Mar Park N.Y.

March 21.

Dear John Muir,

I am sure you will be glad to know that I have changed the Yosemite paper - cut out much of the matter that displeased you, & had some correspondence with Phillips of the U.S. Geological Survey & got his views & the views of others, on the geological history of the great valley, & changed my article accordingly. My paper on the Grand Canyon may

04741

appear in July Century.  
I should not stand  
all the geology we'd cut  
much of it out. I am to  
have a paper in the way  
Atlantic called "Through  
the eyes of the Geologists"  
If you should chance to  
see it - I should be glad  
of any criticism you  
might make, I will not  
sneak sit-down upon  
you when so kind.

I am hoping you will  
come East this spring or  
summer & will stop a  
while with me at Slabside.  
We will make excursions  
to the Catskills & to the  
Shawangunk & study the  
Silurian & Devonian rocks.

May be the Review will come, I have  
written three. If you come we will go  
& all the transactions of their business  
The Review too, would be delighted to  
see you, or will undertake of others. We  
will go or we present - too, or get - in  
my home. I have a glimpse of the Review  
yesterday, she was looking fine, did she  
write you that she is to have a paper on  
the New York in the Century? more  
about you than about me, I hope.  
You are well & that I shall see you. This  
I remain,  
affectionately  
John Burroughs

West Park, N.Y.  
Mch. 31, [1910?].

Dear John Muir:

I am sure you will be glad to know that I have changed the Yosemite paper -- cut out much of the matter that displeased you. I had some correspondence with Willis of the U.S. Geological Survey and got his views and the views of others on the geological history of the great Valley, and changed my article accordingly. My paper on the Grand Canyon may appear in July Century. Johnson could not stand all the geology, so I cut much of it out. I am to have a paper in the May Atlantic called "Through the Eyes of the Geologist". If you should chance to see it I should be glad of any criticism you might make. I will not squeal, sit down upon me never so hard.

I am hoping you will come East this spring or summer and will stop a while with me at Slabsides. We will make excursions to the Catskills and to the Shawangunk and study the Silurian and Devonian rocks. Maybe the Browns will come. I have written him. If you come we will go and see the Harrimans at their new place. The Osborns, too, would be delighted to see you, as will hundreds of others. We will go and see Roosevelt, too, or get him up here.

I had a glimpse of Dr. Barrus yesterday. She was looking fine. Did she write you that she is to have a paper on us two Johnnys in the Century? --more about you than about me.. I hope you are well and that I shall see you this season.

Affectionately,

John Burroughs
