The first step toward having outside teams play here regularly will be taken when the Elameth Falls A's invade the local diamond this Sunday, May 30, Memorial Day, to face the Project all-star team in a hardball contest.

Unquestionably the game will draw one of the best crowds in the city's history and our boys will probably put up a good performance despite the short practice period.

Since it is the first time that a Project team will play an outside team, except for the weight-lifters, and since the futures of having other teams come here hinges on this first game, it is absolutely necessary that everything goes smoothly.

By everything we mean, mainly, the sportsmanship of the fans as well as the players.

Already this season in softball, the conduct of various pitchers and catchers have led to fist-fights and the creating of much ill-feeling—an action for which there is no legitimate excuse.

If this sort of thing is carried over to the game this Sunday, then we may as well say “good bye” to the chances of having future meetings with visiting teams.

It is up to us, and we must prove that we are worthy of not only competing with those teams but that we are good sportsmen as well.

We will know after Sunday.

NYA OFFERS GOOD OPPORTUNITY

Tomorrow a group of 55 young men will leave the Project to enter the NYA resident training schools.

The opening-up of this school has been made possible after months of negotiation between the WRA and the NYA officials. Throughout the centers small groups are being recruited for this school. If the initial group of students prove successful, the NYA will in all probability open its door to another group of nisei.

Young nisei will have an opportunity to learn in a government sponsored institution a skilled trade which will be of great value to them not only for the duration of the war but afterward as well.

The NYA prepares its students for employment in war industries, and students completing the course are assured of a job. The opening-up of NYA facilities to the nisei is an indication that the government is fulfilling its program of restoring loyal Japanese-Americans to their rightful place in society.

If the experiment proves highly successful, thousands of young nisei will be entering a new field of employment which will give them an opportunity to make an important contribution to the war effort.
