It has been accepted for inclusion in College of the Pacific Faculty Presentations by an authorized administrator of Scholarly Commons. For more information, please contact mgibney@pacific.edu.

Antecedents and Consequences of Social and Emotional Evaluations

Antecedents and Consequences of Social and Emotional Evaluations

Social and emotional evaluations of self and others are influenced by various factors and have influences on cognition and behavior. Antecedents (e.g., politeness, group membership) and consequences (e.g., face processing, emotion recognition) of such evaluations are examined in diverse samples using various methodologies (e.g., behavioral experimental approaches, fMRI, eye tracking).
