John H Redfield

My dear Sir -

I send you another specimen of the  
Raillardia to which you refer as  
new, that is of the one which I think  
answers to your description - I can't  
recollect its exact locality - but it was  
found in the high Sierra above Yosemite  
somewhere. I showed it to Gray when  
he was here & he then called it  
R. scaposa. I will set out in a  
month or six weeks for another season's  
exploration in the Northern half of the  
range & though my pursuit will  
be chiefly Geology I will endeavor  
to do some little for you in plants

I am yrs Cordially  
John Muir
