Martinez May 11, 1848

My dear Prof Sargent, I have just returned from a four days trip of inspection of Magnifica around Truckee. Not a single coniferous bud is yet open thereabouts, so this year I was too early, as last year too late. I found that many of last years young leaves & cones were killed by frost & consequently this years crop of cones is likely to be small. Still we can hardly fail to get flowers somewhere. I took Sonne with me & have him vowed to watch Magnifica almost from day to day. I reported to Miss Eastwood & she will go to the summit of the Sierra in June unless she hears from Sonne that he has collected & forwarded the flowers. I have also engaged a man in Yosemite who is a collector of Comper seeds to send me the Magnifica flowers & I will be ready to go again myself in June if necessary.

I Thank you for the invitation to the glorious
 round headed Atlantic forests with Canby;
 Perhaps I should go to the glaciers of
 Yakutat Bay, Prince Williams Sound & Cooks
 Inlet. Any how I'll let you know
 after this magnific business is settled.
 Abbots letter is very interesting. Remember
 me to him when you write.

I have done all I could in writing to
 members of Congress on the Reservations &
 getting other friends to write, & getting resolutions
 of the Sierra Club forwarded by telegraph
 & post. But in the excitement & din
 of this Confounded war the silent trees stand
 a poor show for justice.

Your 11th vol of Silva arrived the other day & I at
 once turned to Muggins & Ponderosa to see your
 conclusions on these wildly varied species & your
 descriptions of them. ~~wonderful trees~~
 Both are well done though you should
 have sounded their praises for strength
 & beauty & indomitable unkillable beauty
 louder & longer.

Later I happened³ to notice the
dedication & it made my heart
jump with joy as no other honor
I have received ever did. The
Harvard A. M. & Wisconsin University
L. L. D. are as nothing to this. So
you will know how deep my
thanks are. You might have
dedicated this grand volume to anyone
of a hundred better botanists but to
none that loves a fine tree more than

Your humble friend & admirer
John Davis
