The publisher comments:

China is engaged in a major evolutionary economic change. Foreign direct investment participation has been and will continue to be the driving force behind this change well into the next century. This book presents to Western business and legal communities a comprehensive picture of the prevailing Chinese foreign investment climate. More important, it provides keen insight into the ways China must move to improve its laws and policies.

THE FALL OF THE U.S. CONSUMER ELECTRONICS INDUSTRY: AN AMERICAN TRADE TRAGEDY.

The publisher comments:

This work traces the history and background of the once great American consumer electronics manufacturing industry, an industry that was plagued and finally destroyed by an American-Japanese cartel subverting enforcement of our traditional trade laws. The work is not a "Japan-bashing" diatribe, but a call for changes in Washington, and a return to free trade in our domestic and foreign commerce.

Philip J. Curtis was educated at Regis University and Georgetown University. He is a corporate and civil litigation lawyer with over forty years experience and has participated in many of the activities described in the text.
