental College, Dentistry, 1983
PhD, Tsurumi University, Dental School, Orthodontics, 1990

Sheetal Patil

Adjunct Assistant Professor of Orthodontics
College of Engineering, Electrical Engineering, 1990
BDS, Govt. of Dental College Hospital, Dentistry, 1996

Iroshini Perera

Adjunct Instructor of Orthodontics
BS, University of California Los Angeles, Psychobiology, 2004
DDS, University of Southern California, School of Dentistry, dentistry, 2012
MSD, University of the Pacific Arthur A. Dugoni School of Dentistry, Orthodontics, 2014

Thomas R. Pitts

Adjunct Associate Professor of Orthodontics
DDS, University of the Pacific, 1965
MSD, University of Washington, 1970
University of Washington, Certificate, 1970

John M. Pobanz

Adjunct Assistant Professor of Orthodontics
Utah State University, Predental Studies
Weber State University, Predental Studies
DDS, University of Nebraska College of Dentistry, dental, 1996
MS, University of Nebraska College of Dentistry, orthodontics, 1998

Jesse Punch

Adjunct Instructor of Orthodontics
BSc, University of Massachusetts Amherst, Biology, 2009
DMD, Tufts University School of Dental Medicine, Dentistry, 2013
MSD, University of the Pacific, MS in dentistry, 2015

R

Sarah Rashid

Adjunct Assistant Professor of Orthodontics
BDS, Kings College London, Dentistry, 1993
Royal College of Surgeons of England, Orthodontics Pediatric Dentistry, 1996
MSc, University of London, Orthodontics, 2001
Royal College of Surgeons of England, Orthodontics, 2002

W. Ron Redmond

Adjunct Associate Professor of Orthodontics
BA, U C Riverside, Zoology, 1962
DDS, University of the Pacific, Dentistry, 1966
MS, University of Southern California, Orthodontics, 1970

Michael R. Ricupito

Adjunct Associate Professor of Orthodontics
BA, San Jose State University, Biological Science, Psychology minor, 1980

DDS, University of the Pacific School of Dentistry, Dentistry, 1983
MS, University of California at Los Angeles School of Dentistry, Oral Biology, 1987
University of California at Los Angeles School of Dentistry, Certificate in Orthodontics, 1987

Straty S. Righellis

Adjunct Associate Professor of Orthodontics

DDS, University of California, Los Angeles, 1971
MSD, University of California, Los Angeles, 1973

Charlene Rocha

Adjunct Instructor of Orthodontics

AA, Chabot College, Hayward California, liberal arts, 2006
BS, University of California, San Diego, biology, 2008
DDS, University of California, San Francisco School of Dentistry, dentistry, 2012
MSD, University of the Pacific, Arthur A. Dugoni School of Dentistry, orthodontics, 2014

Bert D. Rouleau

Adjunct Assistant Professor of Orthodontics

BS, University of Vermont, Zoology, Botany, 1975
DMD, Tufts University, Dentistry, 1978
MS, Northwestern University, Pediatric Dentistry, 1980
MSD, University of the Pacific, Orthodontics, 1982

Bertrand Aaron Rouleau

Adjunct Instructor of Orthodontics

Tufts University, 2003
BA, University of San Diego, Psychology, 2007
Other, University of San Francisco, Biological Sciences, 2007
DDS, University of the Pacific, Dentistry, 2011

S

L. William Schmohl

Adjunct Assistant Professor of Orthodontics

BS, University of California Berkeley, Business Admin, 1966
U.S. Naval Hospital, Oakland, CA, Externship, 1969
DDS, University of California San Francisco, Dentistry, 1970
MS, Case Western Reserve University, Orthodontics, 1974

Kenneth Shimizu

Adjunct Assistant Professor of Orthodontics

BS, University of California, Berkeley, Biology, 1980
DDS, University of the Pacific, Dentistry, 1985
MSD, University of the Pacific, Orthodontics, 1987

V

Adrian M. Vogt

Adjunct Assistant Professor of Orthodontics

BS, University of Western Ontario, Pharmacology Toxicology, 1988
DDS, University of the Pacific School of Dentistry, General Dentistry, 1992
MSD, University of the Pacific School of Dentistry, Orthodontics, 1994
University of the Pacific School of Dentistry, Certificate in Orthodontics, 1994

W

Eric C. Wu

Adjunct Assistant Professor of Orthodontics

BS, Revelle College, University of California San Diego, Biochemistry/Cell Biology, 1995
DMD, University of Pennsylvania, School of Dental Medicine, 2000
University of California Los Angeles, Advanced Education in General Dentistry, 2001
Katz Graduate School of Business, University of Pittsburgh, MBA Certificate program, 2004
University of Pittsburgh, Orthodontics and Dentofacial Orthopedics, 2005

Course Descriptions

Predoctoral Courses

OR 144. Human Growth and Development. 1 Unit.

Study of the basic mechanisms of human growth and development with emphasis on craniofacial development. Study of the development of the dentition and occlusion and introduction to malocclusion and its classification. (10 hours lecture. Quarter 3.).

OR 244. Orthodontics. 2 Units.

An introduction to orthodontic diagnostic procedures, comprehensive treatment planning, and various treatment modalities as applied to a full range of malocclusions in a general dental practice. A strong emphasis is placed on the use of the Invisalign appliance and its application in general practice. Other orthodontic appliances covered will be the functional appliance as it relates to early orthodontic treatment and the edgewise appliance in full comprehensive cases. Orthognathic surgical cases and use of microimplants for anchorage will also be reviewed. (20 hours lecture. Quarters 4-5.).

OR 249. Preclinical Orthodontics. 1 Unit.

This preclinical course introduces students to various removable and fixed appliances with primary focus on their application for minor orthodontic movement. Laboratory instruction addresses such areas as fabrication of removable and fixed appliances, cementation of bands, bonding of brackets and placement of arch wires. Lateral head films are traced, measured, analyzed, and discussed with regard to norms and growth patterns. The course also introduces students to 3-D computer technology for the manufacturing of the Invisalign system appliance and the use of this appliance in general practice. Emphasis is placed on critical self-evaluation skills. (12 hours seminar. Quarter 8.).

OR 348. Applied Orthodontics. 1 Unit.

A study of standard orthodontic records and their application to diagnosis, treatment planning, and treatment evaluation in the mixed and permanent dentitions. Lateral head films are traced, measured, analyzed, and discussed with regard to norms and growth patterns. Facial soft tissue surface mapping using volumetric imaging technology and 3-D imaging software will be introduced. Students will present cases incorporating dental records, study models, cephalometric analysis, photographs, arch length and tooth size discrepancy analysis to explain diagnostic, treatment planning, and treatment procedures. (12 hours seminar, 6 hours graduate orthodontic clinic. Quarters 9-10.).

Graduate Courses

OR 401. Cephalometrics. 4 Units.

This course introduces students to the use of cephalometric radiographs in clinical orthodontics. Students will learn basic principles of cephalometry, the historical significance of cephalometry, and how to interpret various cephalometric analyses that are most commonly used in diagnosis and treatment planning. At the end of this course, students should be able to perform various methods of superimposition in order to identify and understand changes that occurred during growth and treatment between different lateral cephalometric radiographs. (Quarters 1-2.).

OR 402. Facial Growth. 4 Units.

This course reviews scientific literature covering basic biological principles on craniofacial growth and development. This course focuses on the basic mechanisms of postnatal growth of the cranium, nasomaxillary complex and mandible, and the clinical application of facial growth principles. (Quarters 3-4.).

OR 403. Critical Thinking. 3 Units.

In this course, students will learn foundational knowledge on scientific methods, design a sound research project and critically evaluate literature in their area. (Quarters 2-4.).

OR 404. Research Practicum and Thesis I. 4 Units.

In this independent research course, students work with research mentors to develop research questions, formulate hypotheses and write a formal research proposal that includes a full literature review, statement of material and methods, execution of the research, and appropriate analysis and interpretation of data. This course is designed to enable successful completion of the MS thesis. (Quarters 1-4.).

OR 410. Biomechanics. 7 Units.

This seminar-based course introduces fundamental concepts for understanding the laws of mechanics and biological responses to force systems used in orthodontic force systems and appliances. (Quarters 1-4.).

OR 411. Craniofacial Biology & Genetics. 6 Units.

In order to build a solid foundation for clinical orthodontic treatment, this course specifically focuses on human craniofacial growth and development and on craniofacial genetics, helping students to understand concepts related to the nature and control of normal and abnormal craniofacial growth. The course is divided into three consecutive quarters: Normal Human Growth and Development (1Q), Advanced Basic Science (2Q), Abnormal Growth and Development (3Q). (Quarters 1-3.).

OR 412. Cleft Lip & Palate/Craniofacial Anomalies. 2 Units.

The course focuses on introducing a multidisciplinary approach to treating patients with cleft lip and palate and other craniofacial anomalies (CFA). A state-of-the-art approach in the management of CFA patients is based on current literature and seminars covering etiology and epidemiology, recurrence risk, and primary prevention. While this course emphasizes orthodontics (which includes naso-alveolar molding), surgical treatment, speech problems and psychological issues are also covered. (Quarter 4.).

OR 413. Cleft Medical Missions Seminar. 2 Units.

This course consists of seminars and practical exercises in making appliances to prepare residents to be actively involved in the treatment of patients with cleft lip and palate and other craniofacial anomalies by participating in medical and dental missions in developing and undeveloped countries. (Quarters 1-2.).

OR 414. Introduction to Contemporary Orthodontics. 5 Units.

This course introduces basic artistic skills in contemporary orthodontics. Students will review the basic concepts of photography, direct bonding of fixed appliances, 3D imaging, 3D cephalometric analysis, and digital imaging software (2D and 3D). (Quarters 1-4.).

OR 420. Bone Biology. 1 Unit.

This seminar course is designed for first year residents to review basic concepts and theories of bone biology, orthodontic tooth movement, and osseointegration of orthodontic microimplants. (Quarter 4.).

OR 421. Current Literature Seminar I. 4 Units.

In this seminar series, students review articles appearing in orthodontic and related journals. (Quarters 1-4.).

OR 422. Anatomy. 1 Unit.

This course provides a detailed review of anatomic structures of the craniofacial region. Lecture topics include osteology of the skull, innervation and blood supply of the face, muscles of facial expression and mastication, and anatomy of the oral cavity. (Quarter 1.).

OR 423. Comprehensive Case Analysis Seminar I. 4 Units.

Topics in this seminar series include the clinical application of various diagnostic procedures and treatment philosophies, the presentation of practical procedures in the management of unusual problems that can arise during the course of treatment, basic and applied principles of photography, and advances in computer technology. (Quarters 1-4.).

OR 424. Treatment Planning Seminar I. 4 Units.

In this seminar series, first-year residents prepare a case presentation to share initial diagnostic records to diagnose and treatment plan orthodontic cases. All students then participate in free-format discussion. (Quarters 1-4.).

OR 426. Principles of Orthodontic Technique. 5 Units.

This course is designed to provide basic principles on orthodontic tooth movement and fixed appliances by working on typodonts. (Quarters 1-2.).

OR 430. Surgical-Orthodontic Treatment. 6 Units.

This seminar-based course covers basic concepts involved in surgical orthodontics, which include diagnosis and treatment planning, pre-surgical orthodontics, surgical procedures utilized by oral surgeons, and post-surgical orthodontics. Topics such as TMJ disorders, Distraction Osteogenesis, and Obstructive Sleep Apnea are also discussed. (Quarters 1-4.).

OR 431. Orthognathic Surgery Seminar I. 4 Units.

This seminar series for the orthodontic and oral surgery residents emphasizes diagnosis, treatment planning, management of pre- and post-surgical orthodontic treatment, and understanding of treatment outcome and stability. This course consists of case presentations by the Orthodontic and Oral and Maxillofacial Surgery faculty and residents. (Quarters 1-4.).

OR 432. Multidisciplinary Seminar I. 4 Units.

This seminar series covers treatment of patients with complex dental and skeletal orthodontic, periodontal, and restorative problems that require input from a variety of dental specialties. The teaching format includes case presentations by the residents and open discussions of interdisciplinary topics. (Quarters 1-4.).

OR 433. Retention Seminar I. 1 Unit.

In this seminar series, each second-year resident presents on a long-term post-retention patient whose active orthodontic treatment was completed at least ten years prior to the resident's year of graduation from the program. All students and faculty then participate in discussion. (Quarter 4.).

OR 434. Introduction to Invisalign. 1 Unit.

The purpose of this course is to introduce basic knowledge on clinical applications of Invisalign treatment, while also incorporating the latest treatment protocols. (Quarter 1.).

OR 456. Clinical Orthodontics I. 30 Units.

This series provides clinical experience in treating orthodontic patients with a variety of problems. Various orthopedic appliances, including the headgear, face mask, rapid maxillary expander and other fixed auxiliary appliances (LLA, TPA, Wilson distalizer) may be incorporated into specific treatment protocols. Topics also include other appliance systems such as edgewise appliance (.018 & .022" slot), TAD, self-ligating brackets, fixed-functional appliance (Herbst, Forsus), and Invisalign for adolescent and adult patients. (Quarters 1-4.).

OR 457. Mixed Dentition Orthodontics I. 8 Units.

This series provides clinical experience in treating various malocclusions in the mixed dentition stage. This course covers facial growth and occlusal development in the mixed dentition, diagnosis and treatment planning for mixed dentition cases, and evaluating growth changes and treatment outcomes. (Quarters 1-4.).

OR 458. Surgical Orthodontics I. 2 Units.

This series provides clinical experience in analyzing diagnostic records, formulating surgical orthodontic treatment plans for patients with major skeletal and dental disharmonies, integration of surgical and orthodontic treatment, communication with surgeons, pre-and post-surgical orthodontic treatment, and evaluation of treatment outcomes. (Quarters 1-4.).

OR 459. Clinical Orthodontics in Craniofacial Anomalies I. 2 Units.

In this series, students will provide orthodontic treatment to patients with craniofacial anomalies in the graduate clinic and attend panels provided by comprehensive KAISER and Oakland Children's Hospital Craniofacial Anomalies Teams. (Quarters 1-4.).

OR 501. Principles of Orthodontics. 8 Units.

In this literature-based seminar, residents participate in discussion with emphasis on the critical analysis and evaluation of the scientific methodology in the literature reviewed, and the clinical application of the material. Topics include Principles of Orthodontics Introduction, Biomechanics, Facial growth, Retention & Relapse, Functional appliances, Intraoral forces, Mandibular motion & Tooth contact, Maxillo-Mandibular references, and Occlusal treatment objectives. (Quarters 5-8.).

OR 502. Microimplant & Bone Biology I. 6 Units.

This course provides comprehensive review of the factors related to safety and stability of orthodontic microimplants and their clinical application in orthodontic treatment. Students will present their own clinical cases that utilized microimplants. (Quarters 5-7.).

OR 503. Research Design I. 4 Units.

This advanced course covers the nature of hypothesis testing, the process of clinical decision making, and the statistical methodology to be employed in each student's thesis project. (Quarters 5-8.).

OR 504. Research Practicum and Thesis II. 4 Units.

In this independent research course, students work with research mentors to develop research questions, formulate hypotheses and write a formal research proposal that includes a full literature review, statement of material and methods, execution of the research, and appropriate analysis and interpretation of data. This course is designed to enable successful completion of the MS thesis. (Quarters 5-8.).

OR 510. Periodontic-Orthodontic Relations. 8 Units.

The first part of this course covers the Orthodontic-Restorative-Periodontal Interface, including esthetic and functional considerations, periodontal and other benefits of two-phase orthodontic treatment, clinical considerations of orthodontic root resorption, periodontal considerations in the orthodontic treatment of impacted teeth, and Invisalign treatment. The second part of this course covers the latest innovations from Invisalign and their application to Complex class, I, II, and III Malocclusions. (Quarters 5-8.).

OR 511. Practice Management I. 3 Units.

This course covers basic concepts of practice management, including human resource management, management systems, marketing, legal aspects of orthodontics, associateships/practice ownership, and customer service. The format of this course includes guest lectures by orthodontists, orthodontic consultants, and other professionals connected to the specialty of orthodontics, as well as private practice office visits. (Quarters 6-8.).

OR 512. Preparation for Specialty Examination. 1 Unit.

This course will prepare students for the American Board of Orthodontics written exam by reviewing basic sciences and clinical concepts in orthodontics. (Quarter 7.).

OR 513. TMD & Orthodontics. 1 Unit.

This course covers the ramifications of orthodontic treatment on the stomatognathic system, the intricacies of the interrelationship between the occlusion and the TMJ, and basic management of TMD symptoms. (Quarter 5.).

OR 521. Current Literature Seminar II. 4 Units.

In this seminar series, students review articles appearing in orthodontic and related journals. (Quarters 5-8.).

OR 523. Comprehensive Case Analysis Seminar II. 4 Units.

Topics in this seminar series include the clinical application of various diagnostic procedures and treatment philosophies, the presentation of practical procedures in the management of unusual problems that can arise during the course of treatment, basic and applied principles of photography, and advances in computer technology. (Quarters 5-8.).

OR 524. Treatment Planning Seminar II. 4 Units.

In this seminar series, first-year residents prepare a case presentation to share initial diagnostic records to diagnose and treatment plan orthodontic cases. All students then participate in free-format discussion. (Quarters 5-8.).

OR 531. Orthognathic Surgery Seminar II. 4 Units.

This seminar series for the orthodontic and oral surgery residents emphasizes diagnosis, treatment planning, management of pre- and post-surgical orthodontic treatment, and understanding of treatment outcome and stability. This course consists of case presentations by the Orthodontic and Oral and Maxillofacial Surgery faculty and residents. (Quarters 5-8.).

OR 532. Multidisciplinary Seminar II. 4 Units.

This seminar series covers treatment of patients with complex dental and skeletal orthodontic, periodontal, and restorative problems that require input from a variety of dental specialties. The teaching format includes case presentations by the residents and open discussions of interdisciplinary topics. (Quarters 5-8.).

OR 533. Retention Seminar II. 1 Unit.

In this seminar series, each second-year resident presents on a long-term post-retention patient whose active orthodontic treatment was completed at least ten years prior to the resident's year of graduation from the program. All students and faculty then participate in discussion. (Quarter 8.).

OR 556. Clinical Orthodontics II. 40 Units.

This series provides clinical experience in treating orthodontic patients with a variety of problems. Various orthopedic appliances, including the headgear, face mask, rapid maxillary expander and other fixed auxiliary appliances (LLA, TPA, Wilson distalizer) may be incorporated into specific treatment protocols. Topics also include other appliance systems such as edgewise appliance (.018 & .022" slot), TAD, self-ligating brackets, fixed-functional appliance (Herbst, Forsus), and Invisalign for adolescent and adult patients. (Quarters 5-8.).

OR 557. Mixed Dentition Orthodontics II. 8 Units.

This series provides clinical experience in treating various malocclusions in the mixed dentition stage. This course covers facial growth and occlusal development in the mixed dentition, diagnosis and treatment planning for mixed dentition cases, and evaluating growth changes and treatment outcomes. (Quarters 5-8).

OR 558. Surgical Orthodontics II. 2 Units.

This series provides clinical experience in analyzing diagnostic records, formulating surgical orthodontic treatment plans for patients with major skeletal and dental disharmonies, integration of surgical and orthodontic treatment, communication with surgeons, pre-and post- surgical orthodontic treatment, and evaluation of treatment outcomes. (Quarters 5-8).

OR 559. Clinical Orthodontics in Craniofacial Anomalies II. 2 Units.

In this series, students will provide orthodontic treatment to patients with craniofacial anomalies in the graduate clinic and attend panels provided by comprehensive KAISER and Oakland Children's Hospital Craniofacial Anomalies Teams. (Quarters 5-8).

OR 601. Temporomandibular Joint Disorders. 1 Unit.

This course provides an overview of clinical anatomy and mechanics of the TMJ, pathogenesis of degenerative TMD disorders, and various approaches on the management of TMD. (Quarter 9).

OR 602. Microimplant & Bone Biology II. 1 Unit.

This course provides comprehensive review of the factors related to safety and stability of orthodontic microimplants and their clinical application in orthodontic treatment. Students will present their own clinical cases that utilized microimplants. (Quarter 9).

OR 603. Research Design II. 1 Unit.

This advanced course covers the nature of hypothesis testing, the process of clinical decision making, and the statistical methodology to be employed in each student's thesis project. (Quarter 9).

OR 604. Research Practicum and Thesis III. 6 Units.

In this independent research course, students work with research mentors to develop research questions, formulate hypotheses and write a formal research proposal that includes a full literature review, statement of material and methods, execution of the research, and appropriate analysis and interpretation of data. This course is designed to enable successful completion of the MS thesis. (Quarter 9).

OR 611. Practice Management II. 1 Unit.

This course covers basic concepts of practice management, including human resource management, management systems, marketing, legal aspects of orthodontics, associateships/practice ownership, and customer service. The format of this course includes guest lectures by orthodontists, orthodontic consultants, and other professionals connected to the specialty of orthodontics, as well as private practice office visits. (Quarter 9).

OR 612. Ethics. 1 Unit.

This is an intermediate-advanced course that builds on undergraduate ethics instruction and focuses on issues unique to orthodontic practice. Students will reflect on and discuss real-life cases that exemplify typical ethical problems in orthodontics. (Quarter 9).

OR 613. Orthodontics Speaker Series. 2 Units.

In this course, guest speakers deliver lectures on a variety of orthodontic topics. (Quarter 9).

OR 621. Current Literature Seminar III. 1 Unit.

In this seminar series, students review articles appearing in orthodontic and related journals. (Quarter 9).

OR 623. Comprehensive Case Analysis Seminar III. 1 Unit.

Topics in this seminar series include the clinical application of various diagnostic procedures and treatment philosophies, the presentation of practical procedures in the management of unusual problems that can arise during the course of treatment, basic and applied principles of photography, and advances in computer technology. (Quarter 9).

OR 624. Treatment Planning Seminar III. 1 Unit.

In this seminar series, first-year residents prepare a case presentation to share initial diagnostic records to diagnose and treatment plan orthodontic cases. All students then participate in free-format discussion. (Quarter 9).

OR 631. Orthognathic Surgery Seminar III. 1 Unit.

This seminar series for the orthodontic and oral surgery residents emphasizes diagnosis, treatment planning, management of pre- and post-surgical orthodontic treatment, and understanding of treatment outcome and stability. This course consists of case presentations by the Orthodontic and Oral and Maxillofacial Surgery faculty and residents. (Quarter 9).

OR 632. Multidisciplinary Seminar III. 1 Unit.

This seminar series covers treatment of patients with complex dental and skeletal orthodontic, periodontal, and restorative problems that require input from a variety of dental specialties. The teaching format includes case presentations by the residents and open discussions of interdisciplinary topics. (Quarter 9).

OR 656. Clinical Orthodontics III. 10 Units.

This series provides clinical experience in treating orthodontic patients with a variety of problems. Various orthopedic appliances, including the headgear, face mask, rapid maxillary expander and other fixed auxiliary appliances (LLA, TPA, Wilson distalizer) may be incorporated into specific treatment protocols. Topics also include other appliance systems such as edgewise appliance (.018 & .022" slot), TAD, self-ligating brackets, fixed-functional appliance (Herbst, Forsus), and Invisalign for adolescent and adult patients. (Quarter 9).

OR 657. Mixed Dentition Orthodontics III. 2 Units.

This series provides clinical experience in treating various malocclusions in the mixed dentition stage. This course covers facial growth and occlusal development in the mixed dentition, diagnosis and treatment planning for mixed dentition cases, and evaluating growth changes and treatment outcomes. (Quarter 9.)

OR 658. Surgical Orthodontics III. 1 Unit.

This series provides clinical experience in analyzing diagnostic records, formulating surgical orthodontic treatment plans for patients with major skeletal and dental disharmonies, integration of surgical and orthodontic treatment, communication with surgeons, pre-and post- surgical orthodontic treatment, and evaluation of treatment outcomes. (Quarter 9.)

OR 659. Clinical Orthodontics in Craniofacial Anomalies III. 1 Unit.

In this series, students will provide orthodontic treatment to patients with craniofacial anomalies in the graduate clinic and attend panels provided by comprehensive KAISER and Oakland Children's Hospital Craniofacial Anomalies Teams. (Quarter 9.)

Pediatric Dentistry (PD)

Department Chairperson

Alfred Jeffrey Wood

Professor of Pediatric Dentistry

Faculty

B

Nicolas Bronzini

Assistant Professor of Pediatric Dentistry

BS, University of California, Davis, Biological Sciences, 2002

DDS, University of the Pacific - School of Dentistry, Dentistry, 2005

University of Southern California, Pediatric Dentistry, 2007

G

Geraldine Gerges Gaid

Assistant Professor of Pediatric Dentistry

DMD, Universite de Montreal, Dental Medicine, 2008

Adjunct Assistant Professor of Pediatric Dentistry
Georg-August Universitaet, Education Abroad Program, 1997
BS, University of California, Major: Biology Minors: German Music, 1998
DMD, Nova Southeastern University, Doctor of Dental Medicine, 2004

Nova Southeastern University/Miami Children's Hospital, Certificate in Pediatric Dentistry, 2006

Scott Ngai

Adjunct Assistant Professor of Pediatric Dentistry

BS, University of California, Berkeley, Molecular Cell Biology/Public Health, 2007

DDS, UoP School of Dentistry, Dentistry, 2010

Other, University of California, Los Angeles, Pediatric Specialty, 2012

S

Jamie J Sahouria

Adjunct Assistant Professor of Pediatric Dentistry

BS, University of the Pacific, Biological Sciences, 2001

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, 2004

University of the Pacific, Advanced Education - General Dentistry, 2005

MS, University of Texas Health Sciences Center - Houston, Pediatric Dentistry, 2007

Rinku S Saini

Adjunct Assistant Professor of Pediatric Dentistry

BS, University of California, Irvine, Biological Sciences, 1999

MS, University of Hawaii at Manoa, Cell and Molecular Biology, 2000

University of Hawaii at Manoa, Certificate of Public Health, 2000

DDS, Columbia University College of Dental Medicine, 2005

MPH, Columbia University Mailman School of Public Health, Health Policy and Management, 2005

UCLA, General Practice Residency Program, 2006

Children's National Medical Center, 2009

Donald C. Schmitt

Adjunct Assistant Professor of Pediatric Dentistry

BA, University of California, Berkeley, Human Biodynamics, 1993

DDS, University of the Pacific, 1999

Miller Childrens Hospital, Long Beach, 2001

University of Southern California, Pediatric Dentistry, 2001

Poonam Shah

Adjunct Assistant Professor of Pediatric Dentistry

BA, Northwestern Univ, Psych, 2005

DDS, Indiana Dental School, Dentistry, 2009

Other, King's County Hospital, GPR, 2010

Other, Maimonides Medical Center, Pediatric Dental Residency (Certified), 2012

Richard Stephen Sobel

Adjunct Associate Professor of Pediatric Dentistry

BA, Queens College, New York City, 1963

U.S. Public Health Service COSTEP Externship, Federal Medical Center, 1966

DDS, State University of New York at Buffalo, School of Dentistry, Dentistry, 1967

Harvard University, Pediatric Dentistry, 1979

Joshua J. Solomon

Adjunct Assistant Professor of Pediatric Dentistry

BS, University of the Pacific, BS Biology, 1998

DDS, University of the Pacific, Arthur A. Dugoni School of Dentistry, 2001

MS, University of Texas, Dental Branch at Houston, Dept. of Oral Bio-Materials, Master of Science, 2003

University of Texas, Dental Branch at Houston, Dept. of Pediatric Dentistry, Certificate in Pediatric Dentistry, 2003

T

Yogita B Thakur

Adjunct Assistant Professor of Pediatric Dentistry

BDS, VYWS College Hospital, General Dentistry, 1996

MSA, University of Iowa, Dental Public Health, 2002

MS, UCSF, Certificate Pediatric Dentistry, 2010

Vikram Tiku

Adjunct Assistant Professor of Pediatric Dentistry

BA, Dartmouth College, Biology, 2005

DDS, University of the Pacific, School of Dentistry, Dentistry, 2011
Other, UNLV, Pediatric Dentistry, 2014
Other, USC, GPR, 2014

Brigid W Trent

Adjunct Assistant Professor of Pediatric Dentistry

BA, Marquette University, Physiology, Spanish, 2002
DDS, University of Illinois, Dentistry, 2006
DDS, VA Medical Center, SF, General Practice Residency, 2009
Childrens Memorial Hospital, Pediatric Dentistry, 2011

V

Vivienne L. Valdez

Adjunct Assistant Professor of Pediatric Dentistry

BS, Ohio State University, Biological Sciences, Biology, 2003
DDS, New York University College of Dentistry, 2007
St. Barnabas Hospital, Bronx, Pediatric Dental Residency, 2010

Y

Christian Yee

Adjunct Assistant Professor of Pediatric Dentistry

BS, University of the Pacific, Biology, 2006
Shasta Community Health Center, 2009
DDS, UCSF Dental School, Dentistry, 2010
Certi., University of Southern California, Pediatric Dentistry, 2012
USC/Children's Hospital Orange County, Pediatrics, 2012

Course Descriptions

Predoctoral Courses

PD 146. Preclinical Pediatric Dentistry. 1 Unit.

This simulation lab-based course introduces first-year IDS students to the technical aspects of preparing and restoring primary teeth. (2 hours lecture, approximately 6 hours lab/clinic. Quarter 3.).

PD 240. Pediatric Dentistry. 2 Units.

The study of the physical and psychological development of the child; understanding and prevention of dental disease in children; differential diagnosis and treatment of dental and periodontal diseases and abnormalities in children; and modern concepts of behavioral guidance in children. (20 hours lecture. Quarters 5-6.).

PD 346. Dental Auxiliary Utilization. 2 Units.

Rationale and system of procedures for sit-down, four-handed dental practice, including ergonomically correct practice and work-related injury prevention. (84 hours clinic in conjunction with Clinical Pediatric Dentistry. Quarters 7-10.).

PD 347. Clinical Pediatric Dentistry. 2 or 4 Units.

Study of the diagnosis, treatment planning, and comprehensive preventive and restorative dental treatment for children. (84 hours clinic in conjunction with Dental Auxiliary Utilization. Quarters 7-10.).

Graduate Courses

Periodontics (PR)

Department Chairperson

William P. Lundergan

Professor of Periodontics

Faculty

A

Editha Abayan

Instructor of Periodontics/Dental Hygiene

BA, University of Pacific, Bachelor of Science in Dental Hygiene, 2006

DMD, Centro Escolar University, Doctor of dental Medicine, 1995

Skyline College, General Education, 2004

Tamer Alpagot

Professor of Periodontics

DDS, Ege University, Izmir, Turkey, Dentistry, 1983

Hacettepe University, Ankara, Turkey, Dentistry, 1981

PhD, Hacettepe University, Ankara, Turkey, Periodontics, 1986

PhD, University of Minnesota, Oral Biology, 1995

Shelly Azevedo

Assistant Professor of Periodontics

BS, Loma Linda University, Dental Hygiene, 1984

California State University, Chico, Pre-Dental Hygiene, 1982

Masters, Touro University International, Health Science with an emphasis in Health Educatio, 2007

B

Gretchen J. Bruce

Associate Professor of Periodontics

BA, Northwestern University, Biology, 1976

BS, University of Illinois, Bachelor of Science Dentistry 12/81, 1983

Cert, Boston University, Certificate, Periodontics 6/87, 1987

DDS, University of Illinois, Doctor of Dental Surgery 6/83, 1983

MBA, University of the Pacific, Master of Business Administration, 1999

University of Minnesota, 1973

C

Abida Tariq Cheema

Assistant Professor of Periodontics

BDS, de' Montmorency College of Dentistry, Punjab Dental Hospital, Lahore, Pakistan, Dentistry, 1974

BSc, Lahore College for Women, Lahore, Pakistan, PreMed/Dental, 1970

MSc, Institute of Dental Surgery, London University, London, UK, Periodontology, 1986

D

Cathleen Dornbush

Instructor of Periodontics

BS, University of Southern California, Dental Hygiene, 1979

Illinois Central College, Prehygiene, 1975

University of the Pacific, RDHAP, 2004

G

Gary Grill

Assistant Professor of Periodontics

Boston University, Certificate in Periodontics, 1980

BS, University of Maryland, BS Zoology, 1974

DDS, University of Southern California, Dentistry, 1978

H

Deborah J. Horlak

Associate Professor of Periodontics

BA, Ohio State University, Psychology/Dental Hygiene, 1973
MA, California State University, Fresno, Higher Education Administration, 2003
Wittenberg University, Biology/Chemistry, 1971

Josef A Huang

Assistant Professor of Periodontics

BS, University of San Diego, Biology, 1993
DDS, Columbia University Dental, Dental, 1998
New York University, Periodontics, 2001

J

Tanya V. Jones

Instructor of Periodontics

AA, Chabot College, Dental Hygiene, 1985
AA, University of the Pacific, Dental Hygiene, 2004
Brigham Young University
Brigham Young University, German, 1982

K

Navid N. Knight

Assistant Professor of Periodontics

B.A., University of California at Berkeley, 1986
D.D.S., University of the Pacific, School of Dentistry, 1989
Oregon Health Sciences University, Certificate in Periodontics, 1992
Oregon Health Sciences University, Mini Anesthesia Residency, 1992
United States Navy, Certificate of Training in Oral Pathology/Medicine, 1995
University of the Pacific Arthur A. Dugoni School of Dentistry, 1990
Veterans Admin. Hospital, Periodontology resident, 1992

L

Dan R. Lauber

Assistant Professor of Periodontics

BA, San Fernando Valley State College, Biology, 1970
Boston University, Periodontics Certificate, 1979
DDS, University of Southern California, 1975

William P. Lundergan

Professor of Periodontics

AA, College of the Sequoias, Mathematics, 1970
BS, University of California, Irvine, Biology, 1973
CERT, University of Connecticut, Certificate of Proficiency in Periodontics, 1983
DDS, University of the Pacific, Dentistry, 1981
MA, University of the Pacific, Education, 1994
University of California, San Francisco, Pharmacy, 1978

M

Frank Martinez

Assistant Professor of Periodontics

BS, University of New Mexico, 1974
DDS, University of Southern California, 1978
National Naval Dental Center, Periodontics Certificate, 1983
SCU, School of Law, Santa Clara California, 1995
U. S. Navy, Technician's Prosthetics School, 1972
University of New Mexico, Chemical Engineering, 1967

N

Richard Alan Nathan

Associate Professor of Periodontics

BS, Tufts College, Biology / Psychology, 1971
Denver Hospital, Denver, CO, General Practice, 1976
DMD, Tufts Dental, Dentistry, 1975

MS, UCSF Dental School, Oral Biology, 1979
UCSF Dental School, Periodontology Certificate, 1978

P

Kavitha Parthasarathy

Associate Professor of Periodontics

BDS, Bangalore University, Dental Science, 1999

MS, SUNY at Buffalo, Periodontics, 2007

R

Mustafa Radif

Instructor of Periodontics/Dental Hygiene

BDS, Baghdad University, Dental Surgery, 2001

BSD, University of the Pacific, Dental Hygiene, 2012

Cert., Diablo Valley College, Dental Laboratory Technology, 2010

S

Marlene Storz

Assistant Professor of Periodontics

BS, University of the Pacific, Dental Hygiene, 2006

T

William J. Tognotti

Assistant Professor of Periodontics

DDS, College of Physicians Surgeons (UOP), 1959

University of San Francisco, 1955

W

Paula Watson

Associate Professor of Periodontics

AS, Foothill College, Dental Hygiene, 1990

BS, Chapman University, Health Systems, Certificate in Gerontology, 2001

MS, University of New Haven Connecticut, Human Nutrition, 2004

Z

Joseph A. Zingale

Professor of Periodontics

Adelbert College of Case Western Reserve University, 1953

BS, Case Western Reserve University, 1955

DDS, Case Western Reserve University, 1957

Letterman Army Medical Center, Periodontics, 1970

MPS, Western Kentucky University, 1974

St. Luke's Hospital Cleveland, Ohio, Rotating Internship, 1958

Walter Reed Institute of Research, Advanced Theory and Science of Dental Practice, 1968

Adjunct Faculty

B

Rahmat Barkhordar

Adjunct Associate Professor of Periodontics

Shiraz University, Iran, College of Arts Sciences, 1972

DMD, Shiraz University, Iran, School of Dental Medicine, Dentistry, 1976

University of Pennsylvania, General Practice Residency, 1977

University of Pennsylvania, Endodontics, 1980

University of Pennsylvania, Periodontics, 1980

Eric M Blasingame

Adjunct Assistant Professor of Periodontics

BS, University of the Pacific, Biochemistry, 2007

MS, University of the Pacific, Biology, 2009

DDS, Pacific-Dugoni School of Dentistry, Dentistry, 2012

University of Alabama at Baltimore, Periodontics, 2015

Lynna BK Bui

Adjunct Assistant Professor of Periodontics

DDS, Northwestern University, General Dentistry, 1999

MA, University of Pittsburgh, Periodontics, 2004

MPH, University of Pittsburgh, Dental Public Health, 2004

C

Lauren K Chin

Adjunct Instructor of Periodontics/Dental Hygiene

BA, San Francisco State University, Industrial Arts, 2007

BA, San Francisco State University, Journalism, 2007

BS, University of Pacific, Dental Hygiene, 2014

K

Richard Tsu-hsun Kao

Adjunct Professor of Periodontics

AB, University of California, Berkeley, Bacteriology, 1976

MA, San Francisco State University, Cell Biology, 1980

DDS, University of California, San Francisco, Dentistry, 1982

PhD, University of California, San Francisco, Experimental, 1984

University of California, San Francisco, Post-doctoral fellow Bone Biochemistry, 1986

University of California, San Francisco, Post-doctoral fellow Pathology, 1986

University of California, San Francisco, Certificate in Periodontics, 1991

L

Fan Liu

Adjunct Instructor of Periodontics/Dental Hygiene

BS, University of the Pacific, Dental Hygiene, 2015

M

Arielle Miller

Adjunct Instructor of Periodontics

BS, Santa Clara University, Biology, 2012

BS, University of the Pacific Arthur A. Dugoni School of Dentistry, Dental Hygiene, 2015

Scott W. Milliken

Adjunct Assistant Professor of Periodontics

BA, San Jose State University, Biology, 1984

DDS, University of Pacific, Surgery, 1987

MS, Northwestern University, Certificate in Periodontics, 1989

Edith Mora

Adjunct Instructor of Periodontics/Dental Hygiene

BS, University of the Pacific, Biology, 1998

MS, University of the Pacific, Biology, 2000

DMD, Tufts University School of Dental Medicine, Dental Medicine, 2004

John Muller

Adjunct Assistant Professor of Periodontics

BS, University of San Francisco, Biology, 1978

DDS, University of the Pacific, Dentistry, 1985

R

Mauricio Ronderos

Adjunct Assistant Professor of Periodontics

DDS, Pontificia Universidad Javeriana, Dentistry, 1992

MPH, University of Minnesota, Epidemiology, 1999

MS, University of Minnesota, Periodontics-Dentistry, 1999

University of Minnesota, Periodontics, 1999

T

Jeffrey Takai

Adjunct Assistant Professor of Periodontics

University of California, Irvine, Biological Sciences Major, 2004

BS, University of California, Berkeley, Nutritional Science and Molecular Toxicology, 2006

DDS, University of the Pacific, Arthur A. Dugoni School of Dentistry, Doctor of Dental Surgery, 2010

MS, University of California, San Francisco, Masters of Science in Oral Craniofacial Sciences, 2013

University of California, San Francisco, Certificate in Post-graduate Periodontology, 2013

V

Bruce Valentine

Adjunct Assistant Professor of Periodontics/Dental Hygiene

Modesto Junior College, Associates of Arts, 1964

University of California, Berkeley, 1965

DDS, University of the Pacific School of Dentistry, Dentistry, 1969

W

Shanda Lauri Wallace

Adjunct Instructor of Periodontics

AS, Cabrillo College, Certificate in Dental Hygiene

BS, Loma Linda University, Dental Hygiene

San Joaquin Delta College, General Education, 1980

Louisiana State University, Cultural Anthropology and Womens Literature, 2011

University of Phoenix, College Algebra, 2011

Jonathan S. Wong

Adjunct of Periodontics

BA, University of California, Davis, Biological Sciences, 1996

BA, University of California, Davis, Organizational Studies, 1996

DDS, University of the Pacific Arthur A. Dugoni School of Dentistry, Doctor of Dental Surgery, 2003

Oregon Health and Sciences University, Periodontology, 2006

Course Descriptions

Predocloral Courses

PR 150. Periodontal Diseases. 1 Unit.

Introduction to periodontology, clinical and histopathological features, epidemiology, classification of periodontal diseases, pathogenesis, etiologies of periodontal disease, genetics, and risk assessment. (10 hours lecture. Quarter 4.).

PR 151. Periodontics & Periodontal Diseases. 3 Units.

Introduction to periodontology, clinical and histopathological features, classification of periodontal diseases, etiologies of periodontal disease, genetics, periodontal examination and diagnosis, occlusal analysis, temporary splinting, initial periodontal therapy, pharmacotherapeutics, re-evaluation, periodontal medicine, surgical asepsis, laser therapy and supportive periodontal therapy. (27 hours lecture, 3 hours simulation, 5 hours clinic. IDS Quarter 1.).

PR 156. Preclinical Periodontics. 1 Unit.

Study of techniques for instrument sharpening, root planning, and use of ultrasonic devices. Introduction to temporary splinting, microbiologic sampling, and occlusal analysis. (5 hours lecture, 5 hours lab. Quarter 4.).

PR 250. Periodontics. 3 Units.

Introduction to the methodology of collecting data, utilizing data to make a diagnosis, preparing a treatment plan, and providing initial therapy including microbial sampling and chemotherapeutics; rationale for initial therapy including elimination of local factors, occlusal correction, provisional splinting, and initial therapy evaluation; basic rationale for periodontal surgery; techniques employed in surgical periodontics including the scientific basis for surgical technique, specific indications/contraindications, and sequence in healing following gingival surgery, osseous resection, gingival augmentation, regenerative therapy, and dental implants. (30 hours lecture. Quarters 5-7.).

PR 251. Periodontics. 2 Units.

Introduction to basic rationale for periodontal surgery; techniques employed in surgical periodontics including scientific basis for surgical technique, specific indications/contraindications, and sequence in healing following gingival surgery, osseous resection, gingival augmentation, regenerative therapy, and dental implants. (20 hours lecture. IDS Quarters 2-3.).

PR 256. Clinical Periodontics I. 3 or 6 Units.

Study of periodontal examination, diagnosis, treatment planning, nonsurgical therapy, use of evidence based dentistry and self-assessment principles, periodontal re-evaluation, periodontal surgery, and supportive periodontal therapy in comprehensive clinical dental practice. (Quarters 5-8.).

PR 356. Clinical Periodontics II. 4 Units.

Study of periodontal examination, diagnosis, treatment planning, nonsurgical therapy, periodontal re-evaluation, periodontal surgery, and supportive periodontal therapy in comprehensive clinical dental practice. (Quarters 9-12.)

DDS ADMISSIONS REQUIREMENTS

Doctor of Dental Surgery Requirements

Details on admissions requirements for the Doctor of Dental Surgery degree are found here (<http://dental.pacific.edu/academic-programs/doctor-of-dental-surgery/dds-admissions-requirements>). From here (<http://dental.pacific.edu/academic-programs>) you can navigate to admissions requirements for all degrees offered at the School of Dentistry.

Bachelor of Arts in Applied Sciences

In conjunction with the School of Pharmacy and Health Sciences on the main campus, students who matriculate at the School of Dentistry without a baccalaureate degree can apply to be reviewed for the degree of Bachelor of Arts in Applied Sciences. Transcripts of interested students will be forwarded by the dental school to the associate dean in PHS for evaluation. Students who meet the requirements for the BAAS will be notified and are eligible to receive the diploma upon successful completion of dental school.

Admission with Advanced Standing

Only under unusual and compelling circumstances does the School of Dentistry accept transfer students. Incompatibility of dental education programs generally inhibits transition from another dental school to the University of the Pacific's program. Students requesting such classification usually join the first-year class. No student will be admitted to advanced standing beyond the second year. Special action regarding transfer is required.

Financial Aid

It is important to know that all applicants are considered for admission regardless of their financial circumstances. Financial aid is awarded on the basis of financial need as long as the student is a U.S. citizen or an eligible non-citizen. The financial aid office mails application materials beginning in late January to those who apply for admission.

Financial aid staff assists students in managing their financial resources and their indebtedness in school and after graduation. Staff members conduct a needs analysis and provide comprehensive financial guidance for every student applying for financial aid. Students may be awarded aid from federal, state, and institutional sources.

TUITION AND FEES

Please click here (<http://dental.pacific.edu/academic-programs/doctor-of-dental-surgery/tuition-and-fees>) for detailed information on tuition and fees.

GENERAL POLICIES

Students who enroll in the School of Dentistry agree to adhere to the school's policies and procedures and to conform their conduct to the standards of the school and of the law. Students who fail to do so are subject to all sanctions or other appropriate action by the school, up to and including interim or indefinite suspension, interim or indefinite involuntary leave of absence, or final dismissal.

In cases where the school determines in its judgment that a student's continued enrollment at the School of Dentistry would not be prudent, for reasons including but not limited to the student's violation of standards of conduct, inadequate academic performance, and/or a judgment that the student has failed to demonstrate attributes of character which the school believes are necessary to qualify students to practice dentistry, the school may terminate the student's enrollment and/or refuse to award a degree.

Equal Educational Opportunity

The school is an equal opportunity institution of higher learning and is firmly committed to nondiscrimination in its delivery of educational services and employment practices. In compliance with all applicable federal and state laws, such decisions will be made irrespective of the individual's race, color, religion, religious creed, ancestry, national origin, age (except for minors), sex, marital status, citizenship status, military service status, sexual orientation, medical condition (cancer-related or genetic condition), disability and/or any other status protected by law. When necessary, the School will reasonably accommodate an individual (including students) with disabilities if the educational program of the school and /or safely perform all essential functions, without undue hardship to the school and/or without altering fundamental aspects of its educational program.

See also:

For all other school policies, please refer to the Policies and Procedures page (<http://dental.pacific.edu/departments-and-groups/human-resources/employee-resources/policies-and-procedures>).

Disclaimer

All claims against the school or university for loss or damage arising from acts, omissions, or contingencies beyond the control of the university and its employees are hereby expressly waived. The waiver includes loss by fire, theft, or natural catastrophe of any materials belonging to a member of the student body, whether such loss occurs on or off the school premises. Students agree to these conditions when they register.

Policy on Accommodations for Students with Disabilities

The School grants otherwise qualified students, residents, and applicants all the rights, privileges, programs, and activities generally accorded or made available to students at the School and does not discriminate on the grounds listed in the Policy Prohibiting Unlawful Discrimination in the administration of its educational programs, admissions, scholarships and loans, or other School activities.

The School will reasonably accommodate individuals with disabilities when the individual so presents a request in accordance with this policy and the individual is qualified to safely and effectively perform all essential functions of the position unless there is undue hardship in doing so. Reasonable accommodations do not include a modification of the fundamental requirements and elements of the program (e.g. behavior and conduct standards, attendance and grading policies, academic and patient-care standards, etc.)

If the individual student, resident, or applicant is otherwise qualified, in response to a request for accommodation the School will offer to make an accommodation if the accommodation is reasonable, effective, does not alter a fundamental aspect of the program, will not otherwise impose an undue hardship on the School, and/or there are no equivalent alternatives. If appropriate, the School may choose to consult with such individuals, internal or external to the School, to provide further assistance needed to evaluate the request for accommodation.

For purposes of reasonable accommodation, a student, resident, or applicant with a disability is a person who: (a) has a physical or mental impairment which limits one or more major life activities (such as walking, seeing, speaking, learning, or working); or (b) has a record with the School by which the School has officially recognized such impairment. To be eligible to continue at the School, the student, resident, or applicant must meet the qualifications and requirements expected generally of its students, and must also be able to perform the requirements of the individual major or program in which s/he is enrolled, with or without reasonable accommodation.

Note: In the event that a request for reasonable accommodation is denied, the School may occasionally choose to afford the student some temporary measure or flexibility, which is not based on the asserted disability issue, but which otherwise is considered appropriate, if it does not alter a fundamental element of the program and is not viewed by the School as inequitable toward other students. In such few cases, such temporary measure or flexibility will not be a precedent, nor will be a reasonable accommodation, and the student thereby will not be regarded as an individual with a disability.

Procedure for Seeking Accommodations

A student, resident, or applicant who requires an accommodation aid or assistance ("accommodations"), whether for academic or other uses, and who believes s/he is qualified under the School's policy, should contact the Assistant Dean of Academic Affairs, who serves as coordinator of disability accommodations and services. Individuals who may apply for admission are also encouraged to contact this office to request general information.

Faculty and staff members who receive student-initiated inquiries or requests regarding accommodations should promptly refer those students to the Assistant Dean of Academic Affairs. Accommodation determinations should not be made without consultation and written determination of the assistant dean.

Students and residents who seek academic accommodations are expected to contact the Assistant Dean of Academic Affairs well in advance of the commencement of the activity course(s), and to provide all requested supporting information at least three weeks in advance of the requested implementation date.

Determination of Accommodation Requests and Right to Obtain Further Review:

Provided that all forms and other documentation, if necessary, are completed accurately and furnished by the student, resident, or applicant in a timely fashion, the Assistant Dean of Academic Affairs will respond in writing to the request for accommodation and will do so in a manner consistent with the policy. If the student, resident, or applicant agrees with the response, faculty and staff members who will be involved in providing or facilitating the accommodation will be informed of the accommodation, but the Assistant Dean of Academic Affairs will not provide medical or health-related information, unless such information is appropriate in order to allow them to assist in implementing the accommodation.

Responsibility of Student, Resident, or Applicant

Each student, resident, or applicant requesting accommodation bears the responsibility for initiating, documenting and communicating promptly with the School regarding a disability-related request for accommodation, in the manner requested in this policy. Timely communication between the student and the Assistant Dean of Academic Affairs and/or individual faculty members is critical. Requests for information and details on accommodations will generally be communicated via confidential email, and student, resident, or applicant replies to such communications, be they from the assistant dean or a faculty member, should be in writing within 72 hours. Students must contact course directors at least one week in advance of an assessment for which accommodation is requested. Once an accommodation has been agreed upon by the student or resident and a faculty member, the student or resident must adhere to the accommodation, barring a significant and unforeseen event (e.g., sudden serious illness). Last-minute requests for or cancellations of previously agreed upon accommodations are prohibited by this policy. Furthermore, a student or resident who appears late for an assessment for which accommodations have been arranged forfeits the time lost due to tardiness.

The student, resident, or applicant will provide to the Assistant Dean of Academic Affairs the documentation to support the request. Documentation from the appropriate health professional(s) should reflect the nature of and present level of disability, how the disability affects the student's, resident's or applicant's needs in a collegiate setting, and how the requested accommodation will resolve the needs. Because the provision of all reasonable accommodations and services is based upon assessment of the current impact of the disability on current academic performance, it is in an individual's best interest to provide recent and appropriate documentation, generally no more than 3 years old. Earlier documentation regarding learning disabilities will be reviewed, if it is supplemented by more recent materials.

The Assistant Dean of Academic Affairs has discretion to determine what type of professional documentation is necessary, and this may vary depending on the nature of the disability and/or accommodation. The assistant dean has discretion to seek independent medical assessment if in his/her judgment it is appropriate in some circumstances.

Family Educational Rights and Privacy Act (FERPA)

Please click here (<http://www.pacific.edu/About-Pacific/AdministrationOffices/Office-of-the-Registrar/Student-Privacy-FERPA.html>) for the University's FERPA policy.

Code of Ethics and Adjudication of Ethics Violations

All allegations of unethical student behavior are investigated by a senior faculty member (appointed by the Dean) acting as an Initial Reviewer. If there is sufficient evidence to support the allegations and the student agrees to the proposed sanction, the Initial Reviewer recommends the appropriate disciplinary action to the Dean. If the student disagrees with the findings of the Initial Reviewer or the proposed sanction, the allegation will then be forwarded to the Ethics Committee.

The ethics committee conducts hearings on matters related to student behavior and violations of the Code of Ethics. The committee is a joint faculty-administrative committee comprised of a chair selected by the Dental Faculty Council, three elected faculty members, and five elected students, one from each DDS and IDS class. In addition, four elected faculty members and three elected students, one from each class, act as alternates, and may be called to serve during committee review of a complaint that may involve an elected member or when an elected member is unable to be present. Recommendations of the ethics committee are submitted to the dean for action. The decision of the dean can only be appealed through University channels (Office of the Provost). Privileged information related to petitions, petitioners, and all deliberations and recommendations of the committee are treated as confidential and will remain "in committee" except as reported through appropriate channels.

Please click here (http://sfdental.pacific.edu/docs/Code_of_Ethics.pdf) to see the Code of Ethics.

Policy Statement on Alcohol Consumption and Drug Use

For the Policy Statement on Alcohol Consumption and Drug Use, please refer to the Policies and Procedures page (<http://dental.pacific.edu/departments-and-groups/human-resources/employee-resources/policies-and-procedures>).

Workplace Security and Anti-Violence Policy

For the Workplace Security and Anti-Violence policy (which includes weapons and firearms), please refer to the Policies and Procedures page (<http://dental.pacific.edu/departments-and-groups/human-resources/employee-resources/policies-and-procedures>).

Prohibited Sexual and Other Unlawful Harassment Policy

For the Prohibited Sexual and Other Unlawful Harassment policy, please refer to the Policies and Procedures page (<http://dental.pacific.edu/departments-and-groups/human-resources/employee-resources/policies-and-procedures>).

ACADEMIC AND ADMINISTRATIVE POLICIES

Academic and administrative policies set forth in this section are in force for all students enrolled at the School of Dentistry during the academic year 2016-2017. Students who join a subsequent cohort for any reason are governed by the policies, requirements, and curriculum of the catalog in effect at the time of re-entry. The right to change academic programs, policies, and standards at any time without prior notice is reserved by the university. It is the student's responsibility to regularly consult this site for changes or modifications.

Registration

Registration at the School of Dentistry includes payment of tuition and fees, enrollment in courses, submission of all required application materials (including one official transcript of academic record from each college or university attended through the last completed quarter, semester, or summer session), and submission of required medical examination and clearance forms.

In order to receive credit for coursework taken during a particular term, every student must be properly registered during that term. Barring a written notice of withdrawal or a dismissal from the school, registration is assumed for all students.

Records & Transcripts

An academic record (transcript) for each student is maintained in the Office of Academic Affairs. This official record is used in the conduct of the student's personal and academic affairs and is considered both private and confidential. In accordance with the Family Educational Rights and Privacy Act of 1974 (FERPA), the School of Dentistry has established procedures to ensure that students have access to their records, that those records are accurate, and that the privacy rights of students are protected. Students are notified annually of their rights under FERPA by publication of this catalog. The full policy is available here (<http://www.pacific.edu/About-Pacific/AdministrationOffices/Office-of-the-Registrar/Student-Privacy-FERPA.html>).

Upon written request by the student, an official transcript is issued to whomever is designated, provided all financial obligations to the university have been met. The official transcript shows all work completed to date, and is divided into four program years (three program years for the IDS program). Official transcripts of credit earned at other institutions which have been presented for admission or evaluation of credit become the property of the university and are not reissued or copied for distribution to other institutions. Students can access their unofficial transcript any time through InsidePacific, the university portal.

Exemption from Courses

If a student has extensive educational preparation in a discipline, the student may petition the appropriate course director for exemption from required coursework. Such exemption may be granted at the discretion of the course director who will award an appropriate final letter grade (A, B, C, D), or credit (CR) signifying completion of the required course.

Attendance Policy

Students at the School of Dentistry assume professional obligations which include regular and consistent attendance at all formal learning activities. This includes classroom, laboratory, and remedial instruction; written and oral examinations, quizzes, and practicals; and patient care experiences. Regular and consistent attendance is an essential qualification of all students. A student who in the judgment of the school fails to meet this qualification may be dismissed from school.

Course directors can determine a reasonable attendance policy specific to their course, and must provide students a written statement of such policy in the course syllabus. In the absence of such a written statement from the course director, the school's policy is in effect.

The student is responsible for making up all work missed due to an absence. Faculty have sole discretion in determining whether and under what conditions missed work is to be made up. Faculty also decide if, when, and under what conditions a make-up exam or practical will be provided. It is expected that make ups will replicate the original assessment in difficulty and content coverage, although an alternative format may be used.

Discretionary Days

The school allots a set number of discretionary days to each student for use during an academic year. Students are expected to use discretionary days judiciously for such events as medical appointments or illness, legal obligations, national board examinations, postgraduate or employment interviews, or other school-sponsored trips or events.

Discretionary days in effect for each class are as follows:

First-year DDS, IDS: 5 full days (DDS no carryover to Year 2)

Second-year DDS: 8 full days

Third-year DDS and second-year IDS: 8 full days plus 50% of unused days from Year 2 (Year 1 for IDS students).¹

¹Night clinic sessions count as one half-day. An absence for all three instructional sessions on Monday or Thursday (morning, afternoon, and evening) counts as 1.5 discretionary days.

Guidelines for use of discretionary days:

1. Half-days can be used for events lasting less than a full day (e.g., medical appointments). However, students who report an illness for a morning session will be excused for the entire day. Faculty will be notified of a day-long absence and, for clinic students, clinic staff will reschedule patients.
2. For any absence of more than two (2) consecutive days, documentation supporting the absence must be submitted promptly to the Office of Academic Affairs. 'Bunching' of unused days at the end of an academic year is prohibited by this policy.
3. Discretionary days may not be used when an examination, quiz, or practical is scheduled. In the event of an absence on a day when an examination, quiz, or practical is scheduled, a discretionary day will be forfeited. Illness or other emergency must be documented. Make ups are allowed at the sole discretion of the course director(s), who will set the day and time of the make up.
4. Discretionary days may not be used retroactively.
5. A discretionary day is forfeited whenever an unreported absence is discovered or otherwise reported to the Office of Academic Affairs.
6. A student who exceeds the number of available discretionary days in an academic year may be referred to the ethics committee. In cases of excessive absence, the assistant or associate dean of academic affairs will meet with the student, and other impacted parties as needed, to determine whether an internal solution is possible (e.g., medical or other leave of absence), and if so, implement the solution. Only if an internal solution fails or is not possible is the student referred to the ethics committee.

Notification Process

A student who wishes to use a discretionary day or part thereof must notify the Office of Academic Affairs in advance or by 9:00 a.m. on the day of the absence. In the event of an emergency, the student must notify Academic Affairs as soon as reasonably possible. The Office of Academic Affairs will notify faculty promptly of the student's absence and will maintain a log of each student's use of discretionary days. Absences must be communicated daily.

A student who exceeds the number of available discretionary days in an academic year may be referred to the ethics committee (see above).

Attendance at Examinations and Other Assessment Activities

Barring a documented emergency, attendance at scheduled examinations, quizzes, practicals, or other assessment activities is mandatory. Students are expected to report to the assigned location early and to begin the examination at the designated start time. No student will be allowed to begin an examination 15 minutes after the designated start time (5 minutes for a quiz), and no student will be allowed to leave an examination room until 15 minutes have elapsed (5 minutes for a quiz). A student who appears for an examination within the 15 minute window forfeits the missed time.

Course directors have sole discretion to determine if and under what conditions a make up examination will be provided.

Approved: DFC, November 21, 2012; Dean's Cabinet, December 3, 2012

Grades

Grades represent passing or failing performance. Grades of A, B, C, and D represent passing performance, and the grade of F represents failure. Grades of A, excellent; B, good; and C, acceptable, represent unconditional passing performance; the grade D indicates conditional passing performance and must be remediated. Special conditions on such grades must be specified when grades are submitted and may include additional instruction or evaluation before advancement to clinical practice or eligibility for board examinations. Course directors are required to provide a grade for every enrolled student at the end of each quarter of instruction. They must also notify the Office of Academic Affairs in writing of conditions and assignments for removing incompletes and suggested alternatives for overcoming failing performance, if any exist.

Credit (CR)

Credit (CR) may be awarded in clinical courses to indicate that the student has not been assigned sufficient patients for clinical ability to be assessed in a particular area. In nonclinical courses, CR signifies satisfactory completion of an ungraded course where reliable differentiation among passing grades is not possible.

INC (Incomplete)

An incomplete grade (INC) may be given temporarily when a student is progressing satisfactorily but the course director has insufficient information to award a letter grade because the student has not completed all assigned coursework. The course director determines the conditions under which and the date by which the deficiency that caused the INC must be removed by the student. If no completion date is stipulated, by default the end date of the subsequent term is the completion date. Failure to comply with stated conditions by the stipulated date will result in the INC reverting to the grade F, failure. When an INC is given in the terminal quarter of a clinical course, a customized program will be developed to allow the student to meet clinical expectations in a timely manner. No student may earn a diploma with a permanent INC grade in a course directly tied to one or more of the school's competency statements.

Grade Point Average

In computing a grade point average (GPA) numerical values are: A, 4 points; B, 3 points; C, 2 points; D or INC, one point; and F, zero points. Credit (CR) notations do not affect the grade point average. The dental school does not award "+" or "-" modification of grades. For details on how GPA is calculated for students repeating a single course or an entire academic year, see the Repeat section in the Academic Performance tab.

Change of Grades

Final passing grades (A, B, C, D, CR) are not subject to change on the basis of second examination or additional work completed after grades are submitted. Passing grades may be changed during the quarter following award of the final grade to correct an error in computation or in transcribing a report or where some part of a student's work has been overlooked. A failing grade of F may be changed only on the basis of reexamination or repeat of the course. Reexamination or repeat of the course is at the discretion of the course director or the Student Academic Performance and Promotion Committee. Upon reexamination, D is the highest grade that can be reported; on repeat of the course, the new final grade will be reported. When a final grade is awarded to substitute for INC or for the failing grade of F, this will be indicated on the student transcript by an appropriate symbol denoting the change (* for INC and # for F grades).

Academic Performance

Academic Progress

The Office of Academic Affairs reviews student academic performance each quarter. In a course that continues through two or more quarters, a grade is awarded each quarter to indicate interim progress, and the final grade for the entire course is awarded at completion of the terminal quarter of the course. However, the Student Academic Performance and Promotions Committee will regard an interim grade in the same manner as a final grade with respect to promotion.

Academic Good Standing

Academic good standing requires a grade point average (GPA) of at least 2.0 for all didactic courses attempted and for all laboratory and clinic courses attempted, and no permanent D or F grades.

Academic Probation

Academic probation is accorded to a student upon receipt of a GPA below 2.0 for all didactic courses attempted OR a GPA below 2.0 for all laboratory and clinic courses attempted OR both; OR to a student with a permanent D or F grade. Normally, the standard for academic good standing must be met within three months of being placed on academic probation. In circumstances where this time constraint cannot be met, e.g. for laboratory and clinic grades at the beginning of the second year, or when a course is being repeated to remove an F grade, a reasonable time period will be specified.

I. Phase One Academic Probation: Intervention

1. Didactic and/or lab/clinic GPA below 2.0 if the student was in good academic standing the previous quarter. (New students are assumed to be in good standing upon matriculation unless otherwise stipulated by the Office of Student Services.)
2. Repeating students are placed on intervention at the beginning of their repeat year.
3. Examples of interventions include:
 - meetings with advisor
 - assignment of tutors
 - inventory of outside activities, living conditions
 - diagnostic testing for suspected health, psychological, language, or learning problems
 - in-course remediation
 - evaluation by health care professional to determine fitness for student activities
 - alternative career counseling

II. Phase Two Academic Probation: Contract

1. Didactic and/or lab/clinic GPA below 2.0 if the student was on Phase I probation the previous quarter, or
2. Any permanent D or F grade.
3. Examples of contract conditions include:
 - required weekly meetings with faculty member, Group Practice Leader, or advisor
 - restrictions on outside activities, living conditions
 - required professional assistance with diagnosed health, psychological, or learning problems
 - tutors
 - assignment to scheduled supplemental courses
 - regular meetings with therapist
4. No student on contract is eligible to take National Dental Board Examinations without approval from the promotions committee.

Academic Disqualification

Academic disqualification may be recommended to the dean by the Student Academic Performance and Promotions Committee for a student who has failed to meet any of the conditions of phase two probation (contract). When a student's academic record meets published criteria for academic disqualification, the committee will provide an opportunity for the student to appear before it to ensure that all pertinent information is available before the committee makes its recommendation to the dean. This is the only opportunity for the student to present relevant information to the committee; if a student fails to provide all pertinent information at this opportunity, the student risks exclusion of information from the committee's deliberations. A student appearing before the committee has the option to: (i) select a faculty advisor; (ii) request and receive assistance from that faculty advisor with preparation of a statement to the committee; and (iii) request the faculty advisor attend the committee meeting with the student as a silent observer.

A student may, at their discretion, take advantage of all or none of these opportunities. During the committee meeting, the student is advised to read aloud their prepared statement, but is discouraged from circulating copies or presenting evidence of academic performance.

If, in the judgment of the committee and after consideration of the relevant information available to it, the student has the capacity and commitment to overcome his or her documented deficiencies and reach an acceptable level of patient care, the committee may recommend (i) continuation on academic contract; (ii) extension of the program; or (iii) re-enrollment in a subsequent cohort. The committee may also recommend re-enrollment only through the normal admissions process, after a careful review of the relevant information and as appropriate to the student's potential.

Promotion

Students who are in academic good standing automatically are recommended for promotion by the Student Academic Performance and Promotions Committee. The committee may recommend that a student who is not in academic good standing be promoted on academic probation with conditions of the probation clearly outlined.

Academic Standards for Holding Student Office

In order to run for and/or hold an elected or appointed office in the Associated Student Body or to assume a major leadership position in an organization affiliated with and approved by the school, a student must be registered for a full-time course of study, be in good academic and disciplinary standing, and maintain a cumulative Grade Point Average of 2.5 or higher during the entire period of time in which he or she holds office. Failure to meet the academic standards outlined by this policy will result in a one quarter probationary period, during which the student is expected to meet the minimum cumulative GPA standard. Failure to do so by the end of the probationary period will lead to automatic resignation from office.

Repeat

When one course is repeated by a student who remains with his/her original cohort, BOTH attempts are permanently recorded on the student's transcript. Repeated courses are identified on the transcript with a "Y" in the repeat column, and the interim and permanent grade earned, if applicable, is INCLUDED in the Grade Point Average calculation ("grade averaging").

When more than one course is repeated (normally by a student who is repeating an entire academic year), BOTH attempts are permanently recorded on the student's transcript. Repeated courses are identified on the transcript with a "Y" in the repeat column, but interim or permanent grades earned are NOT included in the GPA calculation ("grade replacement").

In the absence of a written agreement of exemption filed in the Office of Academic Affairs, students who join a subsequent cohort for any reason are governed by the policies, requirements, and curriculum of the catalog in effect at the time of re-entry.

Withdrawal

A student who wishes to withdraw from school must file a written request in the Office of Academic Affairs. A student's request for withdrawal becomes final only upon completion of the customary check-out process. The student's academic standing at the completion of the check-out process will be recorded on the permanent record (transcript). The record of a student who withdraws without first requesting permission will record a dismissal. A student who has met the published criteria for disqualification may not elect to voluntarily withdraw until the dean has rendered a final decision regarding promotion or academic standing.

Leave of Absence

Student or resident requests for a leave of absence are filed with the dean, who will designate the appropriate administrator to respond to the request. To request a leave of absence, the student or resident must be in good academic standing and must submit a written request identifying persuasive reasons warranting the leave, together with documentation supporting the request. The dean will notify the student or resident in writing of the decision and, if approved, will stipulate the length of the leave and conditions for re-enrollment. The student or resident assumes the responsibility of keeping the dean informed of the intent to re-enroll by the specified date. Students or residents with federally-guaranteed student loans whose leave of absence exceeds 180 days will be reported as withdrawn on the 181st day and federal loans will enter repayment. A student or resident who does not re-enroll by the specified date will be considered to have withdrawn from the school. The decision whether to deny, grant, or set conditions for a request for leave of absence shall be in the sole discretion of the dean. Leaves of absence from the dental school's three-year curriculum are rarely granted.

The dean has the authority to place a student on interim or indefinite leave of absence after careful review of the facts of a case. See also the Overview section of the General Policies section.

Graduation

In addition to all other requirements for graduation, the candidate must demonstrate competence to discharge the duties required of a practitioner of dentistry. In addition to the skills, knowledge, and values expected of a beginning general dentist, this is interpreted to mean evidence of moral character compatible with the public interest and with the practice of the healing arts, discharge of all financial obligations to the school, completion of all technical and clinical requirements prescribed in the curriculum, good academic standing, a passing score on Part II of the National Board Dental Examination, and compliance with all relevant policies of the School of Dentistry. If, in the opinion of the Student Academic Performance and Promotion Committee, the candidate for the Doctor of Dental Surgery degree has met all these requirements, it is authorized to recommend to the dean the graduation and conferral of the degree. The committee may also recommend delay in the individual's graduation date and will stipulate conditions necessary to bring the student to a competent level.

Committees

Student Academic Performance and Promotions Committee

Functions: The Student Academic Performance and Promotions Committee evaluates records of student academic performance and progress; recommends to the dean appropriate candidates for promotion, dismissal, repeat or other action, and students who should receive awards for academic excellences; and works with the curriculum committee in planning, developing, and recommending methods by which students' performance may best be evaluated. The committee ensures enforcement of academic standards as described in this catalog.

Membership includes: the associate dean for clinical services, the assistant dean for academic affairs, the vice-chair of the department of dental practice; all Group Practice Leaders, and all department chairpersons. Should a clinical department chair be unable to attend the meeting, a single co- or vice-chair is invited.

Academic Advisory Committee

Functions: The Academic Advisory Committee reviews records of students who are on phase one academic probation to recommend intervention, and reviews records of students on phase two academic probation to draw up contracts. It also reviews the records of students who have failed their contracts and makes recommendations to the Student Academic Performance and Promotion Committee.

Membership includes: the associate and assistant deans for academic affairs, two Group Practice Leaders, one representative each of the biomedical science courses and preclinical technique courses, and one student.

Student Appeals Committee

Functions: The Student Appeals Committee reviews and makes recommendations on student-initiated appeals for reconsideration of faculty action with regard to grading or evaluation. In academic matters related to promotion and dismissal, the Student Appeals Committee's inquiry will be limited to review of compliance with the due process components of this policy and will not constitute an attempt to substitute its judgment for the academic judgment of faculty or of the administration.

Membership includes: four elected faculty members and three elected students, one each from the two senior classes and the junior class.

STANDING COMMITTEES

In keeping with sound shared governance principles, the School of Dentistry incorporates the expertise and perspective of students, faculty, and administrators in the decision-making process through use of the committee system. Committees are designated according to areas of concern and authority as "faculty," "administrative," or "joint faculty-administrative" committees. Standing committees are listed below.

Faculty Committees

The faculty has primary responsibility for recommending policy in the following areas: curriculum, subject matter and methods of instruction, research, faculty status, and those aspects of student life which are related to the educational process. Final review and decision rest with the dean, president, and Board of Regents.

- Academic Advisory Committee
- Admissions Committee, DDS
- Admissions Committee, IDS
- Curriculum Committee
- Dental Faculty Council
- Faculty Appointment, Promotion, and Tenure Committee
- Research Committee
- Student Academic Performance and Promotions Committee
- Advisors Committee

Joint Faculty-Administration Committees

Joint committees consider areas of major importance to faculty and administration. Administrative officials hold ultimate authority, but faculty members' and students' consultation and advice are of great importance.

- Education and Information Technology Advisory Committee
- Ethics Committee
- Clinical Quality Assurance Committee
- Student Appeals Committee

Administrative Committees

The administration has primary responsibility for maintenance of existing institutional resources and the creation of new resources. The dean plans, organizes, directs, and represents the School of Dentistry with general support from the faculty, the president, and the Board of Regents. The dean initiates, innovates, and assures that School of Dentistry standards and procedures conform to policy established by the Board of Regents and to standards of sound academic practice. Administrative committees are those in which administrative responsibility is primary and members appointed by the dean serve in an advisory capacity.

- A. W. Ward Museum Committee
- Infection Control Committee
- Managers and Directors Committee
- Outcomes Review Committee
- Committee on Continuing Dental Education
- Store Committee
- Student Clinic Advisory Committee
- Student Financial Aid Committee

SERVICES

The resources below are available to assist students and residents in areas related to completion of the academic program.

Business Office

The business office manages student accounts, including posting of all charges; collecting payments; and issuing reimbursements.

Student Services

Under direction of the associate dean of student services, this office is responsible for recruiting and advising potential students, coordinating admissions and pre-dental programs, managing admissions committee activities and directives, and providing consultation and assistance in nonacademic areas including student government, clubs and organizations, financial aid, health, insurance, and housing. Student Services also plans and supervises all student retreats.

Housing

The school maintains a listing of off-campus, privately-owned apartments for interested students. The school does not endorse, investigate, or guarantee the tenability of listings or suitability of those responding to any off-campus listing.

Financial Aid

Financial aid is available only to U.S. citizens, permanent residents, and eligible non-citizens. Loans and grant funds are available from private, state, and federal sources. The financial aid office assists students in managing their financial resources and their indebtedness. It also provides comprehensive financial guidance for every student applying for financial aid to help them find the best funding option. Eligibility for most available financial aid funds is based on demonstrated financial need. An applicant must be approved for admissions before financial aid can be awarded.

Complete information about the types of financial aid available and the application process can be obtained from our website at www.dental.pacific.edu (<http://www.dental.pacific.edu>) or from the financial aid staff in the Office of Student Services.

Student Store

The student store stocks equipment, books, and supplies for the educational program. It is available for students, faculty, and staff. Merchandise is also available from the store's website, www.dentalstudents.com (<http://www.dentalstudents.com>).

First-Year Retreat and Counseling

First-year students participate in a mandatory two-day retreat in San Francisco shortly after matriculation. Through presentations, small group activities, and interactions with faculty and administrators, new students are acquainted with the various aspects and demands of the educational program. A half-day service learning experience at locations in the Bay Area is an important part of first-year retreat.

Many faculty members who teach first-year courses serve as advisors to new students to provide friendly ears and sounding boards for their concerns and to assist them in the transition from undergraduate to professional education. Students are assigned an advisor at the beginning of their first year. Second- and third-year students have access to their assigned group practice leader as well as course directors and other faculty members.

Academic counseling is provided by advisors as well as course directors, faculty members, and the associate and assistant deans for academic affairs. Referral to professional health care counseling is available; however the school cannot warrant the services of external health care providers. (Students should become familiar with the procedures of such counselors before engaging the services.) Services of a psychologist trained in student stress and study skills problems are available to students on an on-call and drop-in basis.

Pacific Health Services

Pacific Health Services (PHS), part of the university's Division of Student Life, maintains a clinic at the School of Dentistry. Dental students who are enrolled full-time and have submitted the required health history form and immunization records are eligible for care at any PHS clinic. The on-site nurse practitioner is supported by an extended professional staff that includes a supervising physician, other nurse practitioners, and a registered dietitian. Services available to students include health education, wellness information, and direct care during illness.

All dental students are charged a health service fee of \$60 each quarter. The fee covers nurse practitioner services, nutritionist services (mostly by phone), and health and wellness management. The health services fee does not cover student health insurance, the cost of some procedures, the cost of medications, or costs incurred as a result of outside referrals.

Dental and Orthodontic Treatment Benefits

Dental and orthodontic treatment benefits are available at the School of Dentistry during regular clinic hours for students in good standing and their spouses and children living at home. Students and their spouses/children who request and are accepted for dental care pay at a reduced rate established by clinic administration.

Development

The school recognizes the strong philanthropic support enjoyed by the school with walls of honor, plaques, and badges. Thousands of the school's generous alumni and students, faculty, staff, friends, foundations, corporations, and organization donors have helped to build clinics and classrooms, provide scholarships, fund faculty positions, provide dental care to patients, and support numerous projects that keep the dental school strong.

Marketing & Communication

The Office of Marketing & Communication directs communications and marketing programs to increase the visibility of the dental school and to enhance its identity to various constituents. The marketing & communication team promotes not only the dental school, but also the school's students, faculty, staff, alumni, and clinics, through effective media relations, Web communications, event planning, publication development, and marketing strategies.

Continuing Dental Education

The Division of Continuing Dental Education provides dynamic and multidisciplinary continuing education programs for members of the dental profession. Program formats include didactic, laboratory workshops, hands-on clinical sessions with live-patient treatment, on-line delivery, or any combination thereof. Programs lengths vary, and include half-day, full-day, and multiple sessions. CDE offers more than 60 courses each year that are presented by many of the profession's outstanding leaders and educators. Annual attendance at clinical and lecture presentations exceeds 3,000 dentists and dental auxiliaries. Courses are offered at the dental school as well as at select locations throughout California and the United States. The division also sponsors learning and travel programs abroad, the next being planned for 2016 in Italy.

Pacific dental students, faculty, and staff receive discounted rates to attend continuing dental education courses offered by the division. Tuition charges are minimal for students, and substantially reduced for faculty and staff, depending on the program. Pacific dues-paying alumni members receive a 10% discount on most CDE programs offered by the division.

For more information, visit www.dental.pacific.edu/ce1 (<http://www.dental.pacific.edu/ce1>) or contact Continuing Dental Education at (415) 929-6486 or cedental@pacific.edu.

PROFESSIONAL AND FRATERNAL ORGANIZATIONS

Social, fraternal, and professional organization memberships are open to all students in the doctoral program. Opportunities to establish associations that will endure throughout graduates' lifetimes are described in the groups. Navigate using the tabs above.

Associated Student Body

The Associated Student Body of the University of the Pacific, Arthur A. Dugoni School of Dentistry is composed of all students enrolled in the doctoral program. Business affairs of the organization are conducted by the Student Executive Council which consists of the elected student body officers, the president and vice president of each class, and elected representatives to selected agencies of organized dentistry. Any student may meet with the Student Executive Council, but only duly elected officers may vote on issues under consideration. Students are represented on the following school committees: Curriculum; Faculty Appointment, Promotion, and Tenure; Student Appeals; Ethics; Museum; Postgraduate Studies; Safety; Store; Student Clinic Advisory; Infection Control; Clinical Quality Assurance; and Academic Advisory.

Student Research Group

The Student Research Group (SRG) works to enhance the research culture at the Dental School by supporting collaboration between students and faculty members in current research projects. The goal of SRG is to promote the advancement of dental research and evidence-based practice.

The SRG is a chapter of the National Student Research Group (NSRG)/American Association for Dental Research (AADR) and the International Association for Dental Research (IADR). Group members are encouraged to participate in various school events, attend the NSRG meeting and the annual AADR/IADR meeting. A member of the student group also represents Pacific each year at the ADA-sponsored Annual Dental Student Conference on Research in the Washington DC area.

SCOPE (Student Community Outreach for Public Education)

The Student Community Outreach for Public Education program (SCOPE) is a student-directed, peer-mentoring organization at the School of Dentistry which provides professional development projects focused on community oral health. Created in 1994 by students and a faculty mentor, SCOPE's mission is to engage and involve students and faculty in volunteer oral health projects directed toward community needs. Today, SCOPE exemplifies several of the school's six strategic directives, including utilization of public health science and best practices.

Clinical externship are one of the SCOPE programs. Externships and SCOPE provide the major components of Pacific's Community-Campus Partnership Programs (CCPP). This partnership engages community agencies in the development of Pacific's oral health community programs.

Inter-professional projects, leadership development, and evidence-based best practices form the foundation of CCPP and SCOPE programs. SCOPE student officers take an active role in designing, participating, and evaluating health projects such as screenings, presentations and educational sessions for children, families and senior citizens in the Bay Area. SCOPE officers strive to sponsor inter-professional projects with audiology, pharmacy, nursing physical therapy and physician assistant students and schools.

National Dental Fraternities

Two chapters of national dental fraternities are active at the School of Dentistry: Alpha Omega and Delta Sigma Delta.

School of Dentistry Alumni Association

The Alumni Association of the University of the Pacific, Arthur A. Dugoni School of Dentistry, has three membership categories:

1. Alumni members – all graduates of the dental school;
2. Associate members – dentists who graduated from other schools and who join the Association; and
3. Dugoni Family members – non-dentists who are valued members of our community.

The Alumni Association's mission is to foster lifelong relationships among its members and with the School. The purpose of the Association is to promote the welfare of the School of Dentistry, the graduates of the School and the profession of dentistry. The excellent reputation of our school and its unequalled physical facilities are the direct result of the loyalty and active support of its alumni and the Alumni Association.

The Alumni Association sponsors, or co-sponsors, many educational and social events throughout the year for alumni and students, and additionally supports students at events such as the city softball league, Bay to Breakers race, and various golf, basketball, and softball tournaments.

Pacific Dugoni Foundation

The Pacific Dugoni Foundation (PDF) is a group of volunteers working closely with the Dean and the development team to promote philanthropy at the School of Dentistry. The mission of the Foundation is to ensure that the University of the Pacific, Arthur A. Dugoni School of Dentistry has the resources it needs to realize its visions and goals.

The Foundation shares the school's commitment to excellence and measures success by the joy it brings to donors, by the funds it raises, by the fundraising programs it initiates, and by the continuing recruitment and retention of new, effective board members.

American Student Dental Association (ASDA)

All University of the Pacific dental students are members of ASDA and, concurrently, student members of the American Dental Association with all the rights and privileges of such membership. Benefits are detailed in publications distributed by these organizations.

California Dental Association (CDA)

University of the Pacific dental students were the first in California to avail themselves of the student membership category offered by the California Dental Association. Modest annual dues provide each student member with CDA publications, access to CDA meetings without charge, and other benefits.

American Dental Education Association (ADEA)

All enrolled predoctoral students are members of ADEA.

The Council of Students is one of several councils of ADEA. The school's elected representatives to the council participate in the ADEA annual session and regional meetings. The Council of Students has an administrative board consisting of a vice president who serves on the ADEA executive committee, and a chair, vice chair, secretary, and member-at-large. The council elects several student delegates who have full voting privileges in the ADEA House of Delegates.

AWARDS

Awards and prizes are presented annually at the Graduate Alumni Association banquet honoring the graduating classes. A detailed description of each award, including selection criteria, is available in the Office of Academic Affairs.

Scholarship

Alpha Omega International Dental Fraternity award
Dean's Valedictorian awards (DDS, IDS)
Dean's Salutatorian awards (DDS, IDS)
Dean's Award (third highest GPA)
Excellence in Anatomy award
Excellence in Biochemistry award
Excellence in General Pathology award
Excellence in Implants award
Excellence in Microbiology award
Excellence in Oral Diagnosis award
Excellence in Oral Surgery award
Inesi Award in Physiology
OKU Clinical Excellence awards
Phi Kappa Phi

Leadership, Professionalism, Scholarship, and Service

Abelson Endowment award
Academy of General Dentistry award
Alpha Omega Dental Fraternity, Bay Area Alumni award
American College of Dentists, Northern California Section award
American Student Dental Association Award of Excellence
Thomas R. Bales Family Endowment Good Samaritan Award
Community Service award
California Dental Association award
Delta Dental Plan of California Student Leadership award
Deric Desmarteau Endowment award
Kevin Campbell Alumni Association Service award
F. Gene and Rosemary Dixon IDS Endowment award
CHIPS Editor award
Pierre Fauchard Academy awards
William W.Y. Goon/OKU award
International College of Dentists Student Leadership award
San Francisco Dental Society Ethics award
Charles, Charles Jr. and Joe Sweet Scholarship awards (for pediatric dentistry)
Frederick T. West Leadership award
Herbert K. Yee Scholarship award

Outstanding Performance

Academy of Osseointegration award
Advanced Education in General Dentistry Outstanding Resident award
Eric B. Bystrom Memorial award
Academy of Operative Dentistry award
American Academy of Implant Dentistry award
American Academy of Oral and Maxillofacial Radiology award
American Academy of Oral Medicine award
American Academy of Oral and Maxillofacial Pathology award
American Academy of Oral and Maxillofacial Radiology award
American Academy of Esthetic Dentistry award
American Academy of Pediatric Dentistry award
American Academy of Periodontology award
American Association of Endodontics award
American Association of Oral and Maxillofacial Surgeons Dental Student awards
American Association of Oral Biologists award
American Association of Orthodontics award
American Association of Public Health Dentistry award
American College of Prosthodontists award

American Dental Society of Anesthesiology award
Oral and Facial Surgeons of California award
Dentsply/American Dental Association Student Research Program award
Charles A. Ertola award (for removable prosthodontics)
Thomas B. Hartzell award (for periodontics)
Hinman Symposium award
International Congress of Oral Implantologist award
Lasky Family Endowment Pediatric awards
Oral and Maxillofacial Pathology award
Oral Surgery Outstanding Resident award
Quintessence Publishing Co. awards (one each for research achievement, periodontics, and restorative dentistry)
Warren Family Endowment award (for pediatric dentistry)
Western Society of Periodontology
Who's Who award

Graduation Honors

Upon recommendation of the Student Academic Performance and Promotion Committee, students who complete the didactic, clinical, and national board requirements for graduation and whose academic record qualifies them for election to Tau Kappa Omega are graduated with honors. Those who complete graduation requirements and whose record qualifies them for election to Omicron Kappa Upsilon are graduated with high honors. The valedictorian is graduated with highest honors.

Honor Societies

Phi Kappa Phi

Each year DDS and IDS students who demonstrate the highest academic achievement are inducted into Phi Kappa Phi, a national multi-disciplinary honor society.

Omicron Kappa Upsilon

The Delta Delta chapter of the national dental honor fraternity, Omicron Kappa Upsilon, was organized at the dental school in 1934. Its purpose is to encourage scholarship and to advance ethical standards of the dental profession. Membership is limited to twelve percent of the graduating DDS and IDS classes, selected by a faculty vote on the basis of scholarship and character.

Tau Kappa Omega

In 1927, the Alpha Chapter of an undergraduate honor society, Tau Kappa Omega, was organized for promotion of honor and service to the school. Students are elected to the fraternity on the basis of ideals and scholarship.
