PACIFIC REVIEW

Vol. 11—No. 7

May, 1977

Five Years Of Growth

Although many people think of the South Campus in terms of campus improvements in recent years at University of the Pacific, considerable changes have taken place throughout the university in the last five years.

A brief mention of some of these follows:

1972—The Olympic-size Chris Kjeldsen Memorial Swimming Pool is dedicated.

—A major addition of an administrative offices and classroom building is completed at McGeorge School of Law, along with a three-story apartment complex of 36 units.

1973—The Pacific Club at Pacific Memorial Stadium is completed along the east rim of the facility to give the university a new site for conferences, meetings and other events.

—The Center For Legal Advocacy, which includes the Courtroom of the Future, is completed at McGeorge.

—A community clinic, built through financial support from the School of Dentistry alumni association, is completed in the Union City area of Alameda County.

1974—The \$3.2 million University Center is completed to give UOP

University Center

increased student housing and provide a home for a variety of student service operations.

—A new recreation area north of the Calaveras River is turfed to provide a location for numerous intramural sports programs.

—A new laboratory and lounge building is completed at the School of Engineering.

—A major two-story expansion of the library is completed at

[Continued on Page Three]

Progress Continues On Renovation of UOP's South Campus

From temporary buildings to rolling hills of lawn, University of the Pacific is transforming the South Campus to become an integral part of the university.

Since purchasing the 42-acre site from the Stockton Unified School District in 1974, UOP has been involved in renovation and clearing projects that are continuing to this day and expected to be in progress for the next several years.

In excess of \$1 million has been spent by the university so far in remodeling and other construction work on the site of the former Delta College. This is in addition to the \$4.5 million price tag Pacific paid when purchasing the property three years ago.

Money received in the sale of bonds by the state and by the sale of university-owned land in north Stockton financed the purchase, which UOP officials consider a bargain. At the time of purchase it

was calculated that the new construction costs for similar permanent buildings on the site would approach \$10 million.

"We thought at the time of the purchase that this was a great opportunity to enhance our physical facilities," said Dr. Stanley E. McCaffrey, UOP president, "and we certainly feel that all the funds spent on the South Campus have been a wise investment in the future of Pacific."

During the past 35 months several projects have been completed on the South Campus, which is being used extensively by such academic fields as education, physics, mathematics and drama.

Decisions on use of the South Campus are made by the University Long Range Planning and Budget Committee. McCaffrey created this committee of UOP students, faculty and administrators to help guide in the development of the South Campus and other future planning for the university.

A total of 30 old "temporary" buildings have been demolished, and many of these were in a strip of land along Kensington Way in the area that was the front of the former junior college campus. This four-acre section is now gently rolling hills of lawn traversed by a curved sidewalk.

Open lawn area now surrounds the few buildings on the South Campus.

Several trees dot the landscape to help create a greenbelt effect.

At both ends of the lawn area are multiple story buildings that are key segments of the South Campus development plan.

At one end, the former library building at Kensington and Stadium has been extensively remodeled throughout the interior to house the UOP School of Education and Pacific Center For Western Studies. This was the first of the renovation projects, costing some \$450,000 and being completed in time for the Fall semester two years ago.

The two-story building contains some 29,000 square feet, with 5,000 of

this total occupied by the Pacific Center and the rest to the School of Education.

Included in the education section is television videotape equipment in such areas as a reading clinic with three interview rooms, psychological testing clinic with four interview rooms and a learning resource center.

The building has five classrooms, 24 faculty offices, a multi-purpose instructional room, several conference facilities, a kitchen, faculty lounge and other facilities.

At the other end of the lawn area, at Kensington and Mendocino, is the two-story main classroom building.

[Continued on Page Three]

Long Theatre

Briefly Noted

Marathon '77

KUOP-FM, the public radio station at UOP raised a record total of \$10,056 in its March week-long fund raising drive. Mike Milhaupt, director of promotion and development, said the money raised in Marathon '77 compares to \$6,500 raised in the same event last year. During the week of the drive programming on the station was interrupted for pledge breaks to attract new members and maintain current members. The funds pledged by community residents and businesses during the drive help the station maintain its level of programming and supplement funds received from the Corporation for Public Broadcasting and UOP. Although the goal for the Marathon was \$12,000, Milhaupt said the station was "very gratified" at the amount that was raised, "especially when it was so much higher than last year."

Summer Sessions

A trip to Africa to study the cities on the west coast, the ancestral home of many black Americans, is one of the special features of the 52nd summer session at UOP. The summer program includes a short intersession from May 23 to June 10, and two five-week sessions, the first from June 13 to July 15 and the second from July 18 to August 19. Persons interested in any of these sessions can register in advance by mail by contacting the Registrar's Office, University of the Pacific, Stockton, CA 95211. Mark Ealey, chairman of the Black Studies Department, is coordinating the July 30 to August 21 trip to Africa that will involve visits to Liberia, Ivory Coast, Ghana and Nigeria. Special features of the program this year will include a course on personal finance which will enable individuals to develop a lifetime financial program, a wild flower photography course, a criminology course, a drama course on producing a children's play, a course examining the British crisis and a workshop titled, "Race, Culture and Human Dignity: Ethnic Purity, Cultural Pluralism, and Melting Pots." There will also be workshops and training programs for teachers, the 30th annual Folk Dance Camp, the 28th annual summer drama theatre in Columbia State Park and the 32nd annual Pacific Music Camp. For more information contact Dr. Robert Anderson, director of the summer session, at the UOP Office of Academic Vice President.

World Famous Violinist

Mischakoff [left] and Fetsch

World famous violinist Mischa Mischakoff and Dr. Wolfgang Fetsch, pianist and chairman of the Applied Music Department at UOP's Conservatory of Music, performed an on-campus benefit concert on March 29. The program included Beethoven's Sonata in F Major, Opus 24; Brahms's Sonata in D Minor, Opus 108; and the Franck Sonata in A Major. Mischakoff spent much of his early life in Russia, but he became upset under Soviet rule and made a dramatic escape from the country with his friend, cellist Gregor Piatagorsky. The pair waded across a river into Poland, holding their instruments above their heads, and then had to perform in a police fortress to convince the authorities they were musicians and not spies. Mischakoff is a former concertmaster of symphonies in Moscow, Warsaw, New York, Philadelphia, Chicago and Detroit. He also was a concertmaster for Arturo Toscanini for fifteen years. His daughter, Anne, is an instructor of viola and music history at the UOP Conservatory and is a former member of the Detroit Symphony Orchestra. Donations received will be applied to scholarships for students of string instruments at UOP.

'The Fantasticks'

"The Fantasticks," the longest running musical off Broadway in New York City, was presented as a dinner theatre offering at UOP this past month. The University Center Programs Council sponsored the musical comedy about two young lovers. UOP graduate Gerard Babb directed the eight-member cast of university community members in the show. Performing were Kurt Reinhardt, Jim Meade, Susie Gage, Phil Sciaroni, Jack Herrera, Mark McQuery, Greg Cohen and Gary Collier. "The Fantasticks" book and lyrics are by Tom Jones and the music is by Harvey Schmidt.

Susie Gage and Kurt Reinhardt sing while Gary Collier looks on.

Reading Room Dedication

[LtoR]: Mrs. Shebl, son James [of the Center staff], McCaffrey and Dr. Shebl.

A reading room at the Pacific Center For Western Studies at UOP has been dedicated in the name of Dr. and Mrs. Joseph J. Shebl of Salinas. A plaque honoring the couple was unveiled at the 30th Annual California History Institute at UOP. It recognizes their "distinguished contributions to the Center's study and interpretation of the American West." Shebl has given the Pacific Center two, large historical collections in recent years. In 1974 he presented the Center with a periodical collection of more than 1,200 volumes in deluxe library bindings. This involved virtually every major journal and quarterly, from volume one to the present, of Western Americana literature. Last year Shebl presented the Center with 11,000 rare and first editions of Western Americana that have been sought after by collectors and universities throughout the United States. The material is primarily historical, but it does include some literature concerning such names as Mark Twain, John Steinbeck, John Muir, Jack London and Bret Harte. Shebl, who has been a Western history buff for 30 years, also gave what Center officials said are two priceless Bureau of American Ethnology collections and 1,600 items published by the various Coralls of the Westerners, a worldwide organization of historians.

PACIFIC REVIEW—Volume 11, No. 7, May, 1977. Published by the University of the Pacific, 3601 Pacific Ave., Stockton, CA 95211 eight times a year; October through June, except January. Editor: Ms. Chris May. Second Class Postage Paid at Stockton, California.

Old Time Radio Shows

Hickinbotham Brothers of Stockton has agreed to underwrite a series of old time radio programs on KUOP-FM, the public radio station at UOP. The agreement will be for one year and involve such shows as The Shadow, Inner Sanctum and Escape. The series is aired at 7:30 p.m. each Thursday on KUOP, which is located at 91.3 on the FM dial. "The financial support provided by underwriters pays for the local production costs of the program," explained Robert H. Greenspan, station manager. "Through the support of underwriters like Hickinbotham Brothers, Stockton Savings and Loan, and Union Safe Deposit Bank, KUOP can continue to provide a wide variety of commercial-free radio programming to the Central Valley," Greenspan said. KUOP, the only public radio station in Central California, is owned and operated by UOP.

Progress on South Campus

[Continued from Page One]

This structure is the largest of the nine buildings retained, as it totals some 72,000 square feet. Currently the Mathematics Department is using a portion of the first floor for a temporary home, according to campus architect Leonard Abbott.

The rest of the structure is vacant, he added, but this will change soon. "Our next project is to remodel the second floor of this building for use by the Biology Department when the Fall semester begins," Abbott said.

In addition to these projects, other remodeling and renovation work on the South Campus includes:

- Converting the former Agriculture Building for use by the Drama Department, effective this semester. The \$150,000 project involved adapting the single story building for use as a studio theatre that seats some 80 people, two classrooms, various drama faculty offices, a seminar and conference room, costume lab, dressing rooms, general shop area, storage section for sets and props, and ticket office.

- Spending some \$50,000 to renovate the former Speech Arts Auditorium. This project involved new upholstery for all the seats, repainting much of the building, new floor covering and carpeting in some areas and changes in the lighting. The building was dedicated as the Long Theatre last October in honor of the Thomas J. Long family of Walnut Creek. Long gave the university a major gift to help finance the renovation of the theatre, Drama building and other UOP projects.

- Changing the former Faraday Hall building to house the Physics Department. This project included rearranging office space and adding air conditioning to the building.

- Converting the former metal shop and auto shop buildings to centralize all maintenance

The Drama Studio Theatre seats some 80 people.

operations, purchasing and auxiliary services for the university. An upcoming project in this area, Abbott said, will be development of a corporation yard for storage of UOP supplies and equipment in an area surrounding the maintenance buildings.

- Repairing and improving, on a minor scale, the old gymnasium and adjacent locker rooms. These facilities are receiving limited use by the Athletic Department.

- Purchasing a large classroom building that is being used as two lecture rooms and four seminar rooms. This modular structure, termed the Z Building, was purchased from Delta College in a separate transaction from the original sale of the property.

According to Abbott, the only vacant space still to be allocated on the South Campus involves the first floor and basement of the main classroom building, which is being considered for expanded science facilities, and the carpentry and print shop building. The latter structure contains close to 18,000 square feet and is a single-story building.

The university architect said work also will start soon on the second phase of the landscaping program for the South Campus. Included will be turfing several dirt areas on the site

and developing walkways to help connect the South Campus with the rest of the university.

In addition, the South Campus affords expanded parking areas for the total campus community and greatly enlarged play areas for intramural sports, physical education and general open space surrounding the campus.

And finally, the transformation of the South Campus has enabled a transformation on both the main and north campuses as well. With the establishment of a new home for the School of Education, the old Owen Hall has become available, after renovation, to serve the need for additional music practice facilities; the removal of the Drama and Physics Departments to the South Campus has restored much needed space in the School of Pharmacy; the university library has benefitted from the added space provided by the vacated Pacific Center for Western Studies, and with the relocation of the maintenance department to the south campus, the university will be able to remove some of the temporary quonset huts that previously housed maintenance.

Thus, the South Campus continued to have a major impact on virtually all segments of the Stockton campus.

Growth

[Continued from Page One]

McGeorge, along with opening the Community Legal Services Center, Institute For Administrative Justice and remodeling a building to headquarter the Owens Research Project and house the Moot Court Board.

- The Raney Recreation Area adjacent to the campus gymnasium is completed to provide additional basketball and volleyball courts.

1975—Computer operations at the university are moved to a new and expanded location to occupy most of the building that formerly

Computer Center

housed the campus bookstore and End Zone.

- A major renovation project throughout the dormitories on the Stockton campus is started. This involves such things as new carpeting, furniture, painting and construction of covered bicycle racks for most of the quad dorms. This project involved the expenditure of some \$200,000 during a three-year period.

- Renovation and expansion of the main clinic at the School of Dentistry, financed by a \$700,000 grant from The James Irvine Foundation, is completed.

- The dance studio upstairs at the gymnasium is relocated in Anderson Hall and the upstairs area is remodeled for use as faculty offices for physical education department personnel.

- A new faculty office and classroom building is completed at McGeorge, along with a recreation center at the law school.

1976—Owen Hall is remodeled for use by the Conservatory of Music as practice rooms for its students and faculty offices.

- The Placement Center is moved from the former Alumni Office across Pacific Avenue to a remodeled building that formerly housed Anderson Y.

- A student center is completed at McGeorge that provides housing for students and a variety of student services.

- Extensive remodeling of the School of Dentistry building is completed. This involves such areas as faculty and administrative offices, conference rooms, a learning center, audio visual departments and bookstore.

The Pacific Center for Western Studies is housed within the School of Education building.

UOP Research Project Results in CB Device

A University of the Pacific research project "to find a better way to transmit speech" has resulted in the invention of a device that should be boom for CB radio sales.

Dr. Richard W. Harris, an associate professor of electrical engineering, and J. Fred Cleveland, a 1975 UOP School of Engineering graduate, have filed for a patent on their narrow band voice modulator system.

They have developed a device that can potentially double the number of CB, or citizens band, radio channels because it allows human speech to be transmitted from one point to another using one-half the normal band width.

Harris, whose research specialty is communications, said the device grew out of a research project by the two to determine how the speech sounds through various audio filters. "We wanted to find a better way to transmit speech from one point to another," he explained, "because current CB speech transmission uses too much band width."

Their invention involves two devices, each about the size of a pocket calculator, that are connected to the transmitting and receiving ends of CB radios.

"A problem today with CB radios is that the crowding of voices on the 40

channels available makes it hard sometimes to understand the person you are talking with," said Cleveland. "We think our narrow band voice modulator system can correct this situation by giving CB users greater selection of channels in the band-width available."

The two engineers said the device also has possible uses with telephone communications, because it can potentially double the voice carrying capacity of the phone system, and for business—using tape recorded messages, because it has the potential to allow recorded messages to be stored on one-half the normal amount of tape.

Harris said cost is another of the benefits of the device. "There are other ways of doing what we are

Fred Cleveland [foreground] and Richard Harris work with their equipment.

talking about," he explained, "but the cost for such units approach \$7,000. We figure our system can be sold for less than \$100."

The two engineers hope to start a part-time business in the near future

to sell their electronic device to manufacturers of CB radios and, perhaps, telephone companies. The invention, which is only applicable to human speech, will not be sold directly to the public they said.

Names in the News

Randy Breschini, a junior majoring in business administration, has been elected president of the Associated Students at University of the Pacific (ASUOP).

Breschini, who is from King City, has served as an ASUOP Senator and on several campus committees. He is a 1974 graduate of King City High School, where he also served as student body president.

Elected to serve with Breschini were Kevin Sullivan, a business administration major from San Francisco, as executive vice president, and Keiji Doizaki, a pharmacy school student from Rio Oso, as financial vice president.

All the new officers assumed their one-year positions in March.

Dr. Stanley E. McCaffrey, president of UOP has been elected vice president of the Western College Association.

McCaffrey, formerly a member of the Association's executive committee, was voted to the two-year term, succeeding Sister Sally Furay, provost of the University of San Diego, who was elected to the presidency of the organization.

McCaffrey, who has served as president of UOP since 1971, is also president of the Association of Independent California Colleges and Universities.

The Western College Association is comprised of approximately 150 colleges and universities in 13 Western states. The main purposes of the organization are the accreditation of member institutions and the improvement of postsecondary education in the West.

Herbert K. Yee, UOP Board of Regents' member and a 1948 graduate of UOP's School of Dentistry, was recently elected to the Board of Regents of the International College of Dentists. As the California Regent,

to serve for six years, he will be responsible for all activities of the college in the state.

Yee was past president of the State Board of Dental Examiners and is currently a member of the examining committee. He has also held offices in several dental organizations and is past president of the UOP School of Dentistry Alumni Association.

Larry Walker, professor and chairman of art, has been elected to serve as vice chairperson of the Stockton Arts Commission. Walker also was appointed to the Board of Directors of the National Council of Art Administrators. The council, composed of art department chairmen, deans and directors of art schools throughout the country, provides effective art data of national scope for administrators and faculty of universities, colleges and professional schools.

Sandra Anselmo, assistant professor in the School of Education, has had her article, "Discipline in Day Care Centers," published in the Fall, 1976 issue of "Child Care Quarterly."

J. Marc Jantzen, dean emeritus and professor of education in the School of Education, is listed in the third edition of "Who's Who in the World." Inclusion in this publication is limited to individuals who have demonstrated outstanding achievement in their own field of endeavor and who have contributed significantly to the betterment of contemporary society.

Richard Tenaza, assistant professor of biological sciences, has had his paper published in "Nature," Vol. 263. It is titled, "Monogamy and Duetting in an Old World Monkey."

John C. Phillips, assistant professor of sociology, has recently published the article, "Toward an Explanation of Racial Variations in Top-Level Sports Participation," in the current issue of "International Review of Sport Sociology."

Neil Lark, professor of physics, is the author of the cover article of the May/June issue of "Mercury: The Journal of the Astronomical Society of the Pacific." The topic, "Astronomy in Science Fiction," was developed in his winter term class.

Professor Travels Abroad To Study Communications

Dr. Halvor P. Hansen, a communication arts professor at UOP, has returned from a trip to several foreign countries to learn more about his specialty—intercultural communications.

Hansen, a UOP faculty member since 1959, spent the month of January visiting with officials in Saudi Arabia, Egypt, Greece, Italy, France and Great Britain.

"As an intercultural experience this trip was fantastic," said Hansen, who arranged the visit after being invited by the Department of Justice to spend a week in Riyadh, the capitol

of Saudi Arabia, to learn more about the language, customs and culture of that Middle East country.

Hansen, who has been teaching linguistics for 25 years, talked with government, religious and education leaders in Riyadh. The UOP faculty member, who is a bishop in the Mormon church, said the trip was also enriching from a religious standpoint. He was able to view the Islamic religion firsthand, visit Luxor in the heart of ancient Egypt and also see three of the largest Christian churches in the world in Rome, London and Paris.

Four Receive Chris Kjeldsen Scholarships

Four senior athletes were recipients this year of the Chris Kjeldsen Scholarship Award.

The scholarships, established in honor of Chris Kjeldsen who was both a student and coach at UOP, are awarded annually to students who exhibit scholastic competency, high moral character and financial need. The students must also show leadership and achievement in athletics.

Those students who received the \$900 scholarships include: Craig Schwartz, a swimmer from Garden Grove; Michael Cronin, a baseball player from Pinole; Gordon Smith, a swimmer and water polo player from Santa Clara, and Don Collier, a football player from Stockton.

Chris Kjeldsen, for whom UOP's olympic-sized swimming pool is named after, was a Pacific athlete, having participated in football, basketball and track. Following graduation, he remained at UOP, organizing the swimming program, and serving as assistant football coach, tennis coach, and as the freshman, junior varsity and varsity basketball coach at various stages in his career.

Lehn Named Dean of Music Conservatory

Ira C. Lehn, acting dean of the UOP Conservatory of Music since last August and a UOP faculty member since 1968, has been named dean of the Conservatory.

Lehn was selected for the position after a nationwide search involving some 90 candidates to succeed Dr. Preston Stedman, who resigned to assume another position.

Dr. Stanley E. McCaffrey, UOP president who announced the appointment with Dr. Clifford J. Hand, academic vice president, said, "I am very enthused about the appointment of Ira Lehn to become dean and feel he will provide excellent leadership for this fine school of music to become even more distinguished."

The announcement of Lehn's appointment also included the promotion of Dr. David S. Goedecke from administrative assistant to the dean to associate dean at the Conservatory.

Goedecke, a UOP faculty member since 1968, had served in the administrative assistance position since 1974 and is known in the community for his work with Pacific Music Camp and the UOP band program.

Lehn came to UOP in 1968 after nine years on the faculty of the

University of California at Santa Barbara. He also has taught at Texas Christian University, Tulsa University and Wilmington (Ohio) College.

The professor of violoncello is a former assistant principal cellist with the Rochester Philharmonic Orchestra and a former member of the Alard Quartet. He has appeared as a soloist with orchestras in Philadelphia, Monterey, Tulsa, Santa Barbara and Ventura.

Lehn has performed with the Sacramento and Stockton symphonies. At UOP he was a member of the former Gabrioni Trio, and he is a member of the Sierra String Quartet, a recently formed Conservatory group. The musician holds Bachelor of

Music and Master of Music degrees from Eastman School of Music. He has also studied under Gabor Rejto and at the Julliard School in New York.

"Ira Lehn and Dave Goedecke will be a splendid team in administering the Conservatory programs," said McCaffrey. "Together they will provide strong leadership, both internally and externally, for the Conservatory."

Goedecke received bachelor's and master's degrees from Washington State University and the Doctor of Music Arts degree from the University of Oregon. He has served on several committees of the College Band Directors National Association and is

Ira C. Lehn

currently president of the Stockton Opera Association.

The appointment of Lehn and Goedecke are effective immediately and were made upon recommendation of a special committee that included Conservatory faculty members and students.

Educators to Develop Preschool Program

There needs to be a better way to use blocks, beads and pegboards in preschool learning if deficiencies that arise later in elementary school youngsters are to be corrected, according to two University of the Pacific educators.

Dr. Hugh J. McBride, coordinator of special education, and Dr. Robert D. Morrow, an assistant professor in early childhood education, are

concerned with the lack of assessment of the special needs of children entering our educational system at the preschool and kindergarten levels.

They recently received a \$7,500 one-year grant from the McDaniel Educational Opportunity Fund to develop a preschool assessment and instructional program. The fund is endowed by Neil McDaniel of

Oakland, the former owner of Valley Tow-Rite in Lodi.

"We see many children that appear to be bright-eyed and bushy-tailed at the preschool level," McBride said, "but by the time they reach third grade their test scores are terrible. We want to try and remedy this situation."

The UOP educator, who has taught preschoolers, feels the problem is that the activity-oriented nature of preschool programs leaves the learning deficits of the youngsters undetected.

"The philosophy of preschool involves activity and developmentally-oriented programs using things like pegboards, beads and blocks," Morrow said. "Our approach is to still use these items, but to expand their use to give the preschool teachers a better understanding of the relationship between what they are doing and later skill development problems in youngsters."

As an example of the current problem, right now in many preschool programs throughout the country, a teacher is holding up a card with a picture of a brush. The teacher asks what it is and four little children eagerly respond with the word "brush." But one is silent and another says "ba."

In another classroom, a little child is asked by his teacher to give him two blocks. He hands the teacher one block and the teacher responds by saying, "How many blocks did you give me?" The child replies "two."

McBride, Morrow and John Lofgren, a doctoral student working on the project, want to reach the children in these situations who don't know the proper answer. "If we can eliminate these skill deficits at the preschool level, I am convinced we can also eliminate the low test scores that appear later on," McBride said.

The UOP educators think the program will take three years to develop, and they are hopeful of securing funding for the work when the McDaniel funds end.

Professor Studies Alcoholism and Stress

The drinking of alcohol to reduce stress is being studied at UOP in a research project involving laboratory rats.

Dr. Roseann Hannon, an associate professor of Psychology, has received a \$17,000 grant from the National Institute on Alcohol Abuse and

Alcoholism for the two-year program.

"We want to compare rats housed in a complex environment where normal rat behavior is possible—which means they will multiply and soon become crowded—with rats housed by themselves," she explained. "In a crowded situation the

stress should rise and we want to see if these rats drink more."

The rats in both situations are given choices of drinking water, water with saccharin, or saccharin and alcohol. In a previous 36-day study she directed, the crowded rats went for the alcohol solution (the saccharin is used to mask the taste of the alcohol), but this study will be over a longer period of time—six months.

Dr. Hannon noted that the longer duration of the study will give researchers a chance to look at different generations of rats, "and this is important because people wonder if alcohol has any genetic component or is entirely determined by the environment."

For her experiments, the UOP psychologist has a group of 12 rats housed in individual cages and a second group in a large cage. The latter group started with 16 rats but has already increased considerably through reproduction.

"In other studies the rats failed to become physically addicted, but most of these studies were for shorter durations than ours," she said. "We want to see if there is solid evidence that crowding can lead to alcoholism in the rats."

So far there have been no signs of addiction, she added, but the study only started last month "and things may change considerably before the end."

Dr. Hannon, a UOP faculty member since 1970, has been interested in alcoholism studies for several years.

Roseann Hannon works with rats in a laboratory setting.

Tiger Tracks

'43

Pauline Davis Hanson, COP, has been appointed a judge in Fresno County Superior Court. She is the first woman to hold a position as Superior Court judge in Fresno County.

'44

John D. Stephens, COP, will retire this month from his position as vice president and senior trust officer of Bank of America in San Francisco. He is completing 25 years of service with the bank.

'56

Cesare F. Ciatti, COP, has been named marketing manager for sheet, tin, and tubular products for U.S. Steel's Southern Division in Fairfield, Alabama.

'63

Mark Smith, Conservatory of Music, presented his fifth annual New Year's Eve recital at Old First Church in San Francisco. He is organist and musical director for the church, and previously served as organist-director at San Francisco's First Unitarian Church.

'65

Roger Francis, COP, is presently employed as Dean of Students at Sonora High School. He and his wife, Kathy (Wiley), COP '65, have two daughters and a son.

'66

Kathleen (Anderson), COP, and her husband James H. Cliborn announce the arrival of their first child, a son, Kevin James, born on November 1, 1976.

'67

Joe Erwin, COP, and Terry Maple, COP '68,

Alumni Events

May 20

There will be a commemorative chapel service for UOP seniors, their parents and members of the Half-Century Club on Friday, May 20 at 4:30 p.m.

The service will be in celebration of the 35th anniversary of the dedication of Morris Chapel. The Reverend John Carson, whose father, Jim, is a 1927 graduate of UOP and member of the Half-Century Club, will officiate.

Mark your calendar now and plan on attending this special service.

July 30

A UOP Social Gathering is scheduled for this Summer. On Saturday, July 30, all alumni from the classes of the 1950s are invited to a dinner buffet and dance at the Galleria in San Francisco.

Cost for the event, which will last from 8 p.m. until 1 a.m., is \$30 a couple.

Members of the committee organizing the gathering include: Shirley Nunn, Sylvia Connelly, Nancy Spiekerman, Virginia Tafjen and Bob Giardina.

For more information, persons should contact Shirley Nunn, Rt. 1, Box 200, Brentwood, CA 94513.

Righter Birthday Celebration

A group of Pacific athletes and their wives gathered recently at Rio del Mar, Aptos, to celebrate the 80th birthday of C. E. "Swede" Righter.

Coach Righter was head football, basketball and track coach at UOP from 1921 to 1933.

Among those present were Paul Easterbrook '24, Jim Corson '27, Marlitt Stark '27, By Prouty '27, Al Jones '28, Ev. Stark '28, Ev. Ellis '29, Pop Stoltz '29, Cy Owen '29, Robin Dunn '30, Les Burwell '31, Glenn Odale '33, Carl Brown '35, Jimmie Thompson '35, and GEORGE Truckell '35.

have participated in the planning and establishment of a new scientific society, the American Society of Primatologists. Joe and Terry, who both received Ph.D. degrees in comparative psychology from U.C. Davis, are serving on the initial board of directors of the Society. Joe is a research associate at University of Washington, while Terry is an assistant professor at Emory University in Atlanta, Georgia.

Douglas E. Hamilton, School of Pharmacy, and his wife, Ellen (Huddleston), School of Education '66, announce the birth of a daughter, Andrea Ellen. They have two other children, Scott, 7, and Eric, 2.

'70

Brad Bogard, COP, and his wife Karla (Carlson), COP, have announced the birth of their daughter, Brittany Janne, born on July 15, 1976 in Santa Cruz, where Brad is employed by Bogard Construction Company. They are planning a trip to England and Holland this month.

'71

John Kumik, COP, and his wife Jean are the parents of a daughter, Jaime Melissa, born January 15, 1977. John and Jean were the directors of UOP's South/West complex from 1971 through 1974, where they lived with their son, Jason. John was recently promoted to marketing manager for Certain-Teed Corporation, Southwest region. They reside in Benicia.

Cassie (Hill) Reutlinger, Conservatory of Music, and her husband Stephen announce the birth of their second daughter, Brenna Lynette, born on February 6, 1976.

Stanley Gibbs, COP, has been appointed assistant scientist in the Chemistry Department of the Warner-Lambert/Parke-Davis Pharmaceutical Research Division in Ann Arbor, Michigan.

Bob Secor, Conservatory of Music, is the director of Public Information for the Church of Scientology and Dianetics and is in charge of the Dianetics Campaign in the Stockton area. He is also a professional trumpet player, and has had three high school jazz band arrangements published.

'72

Jorge A. Verdi, Elbert Covell College, is working as a financial analyst for the International Group of Wells Fargo Bank in San Francisco.

Dan Fausel, School of Pharmacy, and his wife, Joy (Nelson), School of Pharmacy, announce the birth of a boy, Scott Andrew, born on March 2, 1977.

Meta (Baker) Lale, Graduate School, was among the contributors in the March issue of Instructor Magazine. Mrs. Lale wrote an article on how to make it easier for a substitute teacher to take over a class.

'73

Art Whitney, School of Pharmacy, and his wife Candy (Sanger), School of Education, are the parents of their first son, born on September 2, 1976. They live in Roseville, and Art is the owner of Rusch Park Professional Pharmacy in Citrus Heights.

Harvey Hamilton, School of Pharmacy, and his wife, Vema (Luoma), School of Pharmacy,

have purchased Westwood Pharmacy in Lassen County.

R. Doug Alsberge, COP, and his wife, Kathleen, will be moving to Fresno where Douglas will begin a surgical internship at Valley Medical Center. He is graduating in June from the University of Southern California School of Medicine.

'74

Anita Dow, COP, is currently employed by KFSN-TV, channel 30, in Fresno. She has held her present position in the engineering department for one year. She has also appeared in some local television commercials.

James Freer, COP '71, has been to Thailand twice as a Peace Corps volunteer. He has taught in their Teaching of English as a Foreign Language [TEFL] program and has helped prepare English Textbooks for use in the Thai school system. His wife, Wanla, is a Thai English teacher.

'75

Gary M. Ogle, COP, and Ellen (Arden), COP '76, were married on August 15, 1976 and are presently living in Salem, Oregon, where Gary is attending Willamette Law School.

Geoffrey L. Berman, COP, is presently employed as a field auditor for Union Bank in Los Angeles. He is living in Marina Del Rey.

'76

Dwight Jennings, School of Dentistry, opened his own office in Lone, on February 2. Luis Reyes, Elbert Covell College, is producing and directing "A View From the Bridge" for the Nosotros Theatre Company in Los Angeles. It opened February 25.

Penelope Van Liere Ford, Callison College, and Brooke Roberts, Callison College, both graduates in International Studies, have entered the American Graduate School of International Management in Glendale, Arizona.

In Memoriam

Alice Dockter, COP '50, died on January 13 in Fremont, after a lengthy illness.

Clarence Butler, COP '31, and School of Physicians and Surgeons '34, died on March 14, 1977. He was a past president of the Alumni Association and a retired Captain in the Navy Reserves, as well as a W.W. II Veteran. He was 70 years old.

We're Looking for Lost Alumni

The Alumni Office is interested in obtaining some information on the whereabouts of many missing alumni. Below is a list of these "lost alumni" from the classes of the 1950s. If you have any information about these people, the Alumni Office would appreciate hearing from you.

Included in this list are:

Julie Auld; Bill Banducci; Hal Ball; Peggy Brophy; Stan Brokoff; Don Brownfield; Ben Cahill; Todd Clark; Jim Conover; Dan Corley; Jean Crawford; Sharon Crowe; Bill Cummings; Peggy Curphy.

Emil Dattola; Bing Downing; Ed Eastberg; Sharon Eggerts; Stan Emerson; Ken Flags; Larry French; Susie Grafflin; Dutch Grosse; Reuben Guterrez; Trudy

Hagstrom; Patti Moore Haley; Daryle Haynes; Mason Hoberg; Artie Hoozanian.

Sally King; Phil and Janice Laing; Ron Lienke; Ernie Lindo; Jack Mansfield; Tom McCormick; Fred Miller; Wes Mitchell; Willie Mitchell; Pam Morey; Suzie Mulligan.

Larry Parks; Marilyn and Stan Peterson; Carole Randolph; Willie Richardson; Dee Russell; Toby Sebastian; Gene Saltznic; Ron Smith; Harry Solomon; Jerry Streeter; Lynn Swanson; Ken Swearington.

Jim Taylor; Gerry Vanoli; A. D. Williams; Jim Williams; Carol Young; Shirley (Brothers) Meyer; Bobbie Brookman; Patty and Paul Williams.

A Tribute to Ellen L. Deering, Registrar Emeritus

The following is a tribute to Ellen L. Deering, Registrar Emeritus who died in March after a brief illness. This tribute was delivered at her memorial service by Dr. Harold S. Jacoby, a retired UOP faculty member.

Few persons have served the University of the Pacific over so many years and with such devoted loyalty as did Ellen Deering, and it is only right that as we gather here tonight to honor and celebrate her life, we should remind ourselves of her contributions to the university she loved and served so faithfully.

The formal facts of this relationship are quickly stated. She came to the then College of the Pacific from Chico State College in 1926, and for 20 years served as assistant registrar, first under Professor Charles Corbin, and then under Robert E. Burns. When Dr. Burns was elevated to the Presidency of the College, she was named registrar, holding that post until her retirement in 1969. But these formal facts provide little insight into the person herself, or into what her life meant to the institution.

From her vantage point in the university organization, and from the location of her office, midway down the main floor of Knoles Hall—only it was the "Ad Building" in her years there—she was able to reach out and touch virtually everyone who had anything to do with the life of the university.

She knew the faculty and her fellow administrators, of course, but she knew hundreds, if not thousands, of students as well, both by name and by reputation. She knew—and was interested in their problems and their achievements, and she followed them as they left the campus.

Love and respect were high among the feelings we had for her, but—it must be admitted—we also had moments of exasperation as well. Ellen Deering was a stickler for the rules and regulations that governed the academic life of the university, and in her conscientious way, she had scant patience with either the students or faculty members—or even fellow administrators—who neglected or sought to evade any of them. In the words of St. Paul, she was not one "to suffer fools gladly." But her occasional impatience or brusqueness was in the service of the standards of the university she served, and everyone knew this. But she was quick to forgive and forget—and sometimes we were too.

In her selfless way, she was as demanding of herself as she was of those whose lives were affected by her work. Standard hours of work meant nothing to her, particularly in such seasons as registration and final examinations. Accuracy and promptness were qualities she expected of herself as well as of others. She took and discharged her duties and responsibilities seriously, con-

scientiously, and effectively.

But her impact on the campus was by no means limited to her official duties as Registrar. For several years she served as Housemother for the Tau Kappa Kappa sorority—now known as Delta Delta Delta. She was one of the founders of the Strawberry Breakfast, originally a project of the student YWCA, and for many years the breakfast was held on the lawn of the Tau Kappa house—now the home of the Alpha Chi Omega sorority.

Through the years her own personal financial resources made possible scholarship help for countless worthy students—a number that Ellen Deering herself probably could not have readily recalled.

Nor did her concern for the university cease with her retirement. Drawing upon her memory, experience and wisdom, she wrote extensively about persons and events in the life of the institution.

Ellen Deering was not a person who

craved recognition or sought the limelight. She was content to do her work well, and was not anxious as to who would receive the credit. She was concerned only that the university would grow in strength and excellence.

Generations of students will rise up to whom she will be only a name, but those among us who knew her and her work, will be forever appreciative of her life and her contributions.

Alumni Among Victims of Plane Collision

Dr. W. H. Langley Collis and his wife Margaret, both prominent alumni of the College of the Pacific, were among the victims of the collision which took place in late March between Pan American and KLM jumbo jets in the Canary Islands. The Collises were aboard the Pan Am aircraft, bound for La Palma where they were scheduled to board the two-year-old liner, Golden Odyssey, for a 14-day pleasure cruise of the Mediterranean.

Collis, 73, entered the College of the Pacific in 1922 when it was located in San Jose. He was a star athlete, making the all-conference teams twice as a football end, twice as a first baseman, and once as a

basketball forward. He also was captain of the basketball team in 1924.

When Pacific moved its campus to Stockton in 1924, Collis relocated as well, and graduated in 1926. He then entered Stanford University Medical School and received his medical degree in 1931. After returning to Stockton in 1933 to open his medical practice, Collis continued his relationship with Pacific by serving as the COP football team physician for 20 years.

Before retiring at the end of 1975, Collis served as a director of the San Joaquin Medical Society from 1948 to 1952, and was society president in 1949. He also was active with the Stockton Rotary Club and served as a

member of the board of trustees of Pioneer Museum and Haggin Galleries.

Mrs. Collis, the former Margaret Rayburn of Pacific Grove, graduated from College of the Pacific in 1927. She was a member of Junior Aid, the Children's Home Auxiliary, Kappa Alpha Theta alumnae and was a past president, and charter member, of the Junior Women's Group at the museum. Mrs. Collis was 72.

The couple is survived by a daughter, Nancy Stoney of San Jose; and two sons, Dr. Peter Collis of Washington, D.C. and Dr. Rayburn Collis of Pendleton, Ore.

A Collis Memorial Fund has been established at the university.

Alumnus Joins Staff in Off Season

As Carlos Brown, now a quarterback for the Green Bay Packers, contemplated off-season employment, he knew one thing for certain: he didn't want just "a job."

Brown, a 1975 UOP graduate, therefore applied for a development/public relations internship at his Alma Mater—and reported for a four-month stint in late February.

"For the first time I'm employed by an institution that I totally believe in," says Brown, who assists with the complete range of institutional advancement programs at Pacific. "In fact, I see myself as selling Pacific . . . a tremendously easy task since I'm selling a product that has taught me many invaluable lessons."

One of the things he learned, Brown says, was that those at the highest level are committed to the "personal" atmosphere of the institution. Disenchanted and depressed at the end of the 1972 football season because a leg injury sidelined Brown and relegated him from quarterback to second-string tight-end, Brown didn't even bother to attend the annual football awards dinner. "It turns out that President McCaffrey had planned to award me a special 'Certificate of Spirit,'" he says with amazement. "It's that sort of thoughtfulness, that sort of caring clear up to the head of this university, that has made me so impressed with Pacific."

Brown adds: "I don't mind at all helping, through this job, to convince those donors who help keep the university going that they are contributing to a unique institution that is second to none." The football pro adds: "I want to help assure them that their dollar is an investment not only in Pacific, but an investment in society . . . that their gift will play a big part in developing young men and women for productive roles in society."

Brown plans to continue playing pro ball and possibly later entering politics.

Soviet Mathematician Visits

A mathematician from the Soviet Union was recently at UOP as part of a six-month visit to American colleges and universities.

Nail H. Ibragimov is a professor of mathematics at the University of Novosibirsk and is a member of the Institute for Hydrodynamics of the

Soviet Academy of Sciences.

As an Academy of Sciences Exchange Scholar, Ibragimov visited Georgia Tech for three months and spent three months at UOP. At Pacific he worked closely with Dr. Robert A. Anderson, an associate professor of physics and assistant to the academic vice president who spent three weeks with the Soviet professor on a similar exchange program in 1975.

"Our mutual interests involve group theory and its applications to differential equations, geometry and hydrodynamics," said Anderson. UOP Physics Professor Carl Wulfman and his associate, Sukeyuki Kumei, also study in this field.

Ibragimov, who presented lectures in the mathematical physics field to UOP faculty and students, has also visited Harvard, UCLA and Johns Hopkins while on his American trip.

Deering Fund

Dozens of written expressions and memorial gifts, totaling nearly a thousand dollars, have come to the university from alumni, parents and other friends in memory of Ellen L. Deering, Registrar Emeritus, who died in March. Contributions can be made to the Ellen L. Deering Scholarship Fund by contacting the Development Office, Burns Tower, on the Stockton campus.
