One Hundred Ninth

Commencement

1851

The University of the Pacific School of Dentistry is one of the premier dental schools in the nation and has served the Bay Area community for one hundred and seven years. The years surrounding the turn of the twentieth century were packed with potential. Momentous experiments heralded both the fulfillment of dreams and the beginning of creations that promised to forever change the world around them. In 1895, for example, Marconi introduced the wireless telegraph, ushering in a new age of communication. That same year, Roentgen discovered x-rays; and a scant eight years later, Orville Wright took the first airplane ride. Something momentous was also about to take flight in San Francisco. A local war hero named Dr. Charles Boxton came home to nurture his dream of founding a high quality private dental school.

Founded in 1896 as the College of Physicians and Surgeons (known as P&S), the school's curriculum originally included programs in dentistry, medicine, and pharmacy. The college announced to its Northern California public and to the world, "It will, at all times, be the purpose of this school to elevate the profession through its students." Dr. Boxton presided as the first dean of P&S and served briefly as mayor of San Francisco. In 1918, during Dr. Boxton's tenure as dean, the college focused its educational program solely on dentistry.

The school grew and developed right along with its city, its students, and the profession. In the one hundred and six years since Dr. Boxton drove his horse and buggy down a cobble stoned Market Street, of course, much has changed in the city. High-rise buildings now punctuate the skyline, and world-famous bridges span across our waters. In fact, if the first dean were to visit us today, he would not recognize the advanced equipment, the high-tech instruments, or the gleaming state-of-the-art facility; and he certainly would have a hard time parking that buggy on Sacramento or Webster Streets. The one thing Dr. Boxton would not be surprised to see is how his dental school has prospered.

The original P&S campus, located at Fourth and Howard Streets near the present day Moscone Center, was completely destroyed by the 1906 earthquake and fire. As a result, the campus moved to its Fourteenth Street location in the heart of the Mission District, where it operated from 1906 until 1967. In 1962, the College of Physicians and Surgeons amalgamated with the University of the Pacific. A new facility for the new University of the Pacific, School of Dentistry, was constructed in 1967 on the corner of Sacramento and Webster Streets in San Francisco, where the school stands today. It was the first complete replacement of a dental school facility to be dedicated in the United States using federal aid-to-education funds.

With a remarkable capacity for innovation and adaptation, the University of the Pacific, School of Dentistry has thrived through earthquakes and wars, legislation and depression, to forge and maintain its longstanding reputation for producing excellence in scientific and clinical training. At the same time, the school has built a parallel reputation for encouraging diversity, accessibility, and opportunity, which has formed a strong sense of community. This translates to a special concern for people which prevails among students, faculty, alumni, and supporters. Today, both of these traditions of

excellence and of caring combines to form Pacific's guiding philosophy of humanism. A model of humanistic education that is second to none! Where professors teach, faculty care, and students learn.

"Every piece of marble has a statue in it waiting to be released by someone of sufficient skills to chip away the unnecessary parts. Just as a sculptor is to marble, so is education to the soul. It releases it. For only the educated are free. You cannot create a statue by smashing the marble with a hammer, and you cannot by force of arms release the spirit of the soul (of a student)."

—Confucius

We are proud of the technical and scientific progress we have achieved at the School of Dentistry, but we are just as proud of the respect for people maintained at every level. The success nurtured and cultivated by the School of Dentistry is a result not only of fine minds but also of fine attitudes. These attitudes are captured in two words—caring and service. Our mission simply is to "build people—along the way, we make them doctors who serve the public."

Today, under the direction of Dr. Arthur A. Dugoni, dean and P&S alumnus, the School of Dentistry is a leader among dental schools, in curriculum, clinical excellence and technology. Students learn through the "humanistic" model of education in a technologically-advanced setting. Dean Dugoni has successfully guided the remodeling of both the facilities and the curriculum and is leading the school into the twenty-first century dedicated to excellence.

In addition to Pacific's strong educational reputation, its dental clinics handle over 200,000 patient visits per year and offer comprehensive dental care in a variety of specialties including pediatric care, orthodontics, oral and maxillofacial surgery, periodontics, endodontics, pathology and medicine, prosthodontics, and implants.

The Dentist's Pledge

The Dentist's Pledge

I, (dentist's name), as a member of the dental profession, shall keep this pledge and these stipulations.

I understand and accept that my primary responsibility is to my patients, and I shall dedicate myself to render, to the best of my ability, the highest standard of oral health care and to maintain a relationship of respect and confidence. Therefore, let all come to me safe in the knowledge that their total health and well-being are my first consideration.

I shall accept the responsibility that, as a professional, my competence rests on continuing the attainment of knowledge and skill in the arts and sciences of dentistry.

I acknowledge my obligation to support and sustain the honor and integrity of the profession and to conduct myself in all endeavors such that I shall merit the respect of my patients, colleagues, and my community. I further commit myself to the betterment of my community for the benefit of all of society.

I shall faithfully observe the Principles of Ethics and Code of Professional Conduct set forth by the profession.

All this I pledge with pride in my commitment to the profession and the public it serves.

(Approved by the American Dental Association House of Delegates)

"Take time to work-it is the price of success.

Take time to think-it is the source of power.

Take time to play-it is the secret of perpetual youth.

Take time to read-it is the foundation of wisdom.

Take time to be friendly-it is the road to happiness.

Take time to dream-it is hitching your wagon to a star.

Take time to love and be loved-it is the privilege of the Gods.

Take time to look around-the day is too short to be wasteful.

Take time to laugh-it is the music of the soul.

Take time to give-it is too short a day to be selfish.

Take time to pray-it is the greatest power on Earth."

RECESSIONAL

Triumphant March from Aida — *Giuseppe Verdi*
David Hunsberger, Organist

Historical Background of the Mace

Originally a weapon of offense used by a medieval king or great noble, the mace has been refined to symbolize authority during ceremonial occasions. The mace was first used as an academic symbol in the 16th century when Queen Elizabeth I presented a replica of her royal mace to the University of Oxford in 1589, ordering that it be used in all ceremonies to represent the royal presence.

The University of the Pacific instituted use of the mace in its academic ceremonies on Founder's Day, March 6, 1966. Constructed by Stuart Devlin, internationally known silver designer, the four-foot long, 15-pound mace is comprised of silver with gold plating. It was a gift to the University from Mrs. Winifred Raney, University Regent.

Significance of Academic Regalia

Academic dress was worn daily by university faculties of the Middle Ages. In more recent times, use of complete academic dress has been reserved for ceremonial occasions. While European universities exhibit considerable variation in academic regalia, a standard pattern was adopted for use in the United States more than a half-century ago. Gowns generally are black. A few universities adopted other colors for doctoral gowns: Harvard, crimson; Yale, blue; Chicago, maroon; Dartmouth, forest green.

The field of learning in which the degree was awarded is shown by the color of the edging of the hood and, in some cases, by the color of the facing and crossbars on doctors' gowns. Some of the more frequently seen colors are: white (Arts and Letters), pink (Music), dark blue (Philosophy), light blue (Education), scarlet (Divinity), golden yellow (Science), green (Medicine), olive green (Pharmacy), purple (Law) and lilac (Dentistry).

Colors lining the hood are those of the institutions that awarded the degree. For example, the University of California colors are gold and blue; Stanford University, cardinal; University of Michigan, maize and azure blue; University of the Pacific, burnt orange and black.

An individual's degree is revealed by the type of gown and the width of edging on the hood. Designs are of three kinds:

BACHELORS' GOWNS have full pointed sleeves with no trimming, and the hoods have a two-inch edging.

MASTERS' GOWNS have full sleeves with no trimming, and the hoods have a three-inch edging.

DOCTORS' GOWNS are of silk, with rounded sleeves, velvet facing down the front, and three velvet crossbars on each sleeve. Hoods have side panels and a five-inch facing.

Tassels on bachelors' and masters' caps are ordinarily black, but they may be of the color of the field in which the degree was awarded. Doctors' tassels generally are gold. Tassels are properly worn on the left side of the front of the mortarboard.

*The listing of a candidate's name in the commencement program is
presumptive evidence of graduation, but is not to be regarded as conclusive.*

T

he University of the Pacific was established by pioneer Methodist ministers in 1851 as the first chartered institution of higher learning in California. Originally founded in Santa Clara, the institution later moved to San Jose and in 1924 to its present location in Stockton.

In 1996, the Board of Regents established that *"the University of the Pacific's mission is to provide a superior, student-centered learning environment integrating liberal arts and professional education and preparing individuals for lasting achievement and responsible leadership in their careers and communities."*

Throughout its history Pacific has been recognized as a leader in educational innovation. It provided the West Coast with its first medical school in 1858 (it later became part of Stanford and today is the California Pacific Medical Center), its first coeducational campus in 1871, its first conservatory of music in 1878, its first "cluster colleges," and its first and only four-year private institution in the Central Valley. Pacific was first in the nation to offer an undergraduate teacher corps program, the first to send an entire class to an overseas campus and the first to establish a Spanish-speaking inter-american college.

Since the move to Stockton in 1924, only five presidents have headed the administration of the University. Tully C. Knoles presided during the move from San Jose and served until he was succeeded by Dr. Robert E. Burns in 1946. Dr. Burns served as president until his death in 1971. Dr. Stanley E. McCaffrey was named president in 1971. When he retired in 1987, he was succeeded by Dr. Bill L. Atchley, who served until 1995. Dr. Donald V. DeRosa began his service as the 23rd president in 1995.

The School of Education was established shortly after the move to Stockton in 1924. It was renamed the Gladys L. Benerd School of Education in 1992 in honor of the alumna's endowed gift. The University experienced its greatest growth and a broadening of its base under the administration of Dr. Burns. In 1955 it opened its School of Pharmacy and in 1956 its Graduate School. The School of Engineering was established in 1957. In 1962, the College of Physicians and Surgeons, a school of dentistry founded in San Francisco in 1896, merged with the University of the Pacific and became the University's San Francisco Campus.

In recognition of this growth, the name of the institution was changed in 1961 from the "College" of the Pacific to the "University" of the Pacific. The name "College of the Pacific" was retained for the University's central liberal arts college.

A new concept in higher education in the United States found expression in the establishment of the first "cluster" college, Raymond College, in 1962. This was followed in 1963 with the opening of the second, Elbert Covell College, the first bilingual-bicultural college in the country. McGeorge College of Law, and independent law school founded in Sacramento in 1924, amalgamated with the University in 1966 as its School of Law. The third cluster college, focusing on non-western studies and featuring a year of study in an Asian culture, began in 1967 as Callison College. The cluster colleges were ended in 1982. However these concentrations in global study became our School of Business and Public Administration. In 1995 it was renamed Eberhardt School of Business in honor of the Eberhardt family's endowed gifts. University College, a unit of the University designed specifically for the adult "re-entry" student, was reorganized and revitalized in 1985.

In 1995, Pacific issued the first four-year guarantee whereby students are assured completion of the B.A. degree in four years. Accelerated programs announced by President DeRosa enable a student to complete undergraduate studies in combination with a law degree in "3+3" years. The School of Dentistry and School of Pharmacy offer similar accelerated programs. In this spirit of innovation, Pacific is currently shaping bold new plans for the years ahead.

The Vision Statement, adopted by the Board of Regents in 1997 to lead the University to its sesquicentennial, pledges *"to continue to link liberal arts and professional education through innovative curricular and co-curricular programs of exceptional quality and high value. The University will strengthen its visibility and take full advantage of the rich resources of Northern California. Pacific will become a national leader in the creative use of internships and leadership development programs. These distinctive features will be shaped by our commitment to equip Pacific graduates for success in a multicultural and international society."*
