Chapters 89, 90, 93, 294 and 496 were enacted in an apparent attempt to handle the increasing amount of hazardous waste¹ being generated in California.² These chapters provide for better management of the disposal of hazardous waste by mandating specific guidelines for the operation of disposal facilities.³ Chapter 89 establishes a temporary Hazardous Waste Management Council⁴ to administer the procedures pertaining to the management of the wastes.⁵ Chapter 496 regulates the management of land around a hazardous waste site.⁶ Chapter 294 reflects the interest of the Legislature in decreasing the risk of spillage of hazardous substances during transportation.⁷ Chapter 90 mandates that operators of hazardous waste have the ability to financially cover damages resulting from the hazardous waste and provides procedures for site closure.⁸ Finally, Chapter 496 allows increased penalties for civil⁹ and criminal violations¹⁰ of hazardous waste laws,¹¹ and Chapter 93 provides rewards for information that materially reveals violations of the laws.¹²

Implementing Hazardous Waste Control Laws

In response to the need for improved hazardous waste management, Congress enacted the Resource Conservation and Recovery Act¹³ that approved state hazardous waste management programs.¹⁴ In compliance with federal requirements that mandate state hazardous waste programs be at least as strict as the federal scheme,¹⁵ Chapter 89 requires the State Department of Health Services [hereinafter referred to as the Department] to adopt regulations and standards equal to or more stringent than the federal requirements.¹⁶ In addition, Chapter 89 allows the Department to make trade secret information¹⁷ available to the Federal Environmental Protection Agency for the purposes of determining if certain waste is hazardous.¹⁸ Moreover, Chapter 89 creates a temporary Hazardous Waste Management Council to assist generators of hazardous waste in meeting the responsibilities for the safe disposal¹⁹ of the waste and to mandate procedures for running existing facilities and siting new ones.²⁰

Under prior law minimum standards were followed for the handling, processing and disposal of hazardous waste.²¹ Chapter 89 eliminates the minimum standards and mandates the department to adopt specific standards for handling and processing hazardous waste.²²

Recycling of Hazardous Waste

Existing law requires the recycling of any hazardous waste that can be recycled in an economically and technologically feasible manner and requires any producer to justify why waste cannot be recycled.²³ Under Chapter 89, if a producer states that waste cannot be recycled and the department still feels it is possible to recycle the waste, the department can require the waste to be recycled²⁴ at the site of production if feasible²⁵ or to be recycled through sale if there is a ready, will-

ing and able purchaser of the recyclable waste.²⁶

Transportation of Hazardous Waste

Existing law requires the State Department of Health to manage the transportation of hazardous waste.²⁷ The Department of California Highway Patrol, however, is required to inspect the vehicles and containers²⁸ used to transport the hazardous waste.²⁹ Then, the Department of Health Services must conduct required tests³⁰ before the transportation of hazardous waste occurs.³¹ Chapter 294 specifies that the Department must conduct tests to determine the chemical nature of the hazardous material before it is transferred from an abandoned site³² to a disposal site.³³ Additionally, Chapter 294 requires the hazardous waste hauler, in order to obtain a certificate of approval to transfer, to develop a safety plan and procedures for transporting the hazardous material³⁴ unless specified exceptions exist.³⁵ Furthermore, Chapter 89 requires the treatment of hazardous waste at the site if the Director of Health Services determines that treatment is necessary in order to provide safe transportation.³⁶

Hazardous Waste Facilities

Under existing law, the Department may adopt standards to regulate hazardous waste facilities after one public hearing³⁷ has been held and specified criteria³⁸ have been examined.³⁹ Chapter 89 expands the criteria to include types and volume of hazardous waste produced in the area and allows waste technology to be taken into consideration.⁴⁰

Existing law authorizes the State Department of Health Services to issue a hazardous waste facility permit.⁴¹ Chapter 90, however, prohib-

41. CAL. HEALTH & SAFETY CODE §25200.

its a permit from being issued unless the operator can establish that he or she possesses the financial capabilities to cover damages arising from operation of the facility.⁴² Furthermore, Chapter 90 provides that the primary responsibility for the closure and maintenance of hazardous waste sites is with the Department of Health Services and requires each operator to submit to the department a closure and maintenance report containing specified elements.⁴³ In order to protect water quality,⁴⁴ Chapter 90 mandates that each regional water control board review each report.⁴⁵

Existing law limits the use of land around hazardous waste properties.⁴⁶ Chapter 496 provides a procedure for determining if the use of land around a hazardous waste facility poses a potential hazard to present or future health and safety.⁴⁷

Penalties and Rewards

Existing law imposes civil and criminal penalties for violations of the hazardous waste control laws.⁴⁸ Chapter 496 increases the maximum allowable penalty from \$5,000 to \$25,000 for each civil violation.⁴⁹ Additionally, Chapter 496 imposes a mandatory penalty of a \$1,000 fine for intentional civil violations.⁵⁰ In addition, Chapter 496 increases the maximum fine from \$25,000 to \$50,000⁵¹ per day for criminal violations that include transporting, storing, or treating hazardous waste at a facility without a permit.⁵² Furthermore, Chapter 496 requires mandatory fines for specific subsequent criminal violations.⁵³ Moreover, Chapter 496 specifies that the hazardous waste control law does not preclude the Attorney General from commencing with any civil or criminal action.⁵⁴

Existing law requires civil penalties collected for violations of speci-

fied provisions⁵⁵ of the hazardous waste control law to be deposited in the Hazardous Waste Control Account in the General Fund.⁵⁶ Additionally, the State Department of Health Services is required to pay either (1) half of any penalty awarded to the city or county if the action is brought by either entity or (2) the actual costs of prosecuting the case in which the penalty is awarded, whichever is less.⁵⁷ Chapter 93 requires the Department of Health Services to additionally make payment to any person who provides information that materially contributes to the conviction of a person for violating certain provisions of the hazardous waste control law.⁵⁸ The award is to equal 10 percent of the amount of the fine collected, but is not to exceed \$5,000.⁵⁹ Public employees will not be eligible for the reward, however, unless the reporting of violations does not relate in any manner to their responsibilities as public officers or employees.⁶⁰

Conclusion

In summary, Chapter 89, 90, 93, 294 and 496 provide better management in the production, storage, transportation and disposal of hazardous wastes. Chapter 89 provides procedures for managing hazardous waste facilities by creating the Hazardous Waste Management Council.⁶¹ Chapter 496 increases the maximum penalties for civil and criminal violations of hazardous waste laws and imposes minimum penalties for specified violations.⁶² Moreover, Chapter 93 provides rewards for information leading to the imposition of a civil penalty or criminal conviction for violations of the hazardous waste control laws.⁶³ Chapter 294 imposes regulations to ensure safe transportation of hazardous waste.⁶⁴ Finally, Chapter 90 requires operators of disposal sites to be equipped with specified permits that require financial stability to cover costs of damages arising from running these facilities.⁶⁵

Environmental Protection; oil spill notification

Water Code §13272 (new).

AB 2281 (Lehman); STATS. 1982, Ch 1480

Support: Department of Conservation; Department of Finance;
Water Resources Control Board

In an apparent attempt to provide for rapid clean-up of oil spills,¹ Chapter 1480 requires that any person² who causes or permits a specified amount³ of oil⁴ or petroleum products⁵ to be discharged upon the waters of the state⁶ to immediately report the spill.⁷ The notification must be given to either the Office of Emergency Services,⁸ an appropriate federal agency,⁹ or a regional board¹⁰ as soon after the person becomes aware of the spill as possible.¹¹ Chapter 1480 allows *notification* to be postponed only if it would substantially impede clean up efforts or other emergency responses to the situation.¹² Chapter 1480 does not require notification when the discharge is in compliance with waste discharge requirements.¹³

Persons who fail to provide notice of the discharge are guilty of a misdemeanor and will be punished by either (1) a fine ranging between \$500 to \$5,000 for each day of failure to report the spill, (2) imprisonment for a period up to one year or (3) both fine and imprisonment.¹⁴ This penalty does not apply to anyone who has already been fined by

Environmental Protection; radiation—civil penalties

Health & Safety Code §25866 (new); §25863.1 (amended).

AB 1514 (Torres); STATS. 1982, Ch 96

Support: Department of Conservation; Department of Finance;
Department of Health Services

With the presence of potentially dangerous radioactive substances¹ becoming more common place² commentators have suggested that it is increasingly important that federal and state governments regulate the creation, use and disposal of these substances³ to effectively enforce the regulation of radioactive materials, without resorting to revoking the license of a company, the Nuclear Regulatory Commission (hereinafter Commission) has successfully relied on the use of civil penalties.⁴ Recently, the Commission has been encouraging state governments to also

use civil penalties.⁵ In response, Chapter 96 was enacted and provides for civil penalties to supplement the existing Radiation Control Law⁶ (hereinafter referred to as the RCL).⁷ Furthermore, in order to encourage a more thorough enforcement of the RCL, Chapter 96 allows local public prosecutors to institute civil actions⁸ against violators.⁹

In addition to criminal penalties,¹⁰ existing law provides for a variety of civil actions to enforce the RCL, including injunctions,¹¹ liens¹² and revocation of a license.¹³ Under Chapter 96, any person¹⁴ who intentionally, or with gross negligence, violates any provision of the RCL, or fails to comply with an injunction, and in so doing causes substantial danger to the public health, can be civilly liable for an amount of up to \$5,000 for each violation, or for each day of a continuing intentional violation.¹⁵

Prior to the enactment of Chapter 96 only the State Attorney General was authorized to institute civil actions to enforce the RCL.¹⁶ Chapter 96 states that in addition to the Attorney General, a city or district attorney of the area where the violation occurs may also bring an action.¹⁷ Chapter 96 further provides that if the action is brought by the city or district attorney, the penalty must be paid to the city or county where the action is brought.¹⁸ If the action is brought by the Attorney General, however, the penalty must be paid to the State General Fund.¹⁹ Finally, Chapter 96 specifically states that this civil penalty will not supersede any other civil or criminal penalty.²⁰
