CHIPS

Chips - 1962

Foreword

Throughout the years at the College of Physicians and Surgeons there have been many classes both graduate and undergraduate who enter the doors at 344 - 14th Street. Within these doors they gain and enlarge their knowledge of the sciences and they specialize in the science of the oral cavity, dentistry.

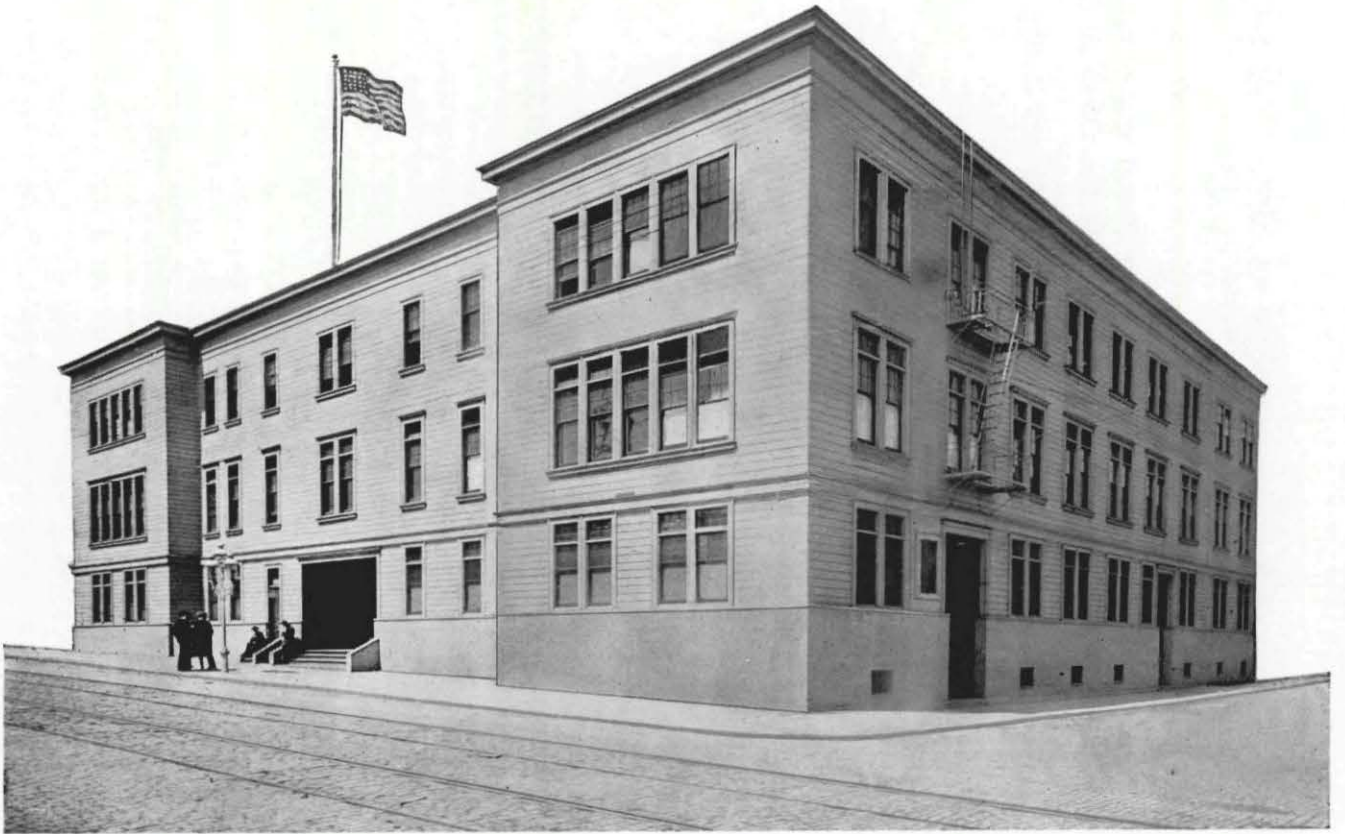

The theme of Chips '62 will show the portals of entrance that each person in the college passes beneath at least two times a day and many times much more frequently in their search for knowledge or instructors.

The cover, a modernized caduceus, was chosen to represent the modern up-to-date thinking, training, and research to be obtained at the college with the hopes that in near future years, a building will be built in keeping with the educational standards of the college.

SPECIAL NOTE

The Chips staff felt that because of the death of two fellow classmates, no yearbook dedication would be made to a faculty member this year, instead a memoriam would be given to these two outstanding young men.

In Memoriam

Charles R. Bertrand was taken from the Senior Class by accidental drowning at Lake Pillsbury on July 30.

Charlie was born and had lived in San Francisco for 23 years. He attended St. Emydius School for eight years and was graduated from Riordan High School in 1955. His three years of undergraduate work were done at the University of San Francisco. He entered The College of Physicians and Surgeons in the fall of 1958. During his years at the College he was an enthusiastic student and an active member in school activities as well as being a devoted brother in the Psi Omega fraternity. He was on the staff of "Contact Point" during his junior year and was elected editor for 1961-62.

Charlie had many loves, and in particular enjoyed any activity in the mountains, growing orchids and miniature conifers.

The tragedy of his death has, beyond any repair, taken its toll from his classmates, the School, his friends, and almost anyone who had come intimately into contact with him. Our sympathies are sincerely extended to his mother and father, Mr. and Mrs. C. J. Bertrand, to whom he was a devoted son; Mrs. Mae Randall, his grandmother; and his sister, Mrs. Eleanor Blank.

For ourselves . . . tributes, a moment of group silence, and moreover the recurrent personal and individual reflections and prayers, help to bridge the emptiness we so often feel during these early days without him. His unforgettable laughter, good nature and sincerity in his relationships will long pervade in the School and in the hearts of all those who knew him.

JIM BLACK

In Memoriam

Maedle C. Kreinbring, whose accidental death occurred, along with that of his brother Delbert, on January 21, 1962, was born in Pine City, Minnesota, on March 29, 1939, and lived in Minnesota until 1947 when the family moved to Santa Cruz. He was a resident of Santa Cruz until he entered P&S in September, 1957.

In his short 22 years, Maedle accomplished more than most young men. He spent his high school days at Santa Cruz High School and at 18 entered San Jose State College. He studied for one year at this institution and then moved on to the University of California at Berkeley.

After only two years of excellent academic achievement in college, he was accepted at P&S. Before entering P&S in September, he was married to Janet Jean Hensley.

In September of 1959 he became a member of the Class of 1963. From the first day in class at P&S he exhibited his outstanding talents, always at the top of his class, not only academically, but in his clinical laboratory courses and also in personality. Always a smile ready, always willing to help at any given moment.

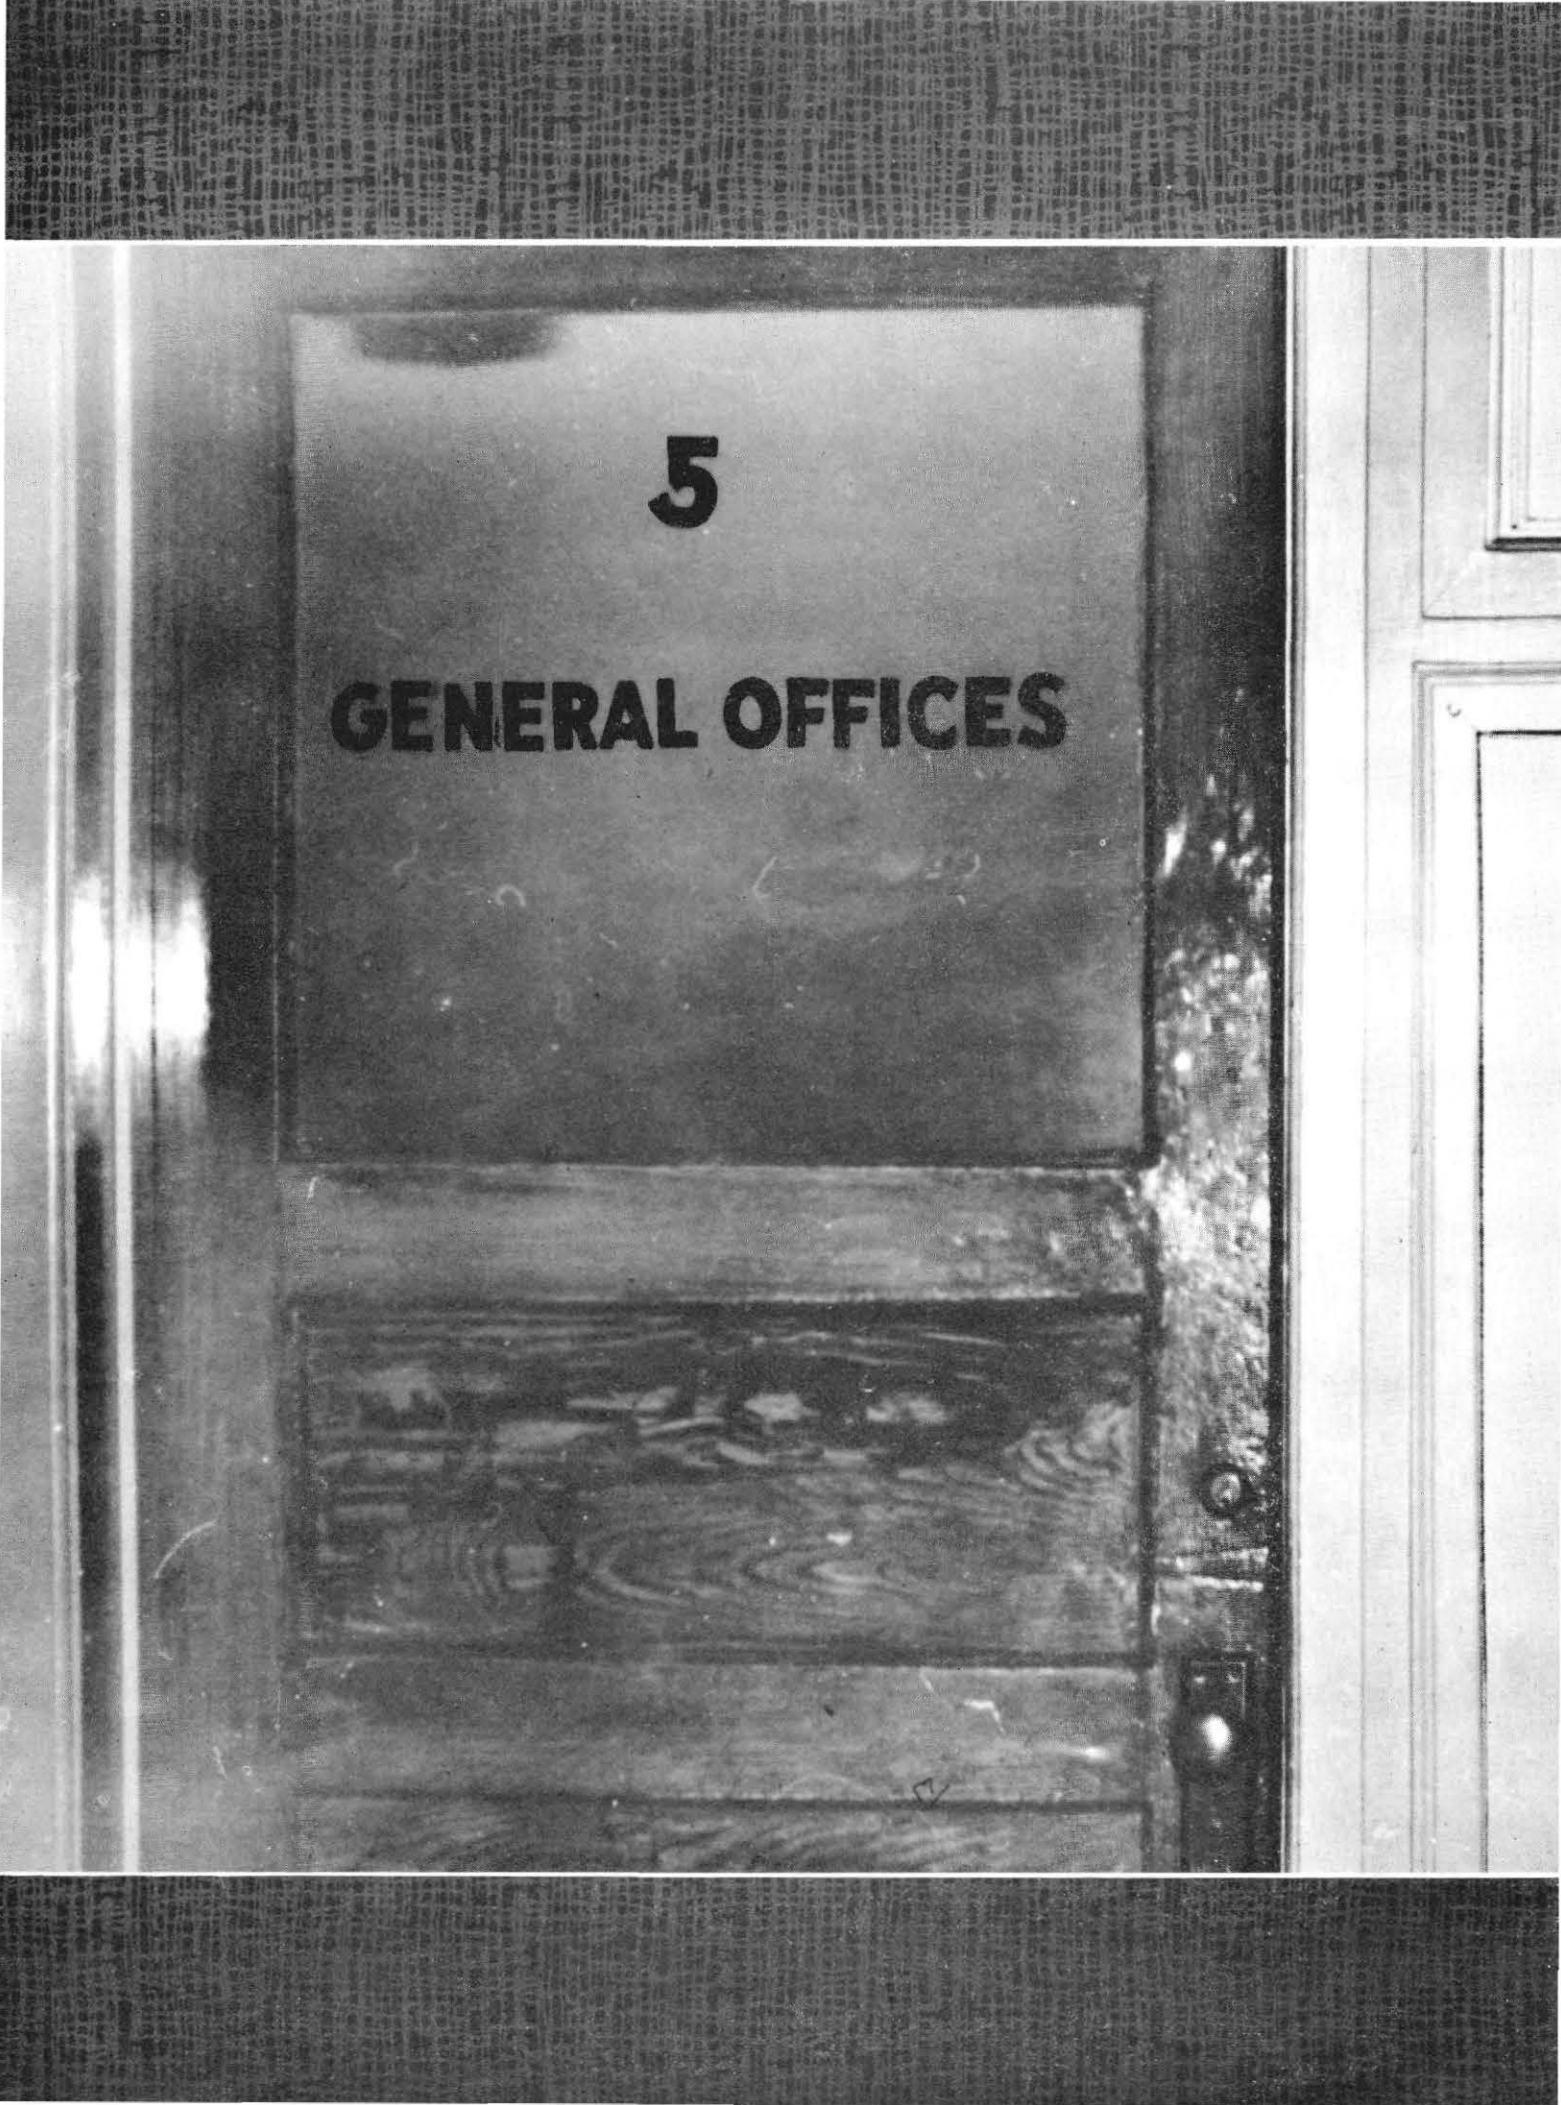

Then, in the middle of his junior year, his super ability still shining, his young life was abruptly ended. Even though the body is gone, the spirit of "Mike" Kreinbring will never be forgotten by the Class of 1963.

Maedle is survived by his wife, Janet, his mother and father and three sisters, Holly, Margaret and Maralee.

R.O.C. and R.L.G.

Dean

The Dean's Message

The Last Class

The College of Physicians and Surgeons was established in 1896 as a school of medicine, dentistry and pharmacy and continued as such until 1918 at which time the schools of medicine and pharmacy were discontinued. Dean Charles Bixton continued the teaching program of the dental school until 1923. In this year a Board of Trustees was formed and took over the assets and continued the School of Dentistry as a nonprofit public trust with three objectives in mind.

The first was to make it the equal of any dental school in the country. The first step in accomplishing this took place in 1926 when the school was given full approval. Since that time the degree of excellence has increased. Undoubtedly this is the main reason why you and other students who have since graduated applied and matriculated at the College of Physicians and Surgeons.

The second was to move into a new, modern and up-to-date building. Unfortunately, the class of 1962 will not have the privilege of finishing their education in the new building. The administration of the school is hoping that the 1964 senior class will be able to spend their last few months in the new building and that the 1964 freshman class will be the first new class in the new structure.

It is our hope that by the time this issue of Chips comes off the press that the architects' plans and specifications will have been completed and that the ground-breaking ceremonies will be a short time off.

The third was to effect a university affiliation. This is now history, with our joining the University of the Pacific in the early months of 1962. The class of 1962 will be the last class to receive the "old" diploma or the last diploma issued by the College of Physicians and Surgeons, A School of Dentistry. The class of 1963 will be the first to receive the diploma from the University of the Pacific.

Thirty-nine years ago the five members of the Board of Trustees set out to accomplish the three objectives and the senior class of 1962 is privileged to share the accomplishment of these objectives with the Board of Trustees. As with the 1962 class, the Board of Trustees will function for the last time as a group.

It does not mean that this class is no longer a part of the school. It is definitely a vital part of the change.

FACULTY

Orientation

The material covered in this department is so oriented that the student may see the over-all dental picture. This is accomplished by a familiarization with the literature of dentistry, the workings of public health, legal requirements, management problems, and ethics of the professional man.

Dr. John Tocchini
Professor of Operative
Dentistry (Pedodontics)

Dr. Thomas Beare
Lecturer in Public
Health Dentistry

Dr. Joseph De Faille

Dentistry (Pedodontics)

Dr. William Westmoreland
Lecturer in Public
Health Dentistry

Mr. Bo Wilhelm Skarstadt
C.P.A., Lecturer
Practice Management

Anatomy

Comprehensive instruction in osteology, general and head and neck anatomy, general and oral histology is offered the freshmen and sophomore men in order to create a foundation of knowledge of the human body "as a whole." Dissection of cadavers and microscopic study of tissue specimens play key roles in the establishment of this understanding, and Dr. Wesson, who has been at the College since 1928, continually strives to see that the students learn their lessons well.

Dr. Miley Wesson
Clinical Professor of Anatomy
Chairman of the Department

Dr. Mitchell Bilafar
Associate Clinical
Professor

Dr. Nicholas D. Bonfilio
Clinical Instructor

Dr. Elmer Bricca
Assistant Clinical
Professor

Dr. William Clark
Clinical Instructor

Dr. John Crampton
Associate
Clinical Professor of
Oral Surgery

Dr. Robert Durand
Assistant Clinical
Professor

Dr. Joseph Presti
Clinical Instructor

Dr. John Roffinella
Assistant
Clinical Professor of

Operative Dentistry

Hamdi A. Tamini
Assistant professor of Microbiology
Chairman of Department

Microbiology

Dr. Tamini lectures and gives a laboratory course in the Sophomore year which includes a survey of the causative agents of infectious diseases.

Mrs. Marian Rose
Instructor in
Bacteriology
and Pathology

Dr. Paul Thomassen
Associate Professor of
Bacteriology

Physiological Sciences

The courses in this department are designed to give a comprehensive understanding of the functions of the body from both the chemical and the structural standpoints, so as to afford a basis of appreciation of normal and pathological processes, their responses to medicinal therapy, and the medicinal basis for Personal Hygiene and Preventive Medicine. Dr. Leicester, who has been at the College since 1938, has an impressive record of achievements in this field, and has developed a series of most interesting and informative lectures based upon his rich background of experiences.

Dr. Henry Leicester
Professor of Biochemistry
Chairman of the Department

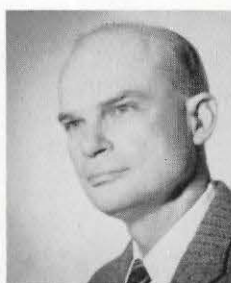

Dr. Thomas Beare
Lecturer in Public
Health Dentistry

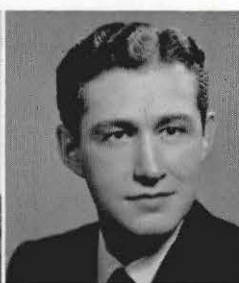

Dr. George Muller
Associate in Physiology
and Pharmacology

Dr. Donald Mythen
Clinical Instructor

Dr. Henry Ralston
Professor of Physiology

Dr. Harold Young
Clinical Instructor
in Therapeutics

Dr. Murray Groves
Assistant Professor
Chairman of the Department

Orthodontics

The aim of the department through lectures and demonstrations is to prepare the undergraduate general practitioner to evaluate orthodontic treatment. He is exposed to some of the recognized diagnostic tools of the specialty as a basis for recognition and timing of referral of patients. Clinical work is designed to supplement that taught in the Pedodontic department with the entire emphasis placed on prevention and interception of malocclusion. Dr. Groves, who came to the college in 1960, has much to offer the department through his sincere desire to impart to the students the most recent developments in orthodontic diagnosis and treatment.

Dr. Wilfred Forbes
Assistant Clinical
Professor

Dr. Gaylor Holmes
Assistant Clinical
Professor

Dr. William Hopkins
Clinical Instructor

Dr. Richard R. Ruther
Clinical Instructor

Dr. Walter Mandler

Operative Dentistry

The department is divided into four subdivisions, instruction is given in each of the four years, and the sections are coordinated in order to afford the best understanding of the subject. The first two years' instruction is designed to give a groundwork preparatory to the clinical practice of the junior and senior years. Dr. True, who has been at the College since 1928, is admired as a man devoted to the basic fundamentals of operative dentistry, and his perseverance in passing on these principals to his students is reflected in their desire to achieve excellence in their work.

Dr. Irwin Beechen
Associate Clinical
Professor

Pedodontics

One of the first challenges that will confront the graduate on entering practice is the child patient. This challenge will continue throughout his career. The course in Pedodontics is designed to prepare the student to accomplish successfully the care of these patients with efficiency, confidence and consideration for the child. Dr. Beechen, who has been at the college since 1947, sincerely assists the student dentist with the problems peculiar to the younger segment of his clinic experience.

Professor

Dr. Franklin Womack
Clinical Instructor

Dr. Lowell Peterson
Chairman of Department

Periodontics

The program of this department is built upon a solid foundation of anatomy, histology, physiology of the periodontium and related stomatognathic system. The student is taught to look for and recognize incipient clinical changes from normal; prevention of disease is a "prime objective." All treatment procedures are based upon an appreciation of the tissue changes underlying that particular clinical problem. Dr. Hileman, who has been at the College since 1958, is regarded by both students and faculty members alike as having done much to elevate periodontics to its rightful position of importance along with the other departments here at school.

Prosthetic Dentistry

Comprehensive instruction in complete, removable, and fixed partial denture prosthesis is offered in this department. Working in close cooperation with the periodontic, operative dentistry and oral surgery departments, students have been made to realize the importance of a correct diagnosis and treatment plan if success is to be achieved. Dr. Werner, who has been at the College since 1919, deserves much credit for his outstanding work in this department; his students have richly benefited from his practical application of fundamental principles and good judgment.

Special Clinic

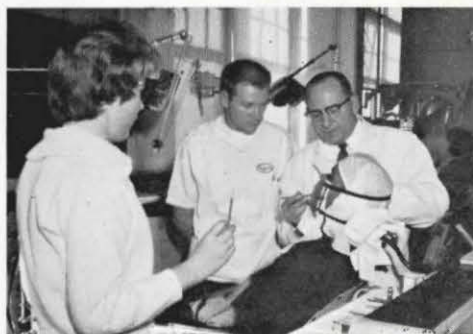

Carefully supervised practice in the placement of amalgams and gold foil is given to junior and senior students in the special clinics. The juniors are required to use the hand mallet for foil condensation. Seniors are allowed to use pneumatic condensers. There are three major objectives: To acquaint the student with the proper use of chairside assistants; to encourage efficiency and perfection in operative procedures; to prepare the student for State Board Examinations.

POSTGRADUATE-REFRESHER COURSES
AND
CONTINUATION EDUCATION

A section from the Principles of Ethics of the American Dental Association states:

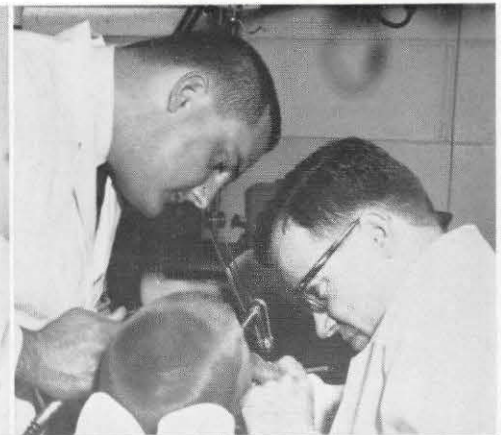

Section I

"The right of a dentist to professional status rests in the knowledge, skill and experience with which he serves his patients and society. Every dentist has the obligation of keeping his knowledge and skill freshened by continuing education through all of his professional life."

The College of Physicians and Surgeons lends cooperative support to the effort of Continuation Education by presenting an attractive program of refresher courses covering most professional fields.

May all our students and alumni realize the truth in the statement by Dean L. R. Main, "He who graduated yesterday and stops learning today, is uneducated tomorrow." Let us always strive to improve ourselves and our profession.

SENIOR CLASSES

ARTHUR GAGNIER
President

Four years and sixty men ago the footprints in the blazen sand converged upon a ramshackle ladder at 344 14th Street. All eyes were raised but none could see the top, leaving only the imagination as a clue to what was there. We all began the climb one by one in alphabetical order. The going seemed easy at first but we soon found that the splinters were many and the missing rungs made the gaps difficult to conquer. At the end of ten weeks there was a resting platform and then the climb began again, this time by the numbers the first is first and the last is last. Now we were climbing to stay alive. Occasionally your hands were stepped on by the man above but more often you would find a helping hand from above and a persuasive shove from below. We have progressed upward four miles high. Now we stand at the top and see the roads, like spokes on a wheel crossing the green valleys and through the hills and forests. We will all venture forth on different roads and whenever we look back we will see the hub of this wheel to which we owe so much.

SOPHOMORE CLASSES

ROGER BOERO
President

Upon returning from a well-earned summer vacation, the new sophomores, tanned, happy, and eager, renewed old friendships made during the previous year. After exchanging jokes, experiences, and handshakes, we realized that once again it was time to put the shoulder to the wheel, the nose to the grindstone, the ear to the ground, the Wedelstaedt to the Arkansas Stone, and work in that position.

Sleep became a luxury, eating became a part of technique, and the television became a dust-catcher. Castings, dentures, gold foil pellets, cadavars, bacteria, and silver points became the article of interest, not to forget 15mg Acetylsalicylic acid and two cups of café along with the many other brain stimulators.

Now that it is over, we recall many light moments and possess several fond memories of the Sophomore Year. However, there appears to be a lack of desire to relive the interval from Sept. 1961 to May 1962 other than mentally.

Interfraternity Council

The Intrafraternity Council at the College of Physicians and Surgeons represents the four National Dental Fraternity Chapters at the college. The council's membership is comprised of the presidents of the fraternities and the dean, representing the major part of the student body. The I.F.C. is intended to coordinate the activities of the fraternities and promote harmony and fellowship between the groups. This cooperation and fellowship exists not only within the fraternities, but also in the activities of the wives' groups.

The fraternity system at the college is intended to extend the professional ability as well as the social understanding of the student. Activities range from business meetings, seminars, and table clinics to picnics and dinner dances. The activities of the fraternities cement the bonds between students and between students and alumni. This interaction between student and alumnus helps prepare the student for his part in the larger fraternity upon graduation.

Alpha Omega

Jack Leider
President

Kappa chapter Alpha Omega has enjoyed an active year despite the fact that the number of active members was lessened by graduation. Therefore the chapter owes considerable thanks to the Alpha Omega alumni for support in the various affairs and the maintenance of the house and the laboratory facilities. Their support has been both moral and financial and to the alumni the active chapter owes its continued existence.

The highlight of our social season was our Las Vegas Open House to which the student body, faculty, and personnel were invited.

Alpha Omega has tried to build professional men—professional in attitude, and professional in their desire to contribute to the growth of dental science and art. We will strive continually toward that goal; success has been and will continue to be our just reward.

The social calendar this year, as in the past left little to be desired. Heading the list of activities were the monthly dinner meetings held at various excellent restaurants in San Francisco. In October the party season was kicked off via a Halloween party at the Cal Zip House. December saw the Zips off to the biggest and best annual Reno Trip yet. A few of the weekenders got early starts on the bus and couldn't remember crossing the Vallejo bridge. January was the month of Rush Parties for the Fraternities and saw the Zips migrating South to San Mateo for a Western theme party. Our thanks to the Zipettes for a chuck wagon full of excellent food. February was the month of the Cioppino. As usual the alumni outdid themselves in providing an outstanding event for the active chapter. March saw the Zips at the Fort Scott Officers Club enjoying a "Twisting" dinner dance.

In all, the past year has been a memorable one for all, and it is the hope of all Zips that the years to come will foster a greater spirit of brotherhood and fraternalism.

Somehow another year has passed, and another fine group of Delt seniors prepares to take its place in the professional world. We of Delta Sigma Delta look back upon a year replete with memorable social events highlighted when the Delt went Hawaiian. Fun was had by all when they led the other fraternities to the snow country for a weekend in the snow.

Special thanks are due Drs. Scrivener, Bushnell and Butler who have continued to devote so much time and interest to fraternity affairs and to those alumni who have returned to make our monthly dinner meetings so much more valuable and interesting. Equally deserving of mention and thanks are the Delt wives whose efforts have so greatly contributed to the success of our social year.

City College of San Francisco

The City College of San Francisco would like to take this opportunity to thank the students, faculty and administration of the College of Physicians and Surgeons for their wonderful cooperation in our program of training Dental Assistants.

Our very best wishes are extended to all of you and particularly to your very able Dean John Tocchini in your efforts to raise funds for new facilities. It is our hope that your institution will continue to grow and prosper, and that our joint effort in training members of the Dental team shall be continued.

Training for Dental Assistants

LEFT TO RIGHT: Mrs. Virginia Lerner, Mrs. Iona Trimble

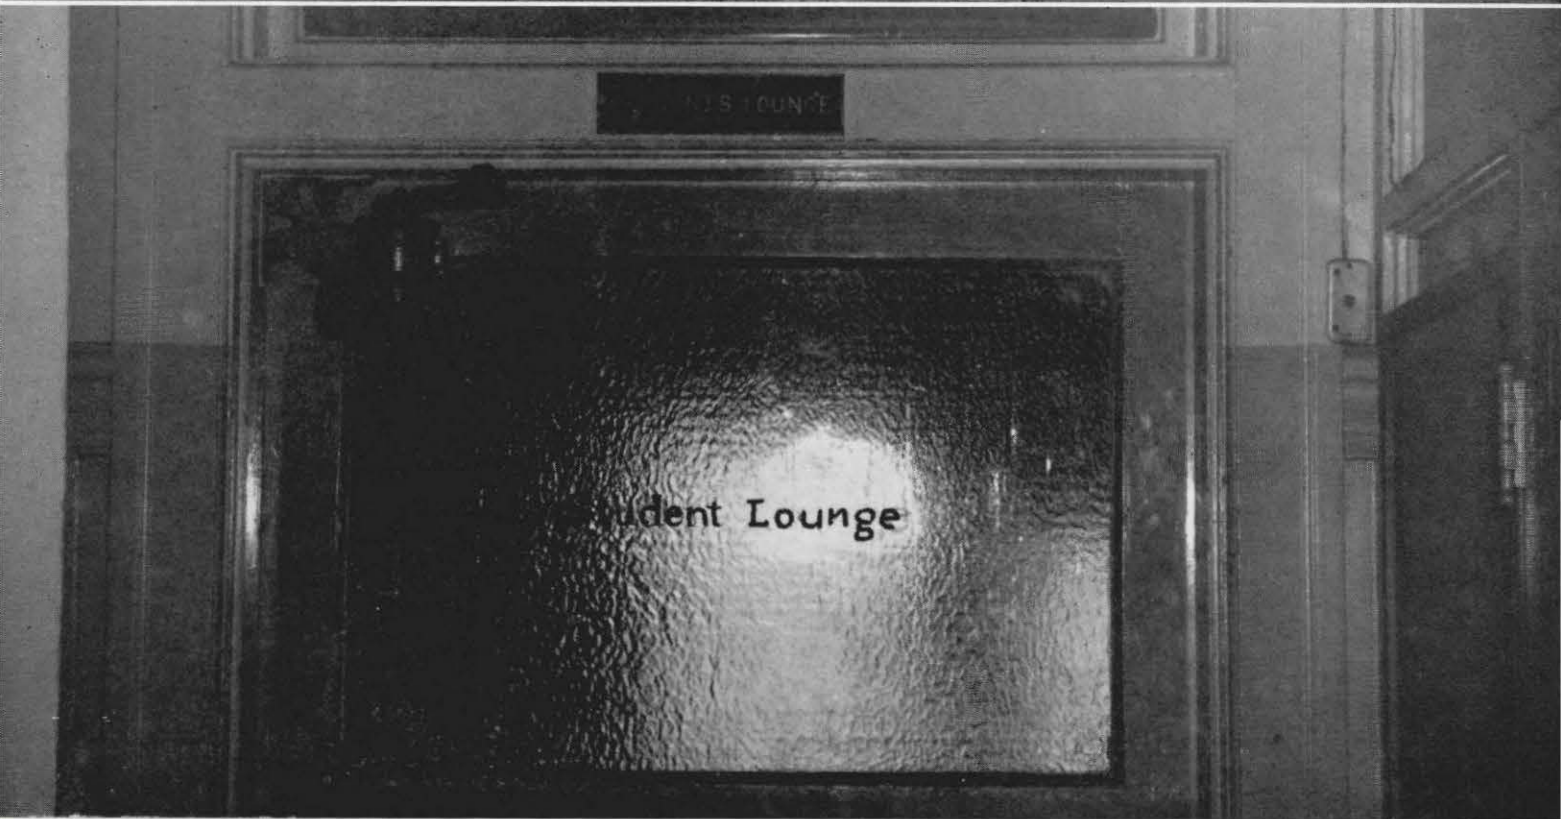

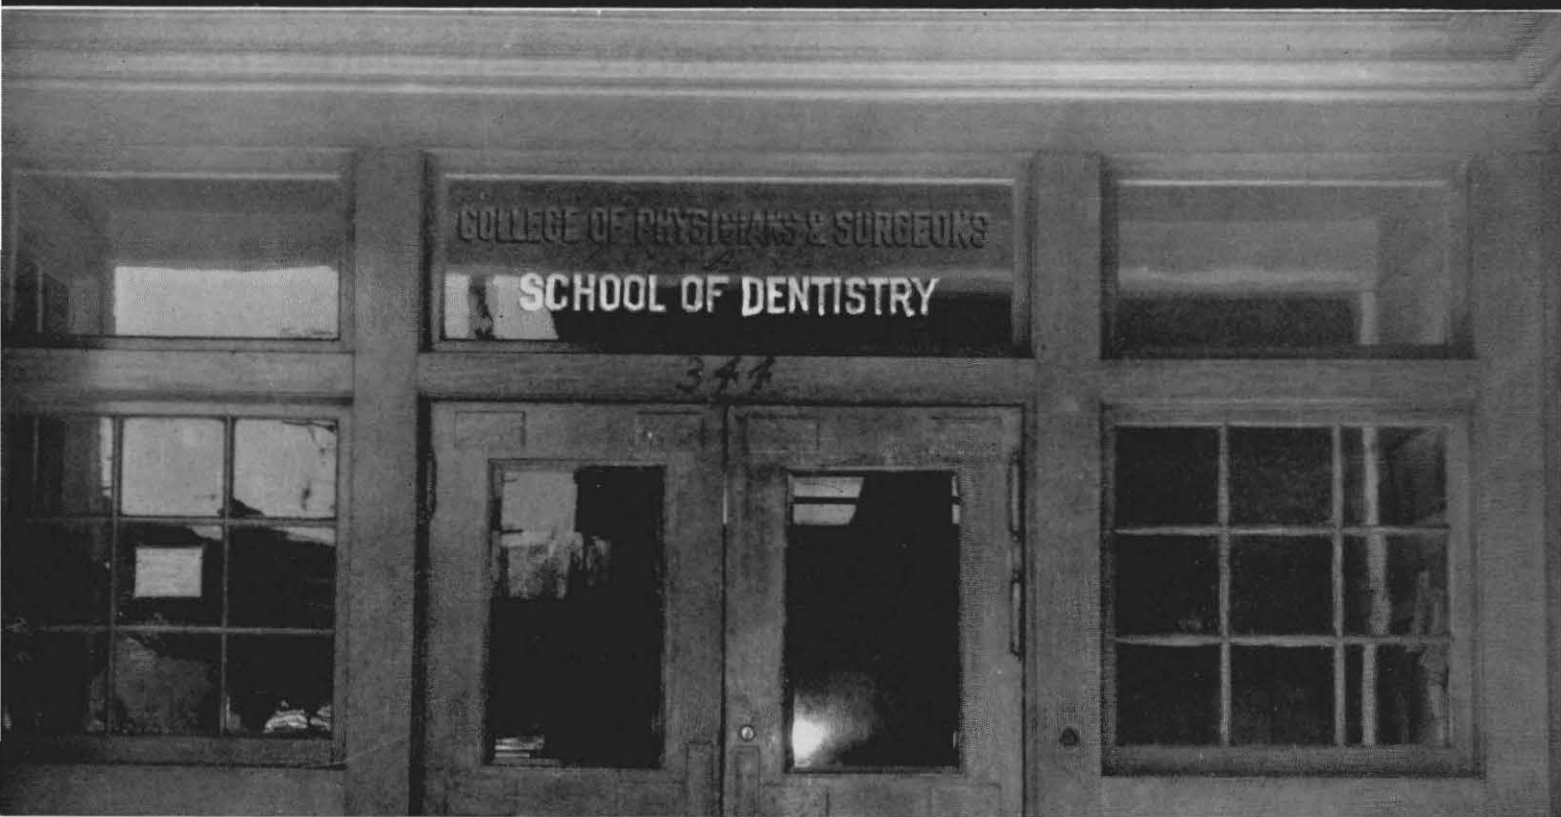

At the College of San Mateo, students in dental assisting receive instruction in all phases of the occupation. In the first semester the necessary academic courses and related subjects in this field are taken. The technical courses are given in the 3rd and 4th Semesters.

Clinical Practice at the College of Physicians and Surgeons in San Francisco is an important part of the training of the dental assistant. This practical experience is taken under the direct supervision of the dental professors and instructors in dental assisting.

Upon successful completion of the training, the graduate is awarded the Associate of Arts degree and a Certificate in Dental Assisting. A Dental Advisory Committee and members of the Dental Society assist in the operation and instruction of the course.

The College of San Mateo Dental Assisting program is fully approved by the San Mateo County Dental Society, the American Dental Assn. and the American Dental Assistants Assn.

A S S O C I A T I O N S

Student Body

Theodore E. Thom
Student Body President

In past editions this page has been given to several paragraphs describing the composition and activities of the student body. I depart from this tradition to note an action by the student body far more important than the meetings, parties, and dinner dances of the past year.

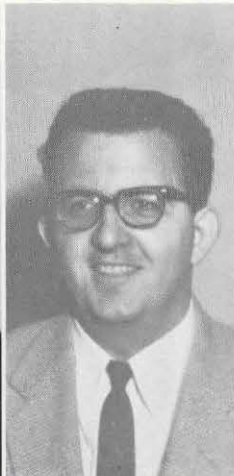

I am referring to the tremendous impetus given to the College's fund raising drive by individual student pledges. Pledges were signed by nearly all members of the student body and totaled \$223,000. The pledge cards are to be kept in trust until the student graduates, when they are turned over to the College administration.

For many of us this pledged gift represented a personal triumph over the many small grievances accumulated since we began at P. & S. Rising above these grievances may mark our first real step toward becoming members of the profession.

Tau Kappa Omega

Tau Kappa Omega is the college honor fraternity which is intended to encourage scholarship and endeavor of a high character. The fraternity was founded at the college in 1927 and has had many distinguished men of the dental profession as active members. Each year during the fall quarter new members are selected from the junior and senior classes. At the same time an honorary member is selected from the profession. During the school year dinner meetings are held at which time guest speakers present subjects of interest to dentistry. Members of Tau Kappa Omega enter the profession with a sense of purpose born of diligent application to didactic and clinical dentistry.

Contact Point

Contact Point is the official monthly publication of the college. Its purpose is to report on the activity and progress of the school and alumni, and to present articles of academic and social interest to its readers. The distribution of Contact Point to all of the widely dispersed alumni has been an important factor in the maintaining of the close ties between these alumni and P. & S. The aim of Contact Point has been to foster and maintain mutual interest, understanding, and cooperation between the students, faculty, and alumni of P. & S.

Alumni Association

As President of the Alumni Association this year, I and the line officers want to extend our greetings to you in this issue of "Chips." This marks a period of great activity of your college, in taking forward strides to attain the goals we have strived and dreamed of for so many years. The affiliation which gives us university standing by becoming a part of the University of Pacific, of Stockton, California, and an integral part of the Presbyterian Center, in San Francisco, is what we most needed and have now.

You undergraduates are to be congratulated on your excellent choice in affiliating with this great and outstanding Dental Educational Center, headed by such an able Dean as Dr. J. Tocchini and his outstanding faculty second to none in the country.

The reputation of your college, the Board of Trustees, and especially your Alumni Association, is the finest in the land.

With such a background your dental education is assured, and you know that you will be properly prepared for a professional career, and do just service to the patients entrusted to your care.

Support your college at all times. Support your Alumni Association by becoming a member on graduation. Keep in touch with its activities and render it loyal service whenever you are called upon.

Max Rabinovich, D.D.S.

In-activity

But on the other hand.

Phantom backfield.

A Few New Teeth

The dentist tinkered day by day,
With wax and sticky gum
He built a model out of clay
And shaped it with his thumb.

He made the man a lovely plate,
With three teeth in a row,
And bars of gold to keep them straight,
Then said, "They'll never show."

"Go forth," the dentist told the man,
"As proud as you can be.
Those teeth are perfect.
No one can tell they were bought from me.

Why I, by whom the work was wrought,
The truth had never known.
Were you a stranger I'd have thought
Those teeth were all your own."

While going out he bumped a miss.
"Excuse me please," he said.
The lady smiled to hear him hiss—
His cheeks went flaming red.

He met a friend upon the street,
Who joined him for a walk,
And said, "Let's go where we can eat,
And have a quiet talk."

"I'd rather walk," the man exclaimed.
"Let them upon the street,
For with you I should be ashamed
To eat that food to eat."

"New teeth?" the friend remarked,
And to the troubled man said "Yeth!
My dentist swore you'd never know.
How did you get them?"

A Christmas Story

'Tis the last day before Christmas and all through the place
The students are happy, there's a smile on each face.

Except for one lad who solemnly stares
At a green bound book, he seems burdened with cares.

The book is a text by True and two others.
I know not their names, but they're F.A.C.D. Brothers.

It seems that this last day he scheduled a case
For a special out back, you all know the place.

Now, specials aren't ordinarily bad,
Unfortunate—perhaps, or maybe sad,

But this day with a certain Doctor in charge,
Danger and fear filled the room at large.

At first twas the set-up with instruments not sharp,
This seemed the thing which kindled a spark,

And from this moment on just nothing went right.
The rubber dam, when in place, was a terrible sight.

The vaseline being yellow seemed to raise a question.
Then came the changing of the chair position.

The outline form could have been some better,
And retentions weren't made according to the letter

Of the "law," which is stated clearly in the text.
My hell! What won't he find to criticize next?

But at last, checked off. Now start building the gold.
Oh God! Please let the retentions hold.

They do, praise the Lord, and now it'll be fun.
But a hand on the shoulder, and a voice saying, "Son,

"I'd like to check your triangular bar . . .
Remember, son, we mustn't go too far."

Oh gold foil, spiritual uplift that you be,
Someday you'll be the downfall of me.

For the voice said, "You've gone too far, per se,
And now if you please, write a short essay

"Just a page or two I'm sure will suffice
On the triangular bar. Won't that be nice??"

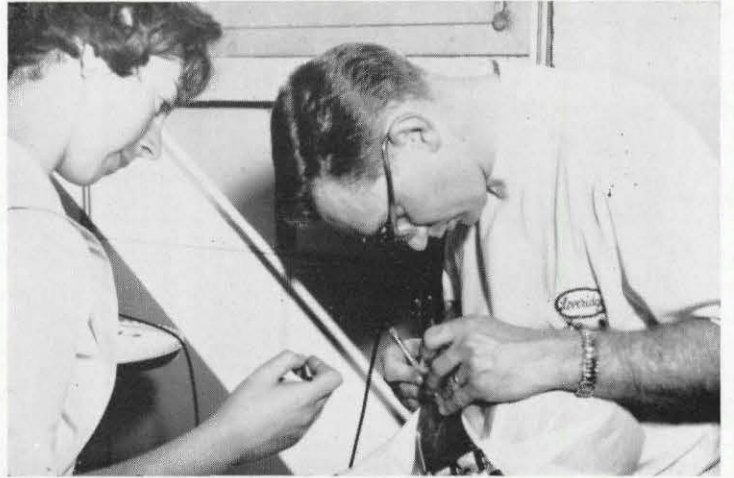

"And just one more thing since you're now here alone,
Place a temporary filling, and send your patient on home."

'Tis the last day before Christmas, and all through the place
No instructor is found with a bigger smile on his face.

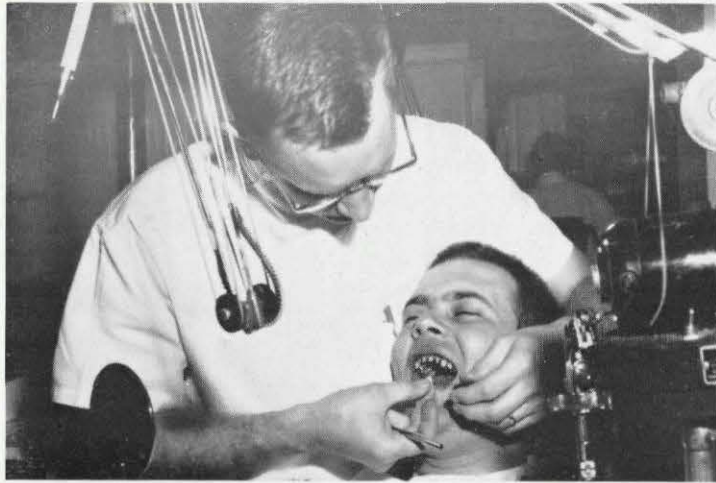

And why not??? For he knows he's helped a student out.
Clear out of school no doubt. No doubt!

Acknowledgements

A sincere thanks is here given to all who gave their contributions for a remembrance of 1961-1962 in P & S.

Assistant editor Fred Barden for his able work and suggestions.

Business manager Charlie Williams who found the time from his active clinical practice to do an outstanding financial job.

Advertising Marv Backlund a real big seller.

Photographer Paul Cheney who quickly adjusted to the shutter of the camera and became a real "flash."

Dr. James Campbell for the use of his camera and help during the year.

To the printers and engravers for their advice and aid.

Money—Mr. Skarstadt for his knowledge and explanation of the budget made it possible to keep the student bill down.

As this final section goes to press we hope that throughout the years many remembrances will be kindled by this book.

YOU CAN LOOK TO
EDWARDS
FOR HELP IN BUILDING A
SUCCESSFUL PRACTICE

The Edwards Dental Supply Co. has served the dental profession since 1882—and the experience it has gained is at your service.

YES you can look to Edwards for assistance in answering such important questions as these:

What locations require additional dental facilities?

What office design will best suit my needs?

What equipment is available for the practice I have in mind?

How can it best be financed?

Edwards has eight conveniently located offices and supply centers to assist you—each is at your service.
