329. O'Farrell St. San Francisco
June 4th 1887

Dear Minn-

685
Since our unsuccessful
attempt at meeting several weeks
ago I have been on the jump, from
North to South, 3 times to Shasta
now that the country is drying up,
I think of taking a rest, and
could come to you for a day any
time next week that would be most
convenient to you. (after 5th inst.)
I am greatly exercised over the
"Manganites" shall be obliged to do
some serious revision. even our
commonest species, are wrongly referred
in books and will have to be
renamed. - I conclude that we do

not have Archostephes pungens HBK
which comes originally from Mexico
and so our commonest species will
be A. Manganita Parry, and beside
this is another common foot hill
species which has been confounded
with A. glauca Link but is very
distinct and will be A. discida Parry!
What I now want particularly
to see (growing) is A. glauca. which
comes from the Mt Diablo region
& farther south -

I shall read a paper at Acad
in this subject some meeting this
month. By the way do you hear
anything of the fun they get up
ridiculing the new administration.
Some lively meetings occasionally
I met the other day your
friend Major Dane about to
sail for New Zealand & Australia

Are you getting rich on
ground? on the ranch. When
is that book coming out?
Mr P. Desires regards to
yourself & family & to Strangers &c!

Yours Truly
C.C. Parry
