To Be Remembered

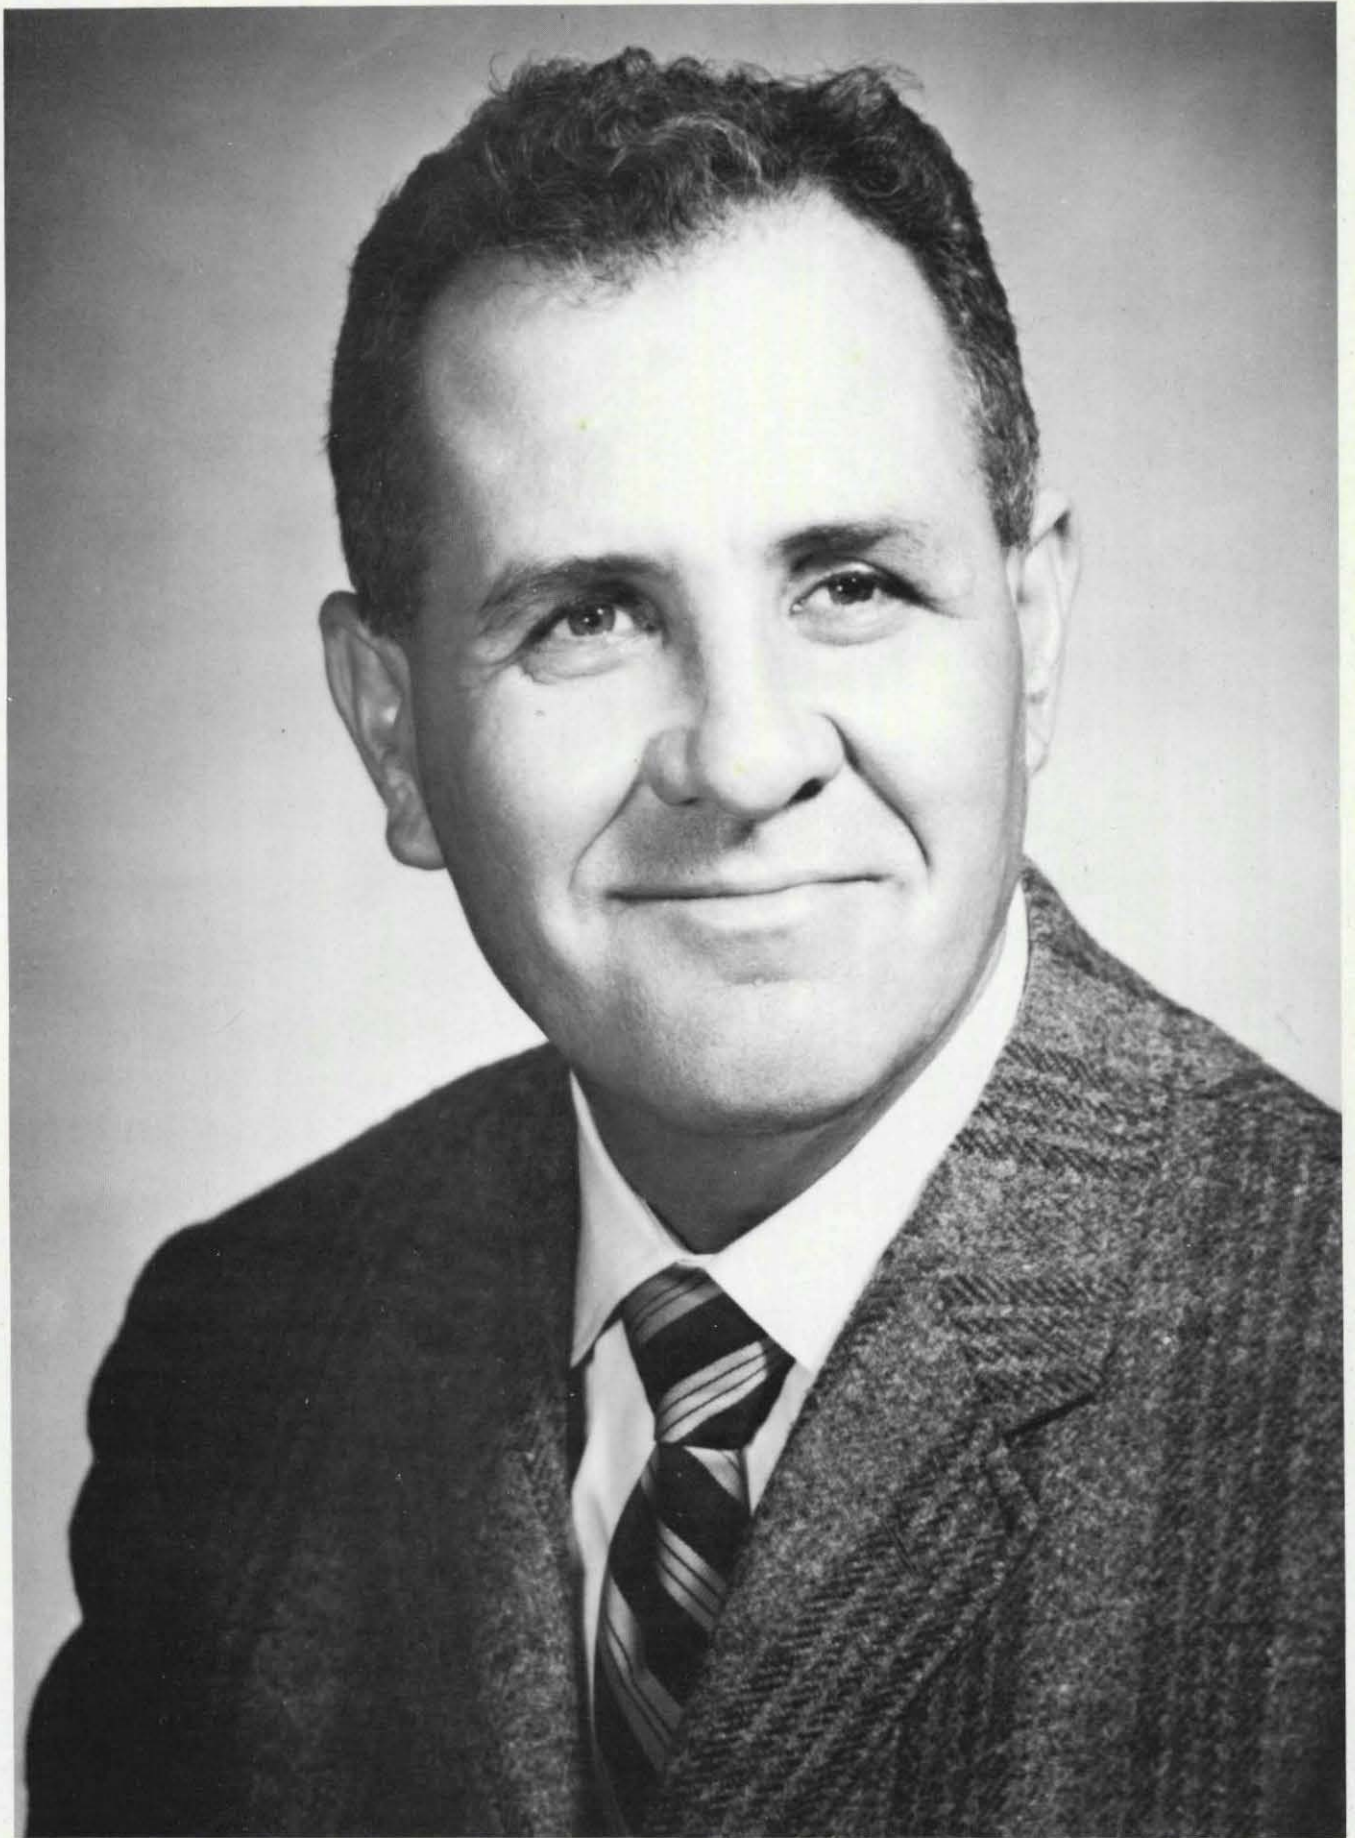

THOMAS J. BEARE, D.D.S., M.P.H.

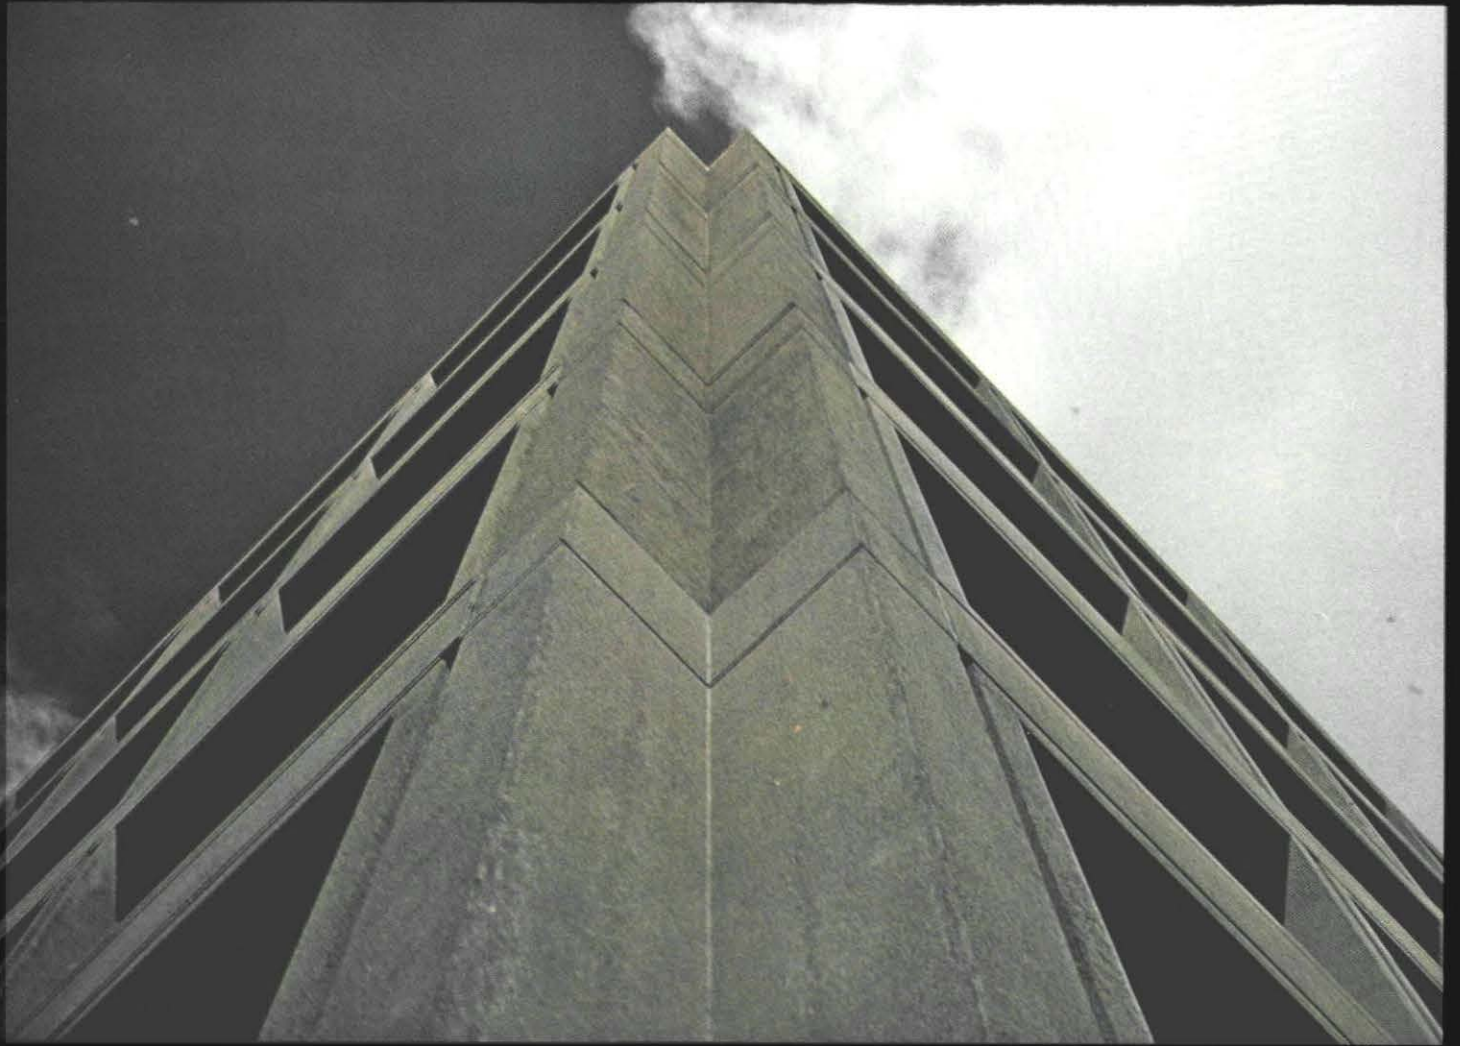

Traditionally, this yearbook is dedicated to the man the students feel has done the most to further their school, and their profession. It is with this is mind that we dedicate this yearbook to Dr. Thomas J. Beare.

Dr. Beare's progressive thinking and genuine concern for the student's welfare has lifted this institution into an unparalleled period of progress. He has instituted in its students a new sense of dignity and purpose. Dr. Beare has opened new avenues of understanding and cooperation between students and administration.

For all that he has done for us and the countless classes that will follow us, for making a potentially great school a truly great one, we the Class of 1969, proudly dedicate this yearbook to Dr. Thomas J. Beare.

EDITOR

Prologue

The staff of this yearbook has attempted to make it unique among P & S yearbooks. This, we hope, reflects the general trend toward change at our school.

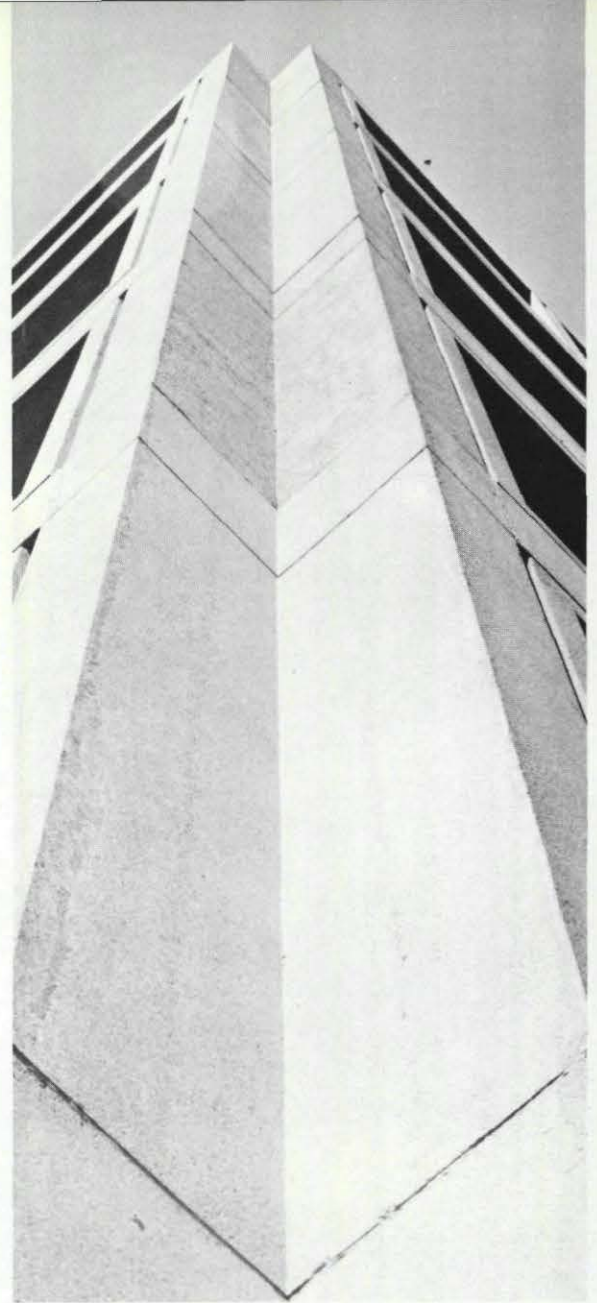

This year has represented a Herculean step forward, a step initiated by a forward thinking administration, and supported by an enthusiastic student body. Only by such progress can P & S maintain its position in the academic community. It is my sincere hope that this book symbolizes that progress.

The Senior Class . . .

If she'd just uncross her legs . . .

Ah, about two more drinks
should do it.

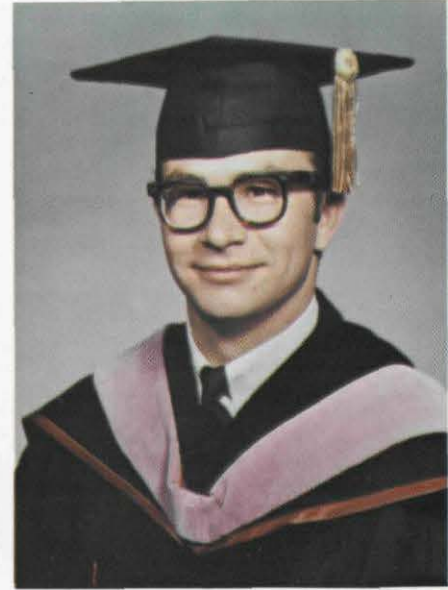

So she had to quit since they wouldn't
allow a student and employee to have . . .

Claudio Bartoli

University of the Pacific; Psi Omega; Tau Kappa Omega

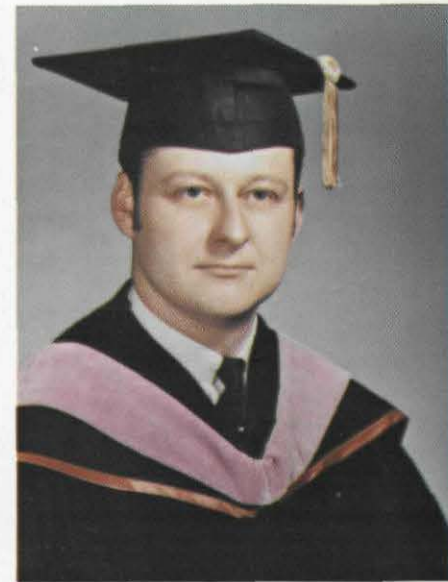

Our answer to the Costra Nostra was Claudio. Always willing to inject his opinion on how things ought to be run, he was more often right than wrong. We understand that Claudio will be back next year giving easy check-offs to members of the Mafia.

David W. Basso

University of Santa Clara, B.S. (Biology); Psi Omega

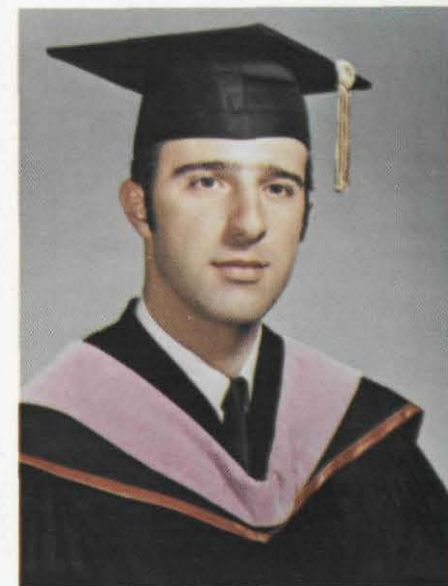

Big David, also a member of the Costra Nostra, was one of our better golfers. While not carding lowest score at the Student-Faculty Golf Tournament, he was Number One at the bar afterwards.

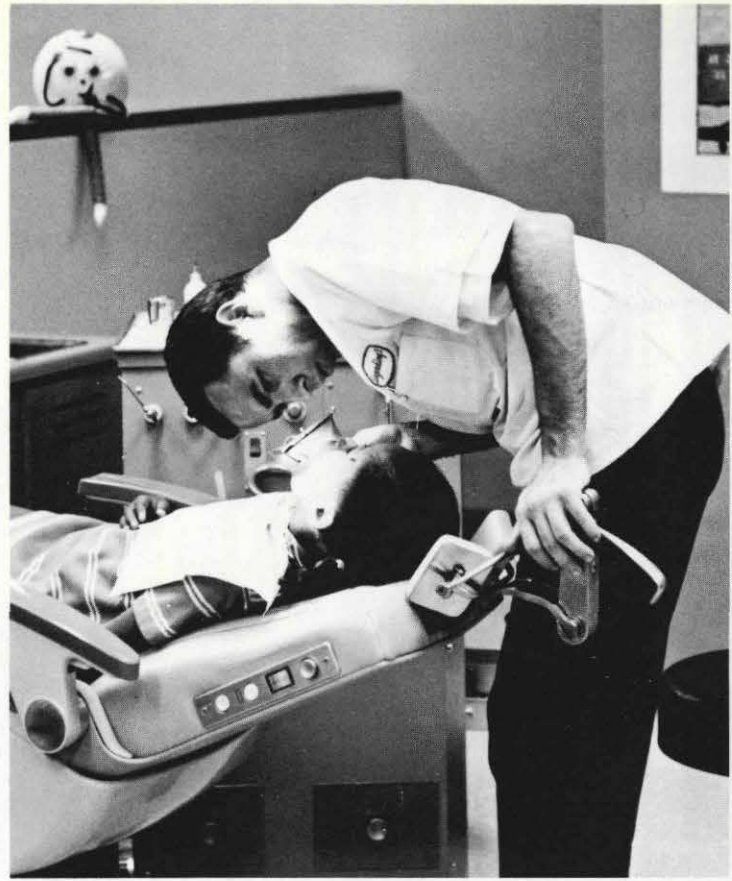

Leslie R. Betz

Long Beach State College; Psi Phi

Don't call him Leslie, the name is just plain Les. Also known as "Mother Betz", you would not believe that he had a full head of hair when he started school. We are not sure if school caused him to lose the hair or his bad luck with the females, but we suspect it was living those four years in the AO House with only his parakeet, Sid, to keep him company.

When we're done tell your
Mom she owes me eight bucks
for this foil.

Oh my god, what's my wife doing here?

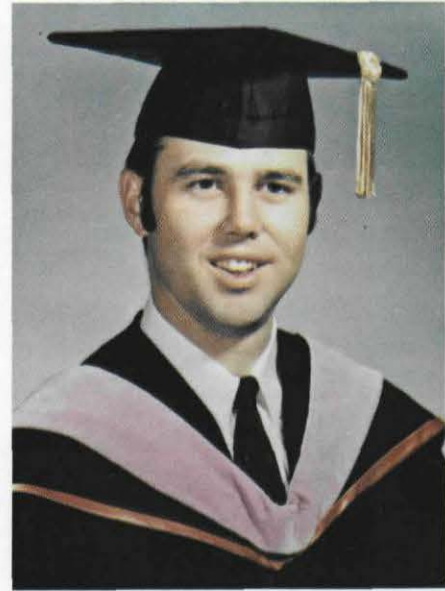

Wait until they realize what I left in that elevator!

Robert M. Bley

San Diego State College, B.A. (Zoology); Psi Omega

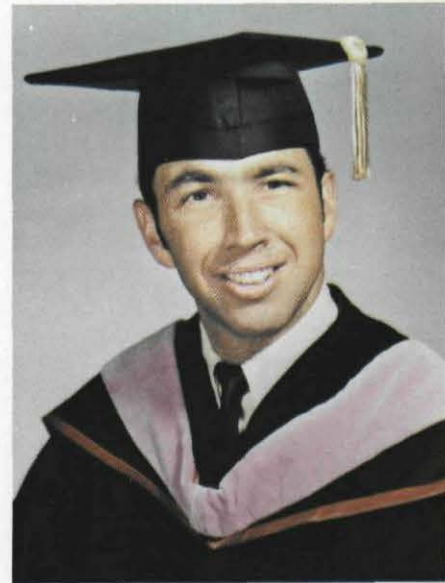

Boomer Bley was our champion in finding something to complain about. We are sure that Bob will find no shortage of material that he thinks should be changed or that he can do a better job at.

William H. Borgerding

University of Santa Clara, B.S. (Biology); Psi Omega

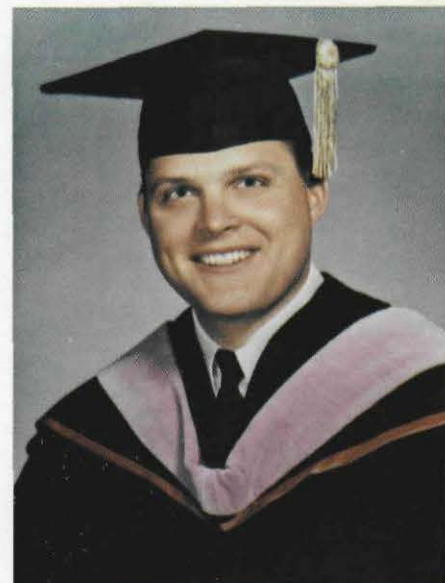

Easy going Bill, or Smiley, as he is known to his friends, doesn't have a care in the world. Just give Bill a little sunshine and a golf club, and he is a happy man. Bill will outlive us all with his easy and ulcer-free life.

Robert C. Brandt

University of Oregon, B.S. (General Science); Psi Omega; Navy

Robert Brandt is an individual whose awareness and sensitivity of the feelings of others is surpassed by none. In fact, all his geriatric and pedo patients, except the ones that have died, think he is the nicest guy in the clinic.

She swallowed the DAM!!

I better not break this spatula, it's the last one Mary had.

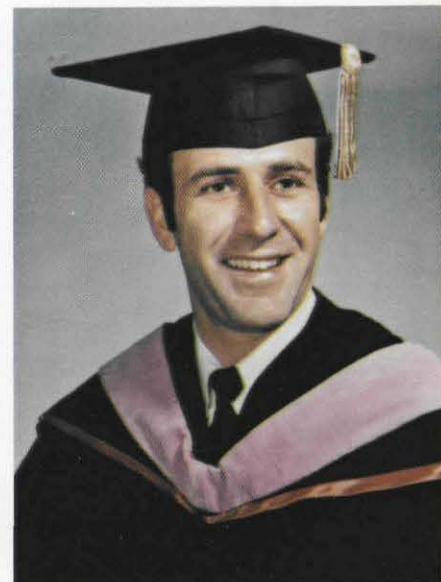

Friends, Romans, and class mates, we are gathered here today to pay homage to the King.

Charles S. Campanella

San Diego State College; Xi Psi Phi; Student Body Sergeant-at-Arms; Tau Kappa Omega

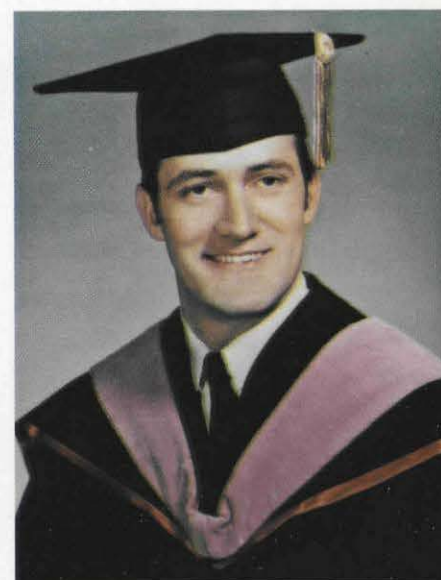

Chuck, better known as "The Destroyer", had the unique ability such that whatever he touched, never seemed to work again. We will remember Chuck, however, for his ability to finish an exam and be up and gone before some of his classmates had time to write their name at the top of the page.

Talmadge Carter

Fresno State College; Xi Psi Phi; Student Body President (1968-69)

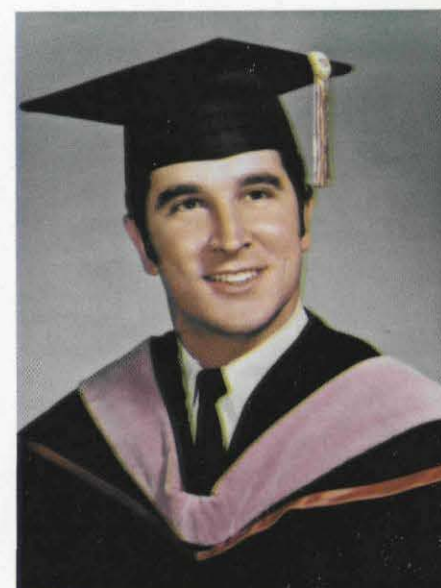

REX, as he became known during the senior year, was a great surprise to those of us who promoted him for student body president. Tal got more accomplished during his tenure in the way of student benefits than all his recent predecessors. For a while when the school was searching for a new Dean, we expected to see Tal's name in nomination.

Alan M. Coffin

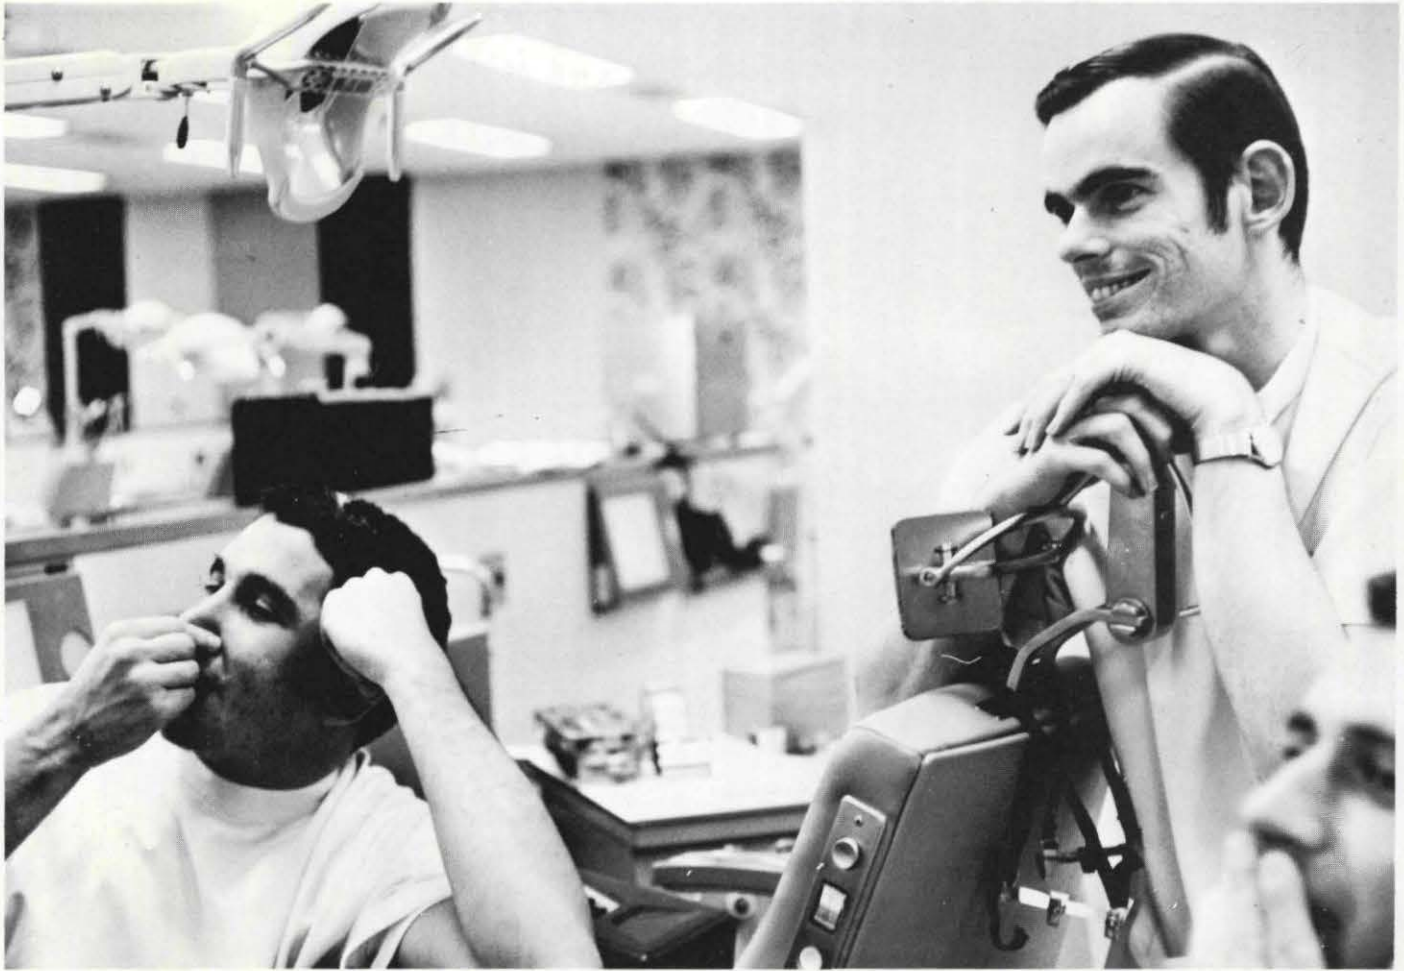

*Cal Poly, Pomona; Xi Psi Phi; Junior Class Secretary-Treasurer;
Senior Class Secretary-Treasurer; Student Body Treasurer (1968-69)*

Big tall Al could have made a career in Baseball, but luckily for us, he chose Dentistry. Easy going Al was our best athlete in the class, and no one dare take him on in a basketball game.

You going to be using your place tonight Terry?

Ya still want me to try and find you a handkerchief, Al?

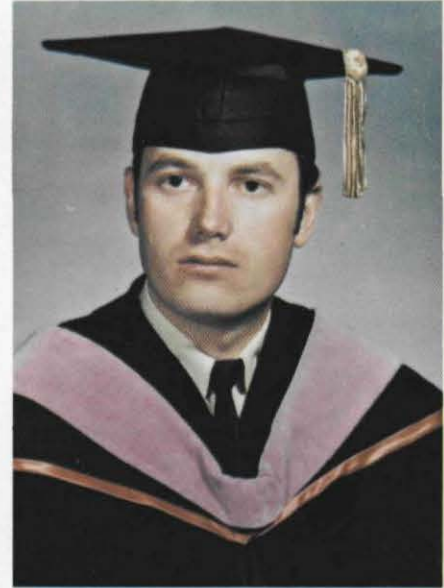

"Jack Morman" is a difficult term to describe.

David P. Coldesina

University of Utah; Xi Psi Phi

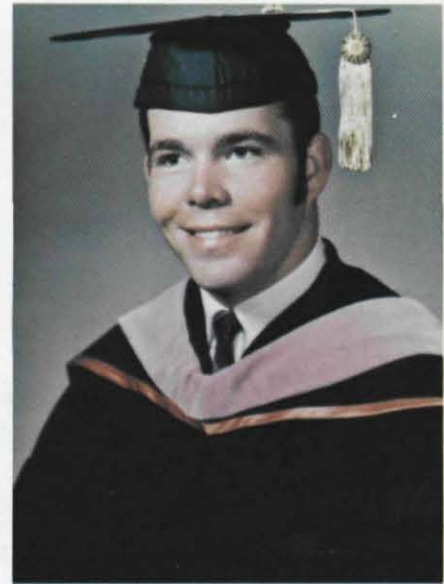

Coldy was more at home sitting at a bar with a nice cold glass of beer, than sitting at a dental chair. We can't understand why he wants to go back to Utah, when the San Francisco night life seemed to agree with him so well.

Michael C. Crookham

San Jose State College; Psi Omega

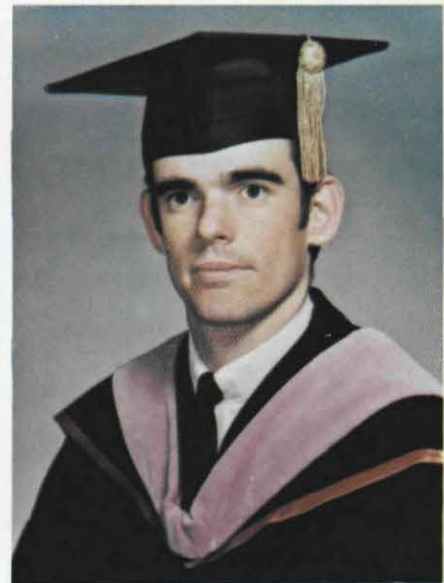

There appears no biography for Mike, because all those submitted were unprintable.
Editor

Walter T. Cunningham

U.C.L.A., B.A. (Zoology); Xi Psi Phi; Navy

It seemed like Walt spent more time at the golf course his senior year than in the clinic. Walt will be the only one to put in two years in the Navy having never seen the ocean.

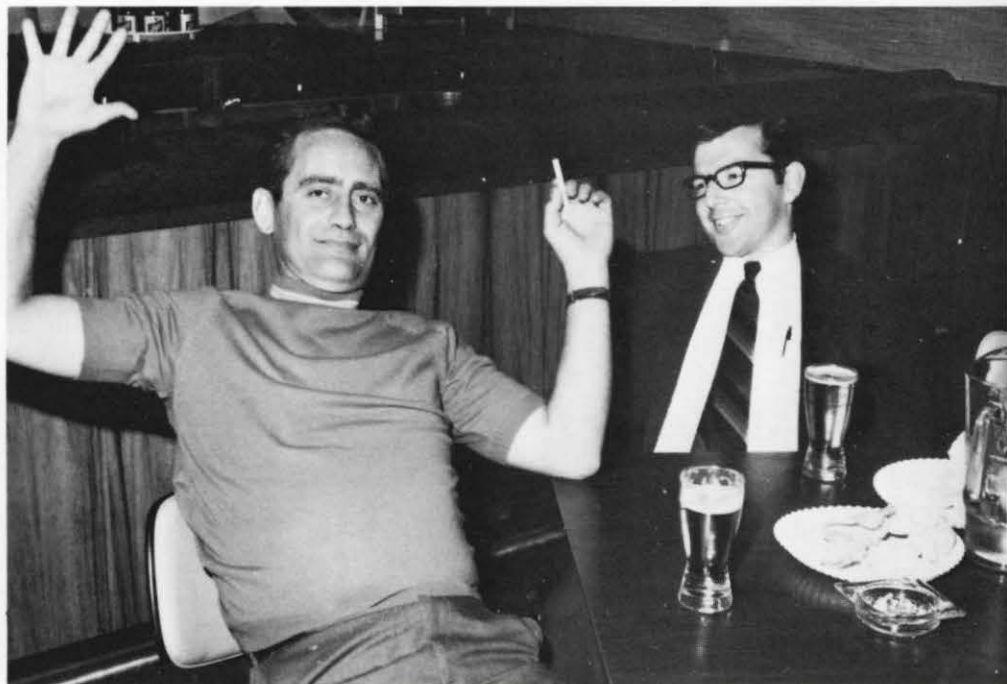

“@ 18% #”“?@”

I'm so happy here.

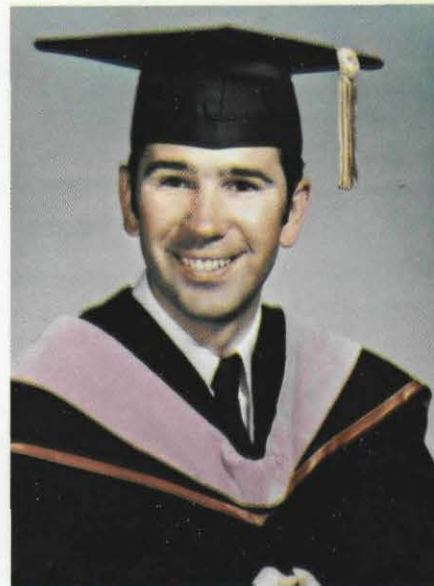

Don't kid me, Paul; it isn't that big!

James R. Douglas

*San Jose State College; Psi Omega; Tau Kappa Omega (President);
Member, Student Executive Committee; Omicron Kappa Upsilon; Navy*

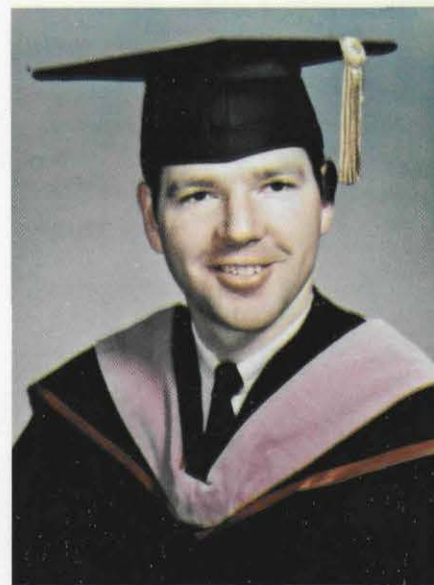

Jim was one of our top students and an easy going likeable guy. If you had a question, Jim would be the guy to see. We predict that he will be a successful dentist—if he can manage to stay away from the ski shops.

Larry M. Doyle

*Humboldt State College, A.B. (Zoology); Xi Psi Phi; Tau Kappa Omega;
Omicron Kappa Upsilon; Student Body Vice President, Junior & Senior Class Vice Pres.*

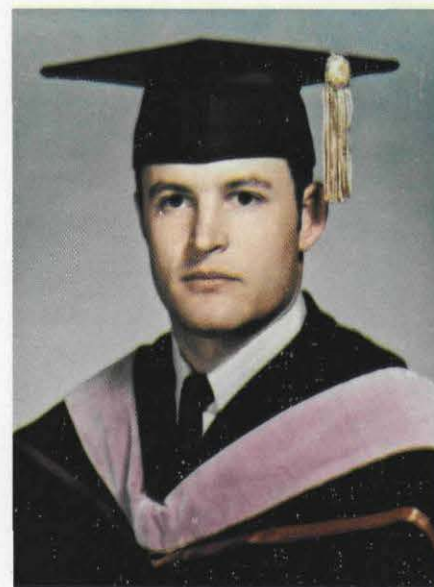

Larry had a particular ability to get elected to student body and class offices. This was due to the fact that he always did an excellent job and represented the students to his best ability. If there was a project that had to be done, count on Larry. The school will really miss a hard working and likeable guy.

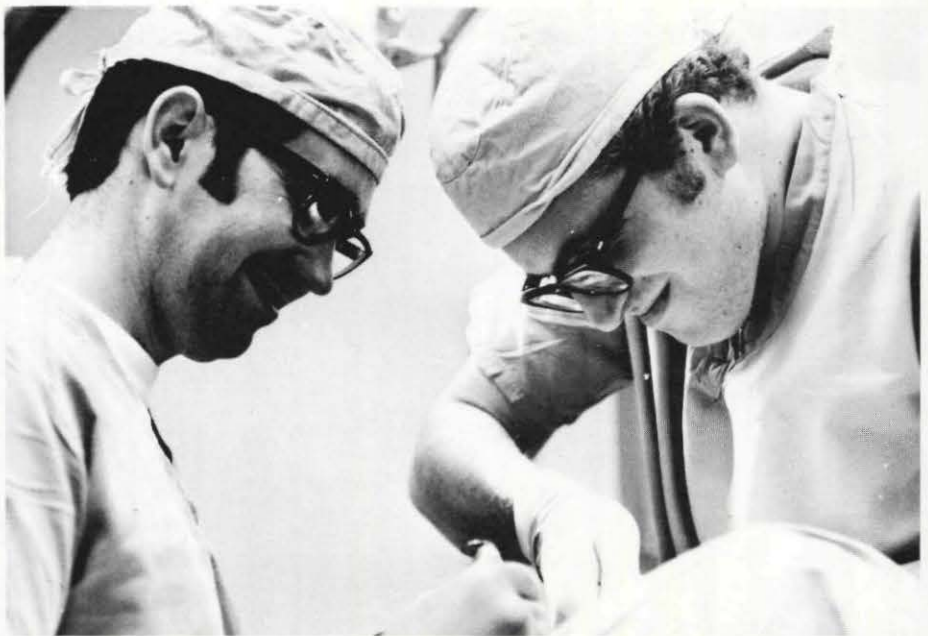

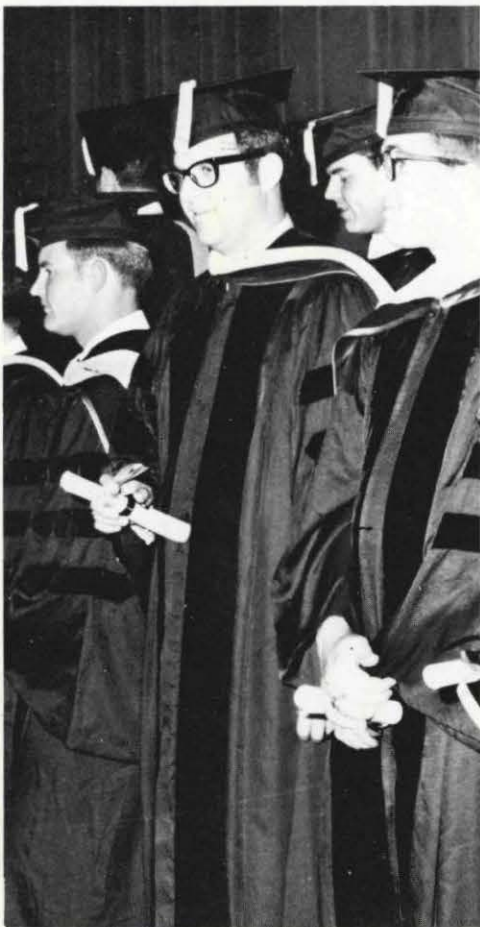

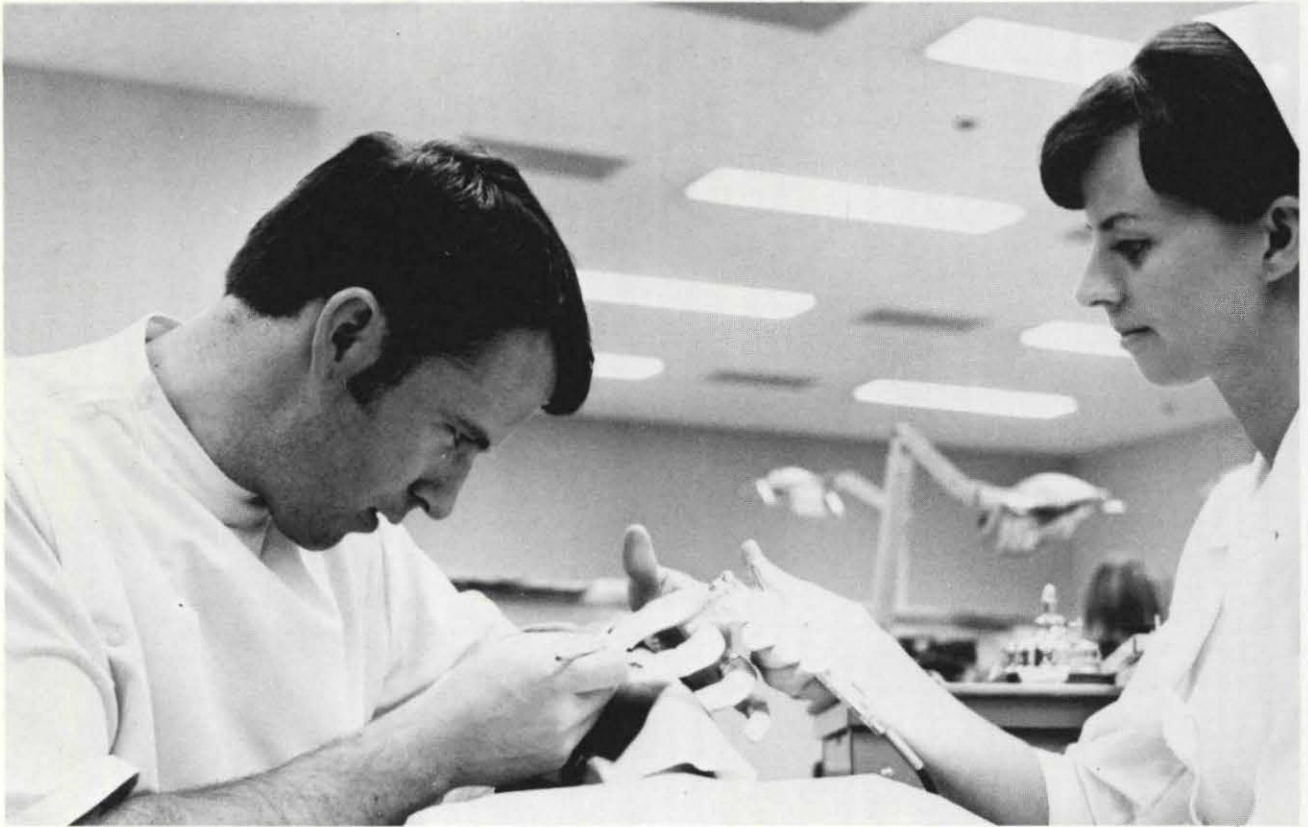

Michael W. Ericson

University of California-Berkeley, A.B. (Zoology); Xi Psi Phi

Along with Walt, Mike formed the other member of that famous golf twosome. When San Francisco had a sunny day, you could see Mike walking over to Walt's Unit and saying, "Hey Walt, why don't you cancel your afternoon patient, and let's get a little golf in!" More often, however, the two would never make it across the Bay Bridge on the way to school if the day was a sunny one.

Liz, you've blown my hangnail off!!

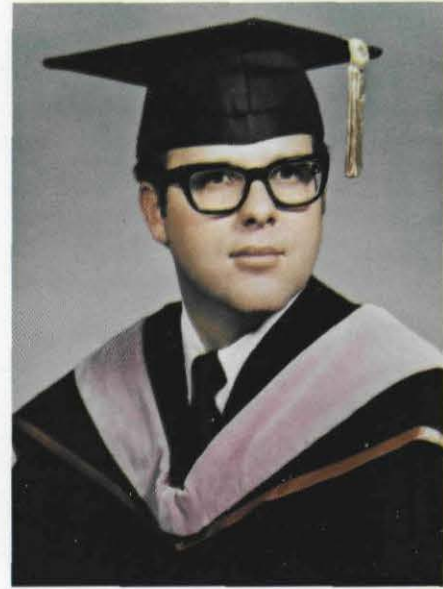

Why are you only taking out the ones with gold fillings Fink?

Fink, couldn't you wait until after we got off the stage to do that?

Charles A. Falzone

University of Redlands, B.S. (Biology); Psi Omega

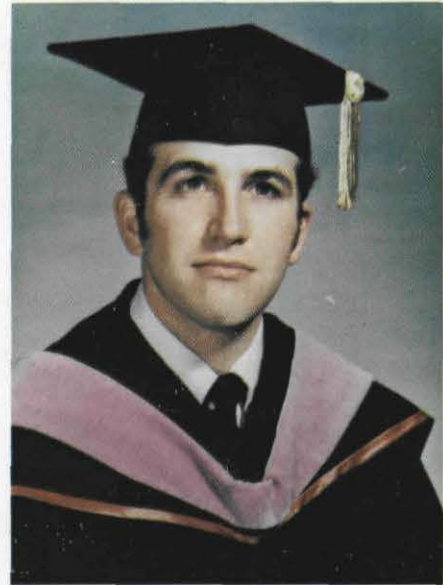

Our man in Sausalito was Fals. Chuck was more at home in a swinging bar across the Golden Gate than at his dental unit. When he was not longing for a nice cold drink, it was because he was thinking about Santa Barbara and how nice it would be to be on the beach looking at the pretty young girls. We predict that Chuck will desert his dental office for the surfboard and live the life of a "surf" bum.

Morris R. Fink

U.C.L.A.; Alpha Omega; Member, Student Executive Committee

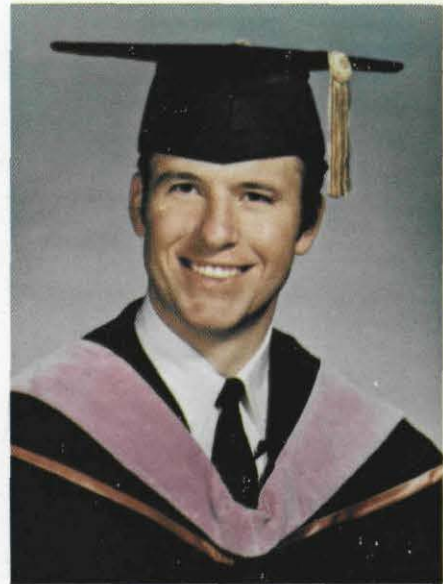

Goose will be returning to the Southland to set up practice in our favorite city. His first two years will be completely devoted to treating relatives. We hope everything goes well for Goose, but how can he fail in Los Angeles with a name like Fink.

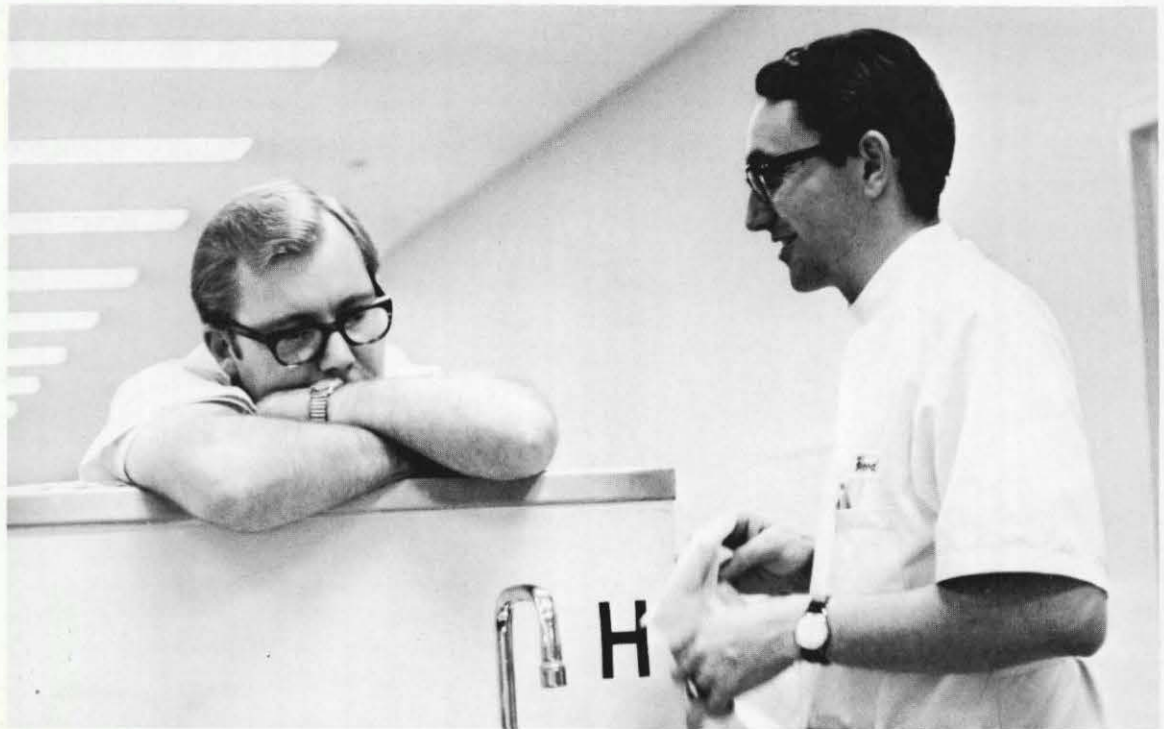

Robert A. Giere

*University of Oregon, B.S. (Basic Science); Psi Omega; Tau Kappa Omega;
Sophomore Class Vice President; Senior Class President; Student Body Secretary;
Member, Student Executive Committee*

Robert A. Giere, President and Leader of our Senior Class, will be remembered as one of the most instrumental forces responsible for the precipitation of student involvement at this institution. Obviously, this accomplishment required dedication as well as sacrifice, as was exemplified by his participation at the week-long Santa Clara Seminar on Hospital Dentistry.

Why do they call you turkey Dennis?
You behave more like a rooster.

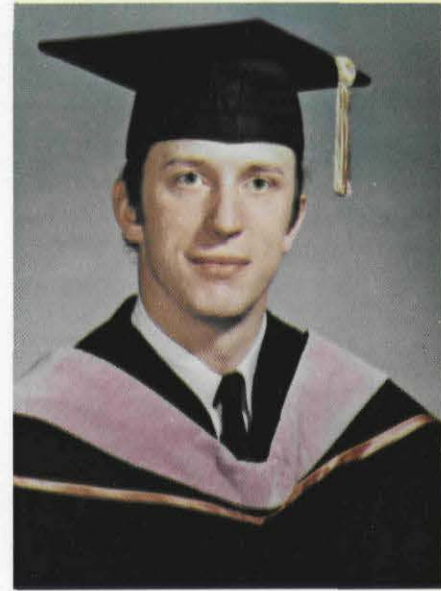

You really starting to think COLDESINA has the right idea Norm?

Maurice R. Growney Jr.

Notre Dame University; Psi Omega; Navy

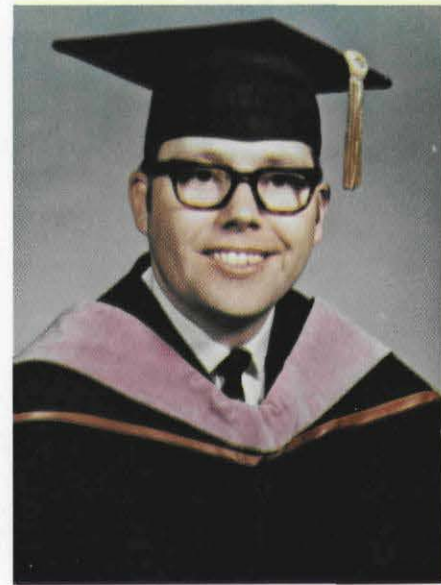

There are a few of us who have gone through four years of school with Skipper and didn't know that he was married and had two kids. Moe never took his wife to any functions and at any party you could always find him chasing the single girls! Moe was harmless, however, because he would usually drink too much and fall asleep in the corner.

Norman J. Hanson

Utah State University, B.A. (Psychology)

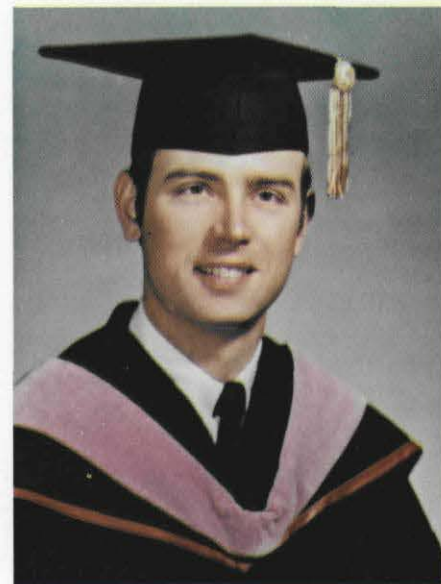

Norman the Mormon was an easy going and likeable guy. Norman was always one of our better "tech" men, and we still remember what happened to him in sophomore gold foil class. Everything should go well for Norman, because he's a hard-working and dedicated fellow.

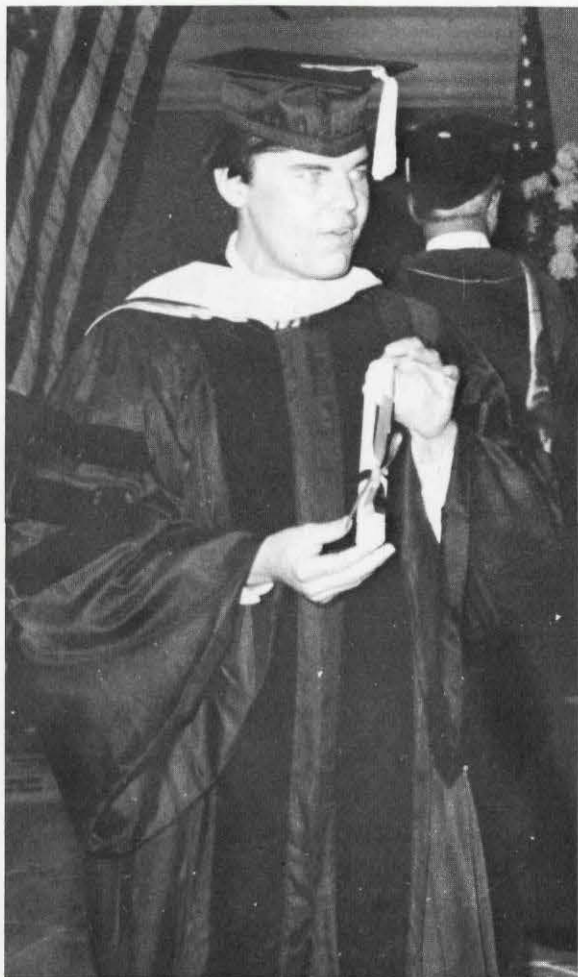

Dennis R. Hardin

*San Fernando Valley State College, B.A. (Biology);
Delta Sigma Delta; Tau Kappa Omega; Omicron Kappa Upsilon; Navy*

Denny was the Class Pharmacologist and seemed more at home behind a lab bench than at a dental unit. Turkey probably holds the record for living in the most number of different places while in San Francisco during the four years of dental school. Denny will return to Southern California to take care of the Marines, and we hope he doesn't find his way to Nam.

Praise ye the Pill folks.

Let's see, graduation is over
at nine, that means I can
still get to her place by ten . . .

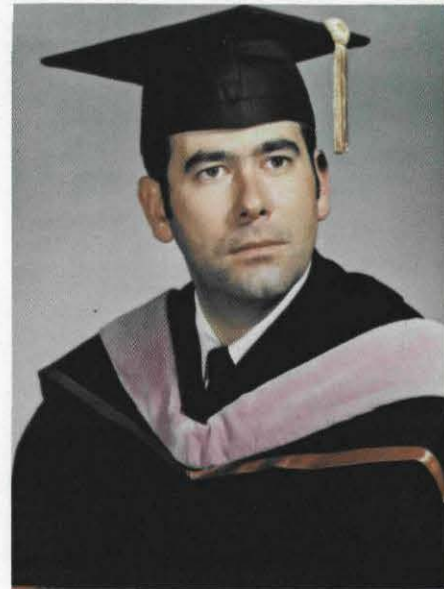

Then I says "Fletch you ain't
going to railroad anyone out
of here!"

Michael H. Harris

*Pacific University, A.B. (Psychology); Delta Sigma Delta;
President, Interfraternity Council; Student Council*

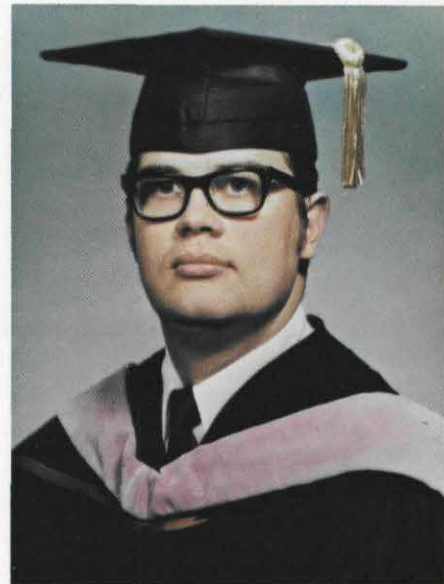

Thumbs was a late addition to our class and we were happy to have him. Known as the "Fastest Wit in the West", we would gladly put him up against Don Rickles in a verbal shoot-out. If there was a party or event that needed organization, you could count on Mike.

Leonard L. Haynes

San Francisco State College; Delta Sigma Delta

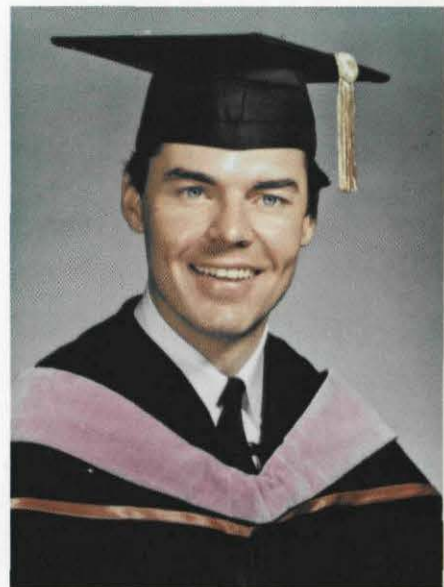

"The Great Pumpkin" was an easy going and nice guy to have around. We could also count on the "Screaming Tomato" to arrive 5 minutes late for any class. We predict that the future will not find Leonard in dentistry, but rather, working the crap tables in Las Vegas.

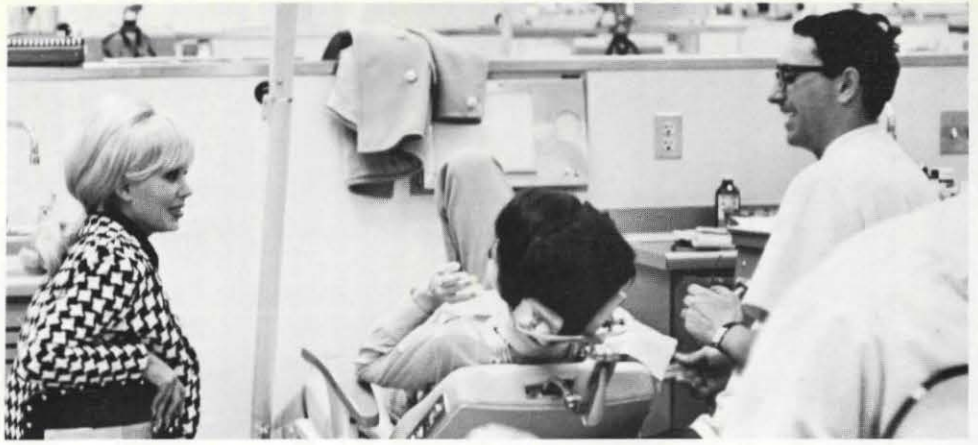

Aldon J. Hilton

California State College-Long Beach; Psi Omega; Freshman Class President

As the Class Stud with those evil-looking blue eyes, Al needs no introduction. Al created a new dental specialty while at P & S, Rootodontics. The future will find Al leading the life of a San Francisco Playboy, if he ever makes it back from Europe.

Wayne says he'd love
to fill your cavity
Yvonne.

Let's see, I'll have to shave at
least two more times before
lunch.

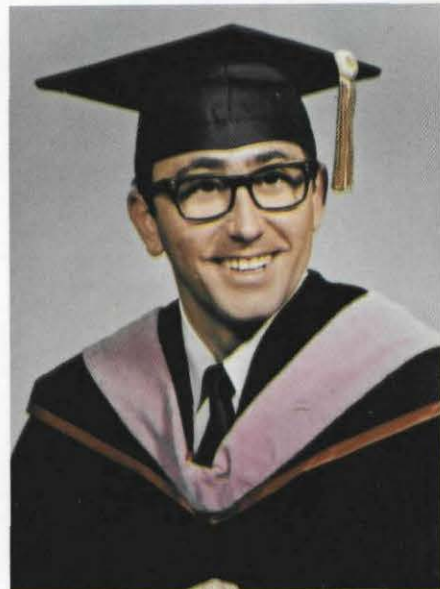

Good going Dr. Hansen, Lynn didn't think you'd find that open margin.

Wayne D. Hood

San Jose State College; Psi Omega; Student Body Secretary (1968-69)

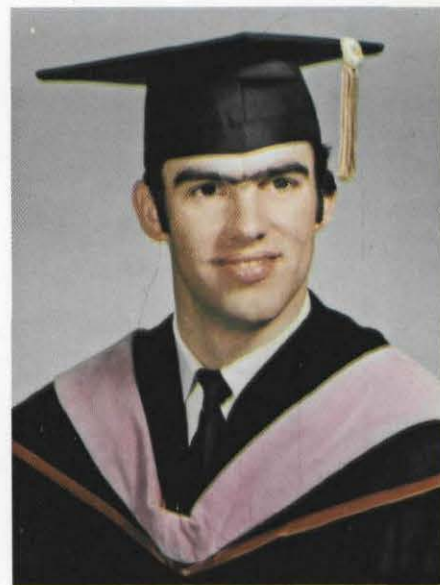

"The Fox" had an interesting life while at school, partly when it came to roommates. We also noted the car that he was driving and wondered "what kind of deal" he had going for him. Since Wayne is the shy and quiet type, you'll have to ask him for the answers.

Martin P. Hull

*Stanford University; Psi Omega; Tau Kappa Omega; Omicron Kappa Upsilon;
Freshman Class Vice President; Junior Class President*

Marty was our All-American Athlete when it came to sports and drinking. No one could chug-a-lug a glass of beer faster than Marty. To top it off, Marty was an excellent student and a good "tech" man. In short, Marty was All-American.

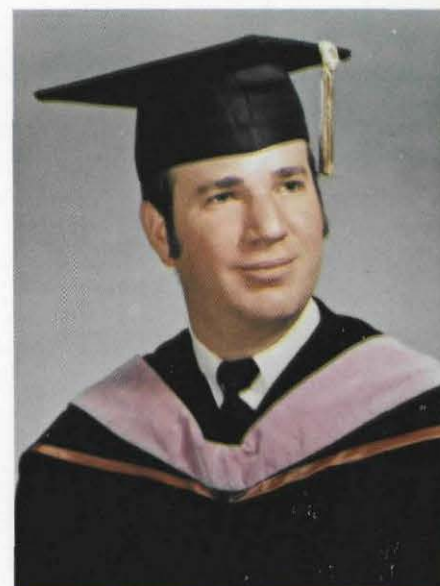

Barry M. Hunau

*U.C.L.A.; Alpha Omega; Senior Class Student Council Representative;
Editor of 1969 CHIPS*

"Hawk" (hōk), n. (hawk — the bird)

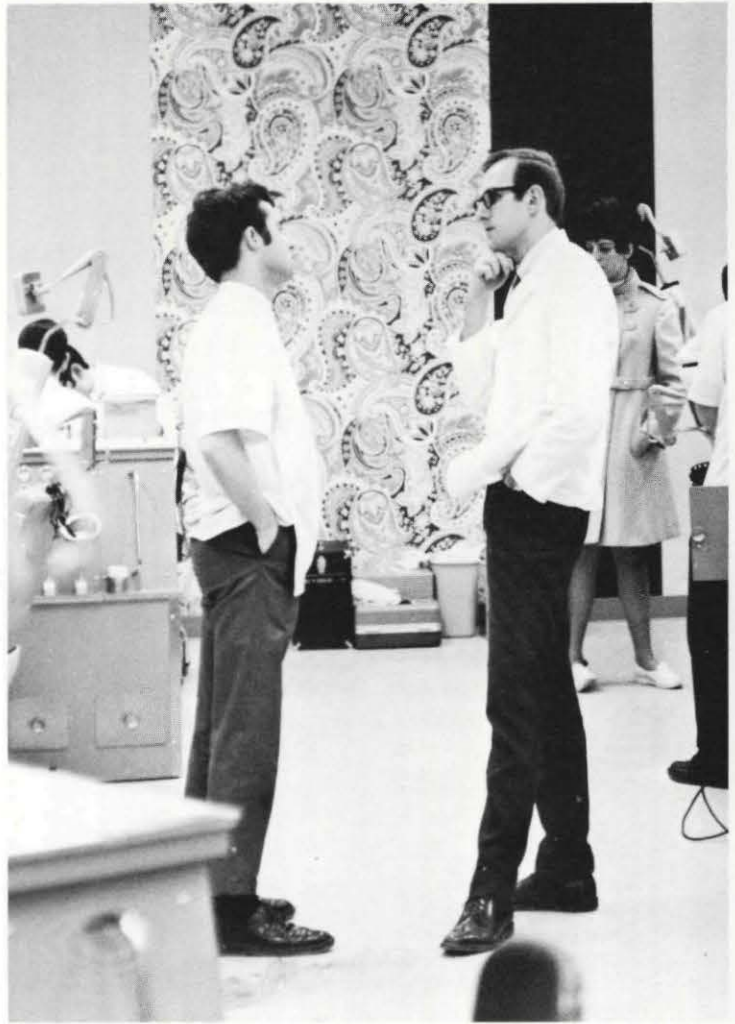

1. any of a family of birds of prey characterized by short round wings, lots of tail, pear-shaped body, and a hooked beak; broadly, any such bird, active by night that preys on rodents and other vermin. 2. a person regarded as having the preying or grasping nature of a hawk.

Barry is the only senior in the history of P & S to decline to compete in the gold foil contest.

Val, you never had this much trouble with girls *before* you had your ears cropped.

You say those dentures are starting to swell?

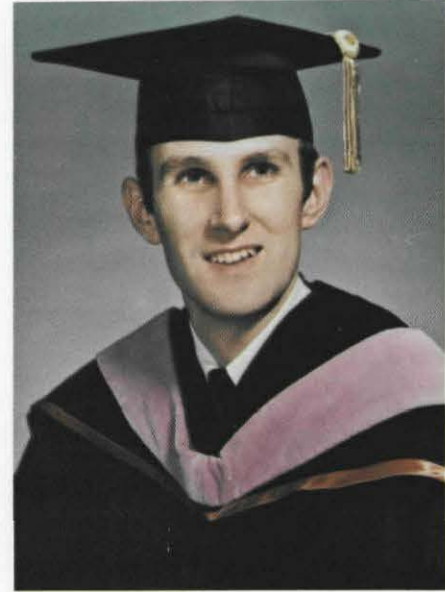

Do I have to make up my mind right now?

Kenneth E. Lange

Chico State College, A.B. (Biology); Xi Psi Phi

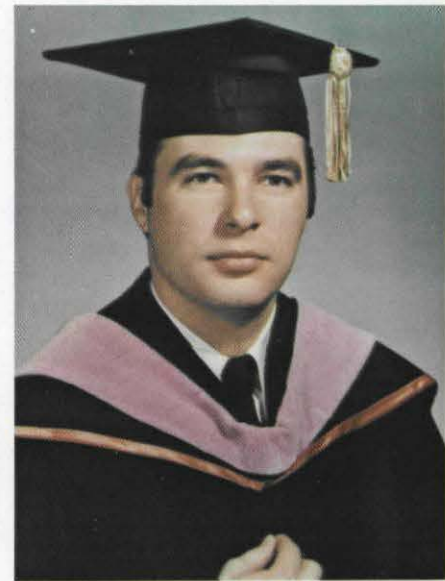

Ken was from far-off Yreka (where is that) and some of his ideas of fun were pretty far-out, like entertaining the Yreka Indians. Ken's tastes were simple; just give him a hot dog and a bottle of beer with a motor boat on the lake and he would be contented for life. Wouldn't we all!

Jon B. Luhman

University of Oregon, B.A. (Biology); Psi Omega; Tau Kappa Omega

Mister Decisive, as we like to think of him. Jon is well known for his quick decision-making ability . . . "Well what do you think; should I put another suture in or not? . . . "I don't know; What do you think? extc." Since he was able to finish his units by the end of March and his Senior Test Case early in April, he had almost the entire third quarter to worry about where he would practice and cry over the requirements he had yet to complete. Even so, his wasteline flourished under these trying conditions and his marriage to "what's her name" up in the store, further rounded out his very likeable personality.

Larry J. Meyer

El Camino College; U.C.L.A.; Xi Psi Phi

1

Now Muscleman Meyer
Is a gent of distinction
Who with an arrow
Can bring you to extinction

2

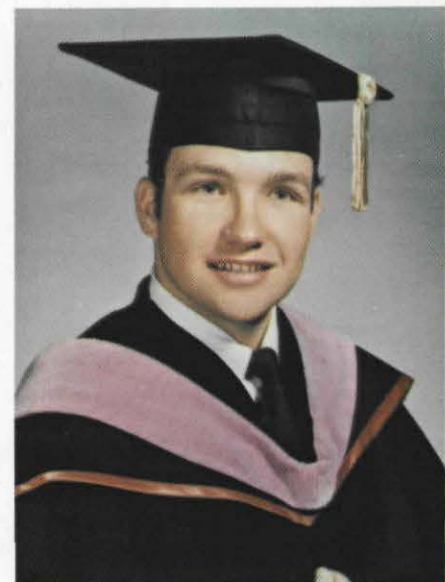

Cleanliness to Larry
Is important in his life
So much so to Meyer
That he cleans up on his wife!

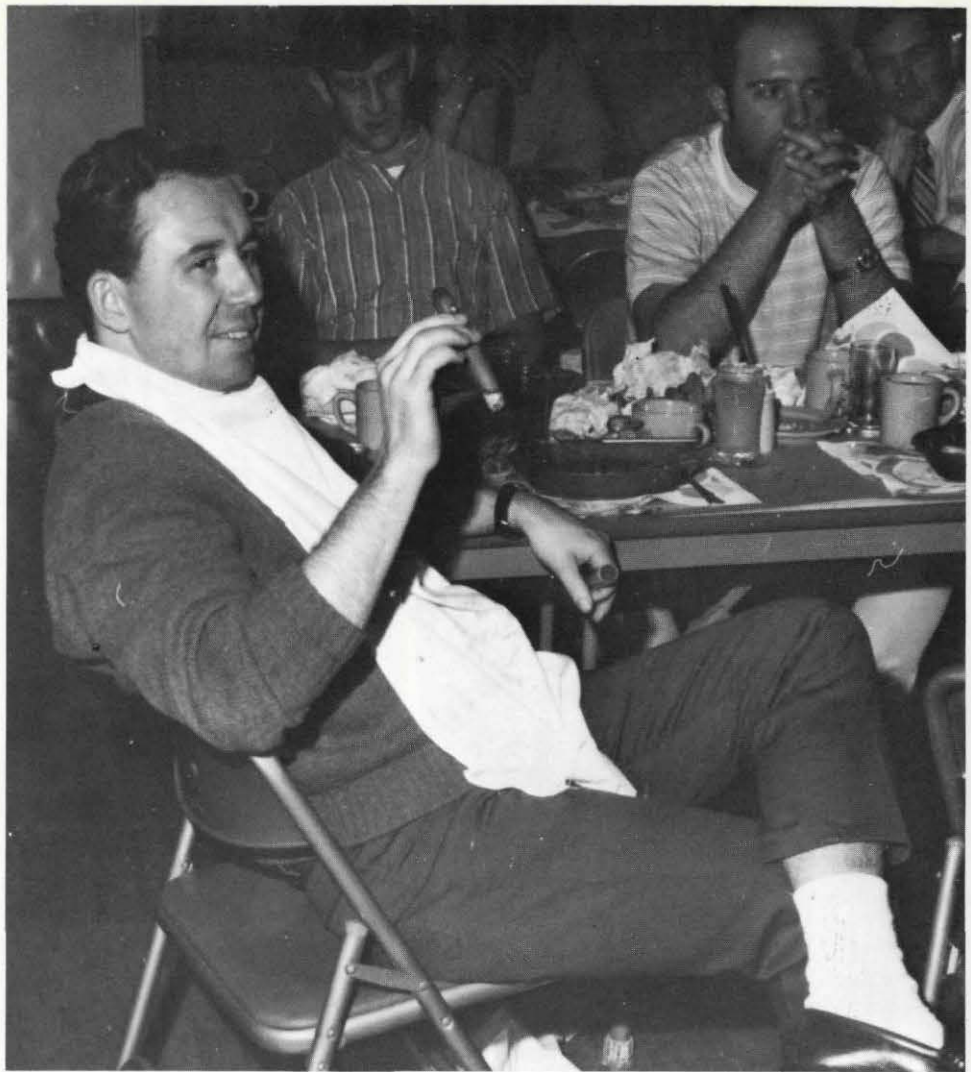

3

This well-liked class member
Who's simple and naive
Has a fear of Dr. Craig
And the gold foil he can't cleave!

4

But this muscular dentist
With his allergies and all
Has one guiding genius
His Rosie! That's all!

So I says, "Dr. Ward,
How cum you're the only
frog around here that
hasn't been pithed?"

Wake up honey you're drooling on my new coat.

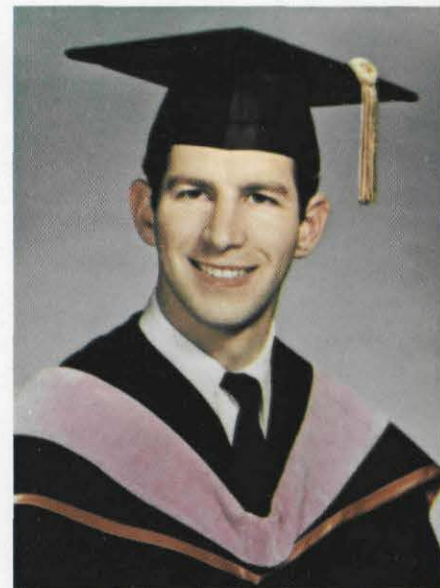

Does that laser beam you made out of toothpicks and baggies
really work, Roger?

Rodger S. Miller

San Jose State College; Photography Staff, CHIPS; Navy

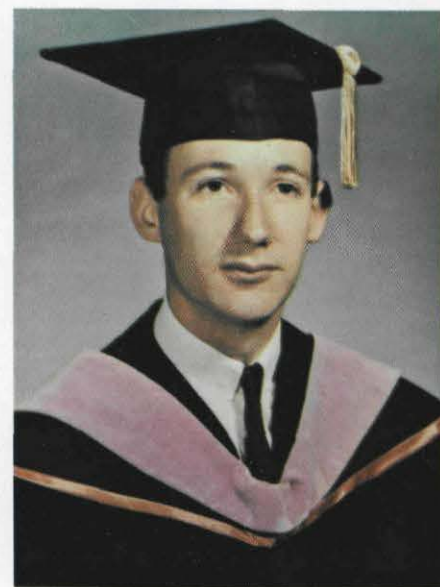

Rodger was our cheerleader on Field Days, being well-experienced for the job by his days at San Jose State. We will remember how Rodger ran off to Reno one week-end freshman year and married Carol, only to live under separate roofs until he could find a place to live. Rodger finally found a "nice home", and during the years at school that followed, we were forever hearing about the burglaries that struck his place. We will best remember Rodger for his ability as a hypnotist on his pedo patients.

Richard J. Murray

San Francisco State College; Xi Psi Phi

Murray the K was one of the quiet members of the school who joined us our junior year. Murray could be seen coming to school, come rain or fog, on his little motor bike. Rick got married recently and we wish him the best of luck.

Thomas C. McCain

*University of Idaho; San Jose State College; Xi Psi Phi;
Tau Kappa Omega; Omicron Kappa Upsilon*

i
When the record is written
About Tom McCain
It will never say
"That he's late again".

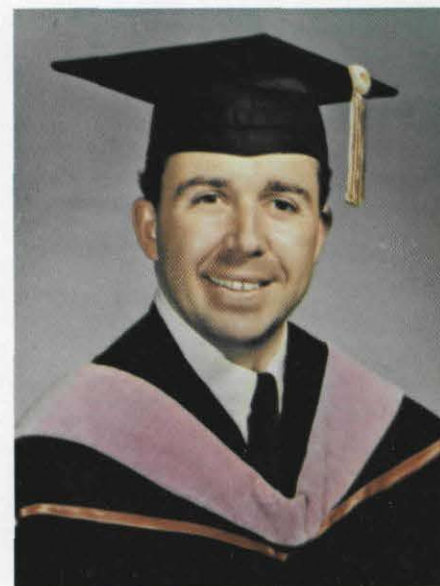

ii
This hyper man
Who bounces around his hutch
Is an avid mechanic—
Always works on his clutch.

iii
He worries about his
School and classes
But never about the words
He uses on asses.

iv
His denture work
Especially vertical dimension
Distinguishes this medic
As having no pretensions.

v
Tom knows quite well
That Candy's not dandy
But it's another story
When it comes to Andy!

vi
But leave it to McCain
This colorful guy
Once he gets going
The limit's the sky!

Soon as Dr. Wright turns his back he gets this scotch right in the _____.

Listen Pal, you stick with me, I'll show ya how to get through this place.

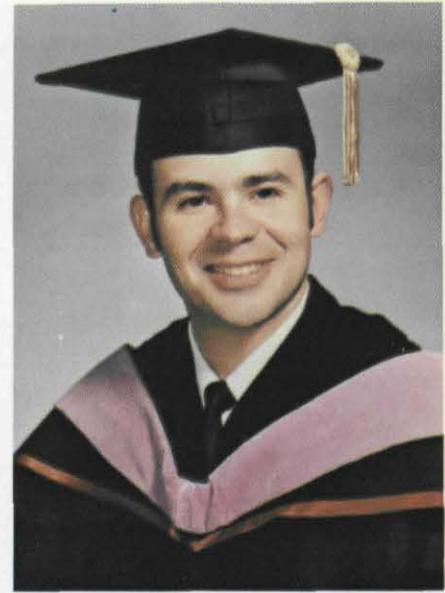

I wonder if maybe I could have just a little neon sign?

Frederick J. McCord

Long Beach State College; Xi Psi Phi

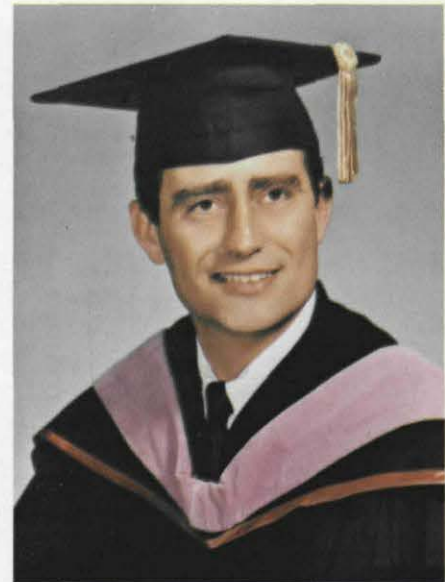

Fred was one of the boys who came to P & S from God's country — that is, Los Angeles. We usually saw Fred working hard at his Unit, like trying to piece together his Junior Test Case that got run over by a car. When not at his Unit, Fred could usually be found getting a smoke in the stairwell. We predict that Fred and his lovely wife, Donna, will end up in L.A. where Fred will specialize in Drilling-Filling-&-Billing.

Paul W. McCrain

Fresno State College, A.B.; Xi Psi Phi

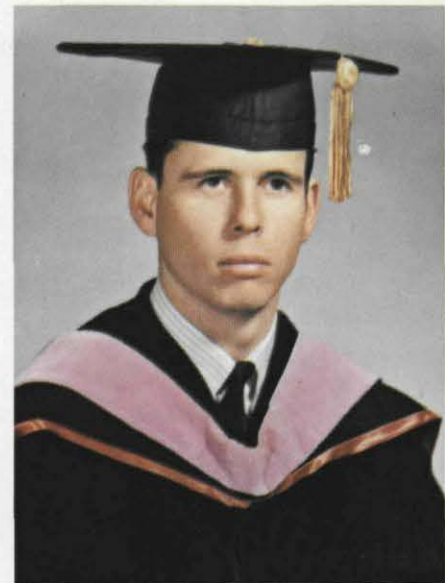

Paul, better known as "the old man", was an interesting member of our class. He always impressed you as a hard-working family man, but when winter came he was the first one who wanted to go skiing. We predict that Paul will set up his practice in the mountains so the slopes will be near.

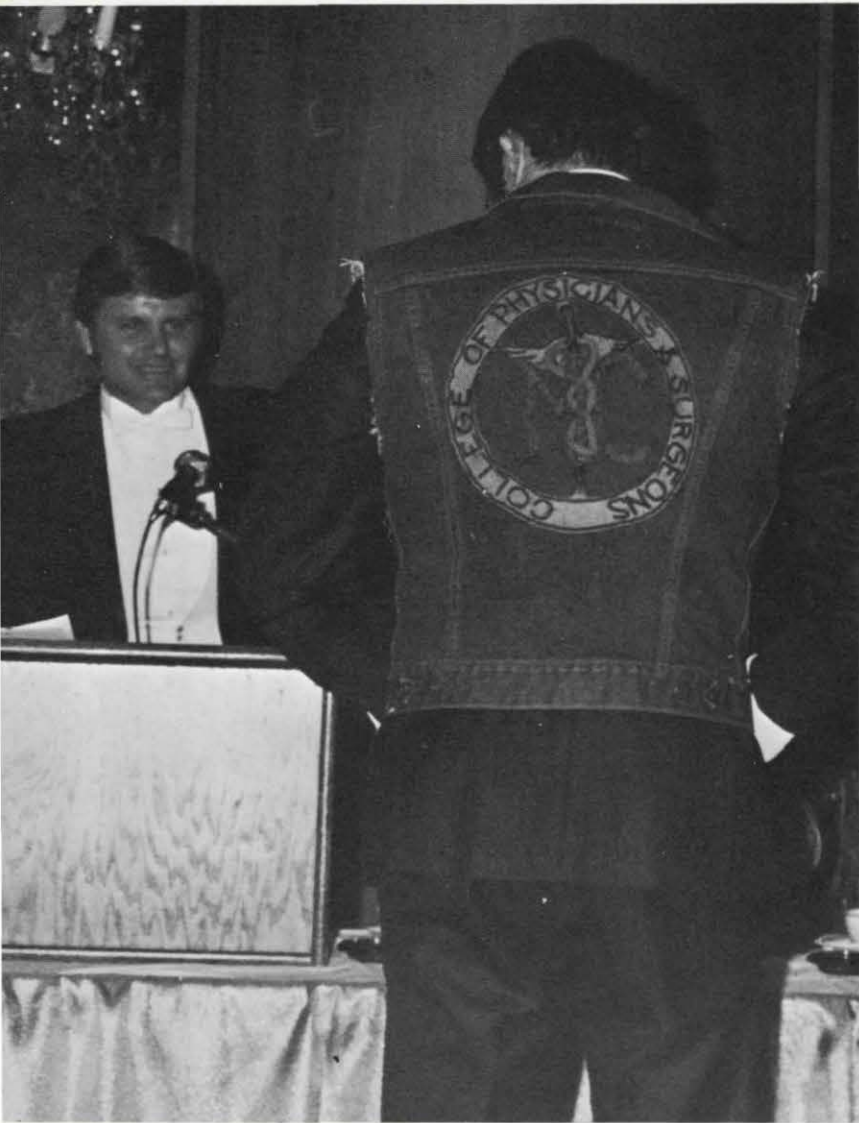

C. Grant McDaniel

*University of California-Davis, B.S. (Biological Sciences);
Xi Psi Phi; Student Council Representative*

Little Granite, as he was known at school, always managed to keep pretty busy. Whether it was taking care of widows of the VietNam War or raising foster children, Grant played an active role. Grant was the only student to commute to school from Sacramento, and the future looks like it will find Grant in Sack so he can be near the mountains he loves to ski.

See, George, it really fits you swell.

Guess what he just asked?

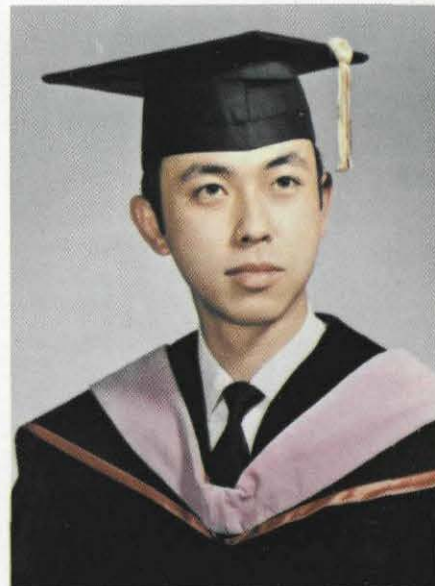

What do you mean, you don't think I can make it home?

Robert M. Nakamura

University of the Pacific, B.A. (Biological Sciences); Xi Psi Phi

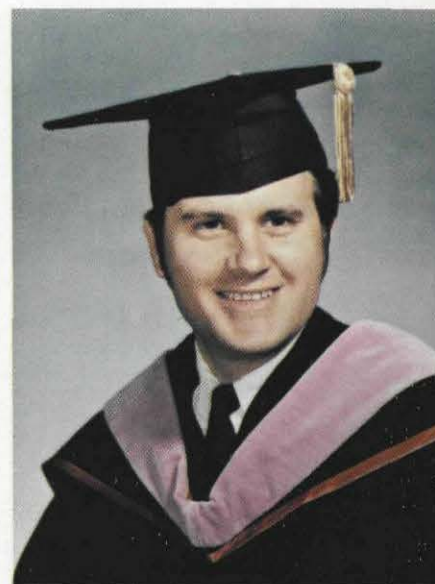

Nak was a frustrated student of the Academy of Dental Arts and Sciences. Sometimes known as Kamikaze, when Nak fired up that gold foil condenser watch out! Bob was also known for his ability to hold his liquor,— holding it in his hands, that is — drinking is another question. The future will probably find Bob sending way for a picture bride and settling down in a teahouse in the rice fields of Stockton.

John T. Oliver

University of the Pacific, A.B. (Chemistry); Psi Omega

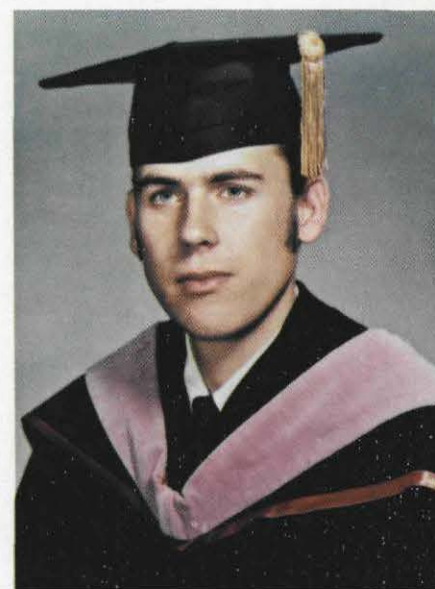

Ollie was one of our Sausalito Boys and that's about all that needs to be said; we can leave the rest up to your imagination. All one had to do was see his pets (a seven-foot boa constrictor) or his far-out girlfriends, to dream about the great life he was leading.

Arvid K. Olson

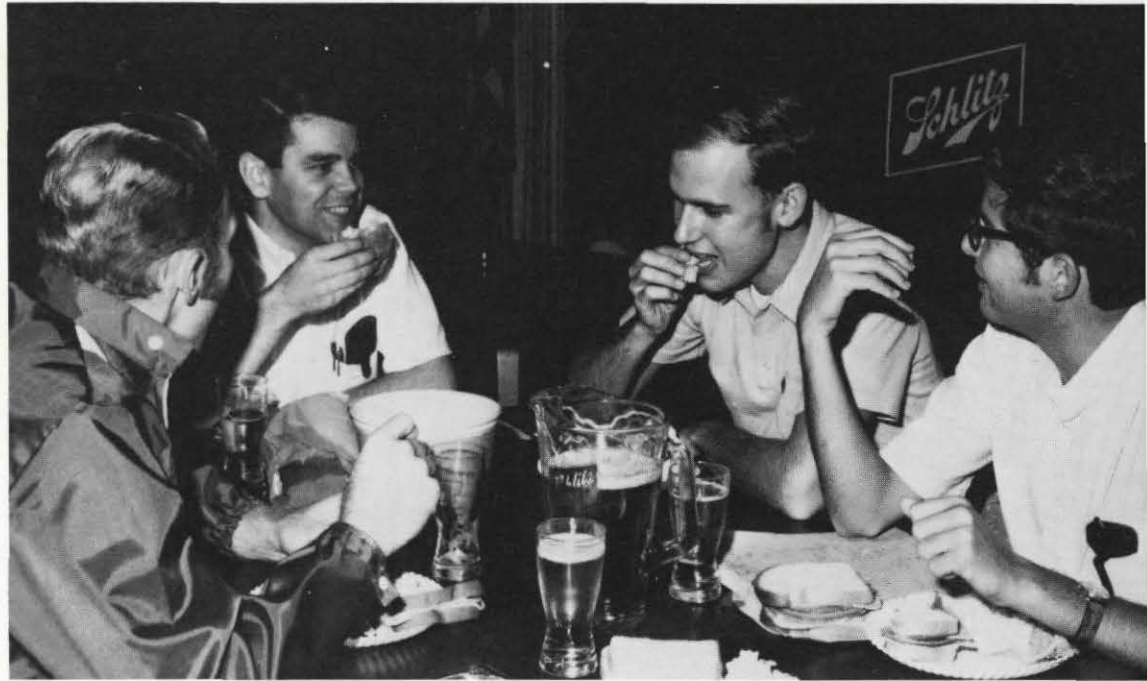

California State College-Hayward; Xi Psi Phi; Army

Arvid "The Professional" Olson (also known as A.O.) will be remembered for his Ceramco® restorations in the clinic, or should I say his temporaries. Closely rivaling the "Olson Ceramco" is the "Olson Custom Tray" which he mass-produced during the sophomore year. (Yes, he finally got one which was acceptable.)

This isn't exactly what I would classify as a "stag" film.

Gosh, fellas, isn't this a great way to study for finals?

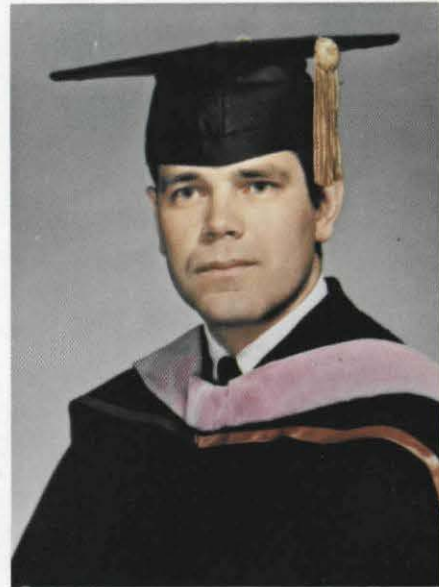

Say, Bunny, you won a lot of carrots on that last hand!

Donald A. Palus

U.C.L.A., B.A. (Zoology); Xi Psi Phi; Tau Kappa Omega; Navy

Don will be remembered as our expert on trivia — if there is some small, unknown fact, Don will know it and lots more. When it came to school, the courses were a snap except for dentures. The future might find Don in the Navy or doing research, but you can be sure that after making all those hundreds of dentures for his patients at Laguna Honda, burger making will be something that he will avoid.

Richard W. Peterson Jr.

*St. Mary's College, B.S. (Biology-Chemistry);
Delta Sigma Delta; Tau Kappa Omega*

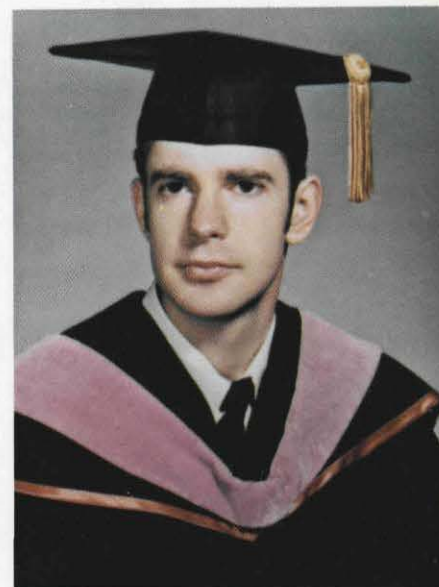

Richard "Dicky-poo" Peterson will be remembered as P & S' only part time student. "Dr. Gray", as he was known in Anatomy, would usually come up with some obscure answer on his anatomy quizzes — and sure enough it would be right! We could call "Pete" the proverbial 10 o'clock scholar, but that is a bit early for him.

John E. Rathbun

University of the Pacific; Xi Psi Phi

"Easy Ed" was a charter member of the P & S Lonely Hearts' Club. When it came to girls, one just couldn't seem to light up his fire. Ed would much prefer to work-out with his Little League team, or on week-ends head for that swinging place called Stockton.

Oh, Garth, you dance divinely.

S-s-say there, big boy . . .

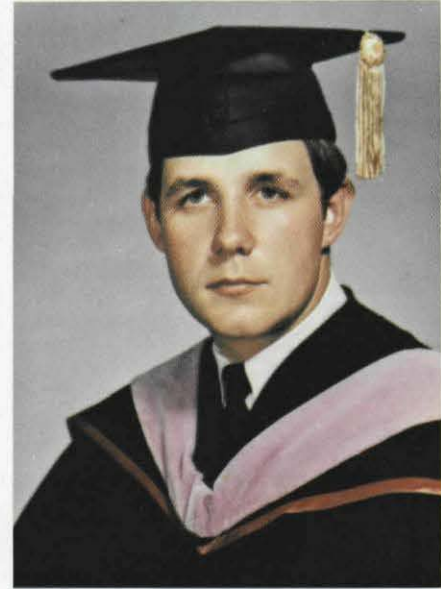

Yes, they just finished their last foil, why do you ask?

Roger H. Rau

Fresno State College, B.A. (Zoology); Psi Omega

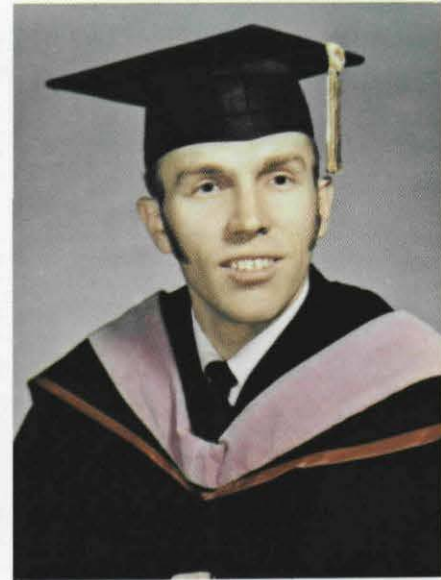

Dr. Rau-Man was the class Super-Tech. We will long remember the C & B window along with the Senior Super-Berger. His one-night Junior Bridge will stand out in history along with his reconstruction case where vertical was held by tin cans. The undergraduates are hoping that Roger will be an easy check-off in dentures, but we suspect that Roger will find Krol-sores on patients that students are presenting for their final check-off.

Garth T. Reid

Long Beach City College; U.C.L.A.; Xi Psi Phi

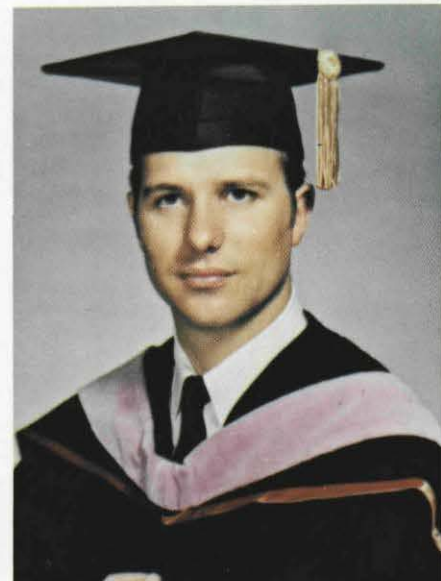

Garth had two interests while at school — finding something to complain about, and talking about cars. When it came to complaints, there was never a shortage of subjects be it girls, instructors, or just the fact that the world was dumping on him. As for cars, for all Garth knew and talked about them, he could never seem to keep his running or out of the repair shop.

Michael G. Scott

College of San Mateo; Delta Sigma Delta

Mike had the ability to ask the most stupid questions at the wrong time. During the clinic years there was never a shortage of good-looking girls in his chair. The future will find Mike a happy and rich dentist with lots of kids.

bet that I can sell six dollars worth of pictures for twenty dollars!

That's all, folks.

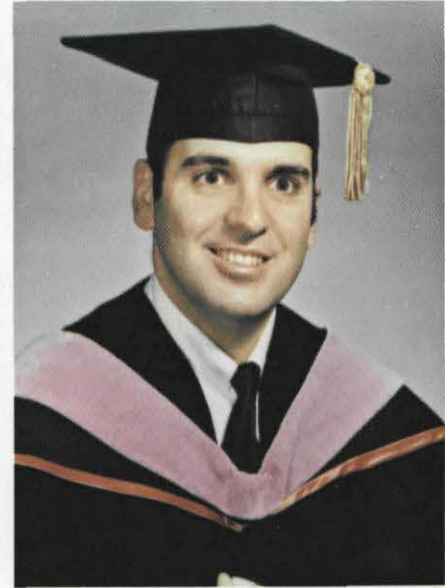

Do you still remember the short cut to the hospital, Tom?

Thomas A. Shekoyan

University of Southern California, A.B. (Zoology); Delta Sigma Delta

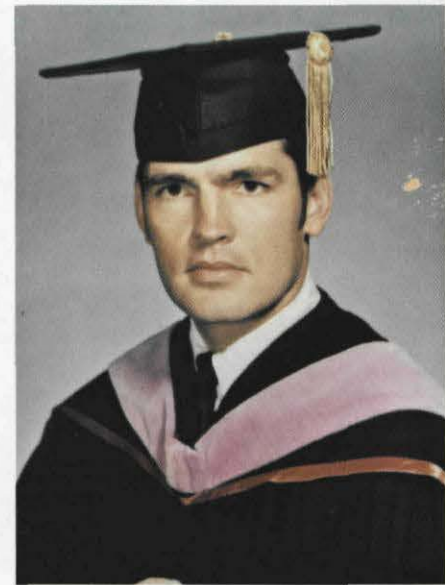

Tom joined us our sophomore year thereby becoming a Super-Soph. This Fresno Indian was a free bachelor and we were all surprised when he got married and followed that up by starting a family. The future will find Tom back in the Valley where he can take care of all his relatives.

James F. Stratton

San Fernando Valley State College, B.A. (Zoology); Psi Omega; Tau Kappa Omega; Omicron Kappa Upsilon; Sophomore Class President; Student Body Treasurer (1967-68)

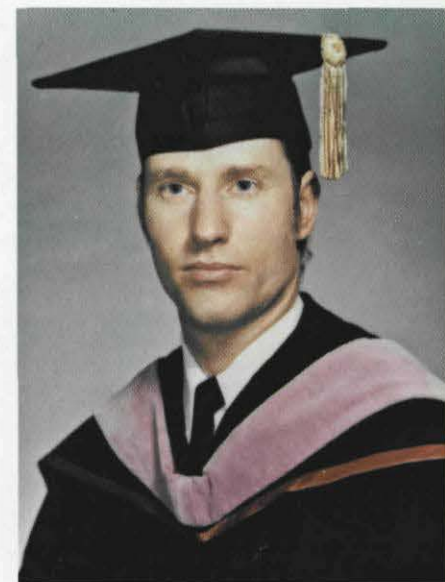

Jim and his pipe were usually permanent fixtures in the last row in the classroom. Jim would sit up there in the back playing with his pipe and he soon acquired the nickname of Mark Trail. He had an interesting political career at P & S and after a hard day in the clinic, you could find Jim buying a round of drinks at the Hillcrest.

Dennis G. Sturm

Long Beach State College, B.S. (Business Administration)

Dennis "Sperm" Sturm is probably the only guy in the school who, during the last 4 years has owned 4 cars, and has been to Hawaii, Mexico (twice), Europe and most of the seamier bars of San Francisco, yet still looks like he couldn't get around the block by himself. He gives the impression of going through life like he drives his cars; by pointing it down a street and then bouncing off the curb all the way to the other end.

Remember when?

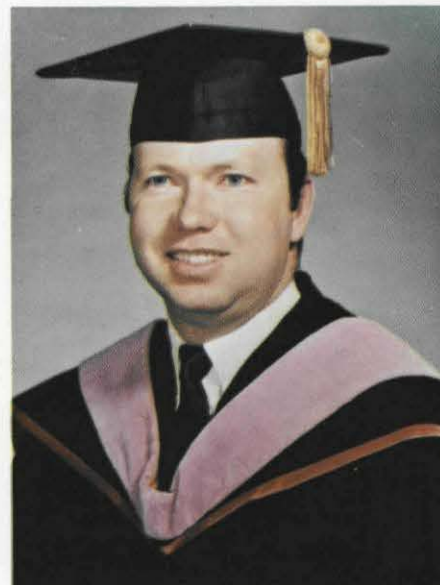

Always time for a game of cards, a glass of yogurt and me.

Lanell S. Topham

University of Utah; Xi Psi Phi

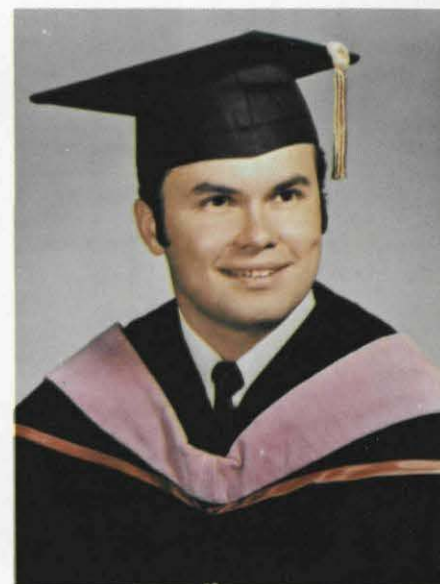

Grand-pa, as he was called by B-Val, was an easy going old man. Never one to be rushed, he always got his work done and did an excellent job at that. Whenever you were rushed and needed a helping hand, Top would always be there. The class will always miss Top, and we hope the future goes well for him.

Kenneth A. Trolesi

University of Santa Clara, B.S. (Biology); Tau Kappa Omega

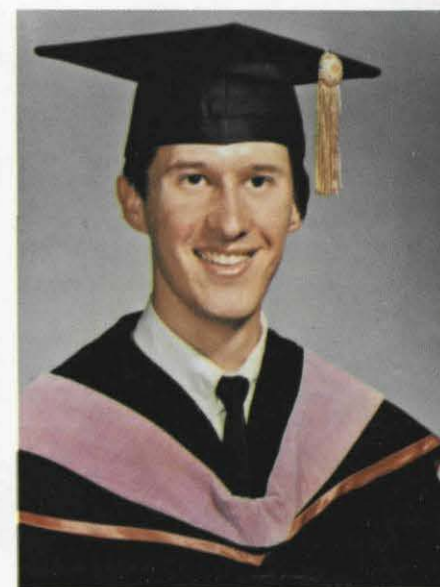

The Trol was a hard working and quiet guy who always managed to come up with the good grades. Be it on the golf course or in the clinic, his performance was tops. Now, if he would only stand up so we could see him.

Donald R. Turnbull

University of Santa Clara, B.S. (Biology); Psi Omega

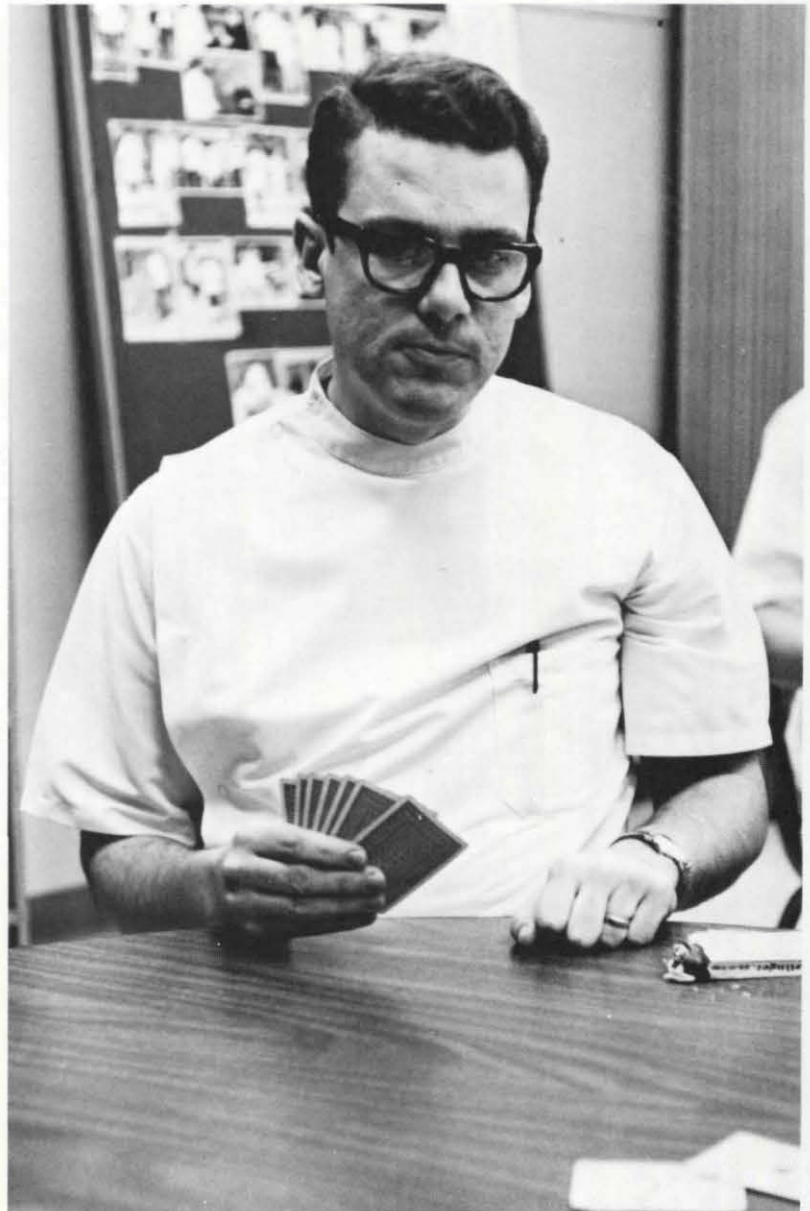

Editor: Are you sure that this guy was a member of our class? I don't remember seeing or hearing of him these last four years.

It's a toast to Dave.
He's gone five whole
minutes without being
obnoxious.

Bruce, I still say you did
nicer work before you had
your ears cropped.

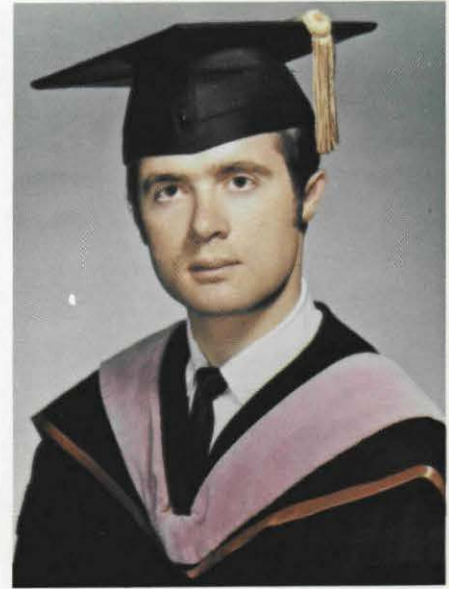

Then my wife says, Bob, it's either me or
the dog, so I took the dog, it eats less.

G. Bruce Valentine

Modesto Junior College; University of California-Berkeley; Xi Psi Phi

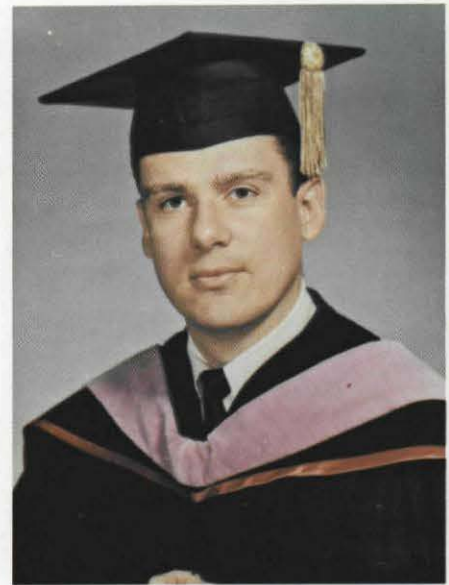

Bruce might have had the smallest ears in the class, but they sure gathered in the information. If there was a rumor, you could be sure that Val knew something about it — and just about every other secret in the school. In reality, Bruce was never a dental student, but a CIA man planted in the school in order to establish a background for future operations of international intrigue and spying.

Robert H. Weiser

University of California-Santa Barbara, A.B. (History); Xi Psi Phi

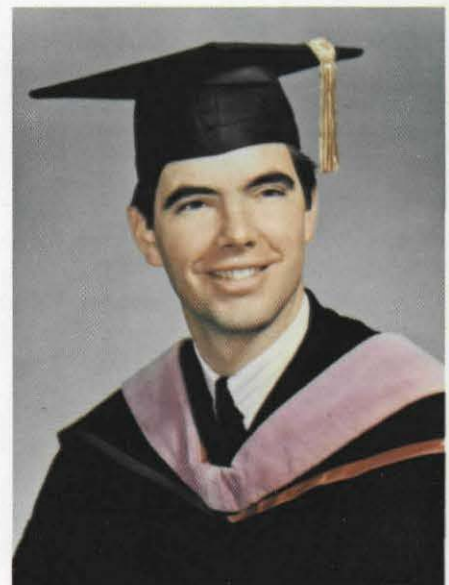

Robert was our perfect example of the "hen-pecked" husband. When his wife was not around, you should have heard him talk, but let her be near and Bob became awfully quiet. Bob enjoyed playing with words, and you knew it by the questions he asked; you never understood the question or what he was talking about. While Bob tried to impress the class by asking "intelligent" questions, there was no need for him to do so with his tech work, which was really top notch.

David F. Wilhelm

University of Oregon; Psi Omega

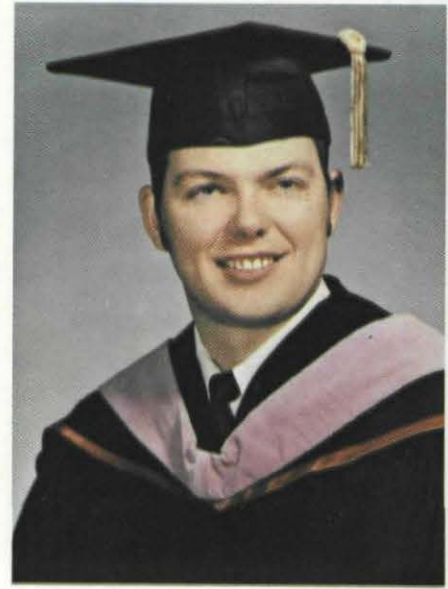

The Kaiser was the master of the put-on. You never quite knew if Dave was for real, or pulling your leg. Dave could give the greatest line and never crack a smile. In short, the safest thing to do was to never believe a word he said.

Jon P. Wilson

University of California-Berkeley, A.B. (Zoology); Tau Kappa Omega

Big, likeable Jon was one of the nicer guys around — always willing to give a helping hand. It was an interesting sight to watch Jon one day take a special without one contact lens, however, it turned out to be his best prep. Most guys worry about an office, and then settle down. Jon, however, builds a place to live and then decides where he wants to practice — we hope this plan works out okay.

Up, up and away . . .

Let's make this Dr. Beare Night, O.K. fellas?

Somebody should tell him his fly is open.

. . . of course my eyes are closed, darling.

Faculty and Administration

Administration

Thomas J. Beare

B. Reinke

D. Minto

J. Otto

A. Gilmour

A. Kuo

M. Kranke

B. Skarstedt

That figure, Mr. Carter, represents my cut from the Student Store!

I'm not stupid, I've just been brainwashed.

Let's see, that's list + 10%.

Another 4 Pedo Units completed!

Do you have an extra leg for Dr. Melarkey?

J. Roffinella J. Crampton L. Franz C. Adams

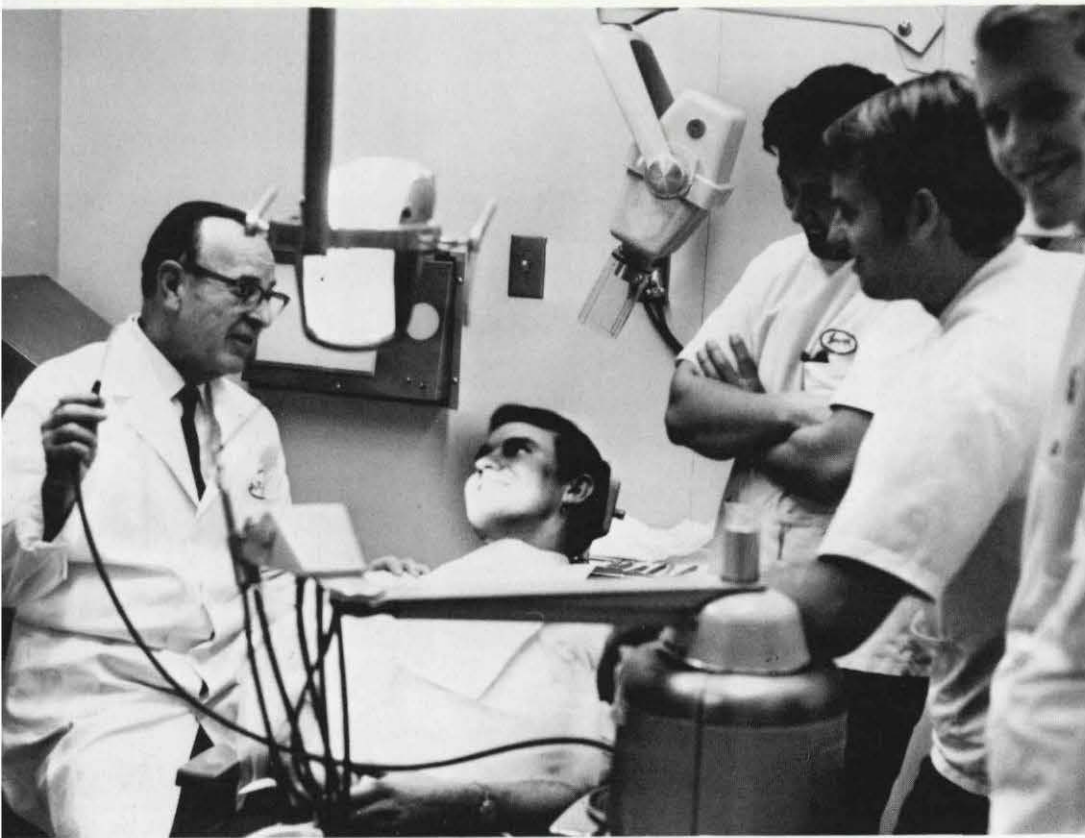

H. Kaplan E. Zeponi A. Edgerton L. Szmyd

B. Harris D. Melarkey C. Blakeley W. Kott

ORAL SURGERY
J. ROFFINELLA, CHAIRMAN

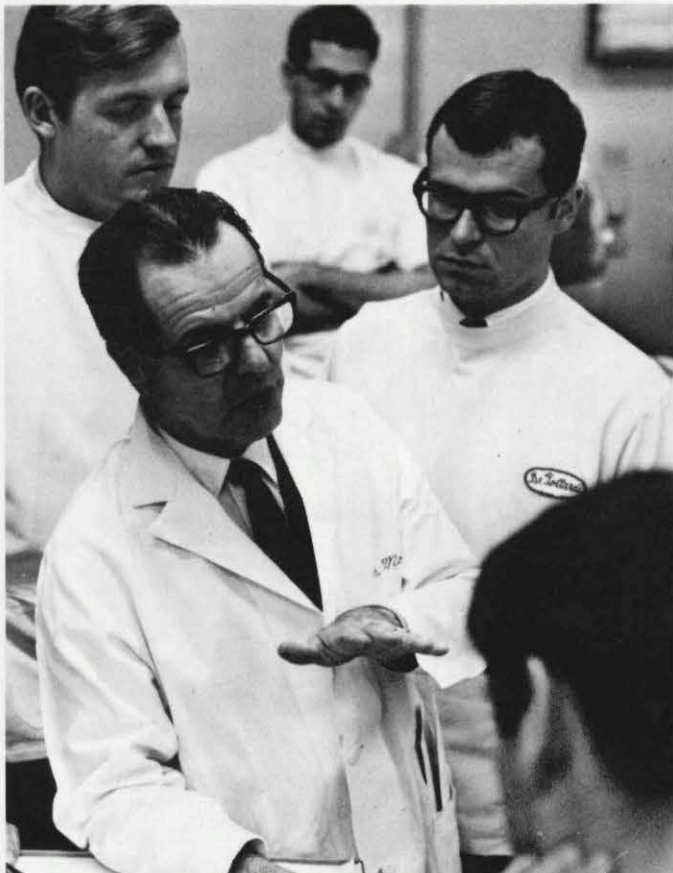

And next hour I'm going to show you how to bend a saliva ejector.

PERIODONTICS
E. MOSER, CHAIRMAN

E. Sasaki

I tell you that dog had a pocket this deep!

E. Moser H. Graham R. Bryan L. Peterson

C. Sumner A. August L. Boortz T. Mullan

V. Romley J. Cullo A. Munk S. Kancir

S. Eliason R. Sunde S. Krug W. Rore

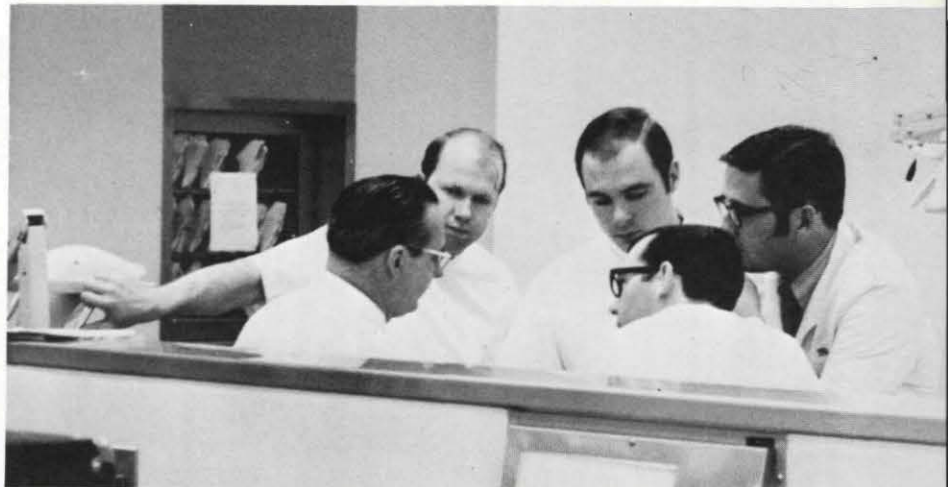

J. Cavellini J. Tackney

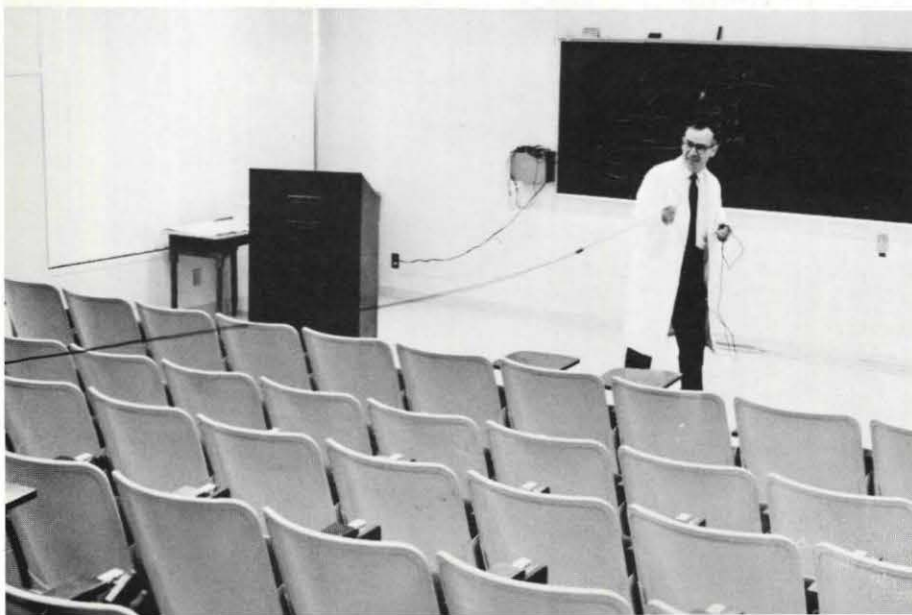

L. Woodall R. Lambing

L. Anderson A. Freda

About a quarter-pound ground round, half a sliced onion . . .

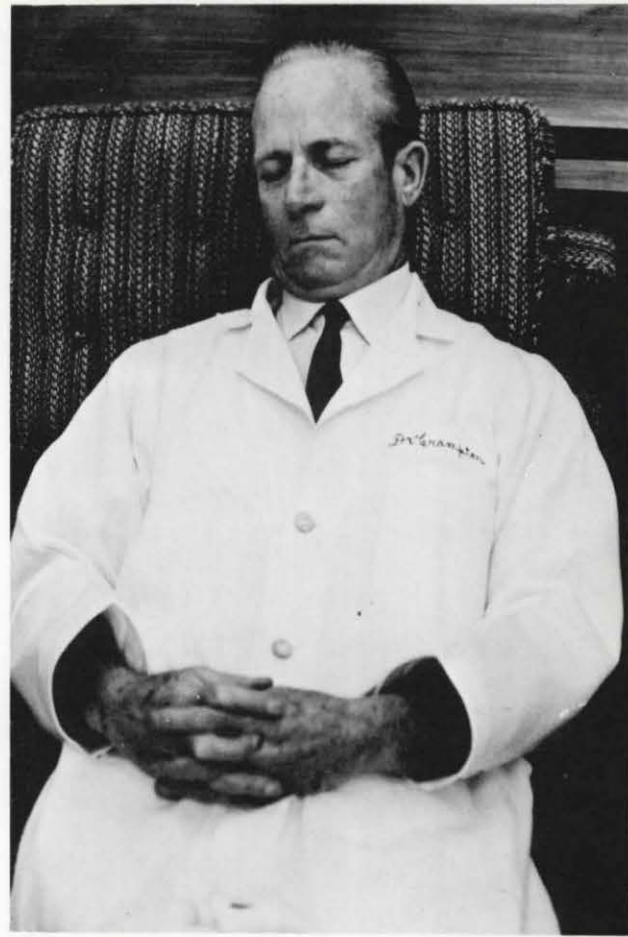

Hmmm . . . Attendance at this class has sure dropped off !

I dreamed I owned a tobacco plantation
in my silk jockey shorts.

Maybe if we put a center-fold in Gray's Anatomy.

ANATOMY

E. Bricca J. Crampton

That's a very nice opening, Son.

PEDODONTICS
R. ADAMS, CHAIRMAN

R. Adams J. Julien A. Rabitz

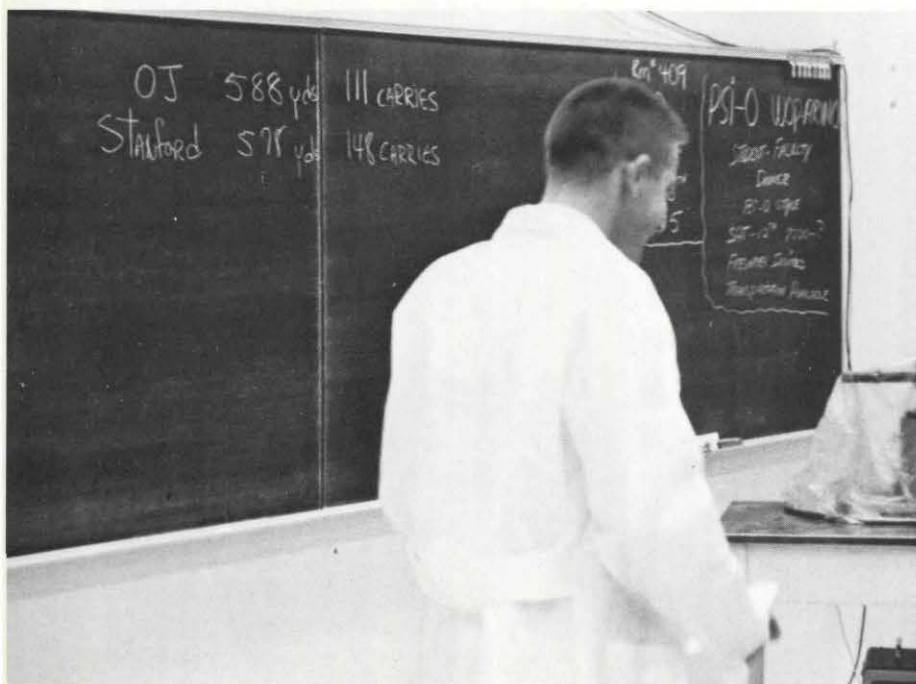

R. Fixott V. Rabbach G. Greenfell

Nice prep, excellent concept, good extensions, dirty shoes, bad breath—D.O.

Actually, Mr. Betz, you've come within a few hairs of being a real pedodontist.

O.J. may have beat a tribe of Indians, but he couldn't defeat a "band" of orthodontists!

R. Rutter W. Hufnagel H. Odden

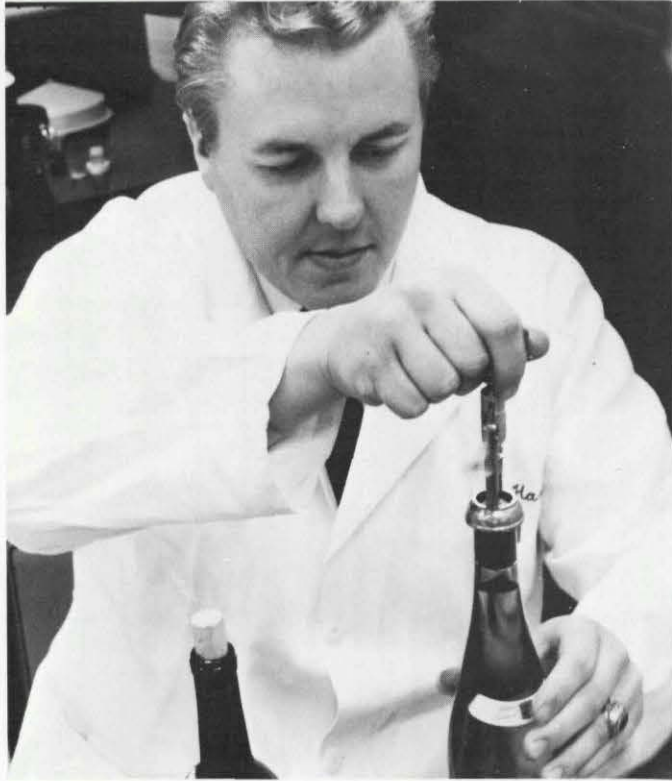

E. Johnson A. Axelrode

ORTHODONTICS
R. RUTTER, CHAIRMAN

CROWN AND BRIDGE
H. WARD, CHAIRMAN

Hmmm, all we need
is some of Kylberg's
cheese and Ward's
baloney and we
could have a picnic...

H. Ward H. Dupree E. Giachetti

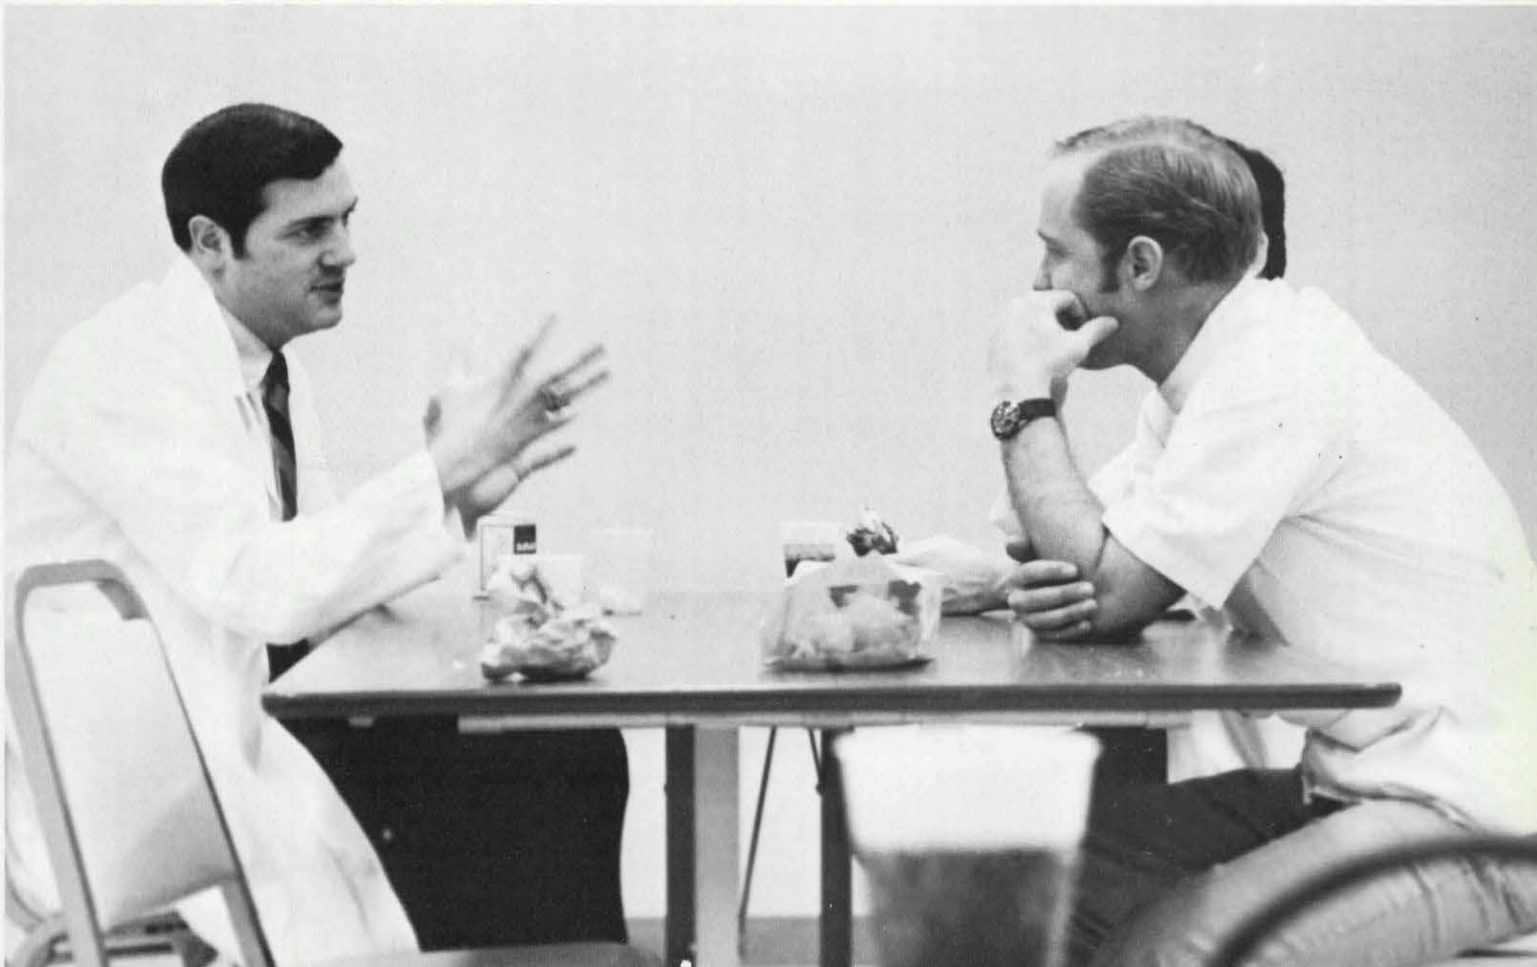

H. Sutro C. Kunz T. Lee

G. Bunnell M. Wong K. Pieri

T. Elders K. Hanson R. Kylberg

When ya get out guys, ya gotta start working hard right aways; that's the only way you'll learn crown and bridge.

BASIC SCIENCES

UTILIZATION

O. Sheffield D. L. Watkins

C. Lynch E. Van Doornick

OK Mel, stop crying, we'll share our lunch with you.

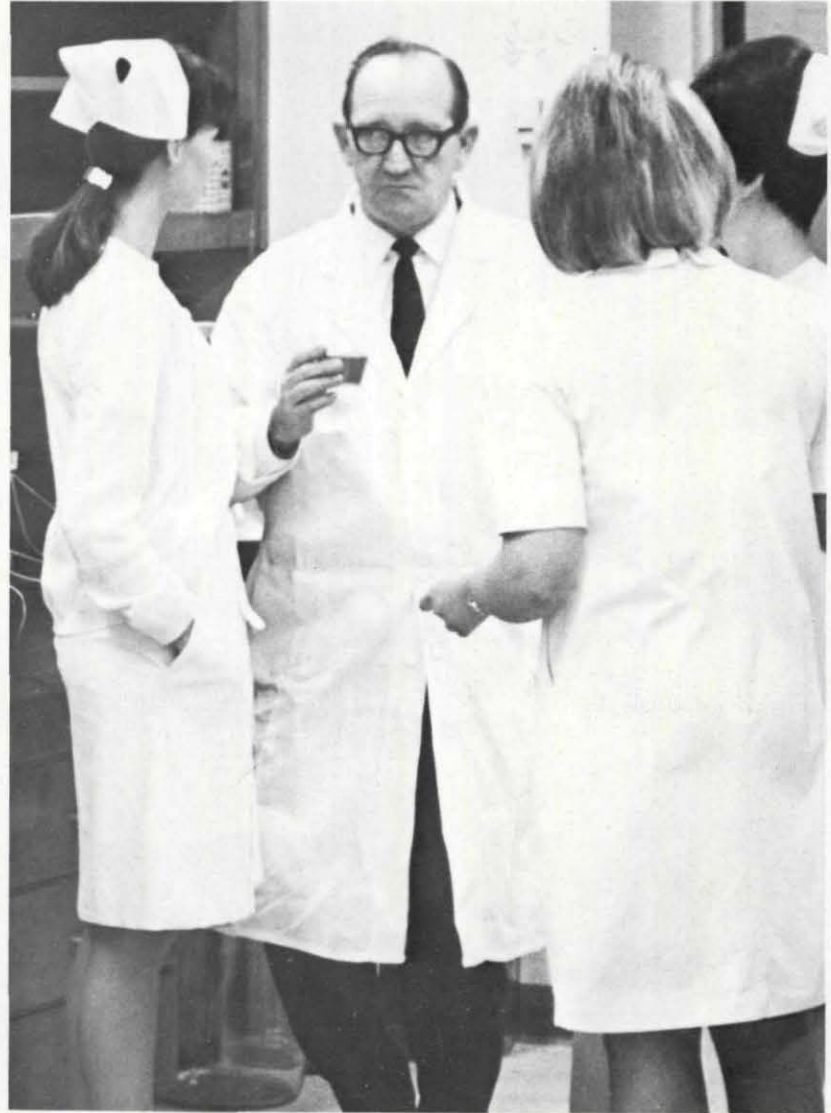

L. Holt

Lynn, no more wine with lunch!

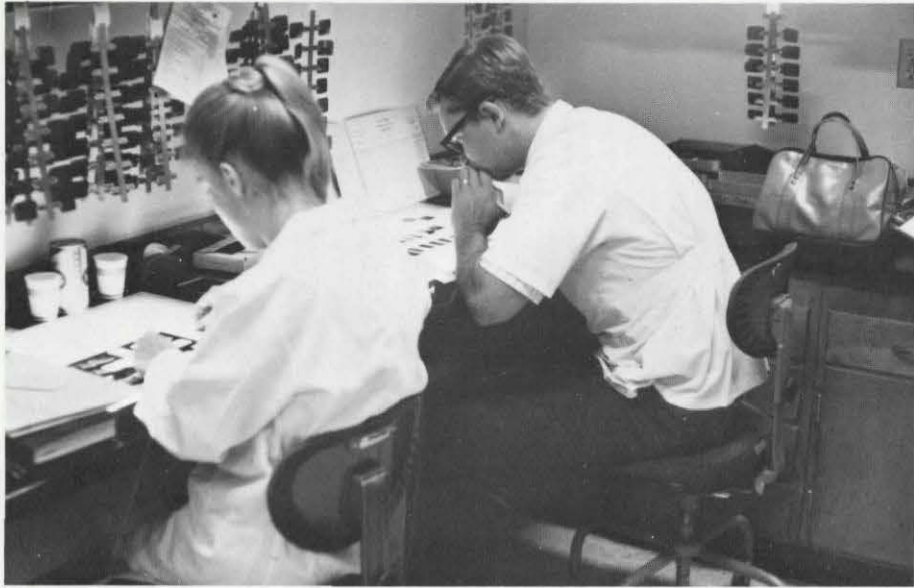

What did you do before you went into the cafeteria business, Ollie?

I didn't get it from any machine, it's Polydent!

P. Thomassen S. Wright

D. Strub R. Graves

J. Campbell

I don't care what Dr. Campbell says, 233 exposures makes for a redundant survey.

I can't seem to get my finger out of my ear!

Undergraduates

Junior Class

Can't get those assistants off my back!

You say no-better one more time, Whalen, and we go to the Dean.

No, I didn't say it had to be filled; I can touch up the X-rays.

At U.S.C. all preps were graded and had a matrix check-off, so at *our* meeting, I suggested . . .

Are you sure this clinic alcohol is drinkable?

I wonder who got that coffee with the ashes in it.

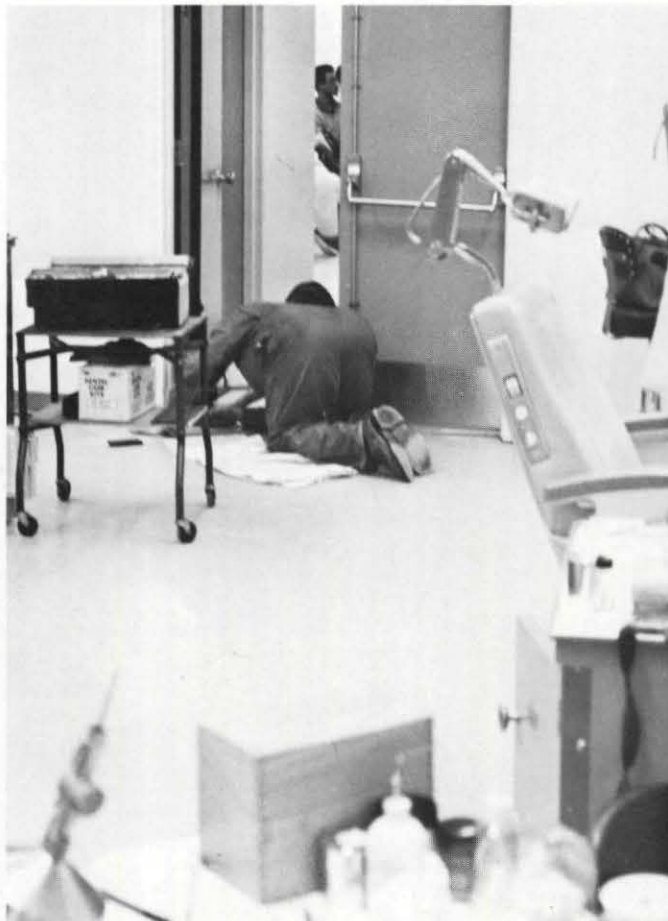

Man, this is a great place to eat!

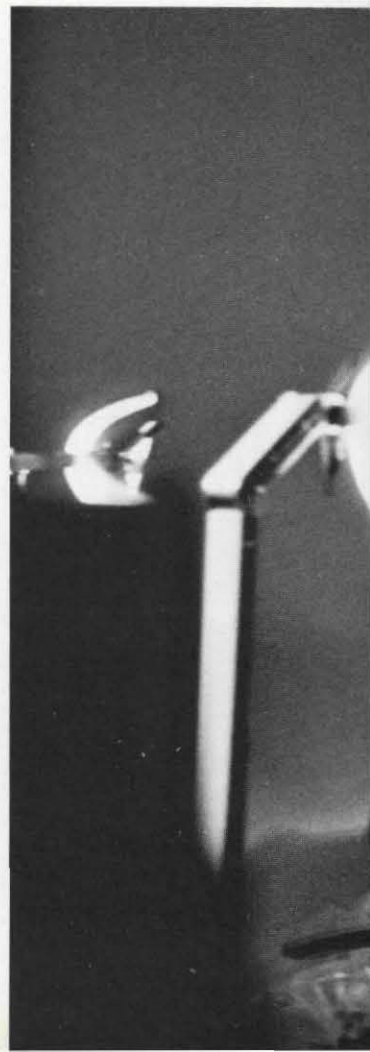

... I just ask them to help me for a few minutes and before they realize it — two hours.

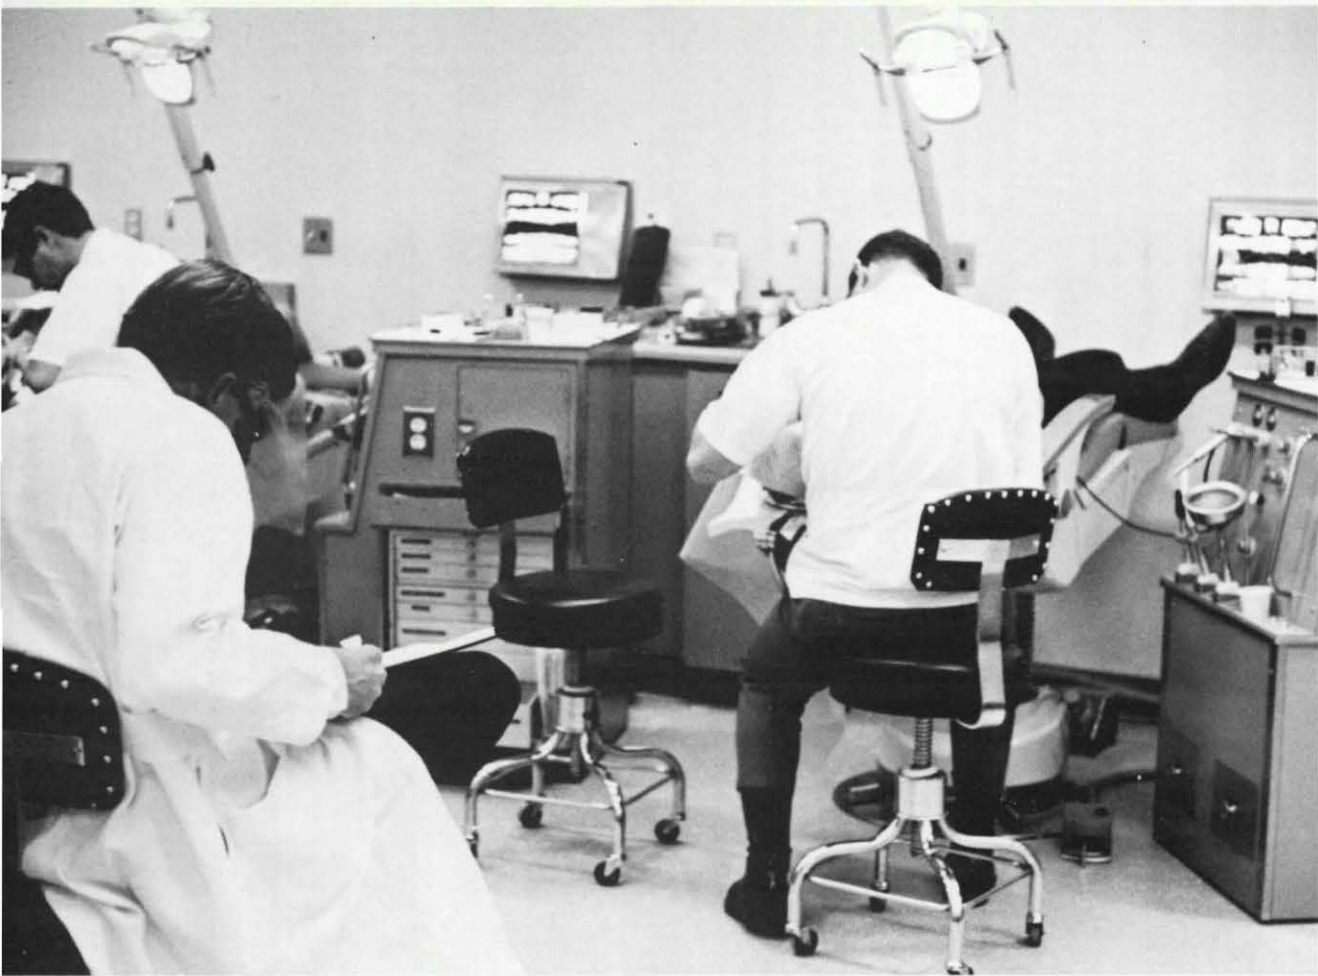

Brylcream, hell, Vaseline's as good as anything!

Has anybody seen Dr. Kunz?

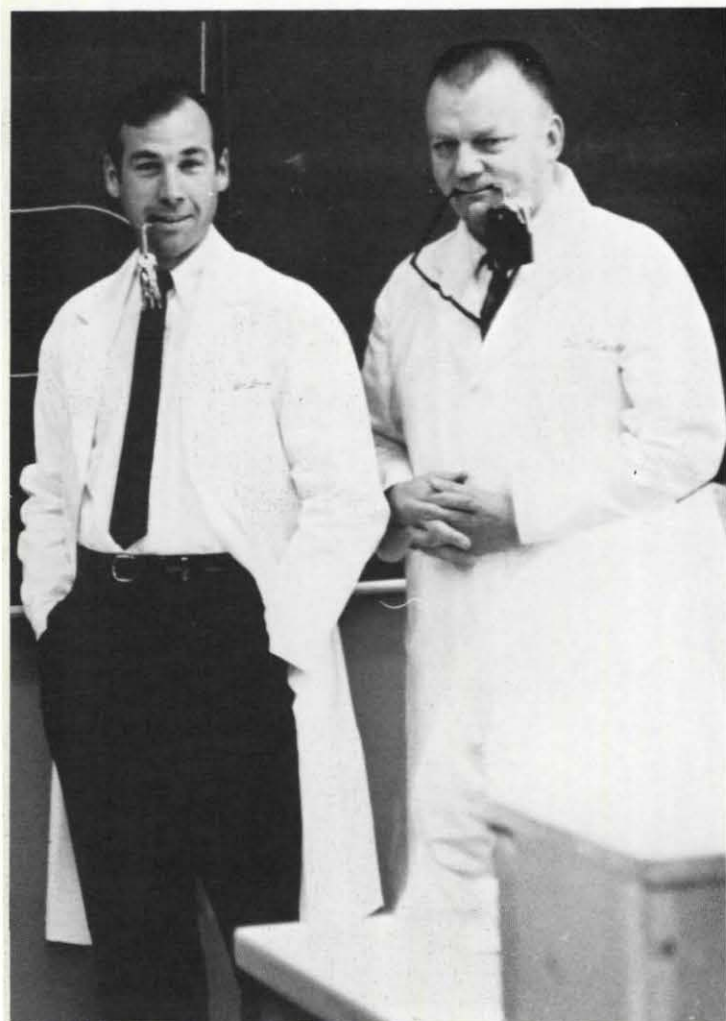

Once upon a time . . . ↗

↖ And when I opened my eyes, my patient was gone!

Notice, Gentlemen, that when she removes her upper appliances, her tissues lose that restrained appearance and have more freedom of movement.

Tweedle-dee and Tweedle-dum.

You've never heard of copper-plated study models?

Sure not much left of this ortho model.

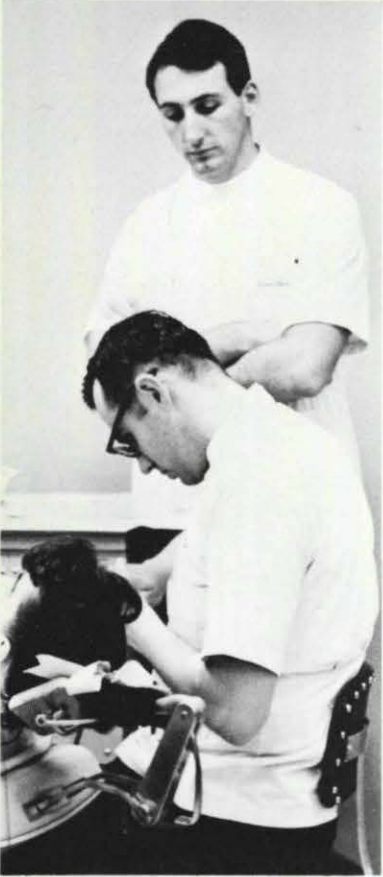

... and your wife let's you develop these?

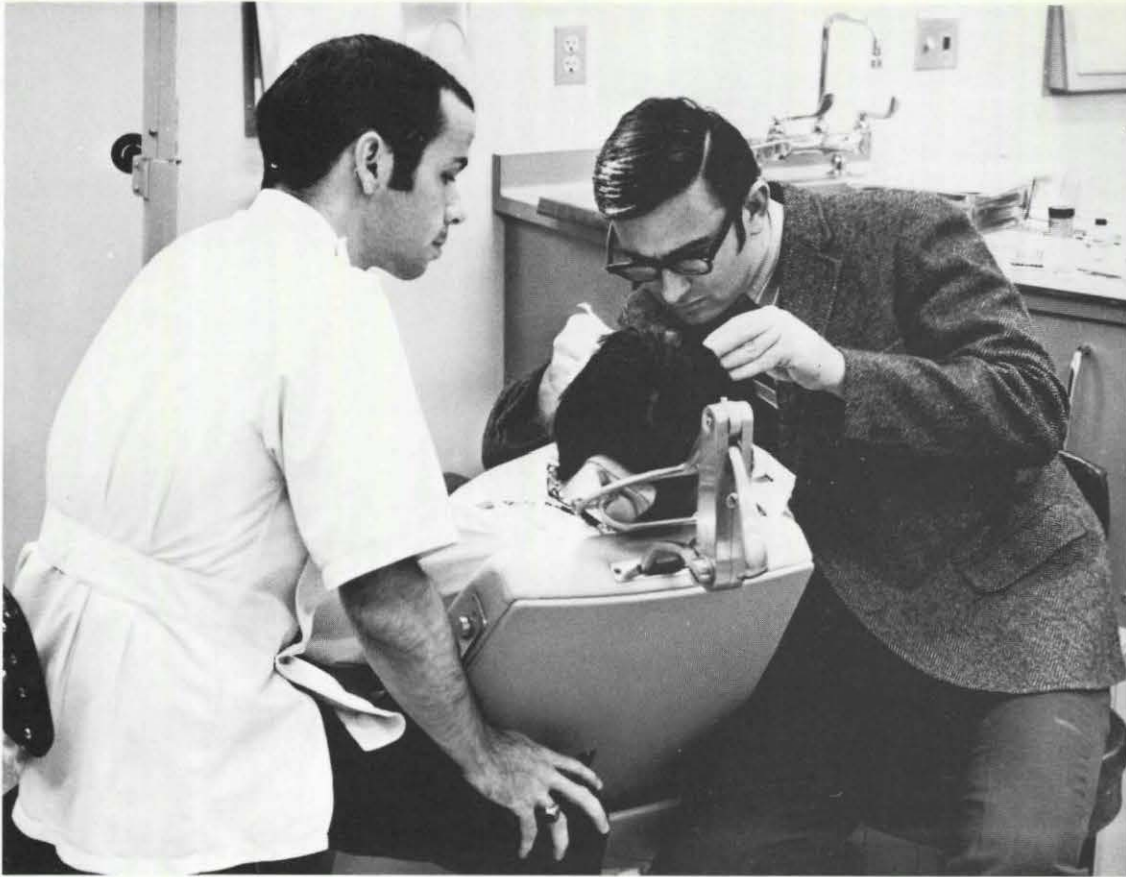

Keep trying Lloyd, you'll get one right yet.

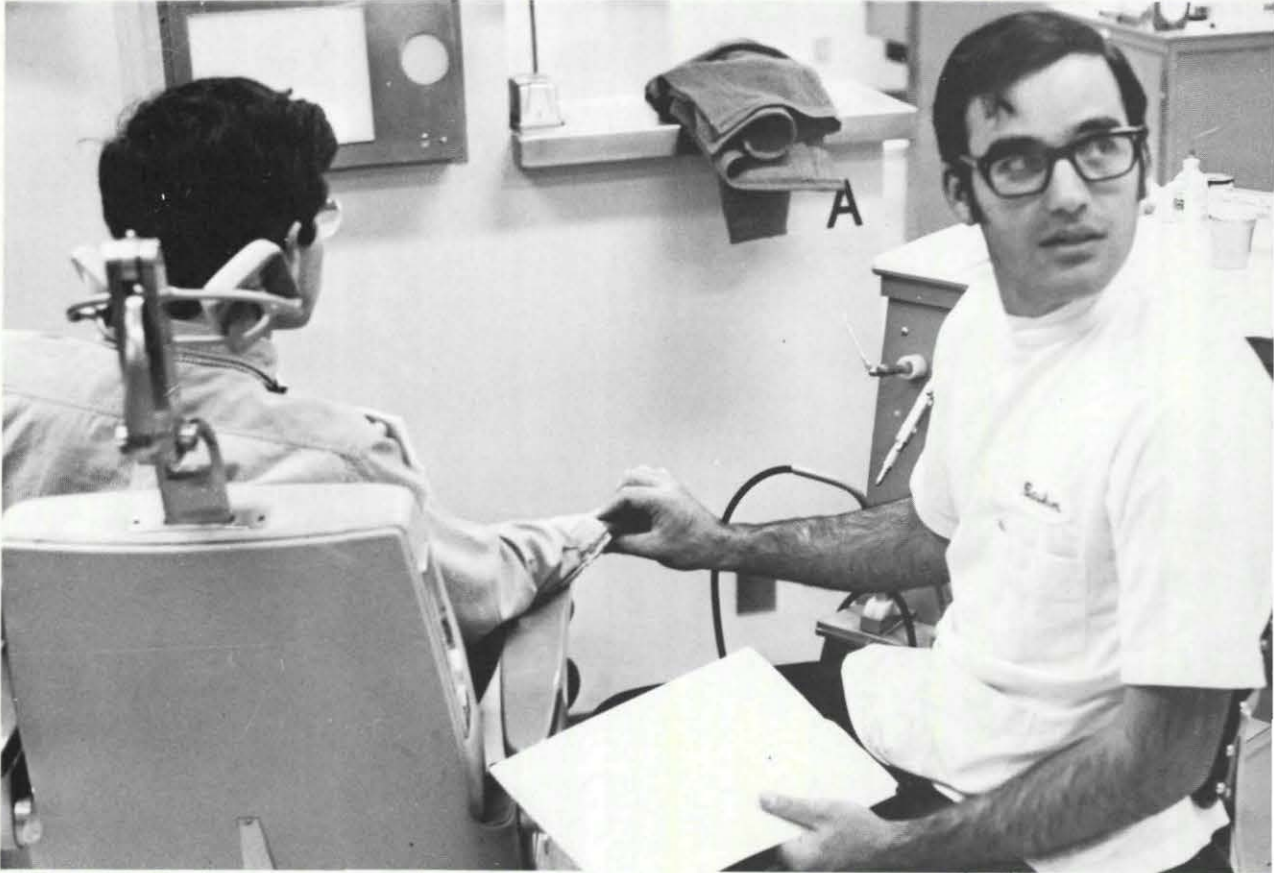

Uh, Hi there, Dr. Burns.

... Some day I might have hands like Baker.

I wonder who I can get to place the amalgam after Goss finishes the outline form?

Never mind the inlay; your heart just stopped.

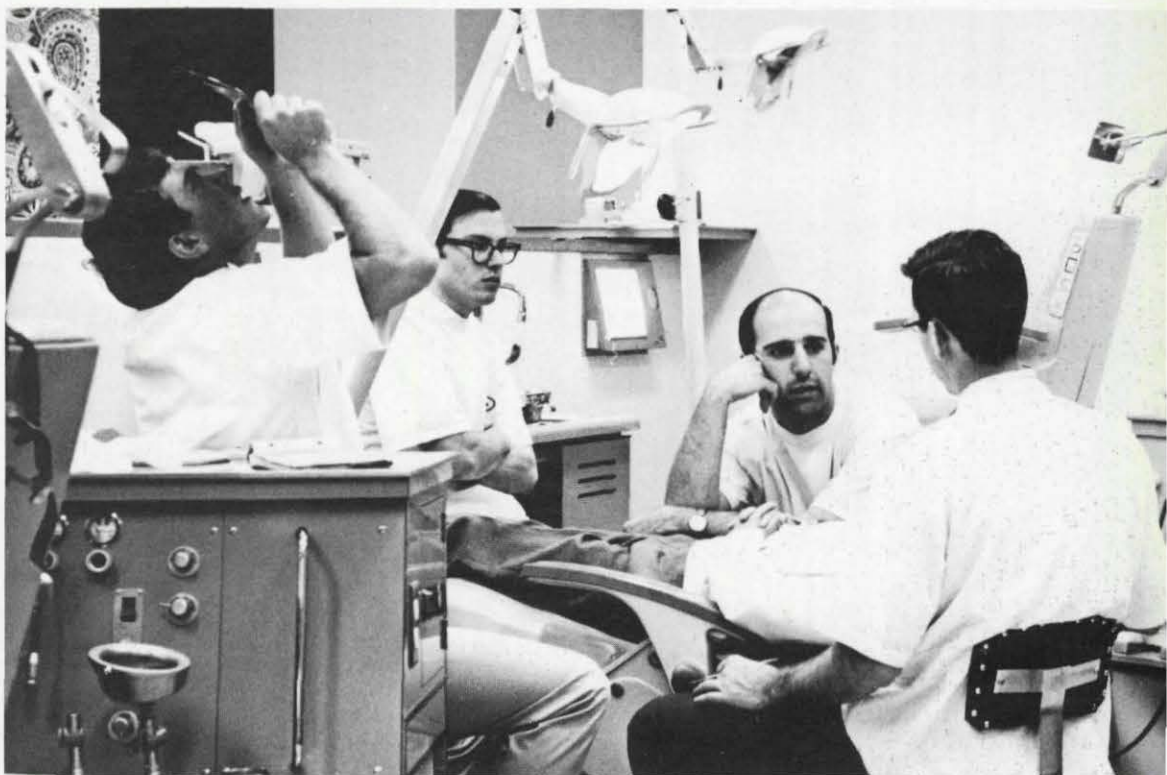

Oh Christ! Baldwin's coat is on fire!

... And if you're still alive by the time we get to delivery ...

I'll fill in the margins with white wax.

Listen you guys, once you're in the clinic, you've got it made.

Because you never stop learning, Jelenko never stops teaching

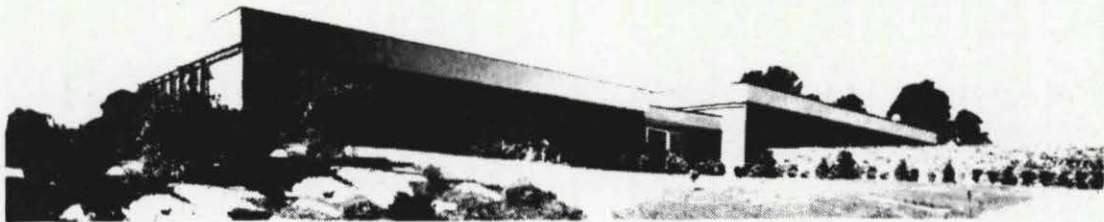

Closed circuit TV aids Jelenko's New Rochelle educational facility. Four other educational centers are at your service with clinics and lectures. 35 district representatives are available for technical consultation.

The Jelenko team attends hundreds of meetings with lectures and table clinics.

Our publications and films keep you and your dental society abreast of prosthetic developments.

You never stop learning. We never stop teaching.

How do you set up a dental practice in 24 western states?

Patterson Dental Co. serves over 24,000 members of the dental profession in 24 western states. Many of the fastest growing areas in the nation are located in these states. Patterson representatives in 36 branch locations serve them on a regularly scheduled basis.

Your Patterson man can provide information on area potentials and will assist you in obtaining space suitable for a dental office. He will design an office for the most efficient dental usage; lay out the operatories; advise plumbers, electricians, carpenters and other tradesmen where air, water, waste, and electrical lines must be placed for dental equipment installation; install equipment; train you in its use and maintenance; help you locate an assistant and train her in office procedures, film processing techniques and proper mixing of many materials; help to set up book-keeping and accounting systems; provide product guidance; arrange for office remodeling and decorating; and provide a variety of time payment contracts tailored to your need. He'll help you acquire a practice and make it grow.

I'm so good!

—P&S ingenuity—

Dental assisting is fun, but it sure does require all of your attention.

Bioblend® Teeth make any denture look more natural.

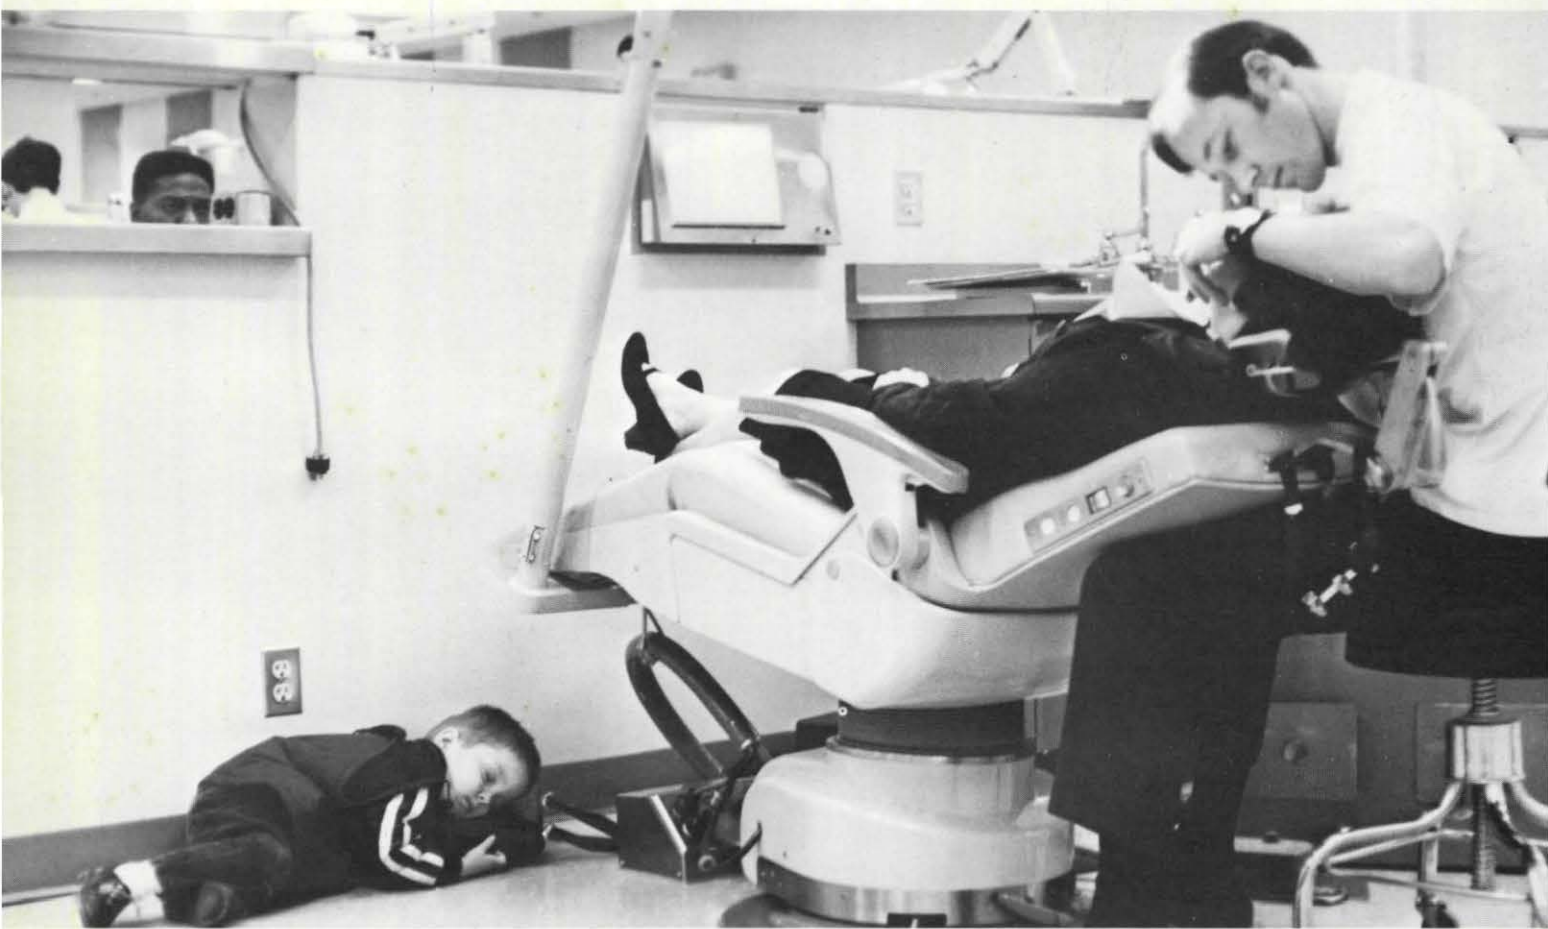

Bone-like enamel. Wrap around translucency. Internally blended color. These are just a few of the esthetic refinements which distinguish Bioblend from all other artificial teeth. The result: Bioblend Teeth are now being used more often for complete dentures than any other teeth in the world. *Any other!*

Available in porcelain or plastic.
