## BULLETIN of the UNIVERSITY of the PACIFIC

Vol. 51

April 22, 1963

No. 12

PUBLISHED 16 times a year: Once in April, May, June, September, and October; twice in January, February, March, and November; and three times in December.

PACIFIC REVIEW issues are published in October, November, December, January, February, March, April, and June.

ENTERED as second class matter at the Post Office, Stockton, California, April 15, 1924, at special rate of postage provided for under section 110, Act of October 3, 1917.

EDITORIAL STAFF: E. M. Crigler  
Shirley Drake, Donald Payne

## ART AT PACIFIC

RUBY ZAHN WHITE

Ruby Zahn White, a prominent artist who makes her home in Stockton, retains a warm relationship with the University of the Pacific—as an alumna, as the mother of two Pacific alumni, as a former faculty member, and as the wife of a current faculty member.

Mrs. White, an art major while attending Pacific, received her bachelor's degree in 1921, and continued her art studies at the California School of Fine Arts in San Francisco. A specialist in the area of documentary painting, Mrs. White travels extensively, studying and painting many of the interesting features of her trips.

Some of her outstanding works are on exhibit in the Common Room at Raymond College during April.

Mrs. White's family has left an imprint in the history of the institution as well. Two children, Mrs. Tom (Patricia) Sprague, and Gilbert White, who is engaged in research at Berkeley, are Pacific graduates.

George Warren White, distinguished faculty member and husband of the talented artist, is a Pacific graduate with the class of 1918. Professor White joined the mathematics department in 1922, and is recognized today as holding the longest record of service to Pacific as a faculty member. Mrs. White served on the faculty of the art department for three years.

**ON THE COVER:** April showers have been a contributing factor in beautifying the Raymond College campus with new spring flowers, green blades of grass, and foliage-covered trees and shrubbery. The first cluster college has entered into the final trimester of its debut as an accelerated three-year liberal arts school.

# Recruitment Spreads to Latin America

by DR. ELLIOTT J. TAYLOR, Dean of Admissions

On the evening of February 21 the Voice of America programs announced the forthcoming visit of the Dean of Admissions of the University of the Pacific to several Latin American countries in the interest of the unique Elbert Covell College program. Thus the University has extended its student recruitment program actively to the Spanish speaking nations of the Western Hemisphere.

The new program is unique in North American higher education as it offers the first college-level degree program ever available in the United States in another language. It is unique to Latin America as it removes the language barrier which has kept so many otherwise well qualified young people from studying in American universities. This new "first" in Pacific's educational pioneering has been publicized through the Latin American press, through the efforts of the Cultural Affairs Officers of our Embassies, through the interest and cooperation of the Bi-National Centers and many secondary schools. In essence Elbert Covell College opens an opportunity to a vast number of Spanish-speaking youth who may come here without English and who may work toward a degree while studying English as their foreign language. The bi-lingual and bi-cultural opportunities are broadened because North American youth with sufficient Spanish may also enroll.

This is the attractive opportunity which made up my "sales kit" during a recent trip of four weeks to ten Latin American cities. Starting with Guatemala City, the itinerary proceeded to San Salvador, Panama City, Bogota, Lima, Santiago, Buenos Aires, Montevideo, Caracas, and Barranquilla. During the four weeks involved there were visits to the United States Embassies in each capitol city to acquaint the Cultural Affairs staff and especially the Student Exchange officer with the program and to the Bi-National Center in each city.

The way had been prepared to meet officers of several of the Rotary and Lions International because of their interest in student exchange. Local organizations such as the Asociacion Universitaria Argentino-Norte American and the North American Association of Venezuela whose services include student exchange and screening of scholarship applicants were always eager to hear of the latest developments.

It was quickly evident that the young men and women with whom I talked are interested in the physical and biological sciences, mathematics, engineering, business administration, political science, economics and pre-

professional studies, especially pre-medicine and pre-dentistry. In those countries where teaching has become a more dignified profession, there was an interest in teaching and school administration. They are aware of many of the needs at home for trained people and they are striving to meet these needs.

Their financial problems are real and critical. The Colombian must pay ten pesos to buy a dollar where until recently it was only seven. The Argentine pays 140 pesos for a dollar, inflated from 25 eight years ago. The Chilean buys a dollar with about 3 escudos, the new currency, but he thinks in terms of his former pesos at 3000 to a dollar, and as he said often, the cost of a North American education equals the price of a very good house.

Thus the University has prepared to underwrite a substantial amount in scholarships. Each student will be expected to meet his own travel costs, which can be financed in many cases through local aids. Each will be expected to pay, according to ability, for some portion of his expenses. Many want to work but this will present difficulties until the language barrier has been surmounted. Committed to this program the University promotion and development staff is seeking funds to underwrite the scholarship commitments.

On the home base, the Admissions Office faces a unique set of problems. It must now provide literature and application blanks in Spanish; it must answer correspondence in Spanish as well. It involves a knowledge of the secondary system in each Latin-American nation as no two are exactly alike in their grading standards, or their requirements for a high school diploma.

As I interviewed potential students in Latin America I asked each in turn how he had learned about Elbert Covell College. There was ample evidence that the Voice of America broadcasts, press releases and brochures were reaching their mark. Some applicants made substantial sacrifices to participate in the interviews. There were two young men and a young lady; two in Chile, one in Argentina—who had traveled at least seven hours one way by bus for a conference. Many had taken time off from work, with full cooperation from their employers, for interviews. It is obvious that many of the youth are charged with hope to learn and to return to their own lands to work and serve. What greater impact can we make in these demanding times than to provide the educational opportunity?

# PACIFIC ALUMNI DAY

# Outstanding Alumnus

The Outstanding Alumnus Award, to be presented Saturday evening, May 4, at the annual alumni banquet, will go to Carlos Wood '33.

The noted engineer will come to the Pacific campus to accept the award from Stratford, Conn., where he is division vice-president—engineering, at Sikorsky Aircraft, a division of United Aircraft Corporation. Wood joined Sikorsky Aircraft in 1960, heading the largest engineering effort in the helicopter industry. His responsibilities include Sikorsky's extensive advanced research program, the design and development of the company's products, and the engineering support necessary for the utilization and continued improvement of aircraft in the field.

Carlos Wood received his bachelor's degree in science from the College of the Pacific in 1933, and in the next two years earned master's degrees in mechanical engineering and aeronautical engineering at the California Institute of Technology. He pursued two additional years of graduate work toward his doctorate before joining Douglas Aircraft Company, Inc., as a draftsman. After advancements to the research department and to preliminary design, he worked on the DC-4 series, B-19, B-23, and C-74 Globemaster.

Wood was named chief of preliminary design in 1942, and during the next 13 years had an important role in the design of the DC-6, DC-7, and DC-8 series airplanes which helped revolutionize transportation throughout the world. He was appointed chief engineer at the Long Beach division in 1955, directing the design and development of the B-66 tactical bomber series, the

C-133 series (the largest transport airplanes in production for the U. S. Air Force), and the design and building of a large part of the ground support equipment for the Thor IRBM missile system. In February, 1959, he became director of advanced engineering planning for Douglas.

The outstanding alumnus is a consultant of the Aerospace Vehicles Panel of the U. S. Air Force Scientific Advisory Board, a member of the Department of Defense Transport Criteria Evaluation Committee, a fellow of the Institute of Aerospace Sciences, and a member of the American Helicopter Society. He has been a private pilot for 33 years.

In 1961, Wood served as general chairman for a tremendously successful New York City meeting for alumni throughout the Eastern United States.

## ROBERT HENNING HEADS ALUMNI CHAPTER

Robert Henning '51, principal of Walter Colton Junior High School in Monterey, has been elected president of the University of the Pacific Alumni Chapter of Monterey County. Other new officers are Pat Swain Raugust '58 of Salinas, secretary, and Vernon Hurd '30, board member.

The election of officers took place during the annual dinner meeting at Asilomar recently. Marcus Williams '49, master of ceremonies, introduced Dr. Warren B.

Martin as the guest speaker. The Raymond College provost discussed the three-year liberal arts college in a talk entitled, "New Students—New Opportunities."

Honored guests at the alumni meeting were George O. Carlson of Pebble Beach, UOP regent, and Dr. Fred L. Farley, a former Pacific faculty member. Dr. Farley held the distinction at the time of his retirement in 1955 of holding the longest teaching record at COP as a full-time professor. Dr. Farley joined the Pacific faculty in 1918.

Jack Hileman

## Recognition For Chemistry Research

Research in the field of chemistry with chemical compounds known as the metal carbonyls has brought statewide recognition to Dr. Jack C. Hileman, chemistry instructor at El Camino College. Hileman earned his Doctor of Philosophy degree in chemistry at Pacific while on a sabbatical leave in 1962.

Hileman's research work led to his authorship of the chapters on the metal carbonyls in each of two soon-to-be-published technical books. The first, *The Encyclopedia of Chemical Technology*, is being edited by Anthony Standen, John Wiley and Sons, and will be published by the Interscience Publishing Company.

The second, *Preparative Inorganic Chemistry*, is edited by Dr. W. C. Jolly of the University of California, Berkeley, and will also be published by Interscience.

Hileman was the first chemist to synthesize technetium carbonyl.

## Chemistry.....

"Professor Leslie W. Gibbs, instructor in chemistry at Spring Arbor College since 1956, has been granted a one year sabbatical leave to continue graduate study for the Doctor of Philosophy degree in chemical education..." Boyne Citizen, Boyne City, Michigan.

This story is not an unusual one in city newspapers across the United States. Gibbs is one of 16 teachers selected from the nation to participate in the Academic Year Institute for College Teachers of Chemistry at the University of the Pacific in Stockton.

The Institute, sponsored by the National Science Foundation, is but one of the important projects underway in Pacific's growing Department of Chemistry.

### Increase in Staff and Enrollment

In 1948 the chemistry staff consisted of one full-time faculty equivalent. The enrollment was 15 students registered for 92 semester hours of chemistry.

The staff for the 1962-63 year has grown to eight full-time men, with an enrollment of 542 students registered for 3,997 semester hours of chemistry. The graduate enrollment has increased from one student to 34 in residence, and 15 additional graduate students doing work on a part-time basis.

How are these students employed after they have graduated—with a Master of Arts—a Master of Science—a Doctor of Education—a Doctor of Philosophy degree?

### Leaders in Industry and Education

Robert Stoner, M.A. '53, is chief chemist for Fiberglass's Antioch Plant. Paul Green, M.A. '52, is chief of organic research for Hewlett-Packard. John Cobb, M.S. '58, is manager of the nuclear missile group for Lockheed Aircraft. Bruce Shore, B.S. '56, is a research associate for Harvard College Observatory.

At least a dozen are on the faculties of other college and university chemistry departments—others are high

## .... Growth and Prestige

school chemistry instructors. Still others are working with the Bureau of Narcotics, the Food and Drug Administration, Gallo Wines, The Texico Company, Dupont, Dow Chemical Company, Campbell Soup Company, and the Peace Corps in Nigeria, Africa.

### Each Faculty Member a Ph.D.

Pacific's distinguished chemistry faculty, under the chairmanship of Dr. Emerson G. Cobb, can boast to the publication of nearly 100 papers in scientific journals. The eight men hold Doctor of Philosophy degrees from the University of North Carolina, University of Oregon, Northwestern University, Cornell University, University of Illinois, Ohio State University, and Bristol, England.

Substantiating the faculty's high calibre, grants for individual research projects and institutes have mounted to approximately \$150,000 a year for the four years 1958 through 1962. Organizations making contributions in-

clude the National Science Foundation, National Institute of Health, Research Corporation, the Philosophical Foundation, the American Cancer Society, and others.

### Graduate Program Expansion

The University has offered the graduate program leading to the Master of Arts and Master of Science for over 30 years. In 1958, a graduate program beyond the masters degree was initiated in cooperation with the School of Education. The program provides for graduate study in chemistry and professional education courses, original research, and a dissertation. The first degrees under the curriculum were awarded as the Doctor of Education at the 1962 commencement.

The doctor of Philosophy degree was added in 1960. At present, 35 persons are studying in the program leading to the doctorate. The first persons are expected to receive the degree at commencement in June.

## IRANIAN VISITORS

Seven men from Iran strayed from their established itinerary to city and county facilities, to take an impromptu tour of Pacific's Department of Chemistry recently.

The group is on a three-month tour of the United States, under the sponsorship of the Iranian government, to learn first hand the role of government in labor affairs and social welfare as well as labor-management relations. The men extended their Stockton visit one day to observe the Iranian New Year with several Iranian exchange students at Pacific.

Pictured left to right are Irshad Ahmad (student), M. Taher Dianati, Ahmad Hamidi (student), Seid Reza Mozafari, Abolghassem G. Pakzad, Caty McKenzie (student), Dr. Emerson G. Cobb, Mohammed A. Mazinani, Bahram Fazeli, (student), Gholamali A. Gueran, Hassan Habibi, and Mahmud Haddad.

# THE FACULTY WORLD

JOHN G. ELLIOTT, professor of music, attended a meeting of the national Board of Regents of Pi Kappa Lambda, honorary music society, held in Chicago early this month. The meeting was held in conjunction with the biennial convention of the Music Teachers' National Association.

DR. EDWARD RAINBOW, assistant professor of music education, gave a report to the Bay Section of the California Association for Supervision and Curriculum Development. The report was based on an experimental study just completed by Dr. Rainbow, and was entitled "A Study to Investigate the Constructs of Musical Aptitude."

GORDON FINLAY, director of bands, spent a busy month of March. He conducted the Oregon All-State Honor Band in Portland, appeared as soloist in Minneapolis, was a clinician at Mound, Minnesota, High School Brass Clinic, rehearsed and conducted the Seventh Day Adventist Band Festival in Stockton, and conducted the Mendocino-Lake County Music Festival at Lakeport.

DR. FLOYD F. HELTON, chairman of the mathematics department, attended the annual spring meeting of the California Mathematics Council, Northern Section, at St. Mary's College on March 30. Early in April Dr. Helton attended a seminar entitled "Improving College Teaching" on the campus of Portland State College. He delivered a paper before 40 college teachers who attended the seminar.

DR. EDWIN DING, professor of economics, has been accepted as a participant in a seminar on Contemporary Economics at the University of Virginia this summer. The program, which will extend from June 17 to July 12, has been made possible by a grant from the General Electric Foundation. Participating faculty members will be brought up to date on comparative economic growth and the role of the government in the economic system.

Dr. Ding, since 1948 a member of the faculty of both Stockton College and UOP, will become a full-time member of the Pacific faculty September 1.

DR. GILBERT C. HUGHES, assistant professor of Biological Sciences, is the author of a paper published in the current issue of the *Transactions of the British Mycological Society*. The paper is entitled "Seasonal Periodicity of the Saprolegniaceae in the Southeastern United States." Dr. Hughes is continuing his studies of aquatic fungi in the Sacramento-San Joaquin Delta.

MAX POLINSKY, assistant professor of pharmacy administration, spoke on the topic, "The Changing Consumer" at the University of the Pacific Pharmacy Seminar last November. His paper has been published in the April issue of *Western Pharmacy*.

An address by DR. WARREN B. MARTIN, provost of Raymond College, has been published in the March issue of the *Journal of Secondary Education*. The title of his address is "Targets for Creativeness in Achieving a Quality Education."

An article by DR. JOEL W. HEDGPETH, director of the Pacific Marine Station at Dillon Beach, was published in the November-December issue of *Deep Sea Research*, by Pergamon Press, Ltd., Oxford, England. The article was entitled "A Bathypelagic Pycnogonid."

A National Science Foundation grant of \$8,030 has been awarded the University of the Pacific for support of an In-Service Institute in Astronomy and Space Science for Elementary School Personnel. JOHN V. SCHIPPERS, Department of Education, will direct the Institute during the 1963-64 academic year.

DR. JOHN J. TOCCHINI, dean of the College of Physicians and Surgeons, is author of the article, "The Dental School in Dental Education," published in the February issue of *The Journal of the California Dental Association*.

DR. LAWRENCE J. OSBORNE, professor of English, was chairman of a literature discussion group at the National Conference of College Composition and Communication and the California Association of Teachers of English. The meeting, attended by 2,000 teachers and educators, was held March 21 through 24 at the Statler Hilton Hotel in Los Angeles.

The American Social Welfare Research Division of the International Association of Gerontology has accepted a paper by THEA KAROLA FROELICH '57 to be read by title at the Sixth World Congress of Gerontology. She is currently an instructor in Modern Languages.

HELEN B. DOOLEY, professor of art, will exhibit a group of oils and watercolors from the Southwest in the Art Center through May 5. The local artist was honored recently by having work accepted for the current American Watercolor Society Exhibition at the National Academy Galleries in New York City.

HENRY R. SPIESS, director of placement, was a member of the evaluation committee which has been making a study for Gustine Union High School Accreditation. The committee met with teachers, student body officers, trustees, and unclassified personnel during its study and made a survey of efficiency and personal attitudes of the groups.

DR. HERSCHEL G. FRYE, professor of chemistry, attended a conference on medical education at George Washington University April 9 through 15.

Bruce Orvis '50, a star half-back at Pacific when it became a football power in the late 40s, is California's Outstanding Young Farmer for 1962. Nine farmers between the ages of 21 and 36 were nominated for the Young Farmer award by California Junior Chambers of Commerce.

Orvis, co-owner and operator of a ranch in the Farmington area, represented California in the national Young Farmer contest in Tulsa, Okla., this month. He is a fourth-generation operator of the historic Snow Ranch. His family has holdings in both San Joaquin and Stanislaus counties.

Bruce and his brother, Jim, have transformed their operation from a commercial beef-raising spread to a purebred Hereford ranch. The title holder is a leader in a state-wide progeny testing program aimed at improving the Hereford strain and has been president of the state Hereford association.

Always active in alumni activities, Orvis has been a member of the Alumni Fund Council, and in 1960 was co-chairman of the 1950 class reunion. Last year he was class agent.

Orvis also served as president of the Stockton Quarterback Club, and is an avid supporter of Pacific's new Agribusiness Program. He is married to the former Roma Porter '50.

## **Outstanding Young Farmer**

Agribusiness is now a realized program at the University of the Pacific.

Agribusiness, a vast new concept of agriculture including all its relations to industry, is one of the largest segments of the entire American economy. It is said to be a \$100 billion industry which employs 35 percent of the nation's work force.

In the fall of 1964, the Agribusiness program will offer classes to a select 35 to 50 students, each holding a bachelor's degree or equivalent and having some background in agriculture.

Being professional rather than technical, the program will emphasize management and marketing. The first year will be devoted to courses in finance, marketing, administrative practices, production business responsibilities, figure controls of business, and written analysis of business problems.

During the second year the student will specialize. In addition to such required courses as business policy and oral communications, he will have an opportunity to relate specialization to agribusiness problems.

In elective courses and independent research, students will receive the assistance of responsible personnel who are in the field at all times doing research into current problems in industry's need for specialized skills.

All instruction will be by the case method, keeping lecture at a minimum, according to Robert L. Lloyd, director.

Patterned after the general organization of other Graduate Schools of Business, emphasis is not only on instruction but also on research. To stay abreast to current trend, each professor will do research for one year.

Although the program is similar to other Graduate Schools of Business, it remains a unique offering in the United States, stressing Agribusiness.

## **Agribusiness: Graduate Studies In Business Administration**

# BASKETBALL:

## MEET COACH DICK EDWARDS

by Ron Reinr  
Sports Information Director

Dick Edwards, highly successful high school coach with a phenomenal win-loss record, has been appointed head basketball mentor to succeed Van Sweet at the University of the Pacific.

The youthful Edwards, only 32, has won four league championships and nine tournament titles in only six years of prep tutoring. Including one season as Frosh coach at Pomona College his overall career record is a very impressive 143-30.

This season he led El Camino High of Sacramento to a 22-2 season, a Capitol Valley Title, and Camellia City Tournament championship. The five-foot, ten-inch native of Palmyra, Missouri, leaves a 16-game winning streak at El Camino and a three-year mark of 64-9. Previously he coached at Yreka High School and compiled a three-year record of 70-12.

### Leaves a Winning Team

At El Camino Edwards coached Bob Krulish, Northern California High School Player-Of-The-Year. Of Krulish, Edwards says he is one of the finest prep players he has ever seen and is a "complete" basketball player. As for a future education, "I will let him decide, but I will certainly try to induce him to attend UOP," Edwards said.

On taking the Pacific coaching reins he commented, "I am very pleased to be associated with the University of the Pacific. I am excited about the job. The basketball situation has a great deal of potential improvement and I hope to contribute to a winning team for the fans of the Stockton area. I think there are some fine players here, but I will make every effort to attract outstanding student-athletes."

Having played only one year of college basketball, at Culver-Stockton College in Canton, Missouri, he re-

marked, "I played one year and didn't letter. But I don't think a great player necessarily makes a great coach." Edwards graduated from Culver-Stockton in 1952, then served four years in the Air Force. He received a masters' degree at Claremont College in 1957, then went to Yreka. He is married and the father of two boys, ages 4 and 3.

On improving upon Pacific's 0-12 record of the past West Coast Athletic Conference season he said, "I think we can compete in the WCAC. Defense will have to be improved for us to win next season—this team can score—there are some good shooters here."

### Fundamentals Stressed

Edwards says he places great stress on fundamentals, explaining, "a sound ball player makes for a sound team. Basketball is a game of conditioned reflexes, attained and mastered only by repetition. Response is essential and that is gained by repeating."

He further explained he believed in the fast break offense but not the "firehouse" brand. "We'll look for it, but if it isn't there we'll use a set pattern."

Edwards has never experienced a losing season, with only a 9-9 mark at Pomona in 1957 his poorest. Best was 30-1 at Yreka. A member of that team was Bill Wilson, the Tigers' leading scorer this season. Other Edwards products are Gary Gresham of San Jose State and Robby Olsen of California.

Van Sweet departs after eleven seasons. Under his tutelage Pacific moved into NCAA major competition, the tough West Coast Athletic Conference, and inter-sectional play. Edwards inherits a veteran team in that the first two squads of this past season will return for the 1963-64 campaign.

## MORE HONORS FOR AMOS ALONZO STAGG

Amos Alonzo Stagg, college sports' Grand Old Man, will be the honorary referee for the first National Collegiate Athletic Association college division track and field meet. The event will be held June 7 and 8 at the University of Chicago's Stagg Field.

Stagg, University of Chicago athletic director from 1892 to 1933, directed the first NCAA track championship for major schools at Stagg Field in 1921.

The Amos Alonzo Stagg Foundation has been "swamped" by requests for the gold physical fitness medal it is sending to all persons who have completed a 50-mile hike in 20 hours or less. Requests have been received from all over the world, including South America, Germany, Europe and Canada.

### Pictorial Biography Available

A 160-page pictorial biography of Amos Alonzo Stagg, who began coaching in 1892 and was still an "advisory coach" at Stockton College three years ago, is available in book stores now.

*The Unreconstructed Amateur* was written by Bob Considine in tribute to the 100-year-old personality. Over 150 photographs cover 100 years of college sports and the career of the man who created modern amateur athletics.

## THE GOLDEN TIGERS TRIBUTE TO MRS. AMOS ALONZO STAGG

AS GIVEN BY HUGH McWILLIAMS '40  
FOOTBALL CAPTAIN, OCTOBER 21, 1939  
(Now assistant coach at Annapolis)

".... Have you ever been 'warming up' on a Monday afternoon, running a couple of laps, 'ironing out' the game bumps, when you are stopped by an interested older lady who asks you, 'How does it feel?' Now that is a unique situation, and one that we have here at the College of the Pacific—it's the closest thing to playing football in your own back yard, then going up to mother for the healing ointment after it's all over .....

"It was not until we came to Pacific and played football surrounded by this wholesome atmosphere that we fully realized the possibility of developing into better men through the game of football ....

"We believe, Mrs. Stagg, that it is that certain atmosphere which your presence creates about the practice field that becomes a part of the way in which we play and interpret this game of football .....

## A ONE-MAN TEAM

March 29, 1963

Dear Sirs:

I am planning to go to the University of the Pacific. I am making a B average in school.

Will you please send me information on your university and your ratings with other colleges. Send me other information you can.

I am very good in football. I'm called a one-man team in football.

If my grades hold out I'm pretty sure I will go to the University of the Pacific.

Yours truly,  
A Sixth Grade Student  
Modesto, Calif.

## Susquehanna Alumni Award

Amos Alonzo Stagg, nearing his 101st birthday, was presented the Susquehanna University Alumni Award early this month by Robert N. Troutman, president of the California alumni association. Stagg coached at the Pennsylvania institution from 1947 to 1952.

Presentation of the award and a special Susquehanna jacket was made at the Hillhaven Convalescent Hospital.

## 25-Year Reunion

FRANCES ABERLE MOORE and her husband, Casey, are owners of River Bend Farms in Lodi. Their children are Jeff, 14, and twins Jean and Jerry, 11.

ELIZABETH McDUGALL PETRIE is making her home in Shafter where her husband, Thomas, is assistant manager of the Bank of America. They have a 10-year-old daughter, Suzanne Marie.

ERMA B. REESE of Acampo has retired from teaching.

IRVA RICKSON RAGETH and her husband, ALFRED '34, operate the Rageth Music Store in Stockton.

DOROTHY REELHORN is an auditor for the State Board of Equalization in Sacramento.

Mr. and Mrs. Douglas Smith '52 of Concord are the parents of a son, David, born March 25.

A new passenger on the Corson Express is Thomas James, carrying a weight of 6 pounds, 5 ounces. The littlest boy and his brother, Peter, are the sons of John Corson '57 and his wife, Sylvia.

Mr. and Mrs. Haven Paul Courtney '51 take pleasure in announcing the birth of a daughter, Lisa Agnes, on March 5. The Courtneys make their home on Tenaya Drive in Merced.

## Donald Duns Directs Institute

Donald F. Duns '58, assistant professor of speech and inter-American studies at Pacific, is director of a new Speech Arts Institute for high school students which is being offered this summer at the university. The five-week program will offer courses to enable high school students to earn college credit applicable toward graduate requirements.

Duns, a top debater during his undergraduate years, is well qualified to supervise the special programs in the areas of debate, interpretation, radio-TV, and public speaking which will be included in the Institute program June 17 through July 19. Intensive practical training workshops in these areas will be conducted, utilizing the campus facilities of KCVN AM and FM and modern commercial quality television equipment.

The Pacific grad is married to another Pacificite, Carol Morley '58. Since graduation, Duns has earned his master's and Ph.D. degrees from Northwestern University.

# Pacific Associates Report

Lesley R. Jackson (seated) of San Francisco presents a gift of \$250,000 to the University of the Pacific. Taking part in the happy occasion are (left to right) Edwin J. Harris, director of development at Pacific's recently-acquired College of Physicians and Surgeons; Paul E. Atkins, attorney; and Dr. John Tocchini, dean of the School of Dentistry.

## PACIFIC RECEIVES \$250,000 GIFT

A San Francisco businessman has donated \$250,000 to the University of the Pacific, to be divided evenly between the College of Physicians and Surgeons and Elbert Covell College.

Lesley R. Jackson, who has operated his "homeware" store since World War I, said he gave the money because he has long admired University of the Pacific's "high moral and educational standards"—even though he attended the University of California.

Jackson's gift will be used to finance construction of a pedodontic clinic for children—to be called Jackson Children's Clinic—in the new \$5.8 million dental building to be occupied by CPS in the Presbyterian Medical Center.

The clinic, as planned, will be able to care for 15 children at one sitting, and will have its own x-ray and dental appliance laboratories.

A dormitory at the Spanish-language cluster college will be named Jackson Hall in recognition of the other \$125,000. Jackson hailed Covell College as a "grass roots" approach to solving the "Latin American problem."

## CONSTRUCTION TO BEGIN ON RESIDENCE HALL

Construction will begin soon on a residence hall and recreation facilities to complete the Covell College campus.

The residence hall, designed to accommodate 100 students, will be erected at the northeast corner of the Covell-Raymond College quadrangle. The two-story college union building to provide recreation facilities for 250 students, will be constructed at the easterly wing of the complex of buildings.

The two buildings are being financed by a \$500,000 federal college housing loan. The dormitory will be completed in September and the recreation center two months later.

## Parents Day . . . May 4

As his last official act as chairman of Pacific Parents, Edward Keller of Martinez will preside over Spring Parents Day Saturday, May 4, on the University campus.

Registration on the lawn north of Anderson Y will be between the hours of 10 a.m. and 12. Following a sack lunch, parents will be guests of the University of the Pacific band at its annual home concert, beginning at 2 p.m. in the Conservatory Auditorium. Election of officers and the executive committee for 1963-64 will be conducted.

Parents are invited to attend the annual Strawberry Breakfast on Sunday, sponsored by Anderson Y.

## EASTER AT YOSEMITE

The 22-voice University of the Pacific A Cappella Choir was featured for the twenty-fifth consecutive year at Easter Sunrise Services at Yosemite National Park.

The famous choral group performed for Good Friday services in Mariposa before continuing their trip for the Sunday appearance at Mirror Lake. The Pacific Choir, under the direction of Dr. J. Russell Bodley, was the first to sing before a mass congregation of all the Mariposa churches.
