The Syracuse Botanical Club,

Syracuse, N. Y., March 28th 1880

Mr Muir

Dear Sir

The package of plants
kindly sent by yourself-
arrived safely this morning
via New York. Why it went
that way around that way is a
mystery to me. We all thank
you for the attention, and shall
value the specimens as from
a friend. As individuals we
are striving to complete our
collections of ferns, of which only
the rare species are now in demand.
B. boreale, N. tenax, C. viscidula & monophylla.

Enc I enclose copy of a paper
read to us last spring by Mrs
Rust. it is just printed. You
will find some errors made
by printer. The specimens
sent by you will be a fine
addition to our club herbarium
and we shall be glad to send
you any thing which grows
here.

Believe me always

Respy yours

Francis J. Myers

Secy.
